At the annual meeting of the Montreal Clearing House, the chairman, B. H. Waud, stated that during the year there were only two changes in the membership, the Bank of British North America retiring and the Bank of Hamilton being admitted. Speaking of the growth of clearings now that the country is gradually returning to a peace basis, he said that the course of clearings during the next few years will be interesting to follow. Clearings for the year amounted to $4,833,924,288, which is an increase of $645,669,078, or 15.41 per cent. over 1917, and over double the amount they were in 1911, which was the previous high record to that date.

The following officers were elected for the coming year H. B. Henwood, manager of the Bank of Toronto, chairman; J. D. G. Kippen, manager of the Merchants Bank, vice-chairman; C. W. Dean, manager of the Bank of Montreal; H. B. Walker, manager of the Canadian Bank of Commerce; M S. Bogert, manager of the Dominion Bank; T. C. Leduc, manager of the Banque d'Hochelaga; and B. H. Waud, manager of the Molsons Bank.

The Oxford Securities Corporation Ltd., Toronto, who have several branches in the Province of Ontario, are moving into much larger quarters in the Royal Bank Building, on the 1st of February. They are also opening an office in Montreal, and have appointed Mr. S. G. Faulkner, general manager.

VALUATION OF INSURANCE COMPANIES' SECURITIES

The January meeting of the Insurance Institute of Toronto, held on Friday evening, January 16th, was addressed by Mr. D. E. Kilgour, actuary of the North American Life Assurance Company, Toronto. Mr. Kilgour, who was to address the institute in February, but consented to do so in January owing to the inability of the scheduled speaker to be present, spoke on methods of valuating securities.

He compared the relative advantages of market value, amortization value and average market value. The first, he said, is objected to owing to the frequent fluctuations in value or rather in price. It affects fire companies more than life companies because the former are subject to greater disturbances and frequently are required to liquidate at a moment's notice. In both cases, however, changes in market value affect the surplus, and in the case of life companies, it also affects the scale of profits to a policyholder. This method may discriminate among various classes of securities, because some, such as bonds and debentures, may vary to a greater extent than mortgages which have not such a responsive market. Periodically, and at crises, the Insurance Department is obliged to fix a purely artificial standard for bonds and debentures.

Regarding amortization, he pointed out that it avoided many of the evils attending the market value method. On the other hand, he said, conditions may arise which make it extremely probable that the principal will be paid in full at maturity. The public estimate as to the possibility of the payments of principal and interest being made in full is reflected in the market value, but is not taken into consideration in the amortization value. For this and other reasons the latter has not received the sanction or the Dominion Insurance Department.

In the averaging method the valuation is based on an average of market values over a period of time such as one year or five years. This method avoids to some extent some of the features of the first mentioned. He also mentioned a method which had recently been proposed by Mr. Johnson, of the Prudential of Newark, of taking the market value at a fixed period and amortizing from that date.

The speaker concluded by expressing the opinion that different methods should be adopted according to the purpose for which they were made. He did not wish to be regarded as prejudiced on such a controversial subject, but on the whole, he favored a market value averaged over a period of, say, three years. In the subsequent discussion which took place, Mr. L. K. File, of the Canada Life, asked for views as to a valuation arrived at by deducting a fixed amount, say, 2 per cent., from the earnings of each company. Thus a company earning 5½ per cent., would be required to value its securities on a 3½ per cent. basis. Mr. Kilgour submitted that this was too flexible, and the general opinion was that such a method would be injurious in diverting investments into high yielding securities.

UNION BANK
OF CANADA

54th Annual Statement—30th November, 1918

The Fifty-fourth Annual Meeting of the Shareholders of the Union Bank of Canada was held at the Head Office of the Bank, in the City of Winnipeg, at twelve noon, on Wednesday, the 8th instant.

The President, MR. JOHN GALT, in the chair.

DIRECTORS' REPORT.

The Directors have pleasure in presenting their report showing the result of the business of the Bank for the year ending November 30th, 1918.

During the year, owing to the depletion of the staff caused by enlistment for military service, the following offices were closed: Coatsworth, Eastons Corners and Toledo in the Province of Ontario; Adanac, Guernsey, Jansen, Major, Netherhill and Salvador in the Province of Saskatchewan; of which all except Adanac have since been reopened.

The number of Branches and Agencies in operation on November 30th, 1918, was 299.

The usual inspection of all Branches and Agencies has been made.

Mr. S. E. Elkin, M.P., of St. John, N.B., has been elected to fill a vacancy on the Board of Directors.

JOHN GALT, President.

JOHN GALT, President. H. B. SHAW, General Manager.

Report of the Auditors to the Shareholders of the Union Bank of Canada.

In accordance with the provisions of subsections 19 and 20 of Section 56 of the Bank Act, we report to the Shareholders as follows:—

We have audited the above Balance Sheet with the books and vouchers at Head Office and with the certified returns from the branches.

We have obtained all the information and explanations that we have required, and are of the opinion that the transactions of the Bank which have come under our notice have been within the powers of the Bank.

In addition to our verification at the 30th November, we have, during the year, checked the cash and verified the securities representing the investments of the Bank at its chief office and principal branches and found them to be in agreement with the entries in the books of the Bank relating thereto.

In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the affairs of the Bank, according to the best of our information, and the explanations given to us, and as shown by the books of the Bank.

General Manager.

FREDERIC P. WYTHE,
Assistant Manager.

A. J. WALKER, C.A., AND R. WILLIAMSON, C.A.
Auditors.

REPORT OF DIRECTORS

To the Shareholders:—

Your Directors beg to present the Twenty-first Annual Report covering the year ending December 31st, 1918, together with the usual Cash Statement and Balance Sheet of Assets and Liabilities, duly certified by the Auditors and passed for publication by the Superintendent for Ontario. You will be particularly pleased to learn therefrom that the operations of the Company were very successful, and that the net earnings were without exception, the largest in the history of the Company.

The Premium Income, Interest Receipts, Building Rentals, Commission on Re-Insurance, Re-Insurance on Fire Claims and Endorsement Fees were respectively, $370,185.78; $19,265.95; $4,350.00; $1,329.77; $6,078.27 and $225.85.

The Net Profit on the year's operations was $95,171.09. A Dividend of ten per cent. (10%) on the paid-in Capital Stock was declared therefrom, and the Balance carried to Profit and Loss Account.

The Amount at Risk now stands at $56,701,263.00. The number of Policies in force is 49,647; an increase of 5,461. The average risk per policy is $1,162.23. The Expense Ratio for 1918 was 33.94%, which is inclusive of all Government Taxes. The Fire Loss Ratio was 39.29%, and the Profit, 26.77% of the Net Premium Income.

The Fund deposited with the Ontario Insurance Department is $111,500.00, and is the largest Government Deposit made by any Canadian Fire Insurance Company. Furthermore, it is greatly in excess of Statutory requirements.

When your Directors reported upon the results for 1917, they ventured to predict that the splendid organization possessed by the Company would produce even greater results during 1918, and I am now happy to say that the hopes then expressed have been abundantly realized. The amount of business written shows a splendid increase, and at the same time was kept up to the high standard set in the past. The Fire Losses and Expenses of Management, despite the heavy general increase experienced throughout Canada, were practically the same as for the preceding year. The affairs of the Company are in a sound, healthy and a very satisfactory condition, and the shareholders are to be congratulated upon the efficiency of the mangement. The Books, Vouchers and Securities of the Company are continuously and efficiently audited and examined and there is not a doubtful Asset or account of any kind that is carried on the Books.

All of which is respectfully submitted.

RALPH E. GIBSON, *President.*

MINIMUM PRICES STAND IN MONTREAL

Following a meeting of the members of Montreal Stock Exchange on January 14th, it was announced that the minimum prices in force on the stock exchange at the present time would stand until peace is signed. This decision was arrived at after the voicing of considerable opposition on the part of some members. The first vote was on an amendment to the proposal that all minimums be removed, proposing that the minimum price only on stocks now selling above the minimum be removed. After this was defeated, voting on the second amendment—namely, that minimums should be removed, but only after peace had been signed, carried it by an overwhelming majority. Among the reasons for the holding of the minimum price was the fact that it was not operating to any extent to the detriment of trading, and that although call money was becoming freer, the banks were still restricting unnecessary borrowing.

MUNICIPAL BOND NEWS

Messrs. A. E. Ames and Co., of Toronto, have purchased $16,500 bonds of the township of Sandwich. They are 6 per cent. debentures, payable in 20 instalments.

Messrs. Kerr, Fleming and Co., of Toronto, have purchased a block of bonds of $13,500 of the township of Whitby Their tender was for $13,677. Six other bond houses also bid. The debentures bear 6 per cent., and are payable in 20 instalments.

The town of Collingwood has sold to Messrs. C. H. Burgess and Co., of Toronto, an issue of $13,000 10-year 6 per cent. bonds, and an issue of $8,400 6 per cent. 10-instalment bonds.

The township of York is calling for tenders on three by-laws amounting to $75,515. They ar to bear $6\frac{1}{2}$ per cent., payable in 10 instalments.

The town of Hanover is sending out a notice asking for tenders for $18,000 for hydro-electric debentures.

The Royal Bank has opened a branch at Mount Stewart, Prince Edward Island.

Mr. F. G. Morley, secretary of the Toronto Board of Trade and secretary-treasurer of the Ontario Associated Board of Trade, is calling a general conference of the various bodies at Toronto on March 27th and 28th. Owing to the war there has not been a general conference since 1916.

THE ROYAL BANK OF CANADA

Fiftieth Annual Meeting

SIR HERBERT HOLT, PRESIDENT, PAYS GRACEFUL TRIBUTE TO VALOUR OF CANADIAN SOLDIERS

Edson L. Pease, Vice-President and Managing Director, Deals With the Policy of the Bank in Foreign Fields and Announces Important Extensions

C. E. Neill, General Manager, Refers to Features of Growth and Expansion of Past Year

The Fiftieth Annual General Meeting of the Shareholders of the Royal Bank of Canada held at the Head Office was marked by interesting references to the principal problems with which Canada is confronted at the present time.

As one of the most important undertakings is to secure to the Dominion a larger amount of the foreign trade of the world, special references were made to the policy of the Royal Bank in foreign fields and the co-operation the Bank is prepared to give in order to help bring a larger volume of foreign trade in this country.

The General Manager, Mr. C. E. Neill, in submitting the Annual Statement, said:—

The statement before you to-day is the best that has been submitted to the shareholders of this bank.

Total assets are $427,512,982.91 as against $335,574,186.52 last year. A portion of the increase—$27,819,291.82—arises from the purchase of the Northern Crown Bank.

Total deposits are $332,591,717.92, the growth for the year being approximately $80,000,000. The relatively large increase in free deposits as compared with interest bearing deposits is due to the transfer of funds to the Dominion Government during the month of November on account of payments on the last Victory Loan. There were heavy withdrawals from the Savings Department in connection with previous Victory Loan issues, but the decrease in interest bearing deposits was temporary, and it may be expected that the withdrawals in connection with the present loan will be made up in due course.

It is interesting to note that subscriptions to the last Victory Loan made through this bank aggregated $104,507,400 of which amount $14,774,564 was due to conversions, the number of our subscribers was no less than 127,085.

The expansion in our circulation continues, the increase for the year being over $11,000,000. The excess is covered by the deposit in the Central Gold Reserve—$26,000,000.

Current loans show a substantial expansion, indicating that we are doing our share in taking care of the commercial requirements of the country.

The liquid position of the bank is more favorable than it was last year, the percentage of liquid assets to liabilities to the public having increased from 53.9% to 56.59%.

From the standpoint of cash reserves we are also stronger, the percentage of cash to liabilities to the public being 17.13% as against 16.36% the previous year.

Our additional investments are chiefly in securities of the Imperial Government and Canadian Government issued for war purposes.

The substantial growth in the bank's assets has resulted in a pronounced increase in earnings. Net profits for the year were $2,809,846.24 being 10.19% on the combined capital and reserve as compared with $2,327,979.51, 8.82% on capital and reserve the previous year. The marked growth in the bank's general business is due to the activities in all branches of trade and increased value of agricultural production.

We must now grapple with the problems of a period of deflation and reconstruction, and we do so with the strong conviction that no serious difficulty will be encountered in surmounting them.

PRESIDENT'S ADDRESS.

In moving the adoption of the Directors' Report, Sir Herbert S. Holt, President, said:—

I am sure I am giving expression to the thoughts of all present in saying that uppermost in our minds at this time are feelings of relief and thankfulness for the end of the terrible war with which the world has been afflicted for four and a quarter years—an ending of triumphant success to the Allies, without which any relief or thankfulness would be inconceivable. With the relatives of those who have given their lives in our cause, we deeply sympathize. The valor and achievements of Canada's soldiers on the battlefield fill us with pride, and gratitude for their heroic service should be shown in tangible form. The country is their debtor. Satisfactory employment should be found for every returning soldier who is fit to work, and relief extended to the maimed and crippled. In this Bank, unless there is some good reason to the contrary, every officer who enlisted and who applies for reinstatement within a reasonable time after his return will be re-engaged on the salary to which he would have been entitled had he continued in the service, subject to reasonable adjustments, where necessary.

The sudden collapse of Germany and her allies has brought us face to face with the grave economic problems which had been foreseen. Not only must several hundred thousand fighting men be re-absorbed into civil life, but an industrial army must be transferred from the manufacture of war materials to other lines of production. Moreover, before the war financing is completed, it is estimated that our national debt will exceed $1,800,000,000, and in addition we must provide for an annual pension load of approximately $30,000,000.

Such an outlook would have been viewed four years ago with widespread pessimism. To-day it is met with confidence, well founded upon abundant natural resources, demonstration of ability to adapt ourselves to unusual conditions, and wonders performed during the times of war through organization and skilful leadership. In spite of the drain on our man power, industrial efficiency is higher than in 1914, and capacity for production has increased; while many enterprises which were then feeling the stress of hard times are now firmly established. Our exports since 1914 have enabled us to regain the balance of trade which for many years previous had been against us. Our general prosperity is evidenced by the striking increase in bank deposits, and by the success of the Victory Loans, particularly the most recent. In that case the subscription per capita was greater than for any other loan made by the warring nations with the exception of the third British issue.

ADVISES POLICY OF THRIFT.

As all our trade enterprises both at home and abroad must be financed by Canadian capital, their success will be measured by the extent of our national capacity for self-denial. To encourage the habit of thrift among all classes, the Government has inaugurated a War Savings Stamp campaign similar to that which proved so popular in Great Britain and the United States. It is unnecessary to enlarge on the value of individual and national thrift. In England the War Savings Committee have recently announced that the organization built up by it throughout the country will be continued as a permanent part of the national machinery. The development of the habit of saving in England has met with marked results, the number of holders of Government securities increasing from 345,000 at the beginning of the war to over 17,000,000 to-day. The success of the movement in England would seem to justify its permanent retention in this country.

CAPITAL MUST NOT BE HAMPERED.

The Business Profits War Tax Act ceased to apply on the 31st day of December, 1918, except in the case of any company or person who had failed to make returns. The Minister of Finance has wisely made the provisions of this Act practically co-terminous with the period of earning of large profits incidental to special business during the war If labor is to be given its full opportunity, the capital which finds employment for it must not be hampered.

Since the signing of the armistice a marked tendency has been evident on the part of those in authority in England and the United States to extend the system of paternalism, which was only approved as a war measure. Organizations which have attained maximum efficiency through individual enterprise and experience will now likely pass under the control of inexperienced political executives and unenterprising officials. At this time, when the need for national economy was never greater, it seems imperative that administration should be left in the hands of the most capable, with Governmental assistance whenever it can be usefully extended, and Governmental regulation wherever public interest demands.

THE VICE-PRESIDENT.

In seconding the motion for the adoption of the Directors' Report, Mr. E. L. Pease, Vice-President and Managing Director, said:—

The President in his address has referred at length to the salient features of the post-war position, and the General Manager has reviewed the course of the Bank's business during the past year. I shall refer more particularly to the extension of the bank's operations in foreign fields and our policy in that direction.

In June last we established a branch in Barcelona, Spain, in order to participate in the large trade between that country and her former colonies, where we have many branches, and I am pleased to say the results have greatly exceeded our expectations.

We are now preparing to open in Paris, France, in order to secure a share of the commerce which is expected to develop with Canada in the rehabilitation of northern France and Belgium.

In consideration of the Commission sent to Siberia by the Dominion Government and the developments to follow, officers have been sent to Vladivostock, Siberia, to open a branch there. This action was taken with the commendation of the Government. The Commission, which comprises representatives of agricultural, mining, transportation and financial interests, was sent to aid in supplying the pressing needs of Russia, and assist in stabilizing conditions there. The organization of a Siberian Supply Commission will follow, and through it goods will be purchased in Canada for shipment to Russia. Siberia needs many commodities which Canada can supply, such as agricultural implements, shoes and clothing.

If Canadian industries are to flourish and increase in the face of the world's competition, our manufacturing processes must be improved, all waste eliminated, by-products utilized, and research encouraged. In the new order of things there is no room for antiquated or unscientific methods. A step in the right direction is the formation of groups of Trade Guilds with the object of applying scientific knowledge to the problems of various industries. These guilds follow the plan developed with such rapidity and success in the United States and in Great Britain where more than thirty are now in operation. The determining factor in our success will be progress in scientific research, through which a new impetus will be afforded to industrial activity.

EXTENSION OF EXPORT TRADE NECESSARY.

The extension of Canada's export trade is vital to her commercial self-preservation and future economic welfare. Only by creating a large favorable balance of trade can we hope to meet the interest of our foreign debt. A great opportunity lies in the speedy development of all the possibilities of our live stock industry, which during the past five years has experienced a phenomenal growth. It is capable of far greater expansion, and as the world's production of animal food stuffs will not be equal to the demand for many years to come, high prices and good markets are assured. A special trade and commerce committee has been sent to London with a view to securing special business from the Allies during the period of reconstruction, which would mean genuine prosperity for several years, but beyond this we need to promote permanent trade relations with South America, the Orient and other portions of the Empire. Other countries are making great preparations to exploit these fields, and there is no reason why Canada should not play an important part in the competition. Our manufacturers demonstrated their technical skill and efficiency in producing munitions and other commodities during the war at a lower cost than the United States. We possess an important advantage in our cheap lumber and paper. The vigorous ship-building policy of the Government will provide in the course of the next eighteen months forty-five vessels of a total dead weight tonnage of 246,000, and thus afford direct communication with foreign countries. Of our large imports of tropical products from the West Indies and South America, only about one-fifth reaches us directly. Four-fifths are discharged at United States ports for trans-shipment to Canada, and the steamers which bring them are laden on the return voyage with American goods.

CANADIAN BANKS CAN HELP.

The Canadian banks can effectively aid our export trade by establishing branches in foreign countries and supplying information to the Canadian exporter to enable him to judge of trading possibilities, such information to include statistics relative to the demand for our manufactured and raw products, methods of transacting business, rules and regulations to which business interests must conform, and the standing and credit of business houses. British banks exist in almost every foreign country, and have proved a powerful factor in the development of Great Britain's world wide trade. Lloyd's Bank recently purchased the assets of the London and River Plate Bank, the largest bank in South America. Germany's trade was promoted by her banks, and American banks are rapidly establishing foreign branches.

Are we going to accept the crumbs of foreign trade without serious competition on our part? It does not follow that Canadian deposits would be diverted to foreign fields—the experience of this Bank has proved the contrary. Our foreign deposits have always exceeded our foreign commercial loans, as the Government returns show. The present excess is over $15,000,000. We have now had twenty years' experience of banking in Cuba, the West Indies and Central America. During this period our losses have been infinitesimal—much under the percentage incurred in Canada, because the business represents chiefly the movement of staples, accommodation paper being inconsiderable. That Canada's trade is benefited by these branches is shown by the numerous business enquiries received. At the same time it cannot be said that we have neglected home interests. The number of our branches in Canada exceeds that of any other bank. With a view to the extension of Canada's foreign trade and encouraged by our past success in this field of banking, for which we are well equipped, we have decided after long consideration and carefully studying the situation, to open three branches in South America, at Rio de Janeiro, Brazil; Montevideo, Uruguay; and Buenos Aires, Argentine. Members of the staff for these branches have already been selected, and are about to leave for South America.

I cannot close without some reference to the achievements of the men who have so splendidly represented our country abroad. They have made the name of Canada great in war—it is for us to keep it great in peace. With thrift, co-operation, organization and wise leadership, we may hope to build up a nation strong in its own strength and a worthy partner in the Empire.

MERCHANTS FIRE HAD SUCCESSFUL YEAR

The figures to be presented at the annual meeting of the Merchants Fire Insurance Company next month, illustrate a healthy and conservative growth. The amount at risk now stands at $56,701,263, as compared with $49,670,297 last year. The following comparative figures illustrate its position at the end of 1918, as compared with the previous year:—

	1917.	1918.
Number of policies in force	44,186	49,647
Average risk per policy	$ 1,124	$ 1,162
Expense ratio (including government tax)	33.93%	33.94%
Fire loss ratio	39.01%	39.29%
Profit	27.04%	26.77%
Fund deposited with Ontario government	$106,500	$111,500
Cash premiums	281,989	335,338
Interest on investments	14,409	18,353
Agency commissions	64,116	75,551
Salaries, directors' and auditor's fees	16,171	20,435
Total management expenses	103,258	124,672
Fire claims	129,605	146,650

Seventy-three per cent. of the company's business is on residential property and it has, therefore, to some extent, avoided the heavy losses which have been incurred on industrial properties during the past year. Its agency organization touches 700 different points in Ontario, at some of which it has several agencies. It has frequently cancelled all its policies at certain points where fire losses were unusually severe.

The company's investments are shown in detail elsewhere in this issue. Government and municipal bonds constitute the largest single item and the list is carefully selected.

RIGHT TO ISSUE BONDS AND STOCKS

The order-in-council prohibiting the issue in Canada of bonds, debentures and other securities and shares of stock, without the consent of the Minister of Finance, has been wholly repealed and issues may now be made without wartime restriction.

The composite plot reproduced in *The Monetary Times Annual*, page 44, was prepared by Babson's Statistical Organization, Wellesley Hills, Mass.

Proceedings are now being taken in the Exchequer Court to definitely declare the Hamilton Radial Company insolvent. This marked the latest stage in the battle between Burlington, Hamilton and other interested municipalities, against the company, over the cessation of electric service between Hamilton, Burlington and Oakville.

CANADA'S WAR SAVINGS STAMPS

Explanation of Plans for Promoting Thrift in Canada—Description of Stamps

The Canadian War Savings plan is an effort on the part of the Dominion government to provide a means for collecting the surplus money of all classes of the population and placing it at the service of the country. It aims at making all persons, no matter how small may be their earning power, direct shareholders and profit-sharers in the financial operations of Canada. By this method it is hoped that $50,000,000 may be gathered in between now and the end of 1919.

This it is proposed to do through the sale of War Savings Stamps, which may be bought during the month of January for $4.00, and for which the government promises to pay $5.00 in January, 1924. The rate of interest is thus a little over 4½ per cent. compounded half-yearly. The sale, which has recently opened, will continue throughout 1919, one cent being added to the price of the stamps, for each month in the year. The price in February is $4.01, March $4.02, April $4.03, and so on, the December price being $4.11. The price is thus increased monthly, because, during all this time, the stamps are bearing interest. Stamps may be purchased at any bank, money order post office, and at the principal railway ticket offices. Fully 9,200 offices are now selling them.

War Savings Certificates

With each War Savings Stamp goes a War Savings Certificate, on the back in which are 10 spaces on which the stamps are to be affixed as they are purchased. It is expected that when stamps are purchased they will be registered by the purchaser. There are spaces also for the name and address of the owner, and another space for registration particulars. By folding, the certificate is reduced to a 4 by 9 inches size, and forms a very convenient shape for the carrying of stamps.

In January, 1924, $5.00 will be paid for the stamps at the finance department, Ottawa; or at any money order post office, after 10 days' notice has been given. If lost, the name and address affords a ready means for identification and recovery. If the owner of War Savings Stamps desires to get his money before 1924 he may do so by applying to a money order post office.

Thrift Stamps for Small Sums

As a means of enabling persons who cannot pay $4.00 down, to buy War Savings Stamps, Thrift Stamps and Thrift Cards are provided. Thrift Stamps are sold at 25 cents each, and, with the first of these, goes a Thrift Card, containing 16 spaces on which the stamps are to be affixed when purchased. When all spaces on the card are filled, it is exchanged for a War Savings Stamp. The possessor then buys another Thrift Stamp, gets a Thrift Card and thus begins saving again to buy another War Savings Stamp.

It is evident that if from now on Canadians are not a saving people it will not be through lack of opportunity, or inducement, to save. Under the War Savings Plan there is hardly a person earning money in Canada who cannot buy War Savings Stamps. If a person only puts by 25 cents a week, then, within a year, he will have become the possessor of three stamps, and will have gone one-fourth of the way towards getting a fourth. He will also have put his money into the soundest investment in Canada and one that pays well.

Issue of Fifty Million

The success of this and similar methods to promote saving in the United States and other countries has given rise to the hope that the present issue of $50,000,000 worth of War Savings Stamps may be disposed of within the coming year. In the neighboring Republic, through a vigorous campaign, over $1,000,000,000 worth of War Savings Certificates have already been sold, the number of war savers being now over 45,000,000. In Ohio alone $100,000,000 worth of War Savings Certificates have been sold to 5,200,000 people.

The public is fairly familiar with the reasons that have given rise to the introduction of War Savings Stamps. The war has brought burdens that call for the exercise of rigid economy, in order that the financial resources of the country may be carefully husbanded. During the war period many important and expensive public undertakings, some of which were under way and others on the eve of being launched, had to be suspended. These will now have to be undertaken, and an attempt made to catch up with the development that has been so long delayed. Then there is the work of reconstruction generally which will make exceedingly heavy demands on the country.

Source of the Money

The question is—where is all this money to come from? Before the war one would have replied—it will be borrowed abroad. But this door is, for the present, closed tightly against Canada, and, for ordinary purposes, will remain closed for some time. Henceforth Canada must bear her own financial burdens. She must obtain from her own people for the money necessary for her own development. Fortunately, the two Victory Loans issued within the last year have demonstrated that Canadians are both able and willing to provide the necessary capital.

The second Victory Loan was taken up by 1,068,000 persons, which shows that there is a very large field for the sale of War Savings Stamps. It is hoped that the number of war savers may reach 4,000,000, nor, considering what has been done in the United States, is this hope unwarranted. It may also be pointed out that the War Savings Stamps provide a means of investment for those who have felt that they could not very well afford to buy a Victory Bond.

Savings Greatly Needed

From present indications Canada, within the next decade, will require every dollar that her people can save. In the work of development the United States is sure to set a pace so fast that this country may find it difficult to equal, but to lag behind in the race will not do. It is realized that much of the money subscribed to the Victory Loans came from the savings of years, which will not be available for other issues. But the need of money will continue, which means that it must be met through continued saving. Nothing should be wasted, and least of all money. The War Savings Plan has been launched to make saving easy.

The second Victory Loan campaign demonstrated what Canada can do in the raising of money for national purposes, and with this splendid achievement in mind, this new campaign has been undertaken in order that the surplus money of Canadians may be mobilized for new work that lies ahead.

The literature issued in connection with the War Savings and Thrift Stamps campaign indicates that Canada is a land of many nationalities. Already pamphlets have been printed in English, French, Italian, Swedish, Norwegian, Icelandic Ruthenian, Polish and Yiddish.

SUN LIFE MAKES NEW HIGH RECORD

Preliminary figures issued from the head office of the Sun Life Assurance Company of Canada, show new high records in the amount of new business written by the company as a whole, and by the Montreal agency.

New business written by the company as a whole for the year ended December 23rd, the date on which the books are closed to new business, amounted to $57,806,966, an increase of $2,642,498 over 1917, and of close to $10,000,000 over 1916. This is believed to establish a new high record in life insurance written by a Canadian company.

The Montreal city agency of the company, under the management of J. C. Stanton, Jr., again contributed substantially to the good showing, reporting a new high record of $4,642,151, an increase of $145,901 over 1917, and of $504,241 over 1916.

Branches of the Bank of Nova Scotia have been opened at Emerald, P.E.I., Kingston, Ont., and St. Peters, P.E.I. The bank has also reopened the branch formerly operated at Jasper, Ont.

Reports showing a prosperous year's business were presented on January 3rd at the annual meeting of the lumbermen's section of the Toronto Board of Trade, when the following officers were elected: Chairman, A. C. Manbert; vice-chairman, W. J. Lovering; secretary-treasurer, Horace Boultbee; executive, A. E. Clark, A. K. Johnson, W. F. Oliver, H. J. Terry and Hugh A. Rose.

$40,000,000 OF TIMBER FOR BRITAIN

The 1,000,000 square feet of timber which the British timber controller will buy in Canada, is to be of all grades, and will be bought through British brokerage houses and Canadian timber agents in London, who will deal direct with the Canadian lumber producers.

It is understood that every Canadian producer who is registered on the lists of the trade board at Ottawa will be given an equal opportunity to sell. There is also to be an allocation of purchases upon a territorial basis thus ensuring a fair proportion of purchases to Western Canada. All the British Columbia lumbermen are represented in London by L. C. Beale, timber commissioner for the province, who is attached to the staff of F. C. Wade, K.C., agent-general for the province in Great Britain, and he will deal directly with the timber controller. This lumber is to be bought within the next 12 months. It will represent a total transaction in money value of about $40,000,000.

CANADA'S MINERAL OUTPUT FOR 1918

The Department of Mines estimates the production of coal during 1918 at about 15,180,000 short tons, as compared with a production of 14,046,759 short tons during 1917.

The production of the more important metals during 1918 is estimated as follows: Gold, $14,750,000 in value; silver, 20,800,000 ounces; copper, 117,000,000 pounds; nickel, 91,500,000 pounds; zinc, 36,000,000 pounds; pig-iron, 1,182,000 short tons; steel ingots and castings, 1,010,000 short tons.

The production of these metals in 1917 was: Gold, $15,272,992 in value; silver, 22,221,276 ounces; copper, 109,227,332 pounds; nickel, 82,330,280 pounds; zinc, 29,668,764 pounds; lead, 32,576,281 pounds; pig-iron, 1,170,480 short tons; steel ingots and castings, 1,745,734 short tons.

The total value of the mineral production in Canada during 1918 was probably not less than $220,000,000. The total value of the production in 1917 was $189,646,821.

UKRAINIANS AND AGRICULTURAL PROBLEMS

Ukrainian delegates from all parts of Canada gathered at their third educational convention in Saskatoon on December 26th. Prominent leaders of the race addressed the meeting and Prof. W. W. Swanson, of the University of Saskatchewan, spoke on "Economic and Social Conditions of Agriculture after the War." He emphasized very strongly the importance of raising the material standards of living, to make cultural and social progress possible. He spoke at some length of the standard of living being very low in the countries from which Ukrainians had emigrated, and compared it with the much higher standard in Canada.

Professor Swanson declared that the farmers are not profiteers. The high prices paid for wheat and other farm products during the past few years had been offset in large part by the rise in general prices. Because farmers had been selling their products too cheaply in the past, there were many ready to cry "profiteers," while, as a matter of fact, there were many farmers who, by reason of poor yields, hail, frost, etc., are no better off now than they were before the era of higher prices. Prices are bound to fall and farmers must see to it that in the readjustment period which will follow, what they produce will give them the necessaries, some of the comforts, and even a few of the luxuries of life, otherwise the standard of cultural advancement cannot be continued.

The electors of Niagara Falls have decided to purchase the street railway. A by-law to spend $38,000 to buy the Lundy property of 24 acres, for park purposes, was defeated. The railway franchise expires in March, 1920.

WANT MONTREAL TO TAKE OVER RAILWAY

Municipalization of the incline railway service up the mountainside, Park avenue, Montreal, was something which the Trades and Labor Council at its meeting instructed its executive to urge upon the city of Montreal authorities. President J. T. Foster informed the Council that the Mount Royal Incline Company, which had operated this service, one of Montreal's sightseeing specialties, had gone into liquidation. The Trades Council had always been in favor of having this service owned and operated by the municipality, pointed out Mr. Foster, and now seemed a very opportune time to have the city take the necessary steps.

CANADA'S PENSION SCALE LIBERAL

A meeting of the Open Forum of Toronto, held on the afternoon of January 5th, was addressed by Major Hume Cronyn, M.P. Mr. Cronyn is not a member of the Pensions Board, but was a member of the parliamentary commission on pensions.

The speaker said that he had discovered that there was an appalling ignorance on the question of pensions, and he welcomed the open discussion of the subject, as it was an integral part of the problem of reconstruction. The task that confronted the country to-day was the task of repairing the rent in the social fabric caused by the war. That task called for the skilful sympathy and co-operation of every man and woman in the country, especially the women.

Major Cronyn, reviewing the brief history of pensions in Canada, said that there were no pensioners in Canada until the present war. Pensions had been governed under the War Measures Act by orders in council, and the law had been changed from time to time since the war began. Pensions had been increased three times in the last four years, and he believed that parliament would pass a law at its next session that would place pensions on a broad and sound foundation. Such a law should be the will of the people crystalized in legal form.

Dealing with the complaints of returned soldiers regarding pensions, Major Cronyn said these were based upon the weakness of the present law and were not the fault of the pensions board. A good deal would depend upon the attitude of the Canadian people to the returned soldier who comes home disabled. The totally disabled man must be cared for to the end of his days, but the partially disabled man could not be dealt with merely by giving him a pension. He would be a better and happier man if he learned to be independent.

As to the question whether the present pensions were sufficient, Major Cronyn said that pensions in Canada were higher than in any other country. The problem was a complicated one. A laboring man suffered greater disability through the loss of limbs than a man who was engaged in clerical employment before enlistment, but it often happened that by training, a laborer would earn a larger income than he had done before enlisting.

Touching upon the question of the equality of pensions, the speaker said the commission had not been able to come to any decision on that matter. The difficulty in putting officers and men on the same basis was in the fact that officers went overseas under the belief that they would get a pension proportionate to their position in case of being disabled, and the question was whether the government was going to keep faith with these men.

One practical suggestion made by Major Cronyn was for the establishment of a committee at every centre where there were returned soldiers. This committee would keep in close touch with pensioners and adjust their complaints.

The Standard Bank of Canada has opened a branch at Raymond, Alta., and at Gray, Sask.

INCREASE MUNICIPAL TAXATION POWERS

New Sources of Revenue Have Become Necessary—Income From Land in Many Cases is Entirely Absorbed

A feeling has been growing in British Columbia that other sources of revenue will be necessary in addition to the tax on unimproved property. In fact Vancouver and South Vancouver have already made use of taxes on improved property. A large delegation made up of representatives of the city council of Victoria, Oak Bay, Saanich and Esquimalt; the Victoria Board of Trade, the Manufacturers' Association, the Retail Merchants' Association, and other organizations, recently waited upon the provincial government and submitted that under the existing financial conditions the municipalities must be granted wider powers of taxation.

While Premier Oliver was not in a position to make any definite announcement as to policy, the fact that he recognized the principle advocated by the speakers of the deputation that the municipalities are entitled to wider taxing powers was hailed with satisfaction by members of the deputation.

A special statement relative to the situation in Vancouver was read, as follows:—

The estimated expenditure for the city of Victoria for the year 1918 is $1,764,365, of which amount $1,099,683 is beyond the control of the council, made up as follows:—

Debt	$ 758,154
Education	268,355
Police	73,173
Total	$1,099,683

The estimated revenue from sources other than land for the year 1918 is $400,000, or 22.67 per cent., and of this amount $220,000 is received from water rates and $80,000 from the government as a grant in aid of education, leaving only $100,000, or less than 6 per cent., to be received from trades' licenses, etc. The balance of 77.33 per cent. has to be raised by taxes on land. It is obvious that this condition of affairs cannot obtain much longer, and some other sources of revenue must be tapped so that the land can be relieved from the present heavy burden that it has to carry, which is greater than the net return accruing from the land and the improvement thereon.

Vancouver Also Wants More Scope

Alderman Kirk, finance chairman for Vancouver, told the aldermen recently at a special meeting of the city council, what additional financial levy would come on the taxpayers of the city if the electors should pass all of the $1,900,000 in money by-laws which the council passed. If these by-laws all receive the approval of the people it would mean an additional annual levy of $175,000, Alderman Kirk said, or about an additional 1¼ mills on the present rate of 24 mills net. He made this statement in the course of a discussion of several clauses of certain charter amendments.

Dealing with the $1,900,000 in money by-laws, Alderman Kirk pointed out that the school board by-laws, amounting to $544,000 alone would add another $50,000 to the city's annual interest and sinking fund charges. He also intimated that next year the schools would probably want about $250,000 more for current expenses than had been allocated them this year. Where was it all to end, and were the property owners to be asked to carry all this additional burden, were two questions which Alderman Kirk asked.

He pointed out that the schools were operated for the benefit of the residents, and would have to be maintained or else educational standards would suffer. The clauses which he proposed under the "reconstruction scheme of taxation" would, he claimed, follow the income to the point where it was earned and draw upon it there. The proposals as he outlined them, were all permissive. What he proposed that the city should do was to secure wide powers of taxation, which were not, however, obligatory, but gave the council the option of employing them if it was found necessary.

Of these four clauses, one comprised a re-introduction of the business tax based on rental values, along somewhat the same lines as the amendment, which was refused by the legislature last spring. Other clauses included a residential tax and a third a tax on the rental values of improvements, This latter clause it was proposed to substitute for the present tax to the extent of 25 per cent. on the capital value of improvements, which was again imposed this year when it was found necessary to abolish the so-called "single tax," which was abolished after seven years trial.

All by-laws submitted to the ratepayers at the municipal elections on January 9th, which provided for new expenditures, were defeated, however. The amount voted down aggregated nearly $2,000,000.

TORONTO FIRE LOSS

Fire Chief Smith, of Toronto, reports that upwards of 3,000 calls were answered by the brigade during the past 12 months, the great majority of which were for fires of a trivial nature or false alarms. The total losses of property and goods from fire during the year amounted to $1,357,233, as compared with $1,164,965 in the previous year, an increase of $192,268. The greatest losses occurred in April last, when the appraised value of property destroyed amounted to $601,521.

NEW YORK LIFE INSURANCE COMPANY

For the year just ended the New York Life Insurance Co. issued 145,000 policies. New paid insurance amounted to $340,000,000, a net increase, practically all in domestic territory, of $25,000,000. During 1918, the company paid on the lives of more than 12,500 policy-holders, death losses amounting to over $35,000,000, and to living policy-holders in maturing policies and other cash benefits, about $62,000,000. The company has loaned at interest to policy-holders on the sole security of their policies, over $19,750,000, and paid to its policy-holders in dividends alone (included in the $62,000,000 above), about $26,000,000.

WAR RESTRICTIONS TO CEASE SHORTLY

It is probable that before the end of the present month most of the wartime restrictions upon trade and business will have been removed. It is the policy of the government to remove them just as rapidly as conditions will permit. Some have to be maintained by reason of restrictions still in force in the United States and Great Britain, or by reason of the necessity of the co-operation of the Canadian officials with officials of those countries. It is thought that the operations of the Canada Food Board and the War Trade Board will cease within the next two or three weeks.

BRITAIN BOUGHT 250,000 TONS OF FOOD

Nearly a quarter of a million tons of meats, dairy products and eggs were purchased by the British Ministry of Food in Canada up to the end of 1918. The exact total is 486,150,000 pounds. The provisions section purchased directly 153,453 tons, made up of 86,438 tons bacon and ham, 420 tons lard, 222 tons butter, 1,674 tons milk, 4,533 tons preserved meat, 60,164 tons frozen meat. In addition to this, the Dairy Produce Commission, on behalf of the British Ministry, purchased 80,622 tons of food, made up of 65,955 tons cheese, 3,988 tons butter, 10,334 tons milk, 345 tons eggs, a combined total of 234,075 tons.

The United States as a Market For Canadian Bonds

Prior to its entrance into the war, the United States was fast becoming the principal market for Canadian Provincial and Municipal bonds, having in recent years replaced England in this particular. A healthy appetite and a sound respect for such securities was much in evidence among American investors in 1914, 1915 and 1916.

The war is hardly over and yet bond dealers in New York and other cities in the States, who formerly handled "Canadians," are already beginning to deal in bonds issued by Cities and Provinces in the Dominion.

There is little doubt but that the United States will quickly resume its former position with respect to Canadian financing operations. Hence, it behooves the borrowing Province, City or Town to present its borrowing problems to the investment bankers in New York, Boston, Philadelphia, Chicago, etc.

THE BOND BUYER is recognized as "The Authority on Municipal Bonds." It is the logical medium through which Bond Dealers, Banks or Municipal Officials may reach every active buyer of Municipal Securities. That is why it carries more official advertisements of State and Municipal Bond Offerings than all other U.S. financial papers combined.

CONTROL OF OWNER OVER PROPERTY

A court in Quebec province recently gave judgment to the effect that the owner of property cannot be forced by a municipality to protect his property from damage by water. In the town of Dorval, the water of Lake St. Louis was gradually destroying the land of one of the citizens, which land separated the edge of the lake from a municipal highway. The municipal authorities notified the owner that he must reinforce his land in order to protect the highway, otherwise they would do the work themselves and charge the cost against him. The notice was ignored and the municipality proceeded with the work and sued the owner for the cost. The court, however, held that he was not liable.

CAMPAIGN FOR CHARITABLE ENTERPRISES

Foundations for a campaign to raise a sum of money in Toronto, probably $300,000 or more, to be used by the various charitable organizations of the city, were laid recently, with the formation of a Citizens' Budget Committee of the Federation for Community Service. At the meeting held in the Federation's board room, 404 Ryrie building, the following committee was chosen: H. G. Stanton, representing the Board of Trade; W. H. Alderson, of the Rotary Club; J. A. Scythes, Canadian Manufacturers' Association; T. A. Stevenson, Trades and Labor Council; Mrs. A. M. Huestis, Local Council of Women; Dr. H. L. Brittain, member at large; and three members of the Central Federation, Rev. Peter Bryce, Rev. P. G. Bench and F. N. Stapleford.

OVER $9,000,000 FOR SALMON PACK

Between $9,000,000 and $10,000,000 will be paid for the salmon pack of British Columbia that has been taken over by the British government. Arrangements for shipping the pack have been practically completed. The canners were given an advance on November 30, and the final payment will be made after the price is decided on. The entire pack amounts to approximately 1,500,000 cases, and of this amount the British government is taking 100 per cent. of the sockeye and red springs, 75 per cent. of the cohoes, and 70 per cent. of the pinks. There was considerable delay in providing for the transportation of the requisitioned goods, but shipping difficulties have been overcome, and there is a steady movement from canneries and warehouses.

SUIT FOR RECOVERY OF AUTOMOBILE DAMAGE

Accidents to automobiles are not always the result of chance, but frequently there is a good occasion for civil action. Where the owner has had insurance, however, he has already recovered his damages from the insurance company and it is the latter to whose interest it is to take this action.

In such cases it is the practice for the company in settling the claim of the automobile owner to secure his signature to a document authorizing the company to take action in his name and undertaking to hand over to the company such amount as he might recover. In fact a clause is usually incorporated in the policy whereby the assured assigns his right to take action to the insurance company, upon his claim being met by the latter.

This happened recently in the case of an accident in the city of Montreal, when suit was entered in the name of the automobile owner. However, the defendants maintained that the plaintiff had no interest in the action in as much as his claim had been paid by an insurance company. The court (Superior Court of Quebec Province) dismissed the action. In this case, however, the company apparently had not had the usual provision in the policy, but merely secured the signature of the assured when it met the claim.

DOMINION ISSUE POSSIBLE IN UNITED STATES

It is possible that an issue of Dominion government bonds may be made in the United States this summer to refund the issue of $100,000,000 5 per cent. two-year gold notes which mature on August 1st. These notes were issued, it will be remembered, in 1917, and are payable at the Bank of Montreal in New York City. The subscription price was 98 and interest, yielding 6.07 per cent. The bonds now sell at around 99¼ per cent.

There is no doubt but that $100,000,000 could be raised in Canada this summer, but a heavy exchange premium would have to be paid, if the present situation is maintained. By raising the money in the United States the payment of this premium can be avoided.

NOVA SCOTIA PRODUCTION IN 1918

The total production of the province of Nova Scotia for the year 1918 has been estimated as follows:—

Coal	$ 26,250,000
Coke and by-products	6,150,000
Gold and other minerals	220,000
Gypsum, limestone, etc.	825,000
Building materials and clay products	550,000
Iron and steel products	22,400,000
Fisheries	11,650,000
Manufactures, ships and freights	58,340,000
Products of the farm	42,680,314
Products of the forest	5,400,000
Game and furs	500,000
Grand total	$174,965,314

Details of the field crop, as estimated by Professor Cumming, follow:—

	Quantity.	Price.	Total.
Wheat (bushels)	704,985	$ 2.25	$ 1,586,216
Oats (bushels)	5,398,815	1.00	5,396,815
Barley (bushels)	406,175	1.20	487,410
Rye (bushels)	7,654	1.20	9,184
Buckwheat (bushels)	446,992	1.40	625,788
Peas (bushels)	32,892	2.00	65,784
Beans (bushels)	143,935	8.00	11,514
Mixed grains (bushels	194,652	1.40	272,512
Potatoes (bushels)	9,776,918	.90	8,799,226
Turnips (bushels)	10,250,194	.25	2,562,548
Mangels (bushels)	982,894	.25	245,741
Fodder corn (tons)	43,619	4.00	174,476
Other fodder (tons)	29,794	4.00	119,176
Hay (tons)	978,696	20.00	19,573,920
Apples (barrels)	500,000	..	1,250,000
Garden truck and small fruit	......	..	1,500,000
			$42,680,314

NOTE.—While the foregoing figures represent the market value of the field crops of Nova Scotia, it should be stated that a large share of the hay, grain, etc., is being fed to horses, cattle, sheep, etc., that are not paying for the fodder they eat at any such prices as now prevail. The field crops of 1917 were valued at $27,117,203. Two-thirds of the year's increase is due to the inflated value of hay, on which the farmer is only realizing fully from the comparatively small portion which he is selling. If, however, one wishes to use these figures as a basis of getting at the actual commercial standing of the farmer, for 1918 in comparison with former years, he must deduct the excess cost of seed, fertilizer, implements, labor, etc. However, making due allowance for all these, it appears that in the main the farmer has netted more from his farm in 1918 than in former years, but the increase is not large.

The Royal Bank of Canada has opened a branch at Chatham, Ont.

Total Business in Force December 31st, 1918	24,192,062.00
Annual Premium Income during 1918	831,770.64
Interest Income, Rents, etc.	219,540.37
Increase in Assets for the Year	447,142.99

COMPARATIVE STATEMENT IN FIVE YEAR PERIODS

	1903 (4½ years)	1908	1913	1918
Premium and Interest Income	$ 135,568.00	$ 396,017.00	$ 739,665.00	$1,014,938.00
Business in Force	4,086,1[illegible]2.00	8,625,509.00	22,299,079.00	24,192,062.00
Total Assets	273,605.00	1,085,228.00	2,438,240.00	4,227,187.00

POINTS OF INTEREST

The Head Office Building market value as per valuation of 1918 is $323,000.00 and has been taken in the statement at Book Value, $250,000.00. Formerly the Treasury Vault and Steel Vault equipment were taken into the statement as a separate asset. This is now included in the Head Office building item.

The items including supplies and office furniture, costing approximately $40,000.00, and formerly taken into the statement as a separate asset have now been eliminated.

Increase in actual cash receipts for the year 1918, as compared with the year 1917, was $72,511.33.

After making provision for Taxes, payable in 1919, amounting to $9,535.95, and after deducting interest on loans paid in advance amounting to $11,818.70, leaves a Surplus for additional protection of Policyholders of $381,964.15 (Including Paid-up Capital Stock of $250,000.00.)

The amount set aside for Reserves for the year 1918 was $353,926.00.

Assuming that the Company's Reserves were based on the 4% Reserve Table, the Surplus would be approximately $575,000.00, and on a 4½% basis approximately $750,000.00.

No interest or principal is overdue or in arrears on any of the invested funds of the Company, with the exception of one. The total number of investments being 775.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Record of Municipal Financing and Activities

L'Orignal, Ont.—Messrs. Brent, Noxon and Company, of Toronto, have purchased $2,500 6 per cent. 20-instalment bonds.

Victoria, B.C.—Messrs. Brent, Noxon and Company, and W. A. Mackenzie and Company, of Toronto, have been awarded a block of $100,000 5½ per cent. bonds due 1946 to 1948.

Lethbridge, Alta.—The city has authorized issue of $126,000 5-year 6 per cent. treasury notes, on security of unpaid taxes, to be applied on cost of filter plant and fire engine.

Victoria, B.C.—The city council has voted a sum not to exceed $4,000 for the construction of new means of access to the Cholberg and Foundation Company yards and improvement of the means already existing.

Edmonton, Alta.—Separate sealed tenders will be received by the Debenture Branch of the Department of Education until January 24th, 1919, on six blocks of school district debentures, amounting to $20,750, as follows:—Rurals, 10-years, 7 per cent.—Onion Lake S.D., $1,000; Cromwell S.D., $2,000; Northern Moose S.D., $1,000; Foch S.D., $1,500; Wild Deer S.D., $1,000; Allenby S.D., $2,500; total, $9,000. Rurals, 10-years, 7 per cent.—Philo S.D., $600; Laughlin S.D., $1,700; Cavendish S.D., $1,500; Wayne S.D., $2,500; total, $6,300. Rurals, 12-years, 7 per cent.—Antrim S.D., $2,250. Rurals, 5-years, 7 per cent.—Lake Geneva S.D., $400. Rurals, 15-years, 7 per cent.—Maple Hill S.D., $1,000. Consolidated S.D., Etzikom S.D., $1,800.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from December 18th, 1918, to January 4th, 1919:—

Rural Telephone Companies.—Vanguard, $1,500 15-years not ex. 8 per cent. annuity. Fairdale, $700 15-years not ex. 8 per cent. annuity. Eston Pioneer, $800 15-years not ex. 8 per cent. annuity. Naseby, $600 14-years not ex. 8 per cent. annuity.

School Districts.—Carmichael Village, $2,500 10-years not ex. 8 per cent. annuity. Lost Horse Creek, $1,900 10-years not ex. 8 per cent. annuity. Maymont, $1,000 10-years not ex. 8 per cent. instalment. Carnduff, $800 10-years not ex. 8 per cent. annuity. South Ridge, $2,500 10-years not ex. 8 per cent. annuity. King George, $600 10-years not ex. 8 per cent. instalment. Gallivan, $3,000 10-years not ex. 8 per cent. instalment. Red Butte, $2,500 10-years not ex. 8 per cent. annuity.

Town of Rosthern.—$4,000, increasing electric light plant, 15-years 7 per cent. annuity.

Rural Municipality of Kingsley No. 124.—$3,500, municipal hall, 10-years not ex. 8 per cent. instalment.

The following is a list of debentures reported sold from December 18th, 1918, to January 4th, 1919:—

School Districts.—Dafoe, $2,500, Waterman-Waterbury Manufacturing Company, Regina. South Side, $2,850, Waterman-Waterbury Manufacturing Company, Regina. Highcroft, $3,500, Drake-Ballard and Company, Moose Jaw. Odel, $1,200, Chas. Thode, Saskatoon. Eden Valley, $1,500, Regina Public School Board, Sinking Fund Trustees. Gravel Hill, $2,500, Wood, Gundy and Company. Willow Lake, $1,200, Canada Landed and National Investment Company, Winnipeg. St. Antoine R.C. Public School, $1,200, Waterman-Waterbury Manufacturing Company, Limited, Regina. Storthoaks Public School, $2,500, E. G. Read.

Rural Telephone Companies.—St. Leonards, $1,900, Wood, Gundy and Company. Raymore, $1,000, Bond and Debenture Corporation of Canada, Winnipeg. Yeomans, $800, City of Weyburn. McDonald Hills, $12,000, M. E. Ramsay, Luton, $1,400, Wood, Gundy and Company. Alsask, $3,800, Harris and Reade and Company.

Cities.—City of Regina, $5,000, Wood, Gundy and Company. City of Regina, $31,000, Wood, Gundy and Company. City of Moose Jaw, $100,000, Sinking Fund Trustees.

Town of Alsask.—$3,250, C. H. Burgess and Company.

Village of Eston.—$1,300, W. L. McKinnon and Company, Regina.

Rural Municipalities.—Hearts Hill, $5,769, Nay and James, Regina. Kingsley, $4,487, Nay and James, Regina.

PROVINCIAL FINANCING

Quebec Long-Term Issue Sold—Alberta Bonds Bring Good Price—Tenders to be Called for $3,000,000 British Columbia Issue

Messrs. A. E. Ames and Company, of Toronto, are offering bonds of the Province of Quebec amounting to $1,625,000, bearing 4½ per cent., for that government. The bonds are offered at 85.91 and interest, and are for 27½ years, maturing June 1st, 1946. They thus yield 5.50 per cent. The issue was purchased outright from the province by private arrangement. There is a general demand now for long-term securities. The net debt of the Province of Quebec is only $32,505,016. The practice of the province for years past has been to sell its bonds in London, with once in a long time an offering in New York.

Ames and Company state that the issue has already been entirely sold.

Alberta Bonds

Messrs. A. E. Ames and Company, and Wood, Gundy and Company, of Toronto, were the successful tenderers for the $1,000,000 5½ per cent. 20-year gold bonds of the Province of Alberta. The price was 99.14. There was a long list of tenders, and some of them were close, the second bid being 99.079. The bonds are dated January 1st, 1919, and are due January 1st, 1939. It is noteworthy that some United States firms bid for the issue. The bonds are payable in Toronto and New York, and it is likely that the bulk of them will be taken up by United States investors, who have shown an eagerness for Canadian bond securities.

The following is the list of tenders:—

1.	Wood, Gundy and Company, and A. E. Ames and Company, Toronto	99.14
2.	Canada Bond Corporation, Limited, Toronto	99.0791
3.	Kerr, Fleming and Company, Toronto	99.0001
4.	Osler and Hammond, Toronto	98.92
5.	W. A. MacKenzie and Company, and Messrs. Brent, Noxon and Company, Toronto	98.288
6.	Dominion Securities Corporation, Limited, Toronto	97.828
7.	The Sterling Bank of Canada	97.6315
8.	Housser, Wood and Company, Toronto	97.273
9.	Burgess and Company, and Campbell, Thompson and Company, Toronto	97.171
10.	Æmilius Jarvis and Company, Toronto	97.119
11.	Municipal Debenture Corporation, Limited	97.06
12.	R. A. Daly and Company, Toronto, and Messrs. Kean, Taylor and Company, New York	96.85
13.	R. C. Matthews and Company, Toronto; Hanson Brothers, Montreal; C. Meredith and Company, Limited, Montreal, and Otis and Company, Cleveland, Ohio	96.52
14.	Harris Trust and Savings Bank, Chicago	94.89
15.	Spitzer, Rorick and Company, Toledo, Ohio	94.85
16.	Morrow and Jellett, Toronto	94.36

British Columbia Plans Issue

At a meeting of the Legislative Council of British Columbia on January 13th, Hon. John Hart, minister of finance, said that the government approved of the floating of a loan of $3,000,000. Tenders will be asked and bonds for this amount issued. The rate of interest and the terms will be decided by the minister in the meantime.

The proceeds of the flotation will be used to pay off the loan of $3,000,000 obtained from the Dominion government last June. For the money so loaned by the Federal government the province is paying 6½ per cent. interest.

Statistics relating to Dominion Savings Banks, Post Office Savings Banks, National Debt, Building Permits Compared, Index Numbers of Commodities, Trade of Canada by Countries, and Preliminary Monthly Statement of Canada's Trade appear once a month as issued by the various Government departments.

Mr. Lester Green and Mr. Fred. C. Henderson, under the firm name of Green, Henderson and Company, have established a new bond house in Toronto. Their offices are in the Sun Life Building.

Messrs. C. H. Birkett and Company, of Toronto, have purchased an issue of $7,500, 7½ per cent., 15-instalment bonds of the Naisberry Rural Telephone Company, Saskatchewan.

INDUSTRIAL UNREST

Repression Will Not Halt Discontent, and if Attempted, Consequences Will be Serious

A preliminary public lecture on "Industry and the Problems of Reconstruction" was delivered by Mr. Francis Hankin at McGill University in Montreal on January 10th. Mr. Hankin, in a survey of the past and in bringing this into relation to the problems to be discussed in the course of lectures, stressed two points which may be taken as the keynote of his thesis: first, if any attempt is made to adopt a system of repression of any discontent or industrial unrest that manifests itself in this new era, the consequences will be serious, because the workers to-day are better educated and have more political power than their predecessors; second, the worker must not be treated as a cog in the wheel, but the demand of Mr. Barnes, the labor member of the Imperial Cabinet, that labor shall be the first charge on production, must be conceded. Another point on which the former regime was attacked, was that of competition being the supreme incentive and result-giving power in industry, the speaker contending that the co-operative method had proved successful during the war period, and that it was the real method for peace time.

Much Unrest

In his opening sentences Mr. Hankin justified the course of lectures on this topic by the fact that there was very much industrial unrest prevalent to-day, the blame for this being thrown upon the conditions under which industry was operated at the present time. As the well-being of the whole community hinged upon the smooth working of industrialism, it was in the general interest that people should study the problem whether they were directly or only indirectly concerned.

The changes that had taken place in ideas of justice and liberty within a century were briefly reviewed by the lecturer, who argued that if popular sentiment could change for the better in regard to the punishment of criminals lack of education, working conditions amounting to slavery among juveniles, similarly this century must be prepared for even more startling changes and revulsion of sentiment owing to the upheaval caused by the world war. Great as had been the material changes, the mental changes were still more important. This latter statement was instanced by the fact that the British Government had issued in blue-book form the document in which the labor member, Mr. Barnes, made the claims for the workers referred to. That the leading governments of the world had the intention to exercise interference in the future in individualistic enterprises indicated a very radical departure, but not more startling than various other theories that were being enunciated.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station, for the week ended January 10, 1919:—

Tretheway Mines, 64,367; Buffalo Mine, 88,000; McKinley Darragh, 281,675; La Rose, 186,775; total, 620,817.

CANADIAN PACIFIC STOCK IN ENEMY HANDS

About ten million dollars of Canadian Pacific Railway shares, including dividends, are owned by Germans, Austrians and other alien enemies. These have been held by the Canadian minister of finance in his capacity as custodian of enemy property. A large proportion of these shares are registered on the New York register, but as a result of a recent conference between the United States authorities and the Under Secretary of State for Canada, it is understood that no objection will be raised to the shares being vested in the alien property custodian for Canada.

DIVIDENDS AND NOTICES

THE MONTREAL CITY & DISTRICT SAVINGS BANK

The Annual Meeting of the Shareholders of this Bank will be held at its Head Office, St. James Street, on Monday, the Tenth day of February next, at 12 o'clock noon, for the reception of the Annual Reports and Statements and the Election of Directors.

By order of the Board.
A. P. LESPERANCE,
Manager.

Montreal, January 3rd, 1919.

THE MERCHANTS BANK OF CANADA

BELL TELEPHONE CASE RESUMED

(Continued from page 16.)

Sir Henry Drayton disagreed with this statement, remarking that the company had a surplus of $3,200,000, which, it was suggested, should be used to meet increased expenses.

Mr. MacFarlane argued that it was necessary for the company to maintain a surplus in order to take care of future business.

Sir Henry Drayton remarked that the company had earned surpluses which might have been kept in such a form as to take care of necessary expenditures in future.

It was argued by H. D. Gordon, of Toronto, that the very worst the Bell Telephone Company could do in 1919 was to have a surplus of about a million dollars. Mr. Gordon pointed out that the application for increased rates was based on the assumption that conditions would remain the same as at present, but it was likely that wages and materials would cheapen.

On the opening of the hearing on the 8th instant, Mr. W. J. Butler, representing the city of Montreal, requested that he be allowed to put in the case for that city at a special meeting in Ottawa. Messrs. W. D. Lighthall, representing the Union of Canadian municipalities, I. F. Rafferty, representing the city of Ottawa, also agreed to set their cases at that time. Sir Henry Drayton, the chairman, accordingly set aside January 22nd as the date for the special hearing of the evidence of the cities of Montreal, Toronto, Ottawa and Hamilton.

Toronto and London Object

When the Board was sitting in Toronto on the 14th, however, more evidence was received. Mr. Irving Fairty called witnesses on behalf of the city of Toronto, and Mr. Thomas Bradshaw, Commissioner of Finance, gave an interesting financial statement, which concluded with the following:—

"There would not appear to be any difficulty in providing additional capital for the Bell Telephone Company of Canada if such is required, either by the issuance of bonds or short-term notes, the latter possibly being the most desirable method, in view of the present conditions.

"Notwithstanding high prices, etc., the company has been improving its earning power, and its financial condition during the years of the war, and, now that prices of materials are receding, and that the tendency is for them to decline still further, it would appear as though there is little basis for the claim now made by the company. In view of the great expansion in the company's business, what may be necessary is the obtaining of new capital money, and there would not appear to be any difficulty in obtaining this on current terms.

"There is also the other thought, and that is that at the back of the Bell Telephone Company of Canada is the wealthy corporation, the American Telephone & Telegraph Company, and it, no doubt, would be able to furnish, if it were called upon to do so in any period of emergency, very substantial funds, by increasing its stock holdings in the Bell Telephone Company of Canada."

Mr. T. G. Meredith, of London, Ont., also protested against this proposed increase, declaring that the Bell Telephone Company should meet the lean years out of the fat of other years.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.

Kitchener	848,994	621,417	+	227,577
Totals	$321,002,446	$255,346,126	+	$65,656,320

The Toronto bank clearings for the current week are $64,078,478, compared with $57,197,375 for the same week last year and $56,064,523 two years ago.

CANADIAN FORESTRY ASSOCIATION TO MEET

The public meeting of the Canadian Forestry Association, will be held at the Windsor Hotel, Montreal, January 29th. It is expected that a number of leading Canadian lumbermen and other forestry experts will be present, while there will be addresses by Col. Henry S. Graves, chief forester of the United States, who has recently returned from service in France, and Hon. W. R. Brown, of Berlin, N.H. Col. Graves will speak on his experiences in forestry work in the devastated areas of France, and the means of preserving forest wealth on the American continent, while Hon. W. R. Brown will deal more exclusively with the latter subject. Their addresses will be illustrated by a series of films illustrating forestry and forest preservation.

WHOLESALE LUMBER DEALERS MEET

Forty members were present on January 13th, at the annual banquet and business meeting of the Wholesale Lumber Dealers' Association of Ontario, at Toronto, at which satisfactory reports of the prosperity attending the first year's operations of the organization were presented. Mr. A. E. Clark, the president, in referring to some of the matters of vital importance to the lumber industry that will require readjusting during the reconstruction period of trade and commerce generally, called upon the membership to exercise wide and careful judgment. During the period that conditions would undergo a general transformation it was equally important that the members should co-operate with civic, provincial and federal governments, and endeavor to avert as little disturbance of industrial lines as it was possible to do during critical periods.

"THE DAWN OF A TO-MORROW"

The war having ended so happily it is believed that a better world will rise out of the ruin—More of beneficence, equality, fraternity and sympathy with "The Other Fellow" will prevail in the great "To-morrow" that is dawning. Life insurance embodies these great conceptions and will be one of the big movements that "Will Come Into Its Own." Now is the time to make Life Insurance your life work. The war has given the institution of Life Insurance a great impulse and it is appreciated to-day as never before. It is a calling for men of the highest abilities and the finest character. Sell Life Insurance, and sell Mutual Life Insurance for the Mutual system is popular because it is based upon strictly democratic principles. If not as an agent then as a member you will be welcomed into our organization.

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

A COMMON-SENSE VIEW OF LIFE INSURANCE

No sensible person doubts the value of Life Insurance, but far too many look upon it as an expense to be avoided as long as one may safely do so.

This is a wrong view altogether. Modern Life Insurance is not an expense, but an investment Under the Limited Payment Policies issued by The Great-West Life, the Policyholder is himself assured of excellent returns if he lives for a given period If he dies meantime his heirs reap the benefit.

Low rates and high profits to Policyholders give the Great West Policies their value.

Write for information, stating age.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Regina Street Railway.—With the December revenue of the company estimated at $21,800, the total passenger receipts for 1918 is $230,582.55, as compared with a total revenue from this source in 1917 of $215,074.05. The total number of passengers carried during the year just closed was 4,923,752, with the December total estimated at 454,000, as compared with a total of 5,112,460 the preceding year.

Dominion Coal Company.—Mark Workman, president of the company, has announced the opening of a new mine on the Cumberland coal areas of the company.

Another important development of the new year in the Corporation's affairs is the taking over on January 1st of the two slopes which the Nova Scotia Steel and Coal Company had been using to get to its iron ore property at Wabana. The agreement allowing Scotia the use of these slopes expired at the beginning of the year, and they will now be available for the Dominion Coal Company in further development of its own ore through which the slopes pass.

Montreal Telegraphs Company.—The annual meeting of the company was held on January 9th. A vacancy on the board of directors caused by the death in action of Lieut.-Col. Bartlett McLean, D.S.O., was filled by the election of F. W. Molson.

In his report Wm. MacMaster, the president, stated that the company continued free from debt or encumbrance of any kind. Dividends paid during the year amounted to 8 per cent., or $160,000. Total assets showed a small increase from $2,313,687 to $2,314,422, through an increase of about $1,000 in cash accounts receivable, bonds and other securities $162,592. A reduction in unclaimed dividends to $1,569, and an increase in contingent fund from $119,741 to $121,029.

Nova Scotia Steel and Coal Company.—The company has been given authority to mine coal on certain areas under Sydney Harbor, belonging to the Dominion Coal Company. The government follows the main recommendations of C. A. Magrath, as director of coal mining operations in Nova Scotia and New Brunswick.

Nova Scotia Steel is, therefore, empowered to enter two parcels of leases of the Dominion Coal Company, one about 4,000 feet by 1,000, the other about 8,000 feet by 500. The Provincial government of Nova Scotia is to receive its usual royalty of 12½ cents per ton. In addition, compensation is to be paid quarterly to the Dominion Coal Company, as the governor-in-council may determine. Although the decision does not specifically so state, this will probably mean reference to the Exchequer Court of Canada.

Montreal Tramways and Power Company.—New financing of the company is taking place within Canada, and through a syndicate of Montreal bond houses.

It is reported to consist of $7,300,000 of 6½ per cent. 5-year gold notes to be issued at par, and will retire an issue of $5,350,000 placed in New York to the firm of Potter, Choate and Prentice. The balance left after the expenses are paid will assure the company of a considerable amount of new working capital.

Up to the present all financing of the Montreal Tramways Company and the Montreal Tramways and Power Company has been effected in the United States, the first mortgage bonds having been purchased by Harris, Forbes and Company, and all the subsidiary financing having been effected through the firm of Potter, Choate and Prentice.

The local purchasing syndicate is headed by the firm of Rene T. Leclerc and Company.

Under its new franchise the company has the right to issue the notes, which are practically secured by the city of Montreal, as the franchise assures the company of the fares necessary to earn the interest.

Dominion Bridge Company.—The total profits of the company for the year ended December 31st, 1918, amounted to $2,477,009, compared with $1,360,534 in 1917, an increase of $1,116,475. After making deductions for depreciation, doubtful accounts, interest and exchange and directors' fees, net earnings of $1,865,717 were shown, as compared with $1,186,436, an increase of $679,281.

When necessary deductions for dividends are made, a surplus of $1,345,717 is shown, which compares with but $56,316 in 1917, or an increase in the year of $1,289,401. When the sum carried forward from the previous profit and loss account is added in, a total surplus at credit of this account of $3,025,307 is shown, compared with $1,679,590 in 1917, an increase of $1,345,717 for the year.

This year the company did not place anything to the credit of the special and interest reserve accounts. Dividend disbursements in the year were $520,000, as against $747,500 in 1917.

The balance sheet shows some interesting changes. Total assets are $12,130,867, compared with $11,876,355, an increase of $254,512. Although cash on hand and in bank decreased from $403,337 to $284,648, the statement shows Canadian war bonds at $46,290 and city of Toronto bonds at $199,000, which were not included in the previous report. Accounts and bills receivable are higher at $2,029,386, against $1,202,773. Stocks of steel and small tools, etc., are lower at $1,304,701, against $1,553,434; investments in other companies lower at $2,658,999, against $3,164,591. Additions to plant during the year were $514,361, against $534,667.

Nipissing Mining Company.—During the past year the leading silver producer of the Cobalt camp was the Nipissing Mining Company, which took the lead as the largest silver producer in the British Empire from the Mining Corporation of Canada. The Nipissing produced in the neighborhood of four million dollars during the year, while the Mining Corporation of Canada was a close second. The Kerr Lake Mining Company is the next largest producer with close to two and a half million ounces to its credit. The O'Brien Mining Company of Cobalt and its associate of the Gowganda camp, the Miller Lake-O'Brien mine, each produced upwards of a million ounces of silver. The Coniagas Mining Company, which previous to the current year has always maintained a production of over one million ounces, this year fell about twenty-six thousand ounces short of the mark.

The Nipissing mine, as well as being the largest producer in the camp, has by far the largest unexplored acreage. During the past year a number of new veins containing high-grade ore and the usual amount of mill rock in the wall have been developed on the property. At the present time a more or less comprehensive development campaign is under way in new territory of the mine. On the eastern shore of Cobalt Lake a new shaft has been started to explore around which during the past summer was thoroughly diamond drilled. With the large acreage of virgin territory to be explored it is highly probable a number of new and important silver-bearing ore bodies will be encountered. It is, therefore, probable Nipissing will continue for many years to lead all other silver mines in the British Empire in amount of production.

NATIONAL WAR BONDS

The sale of National War Bonds in Great Britain, which will close January 18th, has met with great financial success. The total, according to George Sutton, of the National War Savings' Association, is approximately £1,500,000,000, and it is hoped will reach £1,600,000,000 before the end of the campaign.

LABOR'S VOICE IN INDUSTRIAL CONTROL

Community Also Should Have Interest in Industry with Labor and Capital

"Reconstruction cannot be replaced by readjustment as suggested by a member of the Union Cabinet." Such was the statement made by Hon. W. L. Mackenzie King, formerly minister of labor, during the course of an address before the members of the Reform Club, on January 11th, in Montreal. He insisted that the four component parts of industry must be capital, labor, management, and community.

In defining the meaning of reconstruction, Mr. Mackenzie King said that there were two wholly different schools of thought. One thought of the word primarily in material terms of commercial and industrial supremacy, economic boycotts, and the building of high tariff walls—wealth being the main aim and purpose of government. To the other school the chief aim of government is human happiness and the improvement of well-being.

"The party which stands for readjustment only," said Mr. Mackenzie King, "would lead us back under the guise of patriotism to a renewal of efforts which up to the moment of the war were absorbing our political thought to the exclusion of human well-being and its fundamental problems so long ignored. To such effort the word reconstruction is by no means applicable, but simply rebuilding the old edifice on the old site. The problem of reconstruction is deeper than mere restoration, even in Europe, where to-day all is ruin and desolation. It is the problem of establishing right relation between man and man in human society, and avoiding for all time the worship of false gods, material wealth and material power, which alone are responsible for the hell into which this world has been plunged by Prussian ambition, greed, and barbarity."

War But an Episode

"To understand the meaning of the word reconstruction," he said, "we must ask what was it for which our people fought and died. Did they leave our shores, many of them never to return, to fight for a civilization to be estimated in tons or calculated in dollars, or was it for the maintenance of a great ideal? It is this vision which we hold in trust for those who fought and died in Flanders field. If this dream is to be realized we shall have to begin the work of reconstruction in industry with a completely new conception of its aims and purposes. Our conception of industry must be changed, for instead of regarding it as an institution for the purpose of creating wealth, should it not be regarded as in the nature of a social service? Industry has been for too long looked upon as the exclusive concern of capital, and regarded too little in the light of an enterprise in which there are four interested parties—capital, labor, management and the community. The community is as much an investor in industry as capital or labor, for is not 99 per cent. of the expenditure of government in normal times but outlays in the nature of investment in industry. It is the community which provides the natural resources and power that underlie all production. Individuals may acquire titles by one way or another but it is from the community, and with the consent of the community, that titles are held. In our reconstruction of industry we must aim at bringing about a system of joint control which will involve a change in the status of the worker, and give wider recognition to the rights of the community. The worker must be a partner, admitting him along with capital and management, and representatives of the community, to round table conferences in all that pertains to the conditions and circumstances of the employment."

Not Profits but Share in Control

"Let there be no no mistake," he said, "for neither Canada nor the United States will escape Bolshevism, Syndicalism or any other inevitable influences unless our industrial institutions, like our political institutions, are brought into fuller harmony with the democratic sentiments of the times. Here is work enough for a party of reconstruction, and the moment for that party to begin its work is at hand.

"What labor wants is, not a share of profits, but rather in a share in the control of industry, under which profits are made; not houses built with government aid, but houses owned and built and enjoyed by the just reward of honest toil."

"England did not wait till the end of the war, but created first of all, a committee of reconstruction which later on developed into a ministry of reconstruction. The Whitley report constituted the corner stone of its reconstructive policy. Through all its careful preparation the Government of the United Kingdom has been able to give to the nation not a plan of readjustment, but a well-defined policy of reconstruction. It cannot," he said, "be too clearly recognized that if the war has any significance at all, it is that it stands for the overthrow of what remains in the old world of autocracy in government and feudal political control."

COMPENSATION LAW AND PROVINCES

The judgment in the case of Fullum versus the Foundation Company, which was mentioned in *The Monetary Times* of January 10th, was handed down a few days ago in favor of the defendant. The plaintiff had been in the employ of the foundation Company, Limited, whose head office is in Montreal, and was injured while engaged at work for that company at Amherstburg, Ontario. He entered suit for compensation in accordance with the Workmen's Compensation Act of Quebec province. Justice Greenshields held that it was the law of the province of Ontario and not of the province of Quebec which applied. Under the Workmen's Compensation Act of Ontario every company carrying on the business of building and construction is obliged to contribute to an accident fund, and as a consequence is relieved from all liability for injuries sustained by its employees in the ordinary course of their work. The defendant company was at the time of the accident contributing to this fund, and was in consequence relieved of liability. The plaintiff's only recourse, therefore, would be against the Workmen's Compensation Board of Ontario.

POLICYHOLDERS GAIN IN LIFE INSURANCE

The increasing liberality of life insurance policies was dealt with by Mr. George A. Morrow, president of the Imperial Life, at the annual meeting of that company on January 8th. The temporary set-back experienced by life companies during the year 1918 will not permanently affect this development.

The main points in Mr. Morrow's speech were covered in last week's issue of *The Monetary Times*. Mr. E. T. Malone, K.C., vice-president, entered in some detail into the subject of disbursements. "While the year 1918," he said, "has been a record one in many particulars, such as new business, premium and interest, income, etc., the record which will stand over as belonging peculiarly to the year is the amount of the payments to policyholders." In the case of the Imperial Life this reached the sum of $1,760,000, and exceeded by almost $100,000 the aggregate of the payments for the previous year. Mr. Morrow then dealt with the subject under the heads of cash values of surrendered policies, dividends to policyholders, policies and payments to beneficiaries under policies maturing by death.

Mr. G. F. Weston, the managing director, gave a comprehensive statement of the effect upon life insurance of the war and of the influenza epidemic. "The outstanding lesson," he said, "which the experience of the last five years teaches us, is the importance of charging adequate rates and the maintenance of a strong contingency fund to absorb the shock of unexpected mortality or material shrinkage in the value of securities." A resolution was introduced by Mr. Weston and passed to the effect that $60,000 be transferred from the shareholders' fund to the special contingency reserve.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Brock, Sask.—January 9—The business section of the town was damaged. Estimated loss, $100,000. The buildings destroyed include: People's store, Dobson's butcher shop, McCosh's hardware, pool room and barber shop, harness building and residence, restaurant, Brock News printing office, and the Royal Bank.

Chatham, Ont.—January 15—Four tons of tobacco in the drying kiln at O'Brien's cigar factory were destroyed.

Edmonton, Alta.—January 7—The Veteran picture theatre was damaged. Estimated loss, $10,000. Insurance carried, $7,000.

Montreal, Que.—January 9—Premises of H. Mathieu and Co., lumber dealers, were damaged. Estimated loss, $5,000.

January 11—The workshops of the Cadillac Motors, Ltd., were destroyed. Estimated loss, $500,000, mainly covered by insurance.

January 12—The plant of Jennings and Co., 15 Wellington Street, was destroyed. One hundred and forty motor cars, including nine government ambulances, were a total loss, and the premises of the Hudson Bay Co., and S. J. Carter and Co., were seriously damaged. Estimated loss, $1,000,000.

Port Stanley, Ont.—January 12—House of Wm. H. Martin was destroyed. Caused by overheated stove pipe. Estimated loss, $2,000.

St. John, N.B.—January 12—The Gem Building and the Drury Building were damaged. Estimated loss, $15,000.

Toronto, Ont.—January 9—St. Julien Hall, Bloor Street and Lansdowne Avenue, was damaged. Estimated loss, $4,000. Building of Zobbermen and Hemmell, 21 Edward Street, was damaged. Estimated loss, $1,600.

January 14—Home of Mr. A. E. Ames, 625 Kingston Road, was damaged. Contained in the garage were two motor cars valued at $7,000. Estimated loss, $15,000.

Winnipeg, Man.—January 7—Home at 220 Alexander Avenue was damaged. Estimated loss, $500.

York Mills, Ont.—January 15—Home of H. H. Lang was destroyed. Estimated loss, $5,000.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Fort William, Ont.—January 2—The Cleaning Elevator of Parrish and Heunbecker was destroyed. Estimated loss, $250,000. Insurance as follows: On building, Atlas, $3,500; British Colonial, $1,500; Canadian Fire, $2,500; Fidelity-Phenix, $2,500; Globe and Rutgers, $2,500; Guardian, $12,500; Imperial Underwriters, $2,000; Liverpool and London and Globe, $2,500; London Guarantee, $1,500; North British and Mercantile, $2,500; North Empire, $2,500; New York Underwriters, $2,000; Occidental, $2,000; Quebec, $2,500; Royal Exchange, $2,000; Rochester Underwriters, $2,500; Scottish Union, $2,500; Sun, $2,500; Union of Canton, $2,500; Western, $2,500; total, $57,000. On stock, American Central, $5,000; Canadian Fire, $7,500; Great American, $2,500; Globe and Rutgers, $2,500; Guardian, $30,000; Liverpool and London and Globe, $7,500; Mount Royal, $2,500; North Empire, $2,500; Scottish Union, $2,500; Sun, $2,500; total, $65,000. Use and occupancy, Lloyds, $1,500; Globe and Rutgers, $2,500; Globe Indemnity, $2,500; Liverpool and London and Globe, $3,500; total, $9,000.

Victoria, B.C.—The fire department responded to 262 alarms during the year, 45 being turned in from the street fire alarm boxes and 217 by telephone. There were no serious fires during the year. The total loss by fire on buildings and contents for the year 1918 amounted to $14,896.85, a decrease of $136,982.46, when compared with the 1917 figures. The losses are enumerated as follows: Loss by fire on buildings with insurance paid, $8,376.25; loss by fire on buildings with no insurance, $2,890.35; loss by fire on contents with insurance paid, $2,212; total, $14,896.85. The total fire insurance on buildings and contents now in effect is $404,650.

NEW INCORPORATIONS

Government Shipping Placed in Hands of Company Just Incorporated at Toronto

The following is a list of companies incorporated during last week, with the authorized capital and the names of the provisional directors:—

Matheson, Ont.—Matheson Lumber Co., Ltd., $40,000; W. A. Gordon, F. A. Day, E. M. Reilly.

Brant, Ont.—Mount Pleasant Creamery Co., Ltd., $40,000; L. E. Cox, J. B. Sloan, W. J. Wilson.

Hamilton, Ont.—The Smart-Turner Machine Co., Ltd., $200,000; W. G. Smart, J. A. Turner, J. Chisholm.

Richards' Landing, Ont.—St. Joseph Island Telephone Co., Ltd., $5,000; W. J. Hamilton, F. H. Court, A. W. Stableforth.

Ottawa, Ont.—R. Stewart, Son and Cunningham, Ltd., $50,000; T. A. Beament, A. H. Armstrong, L. C. Frewin.

Montreal, Que.—The Canada Pulp and Lumber Co., $750,000; MM. J. Melancon, L. D. Clement, C. A. Brouillard. The Crawley and McCracken Co., Ltd., $100,000; C. Holdstock, H. Langevin, R. Bourdon. Guy Street Garage, Ltd., $20,000; MM. G. Beauregard, L. Therien, J. E. Lajoie. Senneville County Club, Incorporated, $149,000; R. T. Stackhouse, R E. Allen, J. P. Charbonneau. Independent Cold Storage Co., Ltd., $190,000; M.M. E. D'Aoust, W. Olivier, A. Eide. Forhan's, Ltd., $100,000; W. W. Perry, A. L. Reid, C. H. C. Leggott. Modern Creamery Co., Ltd., $20,000; F. Lariviere, N. Mantha, R. Martineau. Canadian Braid and Trimming Co., Ltd., $190,000; MM. E. D'Aoust, W. Olivier, A. Eide. Bock and Tetreau, Ltd., $40,000; H. J. Tetreau, H. Bock, C. Tetreau. The Bannockburn Clothing Co., Ltd., $50,000; P. Bercovitch, E. Lafontaine, N. Gordon. Vanderweghe, Ltd., $49,000; W. S. Johnson, A. R. Hall, J. Edwards.

Toronto, Ont.—Provincial Machine and Supply Co., Ltd., $100,000; J. A. Kent, C. W. Thompson, B. Cameron. The Perfection Garden Tools Co., Ltd.; A. Anderson, A. S. Lowe, T. C. G. Russell. Venus Silk Hosiery Mills, Ltd., $125,000; F. J. Dunbar, A. G. F. Lawrence, F. Strong. Papers, Ltd., $250,000; G. Cooper, N. H. Spence, E. Staples. Coralox, Ltd., $500,000; A. W. Holmestead, J. L. Ross, A. R. Kinnear. National Preserving Co., Ltd., $40,000; W. J. McLarty, M. Magee, I. Lavine. The Scottish Jewelry Co., Ltd., $40,000; J. Goodman, Jessie Goodman, W. B. Dobson. Dominion General Supply Co., Ltd., $40,000; B. E. Bull, J. G. Shaw, J. Montgomery. Toronto Battery Service Co., Ltd., $40,000; S. L. Pearson, C. H. Leslie, M. Patterson. Diamonds, Ltd., $40,000; D. W. Markham, G. M. Baillie, W. E. Burkholder. Synthetic Drugs, Ltd., $200,000; S. R. MacEwen, C. N. Candee, J. F. Edgar. Canadian Pioneer, Ltd., $100,000; G. Ruel, R. H. M. Temple, G. N. Limpricht. Canadian Government Merchant Marine, Ltd., $1,000,000; G. Ruel, L. W. Mitchell, W. B. Langmo.

MONTREAL BONDS LISTED

The three recent issues of city of Montreal 6 per cent. bonds were listed on the Montreal Stock Exchange on Thursday, January 16th, making a new departure for the exchange. Many years ago the city bonds were active features of the exchange trading, but as the bulk of them passed over to British ownership the market finally dried up. About $15,000,000 of the city's bonds have been distributed among Canadians recently and it is believed that under the new conditions they will have a broad and active market.

Bank of Nova Scotia Takes Fourth Place

Purchase of Bank of Ottawa Will Place Bank of Nova Scotia Fourth in List—Terms Announced, Subject to Ratification by Shareholders—Comparison of Principal Figures—Strength of Bank Stocks Suggests Further Developments

	Bank of Nova Scotia.	Bank of Ottawa.	Combined. (Probable figure.)
Year founded	1832	1874	
Capital authorized ...	$ 10,000,000	$ 5,000,000	....
Capital subscribed ...	6,500,000	4,000,000	$ 10,500,000
Capital paid-up	6,500,000	4,000,000	10,500,000
Reserve fund	12,000,000	4,750,000	16,750,000
Dividend rate	14	12	14
Circulation	17,844,915	6,954,012	24,798,927
Total deposits	99,121,306	46,401,517	145,522,823
Total liabilities	142,665,801	63,624,001	206,289,802
Total assets	162,734,560	72,694,205	235,428,765

The above are the principal figures as at November 30th, 1918, regarding the business of the two banks concerned in the amalgamation announced this week. An arrangement has been made between the management of the Bank of Nova Scotia and of the Bank of Ottawa whereby the former is to purchase the latter on the basis of four shares of Bank of Nova Scotia stock for five shares of the Bank of Ottawa. This is just about in proportion to their market valuation. Ten shares of the Bank of Ottawa sold on the Toronto Stock Exchange on Wednesday, January 15th, at 205, and 20 shares of Bank of Nova Scotia sold on Friday, the 17th inst., at 257½. The value of five shares of the former and four shares of the latter would respectively be $1,025 and $1,030.

This merger will reduce the number of Canadian chartered banks to eighteen, and eliminates another of the smaller banks. The Bank of Ottawa stood thirteenth in the list in point of total assets. It was founded in 1874, and while it has not been an aggressive bank but has mainly operated in the Ottawa valley, it has maintained a strong position there. Its general management has been conservative. The Bank of Nova Scotia, on the other hand, has expanded rapidly, and for some time past has paid the largest dividend of any Canadian bank, with the result that its stock has maintained record levels for Canadian banks. As stated in the announcement of Mr. H. A. Richardson, given below, there are only eleven points at which branches of the two banks duplicate, so that many changes will not be necessary.

Many Mergers in Past Few Years

The following is, a list of bank amalgamations which have taken place since the year 1910:—

Date.		Purchasing bank.	Bank absorbed.
Nov.,	1910	Royal Bank	Union Bank of Halifax
Apr.,	1911	Union Bank	United Empire Bank
Mar.,	1912	Bank of Commerce	Eastern Townships Bank
Sept.,	1912	Royal Bank	Traders Bank
Feb.,	1913	Bank of Nova Scotia	Bank of New Brunswick
Apr.,	1913	Home Bank	Banque Internationale
Nov.,	1914	Bank of Nova Scotia	Metropolitan
Sept.,	1918	Royal Bank	Quebec Bank
Jan.,	1917	Royal Bank	Northern Crown
Mar.,	1918	Bank of Montreal .	Bank of British N.A.

The Bank of Nova Scotia has, it will be seen, been one of the most active in expansion of this kind.

The consent of the Finance Minister has already been given to this merger. It was, however, kept a profound secret until the announcement was made on the 19th inst. The fact that there was no suspicion of it is indicated by the quite normal business in the shares of both banks upon stock exchanges. Activity is quite probable during the next few weeks, however, as presumably, it will be necessary for shareholders of the Bank of Ottawa to have shares in multiples of five in order that the exchange may be consummated. The paid-up capital of the Bank of Nova Scotia is, it will be seen, still $3,500,000 less than the authorized capital and as the subscribed and paid-up capital of the Bank of Ottawa is just $4,000,000, the unissued balance of the Bank of Nova Scotia stock will be sufficient to complete the transactions in the proportions arranged, and leave a balance of $300,000. This will probably be sold to make the capitalization an even $10,000,000.

Mr. H. A. Richardson, general manager of the Bank of Nova Scotia, who passed through Montreal on the 19th inst., on his way to attend the annual meeting in Halifax, made the following announcement in connection with the amalgamation:—

"The two banks are peculiarly adapted to the union now under way. To begin with, they met at only eleven points of their nearly 300 branches. Those points are the larger cities where the public is already well served with banks, so that no diminution of bank facilities is entailed.

"The acquisition of the Bank of Ottawa, with branches in the west, is a welcome to our connections there, where we are most anxious to extend. The Bank of Nova Scotia has practically no branches in the Ottawa valley, where the Bank of Ottawa is particularly well established; indeed, they have concentrated their main efforts in that section and largely control the business there.

Growing Competition

"Under conditions developed by the war, it is clear that in order to be completely equipped to meet the growing competition in banking for not only domestic business but for the foreign trade balances that Canada must develop if she is to maintain favorable trade balances, banks should have such a chain of branches as will enable them to provide the most complete facilities for their customers. The Bank of Nova Scotia possesses these facilities, for its branches extend from the Atlantic to the Pacific, to Newfoundland, the West Indies and the United States, and we have taken the initial steps to establish ourselves in Great Britain. Through the medium of our connections we can make the resources of the Bank of Ottawa a much more powerful factor in the development of the trade and commerce of the country.

"We shall have the continued influence and support of the Bank of Ottawa directors, a number of whom will join the board of the Bank of Nova Scotia, and we believe we shall retain the goodwill and business of their customers, as it will be our aim through systematic and generous treatment to make them feel that the change is one in name only. Their whole staff will be welcomed to our service and admitted to our pension fund, and will enjoy equal opportunities with our own officers for promotion.

"Altogether, I believe the amalgamation will prove to be a wise step in the interests of the shareholders of both banks, and will result to the advantage of the commercial and industrial welfare of Canada."

H. A. Richardson
General Manager, Bank of Nova Scotia
(Monetary Times Photo)

It has not been announced as yet what will be the relation of Mr. D. M. Finnie, general manager of the Bank of Ottawa, to the amalgamation concerned. Mr. Finnie was born in Scotland in 1849 and occupied various positions in the banking business in Scotland and England before coming to Canada with the Bank of British North America. He later joined the Bank of Ottawa and became assistant general manager in 1903.

Commencing about the second week in December the listed shares of practically all Canadian banks showed decided strength upon the market. The advances which have been made since December 1st by Canadian bank shares are represented as follows:—

	Dividend rate.	Dec. 11, 1918.	Jan. 20, 1919.
Bank of Montreal	10	210	215
Bank of Nova Scotia ..	14	249	257
Bank of Toronto	11	188	201
Molsons Bank	11	180	196
Merchants Bank	10	171	188
Union Bank	9	159	160
Bank of Commerce ...	10	190	212
Royal Bank	12	208	212
Dominion Bank	12	202½	218
Bank of Hamilton	12	185	203
Standard Bank	13	200	201
Banque d'Hochelaga ..	9	141	147
Imperial Bank	12	200	208

The reasons which are usually considered as responsible for this movement are:—

First, the lessened demand for capital as a result of the cessation of hostilities. Consequently, a general strengthening in all interest and dividend-paying securities was experienced.

Second, an appreciation of the fact that Canadian banks are in a decidedly strong and liquid condition. This is to some extent the result of the careful weeding process which the banks have applied, owing to the shortage of funds during the past two or three years.

Third, the probability that the government savings campaign will react towards growth of bank deposits.

At the annual meeting held in Halifax on Wednesday, assurances that the dividend of 14 per cent. now payable on the capital stock of the Bank of Nova Scotia would be increased in the near future were given. The amount of the proposed increase was not specified. Application, it was decided, will be made to increase the authorized capital of the bank from $10,000,000 to $15,000,000.

General Manager, Bank of Ottawa
(Monetary Times Photo)

Commenting on the growth of operations, Mr. H. A. Richardson said to the shareholders:—

"We wish to state and to emphasize that merely to grow large has been and will be no part of our policy. We never have and never will, I hope, sacrifice quality to size. So far as we are able by the acquisition of desirable business connections, to enlarge our operations and make the Bank of Nova Scotia a more useful factor in the development of Canada, we shall do so, but our first care must be to preserve in all its strength the foundation on which we are building.

"In order to strongly buttress that foundation we have created a very large reserve fund. That has been done largely by issuing to shareholders from time to time shares at a very considerable premium, the premium so paid in by them going into our reserve fund. While this has resulted in placing us in the van of Canadian banks for strength and stability, it has not been productive of more than very moderate dividends to shareholders, for our recent dividend of 14 per cent. yields them on their investment only 5.42 per cent.

"Such high-class investment as the bonds of our own government yield more than that, while many gilt-edged securities yield very much more. No increase has been made in our return to shareholders since 1911. In the meantime, the cost of living generally has grown, and the recently imposed income tax further reduces the revenue from our shares. We, therefore, feel warranted in intimating that at our next dividend period the shareholders will receive an increased return on their holding of our shares."

TORONTO SAVINGS AND LOAN COMPANY

A net profit of $147,902 was realized in 1918 by the Toronto Savings and Loan Co., of Peterborough, Ont. Four quarterly dividends at the rate of 10 per cent. per annum were paid; $50,000 was transferred to the reserve fund and a balance of $34,604 carried forward as compared with $36,701 brought forward from 1917. The slight decrease in the amount carried forward is, of course, accounted for by the transfer to reserve fund. The total reserve is now $1,100,000. The president, Mr. H. C. Cox, in submitting the report, expressed his satisfaction with the company's investments.

The Canadian Bank of Commerce has opened a new branch at Carleton Place, Ont., under the temporary management of Mr. W. C. Gill.

FARM LOANS AND RURAL CREDITS

Must be Given Wider Scope by the Government—Help Farmers by Restraining Interest Rates

"The time has arrived when the government must give wider scope to the Farm Loans and Rural Credits Measure," was the statement made by the Hon. Edward Brown, provincial treasurer of Manitoba, at the annual convention of the Manitoba Grain Growers. He addressed the delegates on January 10th. He said that it was inconceivable that any government could set up an act designed to help the farmers by restraining interest rates and not be subject to hostile criticism. Manitoba was the first province to attempt the plan. He eulogized George W. Prout, M.L.A., for first bringing in the bill, which was given a trial in his, Mr. Prout's, constituency. In view of the success which had attended the measure, Mr. Prout's name would always be inseparable from it. There was a two-fold purpose in the Rural Credits act. First, it was intended to set up a restraining influence not only upon rates but upon the measure of credit which the bank would give. The United Grain Growers of Alberta had passed a measure urging the formation of unit banks to furnish credit to farmers. They memorialized the Dominion Government to give the provincial parliaments power to deal with deposits. The Manitoba government thought this unwise, as the Dominion Government could not delegate its powers to the provinces and the procedure of going to Great Britain for an amendment to the British North America act was a very slow one. Even if the Dominion government did delegate its power the move meant the setting up of new banks and consequent engagement of more officials and overhead expense. They had already the co-operation of the banks, but the time had now come when they must have something to take the place of that co-operation, if at any time the banks thought fit to withdraw it. The bankers' association had said it was an unsound principle to fix a specific rate of interest. He thought the bankers' argument sound, that the rate of interest should not be fixed owing to conditions which might arise from time to time. But, he urged, if the government could lend the farmer money at 6 per cent. for quicker development, why should they pay the banks any more.

To Amend Act

Mr. Brown said that they intended to amend the act to permit the government lending money direct to the societies so that they could get a working capital which would enable them to steer entirely clear of the banks if they wished to do so. Bonds would be authorized at the next session of the legislature for this purpose. Secondly, they intended to grant loans in a larger measure than could now be secured from the banks and thus put the farmers in a position to consolidate their associations. At present banks might loan a man $200, which was entirely inadequate to allow him to get along comfortably. The society would be able to step right in and grant him $1,500 to $2,000, as the case may be, if the circumstances would warrant it. Thus the farmer was being placed in an independent position and there were many of them there who knew what an asset that was. The whole aim of the Grain Growers' association was to secure reduction of the tariff and the provincial government was solidly behind the farmer or the Grain Growers' association, although there might be a difference in judgment as to when their influence should be applied. "You have within your reach," he said, "the power to effect economy by paying cash for your goods and being in the independent position I have alluded to. One implement company manager in Winnipeg had told me that the expenses of collections was 15 to 20 per cent. That is a pure waste. The Rural Credits act provides the means to pay cash and to buy in the lowest markets. This is real independence and real prosperity.

Co-operative Feature

The co-operative features of the act show that the government and municipality were brought together to do business. Farmers who did not need the help of the measure had come forward to help those who were not so fortunate and were doing good work as board members. So much was this spirit in evidence that they now had in Manitoba eighteen of these societies. They had one paid organizer and by the end of the next session would appoint two more. Before the end of 1919 they would have 75 municipalities organized, and by the end of the next year they hoped to have the whole of the 150 municipalities equipped with societies. It would mean the lending of between $2,000,000 and $3,000,000 to be used for the actual development of the province and the placing of farmers in an independent position.

Farm Loans

Touching on the Farm Loans act, Mr. Brown declared this also was a two-fold measure. The great feature here was also to restrain mortgage companies in so far as interest rates went. He pointed out that while only a few farmers took advantage of the 6 per cent. offered by the government, the larger number benefited also by the fact that such a rate was set. The mortgages were for 30 years. The government had been strongly criticized for lending money at 6 per cent. when money was so dear; but, despite war conditions they had secured sufficient at 5 per cent. to keep on loaning it at 6 per cent., and they had no fear of the future. He urged the farmers not to listen to criticism which was never made in the open. Banks and mortgage companies would not openly criticize it, and the eastern financial papers' criticisms should be taken with the proverbial grain of salt. He urged that the government had every right to expect the support of the farmers, the very men whom such legislation was intended to benefit.

The second feature was that the long term allowed the farmer time to make other improvements on the farm, such as building himself a new home. Under the government scheme a man paid 7.265 per cent. for the thirty years and at the end of that time principal and interest had been paid, not like the mortgage companies who wanted 8 per cent. and the loan remained to be discharged at the end of the term. They had 91 loans in 110 municipalities after being in operation 21 months, three of which were spent in organization. They had made loans to over 800 farmers to the extent of an aggregate of over $2,000,000 and only 9 loans were in arrear, to the total extent of $1,200, and this would be liquidated very shortly. The plan was now on a paying basis and would show a profit at the end of this year. They had arrived at a basis of operating expenses and now knew that for every future million they loaned they would make an approximate profit of $10,000. If they could do that in war times, surely they could look for success now that peace and normal times were coming. Mr. Brown refuted the allegation that they were out to crowd the loan companies out of business. There was over $75,000,000 invested in farm loans throughout the province. "We want the loan companies to remain, but we want to restrain them. Any farmer in a sound position should be able to borrow money for current expenses at 7 per cent.," he said. The relations with the loan companies were entirely satisfactory but had it not been for his act many farmers during the war would have been paying 8, 9, or 10 per cent. in place of being able to get money at 7 per cent. "We have improved the relationship between the farmers and the loan companies, because the companies know that if they do not treat the farmer reasonably he can get his money from the government," he said. As to management, the government took no part in that whatever. It was entirely divorced from the political arena.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station, for the week ended January 17th, 1919:—

O'Brien Mine, 74,500; Buffalo Mine, 110,000; Dominion Reduction, 63,800; McKinley-Darragh, 65,471; total, 333,861.

The total since January 1st is 954,678 pounds, or 477.3 tons.

BANK OF NOVA SCOTIA TO ERECT BUILDING

The Bank of Nova Scotia will, it is understood, make preparations before long to erect a new building on the present premises at 39 West King Street, Toronto, and on property adjoining. Nearly a year ago the bank purchased the Quebec Bank property on one side and the Trust Co. premises on the other. War conditions delayed any plans for the erection of a new building, and the possibility of any immediate building activities on the part of the bank will be governed by the supply of materials and the available labor.

DOMINION BANK HAD GOOD YEAR

The annual report for the year 1918 of the Dominion Bank, which has just been made public, shows results slightly better than for last year. The following are the principal figures for the two years:—

	1917.	1918.
Balance brought forward	$ 363,442	$ 393,004
Profits for the year, less taxes	1,005,062	1,086,498
Total available	1,368,504	1,479,502
Dividends	720,000	720,000
Contributions	55,000	63,000
Written off bank premises ...	200,000	250,000
Balance carried forward	393,004	446,503

The usual dividend of 12 per cent. per annum was maintained. A substantial sum was written off bank premises and the balance carried forward was considerably larger than last year. The bank's reserve fund is $7,000,000, or $1,000,000 greater than the capital stock. The total deposits have increased by $12,400,000 to $96,107,000. Cash assets are 23.80 per cent., and immediately available assets 53 per cent. of the bank's liabilities to the public. Commercial loans during the year increased by $18,500,000. The annual meeting takes place on Wednesday, January 29th.

BANK CLEARINGS

The following are the bank clearings for the week ended January 16th, 1919, compared with the corresponding week last year:—

	Week ended Jan. 16, '19.	Week ended Jan. 19, '18.		Changes.
Montreal	$100,326,850	$ 80,606,655	+	$19,320,195
Toronto . .	64,078,478	57,197,375	+	6,881,103
Winnipeg .	40,653,052	38,516,660	+	2,136,392
Vancouver .	10,320,048	8,266,609	+	2,053,439
Ottawa	6,618,408	5,627,552	+	990,856
Calgary	5,387,100	6,420,145	—	1,033,045
Hamilton . ..	4,711,400	4,669,124	+	422,276
Quebec	4,394,549	3,853,340	+	541,209
Edmonton . ..	3,745,185	2,939,361	+	805,824
Halifax	4,391,255	3,570,824	+	820,431
London ...	2,552,194	2,293,413	+	258,781
Regina	3,366,314	2,723,871	+	642,443
St. John ...	2,562,611	2,019,807	+	542,804
Saskatoon . ..	1,798,329	1,471,337	+	326,992
Moose Jaw .	1,751,654	1,024,810	+	726,844
Brantford . .	807,612	779,226	+	28,386
Fort William	659,086	669,181	—	10,095
Lethbridge .	670,165	648,483	+	21,682
Prince Albert . .	345,734	....		......
Medicine Hat ...	384,701	510,312	—	125,611
New Westminster.	496,423	337,262	+	159,161
Sherbrooke . .	665,090	725,739	—	60,649
Kitchener	602,413	440,514	+	161,899
Windsor	1,197,934	....		......
Totals	$260,922,917	$225,311,600	+	$35,611,317

The Toronto bank clearings for the current week are $68,614,191. compared with $52,630,493 for the same week last year and $49,763,770 two years ago.

SEAT ON TORONTO EXCHANGE SOLD FOR $10,000

The last available treasury seat on the Toronto Stock Exchange was sold on January 16th to Malcom Stobie for $10,000. Mr. Stobie is the surviving partner of Cawthra Mulock and Co., and recently returned from the front. There is a bid in for another seat, but it is undecided whether the present limit of seats will be extended.

TORONTO CLEARING HOUSE OFFICERS

At the annual meeting of the Toronto Clearing House on January 16th, Mr. A. B. Patterson was elected chairman, and Mr. G. G. Adam, vice-chairman. The committee elected consists of Messrs. J. S. Skease, D. B. Cameron, W. K. Pierce, G. G. LeMessurier and D. C. Rea. The latter was chairman during the year just closed. The manager's report was presented by A. B. Barker. Toronto clearings in 1918 represented a gain of 12½ per cent. over 1917, 31 per cent. over 1916, 74 per cent. over 1915, and 67 per cent. over 1914.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	2 3-64 pm	2 5-64 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	4.8555	4.8575	4.87½
Cable transfers	4.8645	4.8660	4.88½

Rate in New York—Sterling, demand, 4.7580.
Bank of England rate, 5 per cent.

MIDLAND LOAN AND SAVINGS COMPANY

The earnings of the Midland Loan and Savings Company for the year 1918 amounted to $89,280. This when added to the balance brought forward from the previous year gave a total available for distribution of $110,754. Interest on deposits and debentures absorbed $37,192, dividends $28,800, and $10,000 was transferred to the reserve fund. The balance carried forward is larger than last year.

This company, of which Mr. Walter J. Helm is manager, is a long-established financial institution in one of the old and wealthy sections of Ontario, and now has assets totalling $1,536,909.

CANADIAN NORTHERN EQUIPMENT TRUST CERTIFICATES

William A. Read and Company, of New York, are offering equipment trust 6 per cent. gold certificates of the Canadian Northern Railway issued under the Philadelphia plan. These notes are dated January, 1919, and are authorized to a total of $7,500,000. They are due in semi-annual instalments of $375,000 each from July 1st, 1919, to January 1st, 1929, inclusive. They are in coupon form with provisions for registration of principal. Dividends are payable first January and July in Philadelphia.

These certificates are issued against new railway equipment costing $10,716,914, and the Canadian Northern now being owned by the government of Canada, they are now obligations of the Dominion. Moreover, under the provisions of the statutes here the rentals payable by the company under the lease of the equipment pledged rank as a working expenditure of the railway and constitute a claim against the railway company's earnings prior to both principal and interest on its mortgage debt.

PROVINCIAL UTILITY BOARDS USEFUL

The appointment of a public utility commission is being recommended by the federal finance department to provinces in the Dominion. Alberta and Manitoba are the only ones that have yet taken steps to safeguard the public in this way, and with the removal of certain restrictions on bond selling and new corporation issues, which have been in force during the war, it has been found desirable to provide some other protection for the public. The provinces that have not made such provision on their own account are being asked by the minister of finance, according to advices from Ottawa, to introduce legislation that will serve as a safeguard against issues of speculative and worthless securities.

The control of municipal and utility financing by a provincial commission is the best system which has as yet been devised for use in Canada. In the first place the provincial government is responsible for the formation of municipalities and exercises supervision over them. It is, therefore, most familiar with their business and is in the best position to judge upon the soundness of a municipal scheme. In the west, where many of the public utilities are operated by the municipalities, utility financing is synonymous with municipal financing, and the board has to be familiar with both classes of project.

An alternative method of financial control on the part of the Dominion government has been recently discussed. This is a development of the supervision over security issues which was exercised by the Department of Finance from December, 1917, until recently. This was, however, purely a war time measure and was aimed at conserving finances for the use of the Dominion Government. Any permanent measure must have an entirely different purpose of aiming at the financial solvency of municipalities and corporations. Such supervision does not entirely do away with the necessity for discrimination on the part of investors and bond houses, for such boards would without doubt have shared in the general optimism in Western Canada which prevailed about 1912.

REHABILITATION

While governments in Canada, both Federal and Provincial, and municipalities as well, are announcing plans for the rehabilitation of the returned soldier, complaints are at the same time heard that little or nothing is being done for his assistance. This is a result of duplication and this duplication in some ways promises to work to the disadvantage of the returned soldier. Many will, through the offer of lands and loans on easy terms, be persuaded to engage in agriculture, an occupation for which they have probably no inclination and which they are not competent to exercise without previous experience. No one should be encouraged to assume a debt of several thousand dollars, in the face of declining prices of farm produce, unless he has experience and some private capital. The system of vocational training whereby men are educated in handicraft and clerical work, is better suited to the needs and preferences of the vast majority of returning soldiers.

A recent announcement states that Mr. W. F. O'Connor, K.C., has been appointed special counsel to co-ordinate the efforts of federal and provincial bodies in this direction. As the Federal government lands suitable for the soldiers are not sufficient, provincial Crown lands in provinces east of Manitoba will have to be made use of to round out the government's plan, and in some cases privately owned lands where these are not already put to use. To prevent conflicts of jurisdiction, and to secure the ends in view, it is desired that Federal and Provincial legislation shall be harmonious in accordance with discussions at the Provincial Premiers' conference in Ottawa in November. This necessitates continual conference in preparing legislation by both federal and provincial bodies.

UNEMPLOYMENT PREVALENT IN CITIES

The Honorable A. K. MacLean's recent campaign of optimism has not sufficed to satisfy the people in Canada that the amount of unemployment is quite insignificant. The fact that the newly established employment bureaus are appealing to the provinces and municipalities to proceed with public works is sufficient indication of the actual conditions that prevail. This is a condition which will remain with us for many months to come, although it may be relieved to some extent by a good harvest and by a vigorous policy on the part of provincial and municipal governments. Money rates have already become much easier and long-term bonds are now to be floated at a price, which while not as favorable to the borrower as prices of the pre-war years, yet is very high compared with that which prevailed last year. Many civic and provincial works have become extremely urgent, and the existence of comparatively cheap money, and an ample labor supply at reasonable wages should be sufficient stimulus for construction without the necessity of any patriotic move. It should, however, be thoroughly recognized that only works of unquestioned value should be proceeded with, and also that there are some municipalities, particularly in the west, which are absolutely not in a position to indulge in capital expenditures of any kind for some years to come.

The Canadian Reconstruction Association has taken a firm and intelligent stand on this subject through a letter sent by its president, Sir John Willison, to municipal councils and boards of trade in Canada. Sir John maintains that the city should proceed with a vigorous policy along these lines. While action of this kind on the part of the association merely shifts responsibility elsewhere, nevertheless, it is of value in as much as the officers of the organization have made a thorough study of reconstruction topics and their recommendations are worthy of careful consideration.

The letter says:—

"It is imperative that employment should be provided, that the labor market should not be congested, that war veterans and war workers should find steady employment, and that fair wages should be maintained. The Dominion is undertaking extensive public improvements. The railway companies have announced large construction policies. Many industrial companies are preparing programmes which will involve an expenditure of millions of dollars. But there is a direct responsibility upon each municipality for the welfare of its men who have given vital service overseas and in particular war occupations. Failure to provide employment will not only result in distress and misery to individuals but it will disorganize the labor market, lower municipal revenues, produce industrial and commercial depression and affect national prosperity. Municipalities throughout Canada have made great war sacrifices. If there is failure to meet the difficulties of the reconstruction period much of the value of these sacrifices will be lost, while if the country can be carried safely through the next twelve months it will likely enter upon a long period of expansion and prosperity. A maximum of municipal activity will facilitate readjustment. Without it, conditions will be difficult and may be critical. The Minister of Finance has removed restrictions upon municipal borrowings and steps may now be taken freely for financing public works.

"The Canadian Reconstruction Association respectfully appeals to all Canadian municipalities to provide for local improvements by the resumption of public works. It is suggested that a survey be made in each municipality, in co-operation with local business men, of projected building operations which have been delayed by the war, and of other necessary construction work which can be started without delay. A well-considered programme could then be prepared in each municipality and put into effect. It may be that in many cases municipal construction plans will not have to be carried out in full, but the fact of having adequate works under way will serve as a valuable measure of insurance against possible unemployment or a serious collapse in wages."

PROVINCIAL BANKING SYSTEMS PROPOSED

A resolution to the effect that Canadian provinces should be authorized to establish and operate provincial banks, with power to receive deposits, make loans and do a general banking business, has been prepared by Messrs. Ball, Leedy and Sheppard, of the United Farmers' Association. These members constitute a committee recently appointed to investigate the question of farm loans on the New Zealand plan. In submitting this resolution they recognize its importance, and advise that political action will be necessary in order to obtain action on the part of the Dominion government.

"Don't forget the big interests are determined to prevent us from handling our own money," says Mr. W. R. Ball, writing in the Grain Growers' Guide. "You see, when 1 per cent. pays for operating the loans, the spread from 3 per cent. to 8 per cent. is too good for the big interests to let go without a fight." They say a copy of this resolution should be mailed to every member of the provincial and Dominion governments, asking them to support it and demanding an answer. The resolution reads as follows:—

"Whereas the present system of chartered banks is not able to meet satisfactorily the credit requirements of the agricultural industry;

"Therefore, be it resolved that the convention recommends, in the interest of agricultural development, that the present banking system be supplemented by a system of unit banks under provincial charter, regulation and control, with a minimum requirement of $10,000 paid-up capital, and with power to take deposits;

"And, further, we recommend that the Bank Act of Canada be amended to give the provincial legislature full power to issue charters for banks as are here described."

These arguments are not arguments against large banks but rather for the creation of small banks to supplement the work of the larger ones. It would seem that the Canadian system is maintained to be exactly the reverse of what the United States banking system was before the Federal Reserve banks were put into operation. The United States banks were local and isolated, and the country lacked larger institutions which could act as distributors of funds over the extensive areas. Canadian banks are now said to exercise this function too thoroughly. They withdraw funds from wealthy sections of Canada, such as Western Ontario, where money rates are comparatively low, and loan them for commercial use in cities and for the use of farmers throughout Canada. Moreover, these larger institutions are the only ones which are in a position to promote export business and to provide the financial facilities for securing to Canadian traders a share of foreign business.

There still remain several banks in Canada which are comparatively small. Whether efforts will be made towards the absorption of these by larger banks remains to be seen. Actual experience, however, demonstrates the fact that the larger Canadian banks serve the small community just as well as the small banks, and in addition, they are able to carry on business abroad, as several of them already do, better than can the small banks.

The discovery by the Stefansson exploration party of great herring fisheries in the far northern waters of Canada is announced in a statement which was issued through the Naval Department on January 17th.

The Grand Army of Canada will open co-operative stores in Toronto within the next few weeks, and if the venture meets with the success the association anticipates, others will be opened throughout the province.

NEWSPRINT PRICE APPEAL

Manufacturers Want Prices Raised to $80—Publishers Think $50 Sufficient—Long Argument Before Tribunal

The Paper Control Tribunal resumed its sittings on January 8th, to hear the appeal from the award of $69 per ton fixed as the price of newsprint in Canada by Commissioner Pringle last September. This price was retroactive to January, 1918. The manufacturers maintained that a price of $80 per ton, retroactive to January, 1918, is necessary to provide a reasonable profit to mills operating at high cost, while the publishers argued for a price of $50 per ton, contending that this would give the manufacturers a larger profit than they realized before price fixing was adopted.

Mr. W. N. Tilley, K.C., council for the publishers, presented his case for three consecutive days, January 8th, 9th and 10th. The tribunal then adjourned until Monday, January 13th, when Mr. Tilley concluded his arguments. Figures were produced by the publishers to support their claim that at the price awarded by Commissioner Pringle, some companies made exorbitant profits. They mentioned the Laurentide Co. as making a profit of 86 per cent. a ton; the Booth Co., 89 per cent., Price Brothers, Ltd., 76 per cent.; Donnacona, 74 per cent. and Fort Francis, 68 per cent. Mr. Tilley maintained that the companies had exaggerated their costs through the inclusion of items such as stumpage, sinkage and so forth, by charging a profit on various stages of the process of making wood into newsprint, and by averaging costs over articles of different prices so that a price unfair to one or both of them was sure to result. With regard to the $8 per ton increase in cost allowed the mills by Commissioner Pringle from January 1st, 1918, the publishers made a comparison using the Laurentide Mills as an illustration. They stated that the average cost for the first six months of 1918, as found by Mr. Pringle, was $44.98; the July cost as per report from government auditor Clarkson, was $59.44; the August and September costs, as derived from the same source, were $44.06 and $46.74, respectively.

Claim Profits Too High

The publishers also opposed the manufacturers' claim that from 15 to 20 per cent. should be allowed as a return on capital investment. It is pointed out that the business is not a hazardous one and if large profits remain in the business, the value of the shareholders' investment is correspondingly increased.

Mr. Pringle had allowed the Fort Frances Mill a special price because of its unusually high costs. The publishers claim that no such an allowance should be made as this mill is owned by an American company and its high costs, they say, are due to the diversion to the American mills of this company of power and water which should have been used on the Canadian side.

Manufacturers' Case

The case for the newsprint manufacturers was commenced on Monday, the 13th inst., by Mr. Victor E. Mitchell, K.C., and was continued by Mr. G. H. Montgomery, chief council for the paper mills. The manufacturers entered the plea that export trade makes the business one of great importance to Canada, and asked that Mr. Pringle's price be increased rather than reduced. In this connection they point out that Commissioner Pringle, in fixing the price of $69, declared that he had not made it as high as he might have on the evidence before him and before the United States Federal Trade Commission. The cost reported by the commissioner is average cost not actual cost, and the result is that some of the higher cost mills are obliged to sell their product at a figure which is commercially impracticable and they would not be able to stay in business were they not engaged in the manufacture of products other than newsprint. They also object to the action of the United States court in refusing to allow for stumpage in respect to wood from leased Canadian crown lands, although $2 per cord is allowed for wood cut on owned land. As to depreciation, the manufacturers asked that the United States accountants' method of charging $3.20 per ton of newsprint paper be accepted. Canadian manufacturers have inaugurated this system of charges in recent months.

The hearing continued until Wednesday, January 22nd, when the enquiry came to an end. The decision of the tribunal has not as yet been announced.

IMPERIAL GUARANTEE AND ACCIDENT COMPANY

The following is a comparative statement of the business of the Imperial Guarantee and Accident Co., of Canada, Toronto, for the years 1917 and 1918:—

	1917.	1918.
Balance brought forward ..	$ 86,031	$ 87,560
Number policies issued	18,096	18,626
Amount of new business ..	$35,165,701	$37,174,370
Premiums (new and renewed)	310,657	362,785
Interest earnings	19,539	20,516
Assets	478,031	481,584

The available security for all contracts is now $1,098,139, as compared with $1,112,560 last year. The contingent reserve fund which was formerly $25,000 has now been reduced to $10,000. The government reserve for unearned premiums and the reserve for filed and unfiled claims, however, have increased by over $17,000.

GUARANTEE COMPANY OF NORTH AMERICA

Results for the year 1918 of the business of the Guarantee Company of North America, Montreal, as compared with those for the previous year are as follows:—

	1917.	1918.
Premiums	$ 379,307	$ 374,634
Interest and rents	119,562	117,714
Income for year	498,870	492,349
Expenses, reinsurance and losses	301,664	332,074
Dividends to stockholders ...	36,260	36,552
Net expenditure	338,216	368,626
Balance	2,247,690	2,291,582
Assets	2,166,859	2,292,497

The company has adhered to its policy and methods in underwriting fidelity bonds and some classes of surety bonds. This company, as is well known, continues to be independent of the tariff combination and associations in United States and Canada, and is guided entirely by its own experience. The net amount of risk in force at the end of the year was $130,281,526, and the total claims paid since the establishment of the company in 1872, amounts to almost $3,000,000.

TRUSTS AND GUARANTEE COMPANY

The following comparative statement of the principal figures in the profit and loss account of the Trusts and Guarantee Company, Toronto, illustrates the result of the company's business in 1918 as compared with the previous year.

	1917.	1918.
Balance brought forward	$416,370	$441,141
Net profits after deducting cost of management, etc.	107,966	107,543
Dividends	83,195	83,441
Balance carried forward	441,141	465,244

The net profits are, it will be observed, slightly lower than in the case of the previous year, but the balance carried forward is substantially greater. The company's assets now total $20,473,199, of which $2,507,000 are on capital account, $5,182,000 guaranteed trust account, and $12,783,000 estates and agencies account. During the year the volume of estates and agencies increased over three and a half millions of dollars. The company's 22nd annual meeting will be held at the head office in Toronto on Friday, January 31st.

RECONSTRUCTION IN INDUSTRIAL LIFE

Representatives of Capital, Labor and Agriculture Speak at Social Welfare Congress

Reconstruction in industrial life, was the subject of addresses given by representatives of Capital, Labor and Agriculture, at the afternoon session of the Social Welfare Congress in Toronto on January 16th. The speakers were Mr. S. R. Parsons, ex-President of the Canadian Manufacturers' Association; Mr. Tom Moore, President of the Trades and Labor Congress, and Mr. W. C. Good, B.A., farmer.

Mr. Parsons, who was the first speaker, took the stand that industrial reconstruction must have for its working basis the closer relationship between employer and employee for the mutual benefit of both. But he said that before this could be accomplished, as a starting-off place for further progress, each must be willing to make certain concessions that would reconcile personal liberty to social advancement. He advocated joint committees composed of employees and employers by means of which problems affecting both could be discussed and adjusted.

The speaker took a firm stand for a high tariff wall in Canada. The farmer's cry of "Smash the tariff!" he declared, would, in his opinion, throw out of work one-half of the labor employed in the industries of Toronto. The country, he held, could never be expected to pay increased taxation with a decreasing revenue; but, he said, "I would certainly be in favor of some form of direct financial assistance to farmers in order to aid our agriculturists to become prosperous and contented." He believed that there was a great need for a more proportionate representation of the manufacturers, labor and agriculture in the legislatures of Canada.

Want Shortening of Working Day

Mr. Tom Moore referred to the fact that during the war a law had been passed making idleness a crime, and held that it was equally possible to supply work for all under peace conditions. One of the remedies for unemployment put forward by Mr. Moore was the shortening of the working day. In many cases manufacturers in Canada still maintained a 10-hour working day, while progressive industries had found that a man was not capable of giving his best to his work if driven over the eight hours. In Switzerland, he pointed out, a law had been enacted whereby no employer might lay off a workman for lack of work unless the hours of work had been reduced to each workman beyond a certain point. If the reduction in working hours did not exceed 10 per cent., then the workman bore a portion of the loss, but if reduced less than that the employer received compensation from federal and local governments.

If an eight-hour working day were established in Canada, the conditions thus created would absorb 10 per cent. of the present unemployment. The prosperity of the country was based upon production, not upon the capacity of workmen to work 10 hours.

What the workers wanted, he said, was: Shorter hours, free education for all, free text books, direct legislation by the people and not by means of orders-in-council, and protection for mothers that would take them from the factory to the home and give them back their children, now being taken care of by charity and in institutions.

Mr. W. C. Good, B.A., spoke for greater co-operation between all classes of society, and challenged Mr. Moore to send some of his unemployed out to his farm, where they were badly needed. The farmer, he pointed out, combined in the individual the land-owner, the capitalist and the laborer. He looked forward to the day when every person might become a land-owner through the expropriation of unearned increment.

Democracy, he said, was to be found in its purest state on the farm, where the employer and the employee labored side by side. Here social injustices did not exist, and social injustices, he contended, were the cause of anarchy, unrest and Bolshevism. He gave for his solution of industrial problems: Public ownership of public utilities, development of voluntary co-operation, equality for all and special privileges for none

THE RIGHTS OF CAPITAL

That capital was entitled to its just reward was a statement made by Rev. Father Minehan, of St. Vincent de Paul's Catholic Church, before a large gathering at the People's Forum, St. George's Hall, Toronto, on January 19th, and which was opposed strenuously.

Father Minehan held that money was but one phase of capital, and that in its wider meaning capital stood for the proceeds of past labor stored up for use in further industrial development. He held that the man who first made for himself a bow and arrows was a capitalist, and that the food which he procured by means of these weapons was his legitimate right, or a capitalistic right. It was on this point that he met his greatest opposition, his opponents holding that until the primitive man made a number of bows and arrows and rented them out he was not a capitalist.

In spite of protests that capital had no rights, the speaker stoutly maintained that capital was the energy which animated industry, and that capital had the right to what it had put into industry, and certain remuneration besides, in order that more capital might be created for the animation of further industry.

HYDRO COMMISSION WANTS REBATE OF DUTY

Within the last few days Sir Adam Beck, chairman of the Hydro-Electric Power Commission of Ontario, and other officials, have been actively pressing their case for rebate of duty paid on equipment during the past three or four years on several of the Dominion ministers. Thus far no reply has been made, but not the slightest encouragement has been given the Hydro officials.

The duties which the Hydro has paid, and which it is now asking a refund of, date back to the commencement of the Chippawa Canal power development scheme. As far as possible the commission bought its equipment in Canada. There was much machinery, however, that could only be obtained in the United States. Because of the war the prices were higher, and at the 42½ per cent. duty charge the commission has paid approximately $2,000,000 into the federal treasury. In addition to the machinery bought for use on the Chippawa scheme, equipment was bought for Eugenia Falls, Trent Canal and other development works. Some of it was also for use on the Ontario Power Company extension, which is being put in for temporary use.

TRADE FIGURES SHOW DECREASE

Trade figures for the nine months of the fiscal year, or up to December 31st, show that the total of Canadian imports and exports is $379,405,186 less than it was after a similar period in 1917. For the nine months of the fiscal year the total of Canadian trade was $1,676,006,825, while in 1917 it amounted to $2,055,412,011. For the month of December alone the decrease amounted to $28,551,923, the 1917 total being $212,521,710, and the 1918 being $183,969,787.

The figures show that the falling off in trade is due largely to a decrease in the export of domestic merchandise. The decrease in domestic merchandise exported for the nine months, when compared with a similar period last year, totals over $310,000,000. At the end of December, 1917, the total exports of this class of goods was $1,257,684,900, while this year it was $947,257,356. Import figures show a decline of $55,576,947 during the nine months as compared with 1917.

A great decrease in the export of domestic agricultural products during the fiscal year is largely accountable for the lower trade figures. During the nine-month period which closed on December 31st of the last year this class of goods had been exported to the value of $228,149,278. For 1917 for the same period the total was $475,338,003. Exports of domestic manufactured articles show a decrease of $84,008,824, the figures for 1917 being $522,963,430 and for 1918 $438,954,606.

GOVERNMENT'S ACTIONS QUESTIONED

New Central Liberal Association of Ontario Discusses Tariff, Railway Nationalization and Other Industrial Problems

The tariff question is one which apparently cannot be side-tracked any longer and aggressive action is being planned both in the west and in the east. It has been discussed at all recent meetings of the farmers of the west, and the newly formed Liberal Association of Ontario is also preparing to assail the Union Government programme. The Central Ontario Liberal Association was organized in Toronto at a meeting held on January 21st. The Hon. G. P. Graham, of Brockville, publisher of the "Brockville Recorder," and ex-minister of railways and canals, declared that the government repatriation and reconstruction schemes up to the present were mostly on paper. He said the government should see that widows and orphans of soldiers who gave their lives did not lack for any good thing, that those who came back disabled must be well cared for and that the men who come back fit for work must have a fair field, because they didn't want any coddling.

Nor did the industries of Canada need coddling, and the tariff could be revised downward without injuring any legitimate manufacturing concern that ought to live in Canada. Burdens on the men on the land and in the shop must be removed.

Mr. Graham vigorously criticized the legislation which exempts from taxation the income from Victory bonds. He knew men in Canada who had over a million dollars invested in these bonds, and they were exempt from taxation, while men employed by them who had a salary of the same amount had to pay income taxes on that salary. The rich folk were escaping the income tax by putting their money into Victory bonds, the best investment in the world.

Several resolutions were discussed at the afternoon session. These included facilities for increased export of Canada's products and a demand for the immediate removal of the war tax of 7½ per cent. and 5 per cent. respectively on imports; a request for an investigation into the government purchase of the Canadian Northern Railway; a proposal to abolish appeals to the Privy Council and a demand for the immediate repeal of the orders-in-council.

Several resolutions were passed dealing with industrial and financial questions. One dealing with the tariff, which was moved by F. W. Fisher, of Burlington, and seconded by A. E. Annis, of Orangeville, reads:—

"Resolved, by the Liberals of Central Ontario, that a full investigation be held to probe the affairs of the Canadian Northern Railway, to find out and make public all the facts relating to the negotiations for the sale and purchase of this road; the names of those who benefited directly or indirectly by the sale and purchase of this road; the names of those who dealt in its London securities before the unexpected purchase of the road was announced, and all surrounding facts and circumstances in any way relating thereto."

In supporting his resolution Mr. Hall said that Canadian Pacific Railway stocks, which sold at 220 before the war, dropped to 157 on the declaration of war, although it paid 10 per cent. all through the war. Still Canadian taxpayers are being called on to pay face value for $147,000,000 in unsecured Canadian Northern Railway bonds, a property that was falling behind at a rate of about $10,000,000 a year. "These bonds, I am told, were being sold at 37 cents in London before the line was taken over," said Mr. Hall. "Who profited by the difference between 37 cents and $1?"

The resolution on constitutional development was moved by W. D. Gregory and seconded by James R. Lindsay, Georgetown.

Mr. Gregory, in dealing with the proposed abolition of appeals to the Privy Council, said that the late Premier Whitney once proposed in the legislature to abolish such appeals, but the proposal was not pushed. Later on the Premier was Knighted and nothing more was heard of the proposal.

A resolution on industrial problems was moved by Dr. E. L. Denard, Owen Sound, seconded by E. H. Cleaver, Burlington. It said in part:—

"We recommend the holding of conferences between employers and employed at which there may be an exchange of views and a statement of difficulties, and each side may thus be enabled to see things from the other's standpoint. Let us have democracy in industry as well as in government."

ROYAL SECURITIES CORPORATION CHANGES

Royal Securities Corporation, Limited, announces the appointment as assistant manager of its sales department, of Norman S. Brooke, effective from February 1st, 1919. Mr. Brooke has been connected with the Corporation in this department for a number of years.

Mr. Arthur D. Emory, for several years advertising manager of the Sun Life Assurance Company of Canada, has entered the Corporation's service as manager of the publicity department.

EXCELSIOR LIFE PASSES FIVE MILLION MARK

The total assets of the Excelsior Life Insurance Company of Toronto as indicated by the statement for the year ended December 31st, 1918, are $5,210,841. Included in this amount are $961,500 of long-date war loan bonds. The average rate of interest earned for the year was 6.72 per cent., or almost double the rate required to provide for policy reserves. The surplus on policyholders' account is $733,979.

The applications received for new assurances were the highest in the history of the company; a total of $6,438,056 was issued, bringing the amount in force to $26,842,976. Premiums less reassurances amounted to $909,306 being an increase of 14 per cent. over last year. Total receipts amount to $1,207,316. The amount paid to policyholders totalled $869,567, or about 95 per cent. of the premium income.

The Imperial Bank of Canada has opened a new branch at the south-west corner of Queen Street and Carlaw Avenue, Toronto.

THE TARIFF AND CUSTOMS ISSUE

To be Discussed by Saskatchewan Legislature During Present Session

Reductions in the tariff and customs duties on articles used by the farmers, the acceptance of the reciprocity agreement, special trade concessions to the Old Country and other matters relative to the tariffs are to be discussed by the Saskatchewan provincial legislature during its present session.

Murdo Cameron, M.L.A., submitted a resolution to the assembly on January 17th, urging the federal government to pass legislation dealing with these various matters at the coming session. The resolution reads in part as follows:—

"Whereas the basic industry of Canada, and especially of Saskatchewan, is agriculture, and the rapidly increasing surplus of such products means that for many years to come the prices received for them will be regulated by world prices, whether sold within or without Canada, the result being that the agricultural industry carries all the burdens of the tariff without receiving any of its benefits; and

"Whereas the high cost of living, which is largely the result of said tariff, bears upon our citizens, both rural and urban, to such an extent as to gravely jeopardize the financial ability of our people to bear the ever-increasing load; and

"Whereas, in the opinion of this House (especially in view of our large national debt) the most urgent necessity of our Dominion is that of speedily and largely encouraging and increasing the Dominion's annual volume of natural products, which involves a speedy and large increase in agricultural population; and

"Whereas our soldiers have heroically and at great self-sacrifice, in common with their comrades of all allied armies, achieved for us a signal victory and preserved for us and our children the blessing of Christian civilization and are now returning to us and will in very many instances resume or begin the business of agriculture, and deserve every consideration, encouragement and fair play; and

"Whereas our railways, which have in a large part become the property of the nation, will be successful only to the extent to which the country is developed and prospers and thus provides profitable business for such railways; and

"Whereas the present unjust and unrighteous tariff has resulted in the creation of trusts, mergers and combines and the common people generally have been outrageously exploited; and though pleasing to a favored few, the present fiscal policy is absolutely to the detriment not only of our province but of our country as a whole, and suicidal to our real development as a democratic nation;

"Therefore be it resolved, that in the opinion of this house it is the duty of the government of Canada at the coming session of parliament to introduce legislation which shall have for its effects the following:

1. An immediate and substantial all-round reduction of the customs tariffs.

2. The reduction of the customs duty on goods imported from Great Britain to one-half the rates charged under the general tariff and that further gradual uniform reductions be made to the remaining tariff on British imports that will ensure complete free trade between Great Britain and Canada in five years.

General Reduction in Duties

3. The acceptance by the parliament of Canada of the reciprocity agreement of 1911, which still remains on the United States statute books.

4. The placing upon the free lists of all foodstuffs, not included in the reciprocity agreement.

5. The placing on the free list of all agricultural implements, farm machinery, vehicles, fertilizers, coal, lumber, cement, illuminating fuel, and lubricating oils, and all raw materials and machinery used in their manufacture.

6. The immediate extension to Great Britain of all tariff concessions granted to other countries.

7. The obligation upon all corporations engaged in the manufacture of products protected by the customs tariff to publish annually comprehensive and accurate statements of their turn-overs and earnings.

8. The public hearing before a special committee of parliament of every claim for tariff protection by any industry."

GUARANTY TRUST COMPANY

The figures given on another page of this issue illustrate the magnitude and extent of the business conducted by the Guaranty Trust Co., of New York. This is a summary of the company's position as at the end of the year 1918. In addition to performing the functions of a trust company, as we in Canada understand them, this company does a commercial banking business, as is indicated by the fact that the largest item among the liabilities is the total of deposits. The company's capital is $25,000,000 and its surplus is an equal amount.

The investments comprise commercial discounts, government and municipal securities, foreign exchange, etc. The company's offices are located in New York, London, Paris, France, and Tours, France, and its business is practically world-wide in extent. The growth of the great banks of the world has not only continued during the war, but their growth appears to have been greatly accelerated during this period.

The Guaranty Trust Co. is a conspicuous example of what able and far-seeing management brings to an institution of this character. Total resources of $775,493,531 are shown by its last statement, with deposits totalling $583,786,091. Comparison of these figures with the statement of one year ago shows an increase of $114,748,235 in resources and of $49,504,015 in deposits. In January, 1915, when Charles H. Sabin became president of the Guaranty Trust Co., its total resources were somewhat over $269,000,000, and its total deposits a little over $211,000,000.

NEW WAR SERVICE GRATUITIES

The office of the Ministry of Overseas Military Forces of Canada in London has issued a statement regarding the demobilization of Canadian troops overseas, and the new scheme of substituting the old post-discharge pay by the system of war service gratuities on a sliding scale in accordance with the length of service.

Provision is also made for the return to their homes in Canada at government expense of all dependents of all officers, non-commissioned officers and men of the Canadian Expeditionary Force sent to Canada for demobilization.

The schemes of war service gratuities and the return of dependents are retroactive, that is, all ranks who have already been discharged in Canada prior to November 11th, 1918, and have served at the front in an actual theatre of war, will be placed on the same basis as those still to take discharge, and all dependents who paid their passages home since November 11th will have the fare refunded.

The statement gives in detail the gratuities to be paid, showing that men of three years' service and over, with dependents who received separation allowance, will receive $600 in all; those of two years' service and over, $500; those of one year and over, $400; and those of under one year, $300. Soldiers without dependents receiving separation allowances will receive gratuities as follows:—

Three years' service and over, $420; two years' service and over, $350; one year's service and over, $280; under one year, $210.

Officers and first-class warrant officers will receive the same gratuities as are provided for other ranks at their respective rates of pay.

A Victory Bond interest table, showing the accrued interest on war loan 5 and 5½ per cent. bonds for periods from one day to six months has been issued by A. E. Ames and Co., Toronto.

A Few Practical Accounting Questions

How Many Can You Answer?

1. What is the self-balancing system of accounts?
2. What is a Deficiency Account?
3. What is the best method of treating petty cash?
4. What is the difference between fixed and current assets?
5. What is the difference between a balance sheet and a statement of assets and liabilities?
6. Is goodwill a fixed asset?
7. What are the advantages of a Departmental Trading Account?
8. Can you explain the difference between current and fixed liabilities?
9. Is a Depreciation Reserve a liability?
10. What are the two main objects of an accounting system?
11. What is Burden?
12. What is meant by Expense Inventory?
13. What is a contingent asset?
14. What is the relation between cost accounts and the general ledger?

If you cannot answer these questions with a full appreciation of the values involved, you cannot seriously consider yourself an accountant.

You Could Answer them if You Had Studied the Accounting and Business Administration Courses of the

Cooper Institute of Accountancy, Winnipeg

LIFE INSURANCE FOR IMPAIRED RISKS

Suggested Scheme of Insurance for Disabled Soldiers—Combination of Private and State Insurance

By L. M. Bidwell

Among the many "after-the-war" problems to be solved, one of the most important is the question of insurance for disabled soldiers. There are already in the Dominion a large number of men, whose lives have been impaired to such an extent that either they are uninsurable, or the rate that they would have to be charged for adequate protection would be prohibitive. The number of such men will be largely inincreased in the course of the year.

There are on foot various schemes for taking care of the dependants of soldiers who die as a result of war service. But no scheme has yet been suggested which makes adequate provision for the dependants of soldiers who die from some cause not directly traceable to service. It is true that under certain conditions a pension is allowed, but it is fully recognized that these pensions are not adequate to make proper provision for the family, and it is doubtful if they could ever be made so.

Furthermore, it must be recognized that every husband and father fully realizes his responsibility towards his family, and is anxious to discharge that responsibility if it is within his power to do so, quite apart from any action that the government may take on his behalf. This is a point of view which should receive the fullest encouragement, not so much from the fact that it lessens the burden of the state, as from the fact that it adds to the self-reliance and confidence of the man himself. It was for this very purpose that the institution of life insurance was founded, and the problem is to devise some method by which the benefits of life insurance can be extended to those men who, by reason of their physical disability, are unable to secure it in the ordinary way. There are two avenues through which such insurance might be secured: First, by the establishment of a government scheme of insurance for returned soldiers; second, through the medium of the existing insurance companies. Let us first consider the question of government insurance.

Government Insurance Not Popular

Experience has shown that wherever government insurance exists it has succeeded in reaching only a small proportion of the people which it is intended to benefit, and has merely had the effect of increasing the business done by private companies. Various causes may be cited as contributing to the relative unpopularity of state insurance. It lacks those features which make insurance attractive to the people as a whole, features which have been incorporated from time to time into the policies issued by private companies, as a result of the keen competition existing among them. It makes unnecessary stipulations and conditions, which tend to stultify its benefits, as in the case of certain phases of our own civil service insurance. It fails to take into consideration the fact that insurance is sold and not bought, and seldom realizes the necessity of building up an efficient organization to undertake an aggressive selling campaign. This was strikingly illustrated in the early stages of the United States government soldier insurance. In a word, it lacks the human element, the element of individual service, that appeal to the sentimental side of human nature which is the very essence of life insurance, and which is seldom present in the administration of a government department. For these, and many other reasons, government insurance has never enjoyed the popularity and success attained by private companies, and probably never will.

Now, suppose the government were to inaugurate a department of insurance for returned soldiers, what would happen? The sound lives would hold back, as they always have held back, until induced by some skilful agent to take out a policy in a private company. The impaired lives would perforce seek their protection through the government, with the result that a prohibitive rate would have to be charged, or a heavy loss incurred in the handling of the business. It is true that if all returned soldiers were compelled to place their insurance through the government the system might be conducted on a sound financial basis. It is evident, however, that compulsory insurance would be highly unpopular, and would create universal resentment.

State Could Supplement Premiums

Now, let us turn to the other source, and see if there is no method by which the business could be satisfactorily conducted by the existing companies. It is quite obvious at the outset that these companies could not, unaided, insure disabled men at standard rates without seriously undermining their financial stability. It would, however, be quite possible for them to insure every disabled man, subject to the charging of a rate commensurate with the mortality risk. Then, why not get together and work out a co-operative scheme, by which the burden would be equitably distributed between the government, the companies and the disabled man? Let the companies assume the handling of the business, let the man pay the standard insurance rate, and let the government pay to the companies the additional premium required to cover the increased mortality.

An insurance bureau could be established at Ottawa, consisting of representatives of the government and of the insurance companies, including the necessary medical and actuarial staff. Applications, together with medical examination, would be received from disabled soldiers, either direct or through the various insurance companies. The probable mortality would be estimated, and the additional premium required to cover the risk would be computed. The various risks would be distributed proportionately among the different companies, the applicant would pay the regular premium, the additional amount required being furnished by the government. The business would be handled on a non-participating basis, and would be kept by the companies in a separate class, as is done by many companies which accept sub-standard risks. At stated intervals a computation could be made of the cost of carrying the business, and the excess, if any, returned to the government. Policies would undoubtedly have to be issued subject to certain restrictions. There would probably have to be a condition as to the class of policy available, though there seems no reason why a "whole-life," or a "limited-payment life," should not be granted in the majority of cases. There would have to be a limit to the amount of insurance that would be granted, based, perhaps, upon the number of dependants. It might be desirable to provide for the proceeds of the policy to be paid in instalments, as in the case of the United States insurance. Provision might be made that in the event of a man surrendering his policy, the cash surrender value would revert to the government, up to the amount that the government had advanced on the policy. All these, and many other details, could be very readily worked out.

Should be no Duplication

At the present time, we have in Canada forty-five active life insurance companies, completely equipped to handle every detail of the business. Why not make use of these organizations, with their capable staffs, to help out our disabled men in a business-like way? Let it be noted that even this insurance would have to be sold in the majority of cases, and we have here at our hand an organization of salesmen, which could not be duplicated except at enormous trouble and expense. Arrangements could very readily be made to train returned soldiers, and place them in the various offices, for the purpose of specializing in this phase of the business. The existing rates allow for the payment of a commission which, though usually not very large in the case of non-participating business, is sufficient to enable a man to earn a good living. The vocational training schools could be made a medium of instruction, to familiarize the disabled men with the proposal, and show them the manner in which they could take advantage of it.

Probably the item of most interest to the government in considering a proposal of this nature, is the question of cost. This would be a difficult matter to estimate, but, perhaps, some idea of it may be obtained in round figures. Suppose 50,000 soldiers were to take an average policy of $4,000—a very liberal estimate in both cases; suppose these 50,000

We Take Responsibility

When a man or woman finds himself or herself unexpectedly burdened with financial responsibility, or with the care of an estate, it is a relief to know that the Toronto General Trusts Corporation will take this responsibility and is qualified and authorized to administer their finances or their estate in their stead with the utmost efficiency.

Full particulars and literature on request.

men had an average impairment in their lives of one-third. Figuring that their average age is 30, it would require an additional premium of about $10 per $1,000 to cover the extra risk. This would mean an annual outlay on the part of the government of $2,000,000 at the start. This sum would be continually reduced, once a majority of the men were insured, and would eventually disappear. I think I am safe in saying that this estimate is a very liberal one, and is probably considerably in excess of what would actually be required.

Surely it would be well worth such a comparatively small sum to enable these men, who have sacrificed their health and strength in the service of their country, to provide for the comfort and support of their wives and children.

TRAMWAYS COMPANY OWES MONTREAL $800,000

The Montreal city treasurer declares that the Montreal Tramways Co. owes the city of Montreal around $800,000, and instructions have been given to the city law department to take legal proceedings for the payment of same. The city treasurer further stated that this sum had been due for a number of years, and, although at different times settlement had been attempted by the predecessors of the present administration, the matter had ended in ordering legal proceedings against the company.

DAIRYMEN HOLD CONVENTION

At the convention of the Eastern Ontario Dairymen's Association held in Belleville on January 9, the following officers were elected for 1919: Hon. president, John R. Dargavel, M.P.P., Elgin; president, R. G. Leggett, Newboro'; first vice-president, Thomas H. Thompson, M.P.P.

Professor Leitch, in an address before the association, said that a survey of 450 dairy farms in Oxford county shows that the average cost of producing milk on these farms in the year ending March 1, was $2.17 per 100 pounds. The average price received at the farm for this milk was $2.19½. In making this calculation $500 per year was allowed per man for labor employed. Thirty per cent. of the milk from these farms went to cheese factories, 40 per cent to condensers and the balance to ice cream factories or for sale as whole milk. These figures from farms representing 10 per cent. of the farms of Oxford, show that, with a very moderate allowance for wages for the owner of the herds, milk was sold at just about the cost of production.

TRAVELERS INSURANCE BUSINESS IN 1918

The following figures, contained in a statement issued from the head offices of the Travelers Insurance Company and of the Travelers Indemnity Company of Hartford, Conn., give the business of these two companies for 1918, together with the increase over the business for 1917:—

	1918.	Gain over 1917.
New life insurance paid for	$213,000,000	$27,000,000
Paid life premiums	19,500,000	3,000,000
Paid accident and health premiums	6,250,000	400,000
Paid compensation and liability premiums	26,900,000	9,000,000
Paid premiums, the Travelers Indemnity Company	3,800,000	1,000,000
Total premium income	56,500,000	13,700,000
Income, the Travelers Insurance Company	58,700,000	12,300,000
Income, the Travelers Indemnity Company	4,000,000	1,100,000
Total income	62,700,000	13,400,000

REGINA'S BONDED DEBT

Was Increased During 1918 by $367,200—City's Tax Collections

The city of Regina's bonded debt was increased during 1918 by $367,200, after crediting principal repayments totalling $26,200 during the year, leaving the gross bonded debt on December 31st, 1918, at a total sum of $10,893,287.

The total amount of new debt incurred during 1918 was $393,400, of which $53,000 represents the additional indebtedness created as the result of converting $959,000 temporary coupon bonds which matured in May into a debenture debt of $1,012,000. This was increased toward the end of the year by a further $4,400, as result of the shortage of the debenture issue authorized during the year to retire the million dollar treasury bills.

The other by-laws passed by the city council during the year authorizing the issue of additional securities against the city's credit are as follows:—

Purpose—Purchaser.	Term.	Amount.
Cyclone loan (sinking fund)	10 years	$ 40,000
Broad Street subway damages (Wood, Gundy and Company)	10 years	55,000
Electric light and power (Wood, Gundy and Company)	20 years	175,000
Cyclone loan (sinking fund)	10 years	35,000
Winnipeg street pavement (Wood, Gundy and Company)	15 years	31,000
Total New issues		$336,000
Conversion of temporary issue		57,400
Total		$393,400
Principal repayments made during 1918		26,200
Net increase in debt during 1918		$367,200
Gross debt at January 1st, 1919		$10,893,287

Tax Collections

Final returns completed by the city assessor's department show that the total amount of 1918 taxes collected during the year was $1,060,916 out of a total tax levy of $1,545,484, or 73.06 per cent. as compared with 69.46 per cent. of the current taxes collected in 1917.

The taxes collected during the last month of the year amounted to $371,992 as compared with $309,503 in December, 1917, an increase for last month of no less than $62,488, while the increase in the total current taxes for the year as compared with the total collections of 1917 is $216,796.

This is a record for tax collections, and civic officials are highly pleased with the results, indicating as it does, that the citizens are comparatively prosperous and are desirous of meeting their obligations to the city. It is pointed out that very little more than twenty-five per cent. went into the column of arrears on January 1st of this year.

MONTREAL TRUST COMPANY

The Montreal Trust Co. reports net profits of $168,041 for the year 1918, the best showing in the history of the company. Deductions for the year were chiefly the 8 per cent. dividend, calling for $80,000, $50,000 to rest account, which now stands at $900,000, and $20,000 to contingent fund. The balance carried forward was $78,331, against $67,515 a year before.

The Bank of Hamilton has opened a branch at Gretna, Man., in charge of Mr. L. C. Bitzer, who has been appointed manager.

INSURANCE COMPANIES MIGHT FORESTALL GOVERNMENT

President of British Columbia Federation Suggests that they Take Immediate Action to Prevent Government Insurance

Insurance men throughout America regard with great concern the movement in favor of government insurance. Mr. H. C. Cox, president of the Canada Life, referred to this question at the company's annual meeting a few days ago. He stated that insurance men would look askance at any movement to tear down the great organization which had been built up by private companies as a result of long years of effort. At the same time, he said, they must be willing to discuss the subject and maintain the merits of the existing arrangement.

Mr. William Thompson, president of the Insurance Federation of British Columbia, has addressed a letter to the members of that organization urging that life and accident companies should evolve a plan for continuing the insurance of war veterans who have become physically unfit to secure insurance in the ordinary way. He maintains that if the companies do not do this it will be done by the government, with the result that the thin edge of the wedge of government insurance will be inserted. The letter reads:—

"At the beginning of the New Year, it might not be amiss to write you in regard to the outlook, before the Insurance Federation of British Columbia, for 1919.

"Every thinking man will admit that we will be inevitably faced with serious and far-reaching problems, as the result of the readjustment that has commenced, with the advent of peace.

"The newly-formed Farmers' Association is advocating for the Dominion, inter-alia, a system of life insurance for returned soldiers who are physically unfit.

"Nearer home, Major (Dr.) McIntosh, M.P.P., advocates accident insurance for returned and incapacitated soldiers in British Columbia, that could in his opinion, be added to the duties of the present Workmen's Compensation Board.

Companies are Interested

"The underlying principles are commendable, and worthy of our support. Is it not, however, only reasonable to suppose, that if the above schemes are inaugurated, and prove successful, that their scope will be enlarged at a later date, to the detriment of the insurance companies? Is it not, in the most insidious form, likely to prove the insertion of the thin end of the wedge? Would it not be fitting for us to at once impress upon the life and accident companies the wisdom of their undertaking this necessary work—at cost—no commission to be paid agents—as a patriotic duty to returned men as the primary motive; and the elimination of governmental invasion of these important insurance fields, as the secondary consideration?

"It is clear that the war has introduced a new element into the business, and it is equally evident that this insurance must be available for those men who want to purchase it. I think that it would be a statesmanlike action for both the life and accident companies to immediately evolve some concrete plan, satisfactory to all interested parties, and offer their organizations to carry it out, on an absolutely cost basis. If delay occurs, there is grave danger that the schemes will become political issues, and the greatest opportunity in this age, to popularize corporate insurance, will be lost.

"At the present time those in favor of state fire insurance are publishing in the Ontario papers the results of the New Zealand operations, laying stress upon the point that since the introduction of this competitive system in that country, rates, in some instances, have been reduced about 40 per cent.

"The object of this propaganda is clear—governmental action has already been taken on this continent in regard to life, accident and marine insurance—and it is desired to create a favorable 'atmosphere' so that the fire business will be similarly treated. The New Zealand results are hardly a fair criterion by which to guide North America, where mercantile and industrial conditions are vastly different, and further, they forget entirely to mention places where the system has proved a failure.

"Our federation is an organization of agents, and is essentially defensive, pledged to prevent to our utmost, the passage of legislation inimical to the best interests of the insurance companies, which must logically, also prejudicially, affect us. It is, therefore, doubly necessary for us now, when our business is likely to be continuously and unfairly attacked, to be ready to strike well home for the recognition and preservation of our rights, also to deal immediately and effectually, with any emergency that may arise.

"The ensuing year is likely to be a critical epoch in insurance history, and we must, therefore, be alive to the issues. Insurance men do not ask for preferential treatment, but they are entitled to see that their business is not made a football of between political parties, each anxious to curry favor with those of the more aggressive of the socialistic type.

"Threatened as we are, by perils from within and without, I therefore specially appeal for your support of the vital defensive work of our Federation, to the limit of your capacity; because, we may be called upon at any moment to act as a unit, to insist upon the withdrawal of pending legislation framed—not because it was either necessary or fair—but merely that someone should gain political kudos by its introduction."

BONUS FOR CIVIL SERVANTS

The government has decided, on the recommendation of the Civil Service Commission, to pay for the current fiscal year (1918-1919), in view of the increased cost of living, a bonus to the civil servants of the Province of Ontario now in the employ of the government, to be apportioned as follows:—

$200 to married men and to widows and widowers with dependent children.

$100 to other employees.

While the bonus is paid for the fiscal year 1918-19, those eligible for the full amount must have been in the employ of the government since November 1st, 1917. Those who entered the service since that date and have served at least three months before November 1st, 1918, will receive a proportionate allowance. The bonus does not apply to part-time or seasonal employees, or to those who receive maintenance assistance.

NEW LIFE PRESIDENTS' ACTUARY

Mr. George W. Smith, of Boston, actuary of the Massachusetts Insurance Department, has been appointed actuary of the Association of Life Insurance Presidents, following the recent resignation of Mr. John J. Brinkerhoff. Mr. Smith will assume his new duties about February 1st.

Actuary Smith was born at Woburn, Massachusetts, May 1, 1884. He was educated in the Woburn public schools, and was graduated with the class of 1903 from the College Preparatory Department of the Woburn High School. He then entered the actuarial department of the New England Mutual Life Insurance Company, of Boston, and continued there five years under Actuary Herbert B. Dow, who was then and still is Professor of Insurance at Harvard University. During that time he became thoroughly conversant with the practical detail of a well-managed actuarial department and at the same time engaged in outside study courses in Boston and at Harvard University. He was appointed assistant actuary of the Massachusetts Insurance Department on March 22, 1909, under Commissioner Frank H. Hardison, which position he continued until he was appointed actuary of the department in February, 1917. A large part of his ten years of service with the Massachusetts department has been in the life insurance branch of the business.

This Company, through its various departments, offers the facilities and services of a commercial bank, a trustee, a foreign exchange bank, and an investment institution.

TEMPORARY RELIEF FOR EXPRESS COMPANIES

Uncertain Course of Operation Costs in Near Future—Results in the View that Increase in Rates Should be Merely Temporary

The Dominion Board of Railway Commissioners at its meeting in Toronto, on January 13th and 14th, and in Montreal on the 16th, heard additional evidence regarding the application of the Express Traffic Association of Canada for permission to increase express rates. The evidence submitted by the company on January 7th, was reported in *The Monetary Times* of January 10th.

Opposed by Shippers

Strong representations were made before the board in Toronto by the different fruit and vegetable growers' associations, against the proposed increase. It was declared that the charges are already so high that the profit of the producer is reduced to a minimum. The City of London Industrial Bureau made an application along with the city of London and the London Board of Trade for an order directing the express companies to extend their delivery limits in the city of London. F. H. Phippen, K.C., representing the express companies, said that they were willing to meet the requirements for the public convenience as far as possible, and he submitted a plan to the board as a basis for delivery. It was suggested by him that free delivery service should be maintained on a basis of population in proportion to area. Where such a rate was established in a city or town, it should apply to that particular place only.

The proposed increases were also opposed by representatives of the Board of Trade, the Canadian Manufacturers' Association and large shippers. Mr. Thomas Marshall, traffic manager of the Toronto Board of Trade, said: "We submit there can be no justification in increasing rates to such an extent as will permit the Dominion Express Co. to pay the railways on a basis of 62 per cent. for transportation, while all the companies on the continent are paying on the basis of approximately 50 per cent. or less.

"Based on the relative earnings of the two companies, the revenue of the Canadian Express Co. is approximately 54 per cent. of that of the Dominion Express Co. An advance in rates which would provide $2,500,000 additional revenue for the Dominion Co. would, therefore, produce approximately $1,350,000 for the Canadian Express Co. to take care of a deficit of $66,000. The Canadian Northern Express Co., working on a 40 per cent. basis, apparently did not require an increase in revenue."

A London baker, who ships bread to various parts of Western Ontario testified that the proposed 37 per cent. increase in express rates "would put us out of business."

Figures of Increased Cost

Mr. W. S. Campbell, traffic manager of the Canadian General Electric Co., gave details of shipments from three of the company's factories, showing that shipments which would cost $1,100 under the existing rates would cost $1,800 under the proposed rates. He said that if the board found the express companies were operating at a loss his company was prepared to pay their share of necessary increases, but they strongly objected to the entire dislocation of the system which had served so well for years. Mr. Campbell also complained of poor service between Peterborough and Montreal and of delays in the transportation of goods.

Mr. Miles, of the Willys-Overland Co., had similar complaints, and Mr. J. E. Walsh, manager of the Canadian Manufacturers' Association, observed that the proposed new rates would prove a severe hardship on the bulk shipper. Sir Henry Drayton, chairman of the Railway Board, asked Mr. Miles why the Willys-Overland Co. shipped to Winnipeg and Regina by express instead of by freight.

"The freight is too slow," was the reply.

"Or is it because the freight rates have gone up and the express rates have not?" queried Sir Henry.

Mr. Walsh said what applied to these two firms applied to shippers generally.

Mr. A. H. Thorpe, traffic manager of the William Davies Co., presented an interesting statement showing the effect the proposed schedule of rates would have on their business. On packages which at present would cost $90.42, they would have to pay express charges of $131 under the proposed rates, or an increase of 45 per cent. That relates to shipments under 50 pounds. On shipments of over 100 pounds, they would have to pay $799, as against $534, or an increase of 49 per cent. He suggested a flat increase of 10 per cent.

Similar statements were submitted by Mr. Elmer Larson, of the Swift Canadian Co., and by Mr. H. H. Ayer, of the Harris Abattoir Co.

Effect of New Rates

A representative of the Ford Motor Co., of Walkerville, declared the proposed new rates were excessive, and quoted the following:—

From Walkerville.	Present rate.	Proposed rate.
To Toronto	$1.25	$ 1.60
To Montreal	2.00	3.35
To Winnipeg	5.00	7.35
To Calgary	7.25	11.20
To Vancouver	9.75	12.80

Complaints regarding the charges for shipping horses were made by Mr. Pepper, who said the rate to Montreal from Toronto was 40 cents per mile, and the rate from Toronto to Hamilton or Fort Erie was $1.25 a mile.

Montreal Hearing

New views on the application were heard before the Dominion Board of Railway Commissioners in Montreal on Friday, the 17th instant. There are two applications before the board in relation to the express companies; the one relates to the general question of rates and the other to the merely local matter of the collections and deliveries within city limits.

The Express Traffic Association was represented by Mr. F. H. Phippen, K.C., and the transportation bureau of the Board of Trade by Mr. W. S. Tilston. The former intimated that as it might take some time for the Commissioners to arrive at a conclusion as to a fair permanent tariff, the companies were ready to agree to a temporary tariff on a percentage basis.

On behalf of the Board of Trade, Mr. W. S. Tilston stated that the proposed increase in rates would not be opposed if the express companies were able to show that it was necessary, but it was desired that the evidence to this effect should be placed before the Commissioners.

Mr. Phippen said that it seemed to him that it would be desirable to give the companies some purely temporary relief pending the determination of this application, which would in no way involve any injustice to the people and would not perpetuate any errors of the present tariff.

On behalf of the Montreal Butter Merchants' Association, Mr. A. J. Hodgson and Mr. H. R. Gray appeared. The former said they did not deny that the express companies were entitled to an advance, but they wanted the board to investigate the matter. He urged that if there was any change it should be made on a uniform basic scale end.

If a new system were adopted that was going to eliminate the scale end, it would mean a jump of 100 per cent. in some cases. There would be serious disarrangement of agricultural interests if uniformity were not followed in any changes.

For the Chambre de Commerce Messrs. Alex. Prudhomme and J. N. Cabana attended. Mr. Prudhomme opposed any change at a time when things were still unsettled and wanted postponement for a year or so until normal conditions came about. Mr. Cabana said the committee of the Chambre de Commerce which had studied the matter offered no objection to the proposed increase if the Commissioners

AUDITORS' CERTIFICATE

We have examined the books and accounts of The Bank of Nova Scotia at its Chief Office and have been furnished with certified returns from the Branches, and we find that the above statement of Liabilities and Assets as at December 31st, 1918, is in accordance therewith. The Bank's Investments and the Securities and cash on hand at the Chief Office and at several of the principal Branches of the Bank were verified by us as at the close of business December 31st, 1918, and in addition we visited the Chief Office and certain Branches during the year, when we checked the cash and verified the securities and found them to be in agreement with the books. We have obtained all information and explanations required, and all transactions of the Bank which have come under our notice have, in our opinion, been within the powers of the Bank. And we certify that the above statement of Liabilities and Assets as at December 31st, 1918, is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs according to the best of our information and the explanations given to us, and as shown by the books of the Bank.

A. B. BRODIE, C.A.
D. McK. McCLELLAND, C.A. Auditors
of the firm of Price Waterhouse & Co.

Toronto, Canada, 15th January, 1919.

had information satisfying them that it were absolutely necessary for them to carry on business. Mr. Cabana discussed the financial statement of the express companies and wanted to know whether rent, taxes and other charges were included. He favored a temporary arrangement on a percentage basis.

Other witnesses included Senator Beaubien, for the Frontenac brewery, Mr. G. E. McIntosh (of Ottawa), for the fruit business, Mr. Masson, a New Brunswick berry producer, and Mr. W. Northey, who spoke on horse transportation. The case was taken for deliberation by the Commissioners.

City Delivery

In regard to the application of the city of Montreal that the express companies should be required to collect and deliver parcels within the limits of the city free of charge, Mr. W. H. Butler appeared for the city and brought several witnesses from such points as Cote des Neiges and other parts in annexed municipalities, who complained of the effect of special delivery charges.

On behalf of the express companies Mr. Phippen explained the system which was followed in regard to free delivery, known as the "Block" system, and although no decision was come to by the board he practically acquiesced in the arrangement that free collection and delivery would be made to such areas within the annexed cities as could show a minimum population of one hundred households.

ONTARIO MOTOR TAX INCREASED

With the twofold object of discouraging the use of excessively heavy motor trucks and of increasing the revenue on motor vehicles, the Ontario license fees on motor trucks have been increased for the next year, according to an announcement recently of Mr. W. A. McLean, deputy minister of highways. On all but what is commonly known as the one-ton truck the license fee has been practically doubled. At the same time the fee for dealers' markers has been increased. From the combined increase in revenue from these two sources it is expected the income of the motor vehicles branch this year will be swelled by $100,000.

The adjustment in the scale of fees of motor trucks is on the basis of weight of the vehicle and its carrying capacity, which is estimated at the weight of the truck. On one-ton trucks and under the fee will remain as at present, $10. The scale provides that on trucks over two tons and under eight tons, the charge will be $5 a ton; on trucks over eight tons and not exceeding ten tons, the charge will be $7.50 a ton; on trucks over ten tons, the charge will be $10 a ton.

HAMILTON TO ASK VOTE OF $2,500,000

A decision was reached at a special meeting of the Hamilton Board of Control that a deputation should wait on the Dominion government at an early date and have it include in its estimates for the year public works for Hamilton calling for an expenditure of about $2,500,000. Those who were appointed members of the deputation are: Controller Jutten, Controller Halcrow, T. J. Stewart, M.P., Industrial Commissioner C. W. Kirkpatrick, A. C. Garden, president of the board of trade, and Capt. George J. Guy, chairman of the harbor commission.

The government will be urged to commence work on the harbor development scheme, which will require about $1,500,000 to carry out. The scheme embraces the purchase of the Stipe's farm and converting it into a large basin and channel where steamers will be enabled to turn around without backing out into the bay from their slips.

Other works which the government will be asked to start include extensions to the new post-office, amounting to $500,000; the building of a new branch post-office on Barton Street, $75,000; the construction of a grain elevator, and the question of having Hamilton made a point of call when the new aerial postal service across Canada is established.

LIBERALS WILL ADVOCATE LOWER TARIFF

Proposals Drawn up at Eastern Ontario Conference—Example Drawn from Great Britain

Delegates from throughout eastern Ontario met at a Liberal Convention in Ottawa on January 13th and 14th and passed a series of nine resolutions. Among these was one dealing with the tariff question.

The tariff resolution, which is the most extensive of all the motions, recapitulates the stand of Liberals on the tariff since the resolution of the national convention of 1893, outlines the reductions, and the articles placed on the free list from 1896 till 1911, sets forth Liberal resolutions since that date, and reiterates tariff reform demands moved in the house and incorporated Sir Wilfrid Laurier's manifesto of 1917.

Tariff Resolution

The resolution continues, "the tariff increases of 7½ per cent. and 5 per cent. should be immediately repealed but that there should also be an immediate downward revision of the tariff in accordance with the omnibus resolution moved by the Liberal opposition in the house of commons on May 22, 1917, in these terms:

"(1) That wheat, wheat flour, and all other products of wheat be placed upon the free list.

"(2) That farm implements and machinery, farm tractors, mining, flour and sawmill machinery, and repairs for same, rough and partly dressed lumber, illuminating, lubricating and fuel oils, cement, and fertilizers, be added to the free list.

"(3) That staple food and food products (other than wheat flour), domestic animals and food, therefore, be admitted into Canada free of duty when coming from and being the product of any country admitting like Canadian articles into such country free of duty.

"(4) That substantial reductions be made in the general tariff on all articles imported into Canada, excepting luxuries.

"(5) That the British preference be increased to 50 per cent. of the general tariff."

On the question of industrial reconstruction the Eastern Ontario Liberal Association stands for the introduction into the government of industry of the principle of representation whereby the interests of labor and of the community may be considered in industrial control. "To democratize the government of industry," says the resolution, dealing with this subject, "is the task ahead."

Free Trade Theory Still Intact

Sir Wilfrid Laurier, in addressing the convention on January 14th, said that the liberal policy of commercial freedom, which had enabled Britain to come so triumphantly through the war from an economic point of view, had received such sanction that the people were anxious once again to show their adhesion to it. Only on account of this policy of commercial freedom had Britain been able to go throughout the whole emergency on a gold basis, and without making any recourse to paper currency, as nations had been wont to do in other great wars, and this even though she had been obliged to spend thirty million dollars every day in the year and finance some of her Dominions and many of her allies.

Sir Wilfrid then referred to the proposals in Great Britain for abandoning to some extent the traditional attitude of Great Britain in favor of free trade. Whatever was done remained for Great Britain to decide, but Liberals had remained faithful in Canada to their declaration in 1893 against protection, and in power they had worked for a tariff for revenue only. He reviewed the preference given to Great Britain and referred to Conservative opposition to it. He brought up again the reciprocity election of 1911, and said that the Conservatives had been driven to do piecemeal what the Liberal government had arranged to do as a matter of policy. Their cry of "no truck or trade with the Yankees" had been simply stupid, in that it refused to trade on good conditions with the wealthiest nation on earth.

GOVERNMENT TO BUILD LINES IN ALBERTA

By 1920 three branch lines of the government railways in Alberta will be built.

Premier Stewart, who took up the question of constructing the Sangudo, St. Paul-De Metis and Medicine Hat-Hanna branches with the railway department when in Ottawa recently, has been given to understand both by Hon. Dr. Reid, minister of the department, and President Hanna, of the government railways system, that it is the intention of the government to build all three lines during the present year.

The provincial government is involved in the construction of these roads to the extent of guarantees on the bonds, but in view of the Canadian Northern having been taken over by the Dominion government as part of the national system the work will now be done under federal orders.

DENIES LONDON AND LAKE ERIE DEAL

A report recently circulated in Toronto to the effect that the London and Lake Erie Railway Co., operation of which ceased some time ago, was to be purchased and operated by the Duffield Estate, of London, Ont., has been denied by Mr. C. M. Duffield in a recent letter to *The Monetary Times.*

The arresting of almost the entire overseas export shipments of Canada has been practically effected by an order from the Canadian Railway War Board, recently issued. At least 80 per cent. of this huge trade, amounting to about half a million tons per month, will thus be backed up in Canadian warehouses, elevators and mills.

MONEYS COINED BY CANADA'S MINT

Coins Struck and Received by the Mint Office for Issue During 1918

The following statement shows the value and number of coins struck and received for issue by the Ottawa branch of the Royal Mint during 1917 and 1918:—

Coinage for Canadian Use

	1917.	1918.
Sovereigns:		
Number	58,845	106,516
Value	$ 286,379.00	$ 518,377.87
Silver:		
Number	14,561,898	15,900,064
Value	$1,951,168.10	$2,258,744.55
Bronze:		
Number	11,738,718	13,084,983
Value	$ 117,387.18	$ 130,849.83
Total (Canadian):		
Number	26,359,552	29,091,563
Value	$2,354,934.28	$2,907,972.25

For Newfoundland Use

	1917.	1918.
Silver:		
Number	1,310,000	360,000
Value	$ 305,000.00	$ 180,000.00
Bronze:		
Number	700,000	....
Value	$ 7,000.00	....
Total (Newfoundland):		
Number	2,010,000	360,000
Value	$ 312,000.00	$ 180,000.00

Nickel-copper struck and issued for Jamaica amounted to 642,961 pieces, with a value of £1,515 9s. 7½d.

Coins Issued

The following table shows the number and value of coins issued during 1917 and 1918:—

For Canadian Use

	1917.	1918.
Sovereigns:		
Number	187	130,768
Value	$ 910.07	$ 636,404.27
Silver:		
Number	13,417,200	17,592,000
Value	$1,862,200.00	$2,402,000.00
Bronze:		
Number	11,690,000	13,181,700
Value	$ 116,900.00	$ 131,817.00
Total (Canadian):		
Number	25,107,387	30,904,468
Value	$1,980,010.07	$3,170,221.27

For Newfoundland Use

Silver:		
Number	1,050,000	620,000
Value	$ 240,000.00	$ 245,000.00
Bronze:		
Number	700,000	....
Value	$ 7,000.00	....
Total (Newfoundland):		
Number	1,750,000	620,000
Value	$ 247,000.00	$ 245,000.00

In addition to the operations mentioned, 4,435,200 shilling blanks were produced at the Ottawa Mint during the year 1918. These blanks, of the nominal value of £221,760 were shipped to the Royal Mint, London, before the close of 1918.

Acting on the recommendation of Chief Chevalier, of the fire department of Montreal, the Administrative Commission has decided to engage the services of ten additional fire inspectors. The duty of these men is to aim at the prevention of fires by ordering measures of precaution.

WAR-TIME RESTRICTIONS TO BE REMOVED

In reply to the statement of boards of trade and other bodies, asking for the removal of war-time restrictions, the War Trade Board says:—

"The restrictions complained of are at the present moment under consideration, and as soon as the members of the newly formed Canadian Trade Commission consider the matter, an announcement is expected to be made. Meanwhile, we may inform you that it is expected that practically all the restrictions in regard to imports will be removed, and that only a small proportion of the export regulations will be retained. As soon as we are in a position to answer you more definitely we shall do so."

DOMINION REVENUE SHOWS LARGE INCREASE

For the nine months' period ended December 31st, according to finance department returns, current revenues totalled $222,485,552, an increase of nearly $32,000,000 over the same period of the year previous. For the month of December alone the revenue was $28,552,723, an increase of practically eight million over December, 1917. In spite of prohibition, both excise and customs revenues have increased. Expenditure on consolidated fund account was last month $16,547,263, as compared with $17,361,674 in December, 1917. For the whole nine months' period, however, expenditure on the same account was $124,539,099, in comparison with $96,982,537 for the nine months ended December 31st, 1917.

The net debt was increased by $22,799,237 during December. It now stands at $1,330,228,898.

GRAIN MEN CONFER

A conference was held in London, England, on January 10th, by Dr. Magill, head of the Canadian Wheat Commission, Mr. George Fisher, of the Winnipeg Grain Exchange, and Mr. Norman Lambert, secretary of the Canadian Council of Agriculture, representing the wheat interests of Western Canada, with Sir George Foster and Dr. Robertson, who represents the Department of Agriculture on the Canadian Mission.

The conference was with respect to the handling of grain from Canada during the remainder of this season and all of next season. Dr. Robertson, who has been closely in touch with the various food committees in Great Britain and with the Inter-Allied Food Council, explained that nothing could be done to plan for the handling of the crop of 1919 until after the Peace Conference had met and the war had been formally ended.

OPEN NEW WATERS FOR FISHING

The Fisheries Department of Ontario has decided to open new waters for fishing purposes in the spring, because of the success of the Ontario fish policy, and the great demand for fresh water fish.

Hon. Findlay G. Macdiarmid, Minister of Public Works, stated on January 13th, that negotiations were in progress between the department and fishermen for the opening of half a dozen lakes in Northern Ontario for fishing purposes. The Indians of the district say that there are unlimited quantities of fish in these lakes, but the department is unable to estimate the possible supply until operations begin.

Last year the government conducted fishing operations at Lakes Nipigon and Nipissing, the former being the chief source of supply for a large section of the province. In the fall Orient Bay, at the northern end of Lake Nipigon, was also opened. This year the government will carry on operations on a larger scale at Lake Nipigon, as the fish caught there are of a very choice variety. The lakes which are to be opened will be operated on the same basis as is Lake Nipigon, where the fishermen supply the equipment, and the government pays them so much for their catch.

CANADIAN WAR MISSION AT WASHINGTON

Owing to the removal of many war trade restrictions on the transaction of business between Canada and the United States, the work of the Canadian War Mission at Washington is being steadily reduced.

Several of the members of the mission have now returned to Canada, including Mr. Frank Rolph, who has been chairman of the mission since Mr. Lloyd Harris went overseas; Mr. R. H. McMaster, of Montreal, and Mr. A. H. Scott, of Montreal. Sir Charles Gordon has been appointed acting chairman to succeed Mr. Rolph.

PLANNING BOARD OF TRADE WORK

Members Requested to Submit Suggestions for Plans of New Organization

The Winnipeg Board of Trade which was recently reconstituted by an amalgamation with a number of other civic organizations, is requesting its members to submit their opinions as to what projects the board should direct its attention to. As these topics are of interest to boards of trade throughout Canada, the complete list of suggestions is given below. Members are asked to choose the twelve which they consider the most important:—

Investment of local capital in existing and new industries.

Agricultural development of Western Canada.

Increased and improved transportation facilities.

Good roads.

Permanent exhibit of natural resources of Western Canada in board of trade building.

Utilization of city and interurban electric lines for hauling farm products during night period.

Establishment of adequate city market with suitable transportation facilities.

Municipal auditorium and organ.

Housing problems and conditions.

Establishment of permanent winter carnival.

Modern and commodious office building on present site, suitable for exhibitions, offices, city and interurban terminal station, board of trade offices, dining room and auditorium accommodating 5,000 people.

Re-establishment of annual industrial and agricultural fair.

Centralization and control of campaigns for money for public relief purposes.

Federated financing in connection with charities.

Investigate thoroughly and endeavor to have inaugurated in Winnipeg the most modern, efficient and economical form of civic government possible.

Extension of Winnipeg's market re manufacturing and wholesale distribution.

Investigate thoroughly different systems of taxation, comparing same to the system followed here, for the purpose of securing for Winnipeg a more equitable system of taxation.

Revision of taxes and investigation re exemptions.

Publicity campaign on broad lines, setting forth Winnipeg's advantages as a manufacturing and distributing centre, including market, available natural resources, etc.

Advertise the new Shoal Lake water and its advantages for domestic use; also to industries both established and possible.

Prevent indiscriminate solicitation of advertising propositions, and eliminate unscrupulous advertising.

Trade trips: Special business men's and firms' trips through Winnipeg marketing area, and also to newer districts, such as northern Manitoba and the Peace River country.

Survey showing industrial opportunities in Winnipeg as well as Western Canada.

Advisability of civic ownership or control of industrial sites, not necessarily "free sites," for new industries, etc.

Fire prevention and salvaging corps.

Central terminal for all city and interurban electric railway lines.

Immediate completion of construction of Hudson Bay Railway.

Increased production of milk and other dairy products.

Extend trade relations with Siberia.

Development of arterial connections with farming territory and with automobile highways reaching to Winnipeg.

Inaugurate club and dining room features for membership of board of trade.

Development of good fellowship and community spirit among members.

Conduct of annnal spring clean-up and development of clean city sentiment.

Campaign to bring conventions and tourists to Winnipeg.

Efforts to secure comprehensive road survey and development of a complete highway plan.

Education of both tenant and owner to better housing methods and encouraging the construction of more and better individual homes.

Campaign to bring new industries to Winnipeg.

Rendering assistance to prospective and existing industries to insure their permanency.

Stimulation of home buying.

Campaign to educate foreigners, including teaching of English.

Development of fire prevention and other methods looking to reduction in Winnipeg rates.

Development of plans to relieve traffic congestion, including provisions for automobile parking, etc.

Survey of business administration and installation of improved business methods in various city, provincial and governmental departments.

Assistance to duly appointed agricultural agents and provincial commercial organizations.

Analysis of bonded indebtedness and financial activities of Winnipeg as a basis for closer control over city revenues and expenditures.

Maintenance of a close relationship with all public offices and furnishing expert assistance as required in emergencies.

Analysis of ward improvement activities for the purpose of promoting greater efficiency and economy.

Co-operation with city officials in promoting municipal health activities.

Constructive educational campaign for greater public safety.

Application of expert real estate judgment to various public interests.

Protection of retail interests and the community through elimination of itinerant merchants and other evils.

Promotion of methods to direct the development of Greater Winnipeg to best serve the business and transportation interests, and the convenience, health and comfort of all citizens.

Organization of effective transportation bureau of shippers and receivers, wherein members will receive adjustment of claims, quotation of freight rates, and all phases of transportation matters without expense.

Continued efforts to protect Winnipeg against discrimination in rates and transportation conditions, and secure rates and service to which Winnipeg is entitled.

Organize and maintain a free employment service for both skilled and unskilled labor, for utilization by both employer and employee.

Development of plans for providing employment for the unemployed, and minimizing the effects of unemployment.

SASKATOON'S BUDGET

A reduction in the city assessment of $946,724, an increase in wages to city employees amounting to nearly $50,000 a year, and a surplus carried over from 1918 of $34,207, were some of the important features of the annual budget for 1919 presented to the new city council of Saskatoon by City Commissioner Yorath on January 7th.

WAR SAVINGS OR ELSE ANOTHER LOAN

Sir Herbert B. Ames, chairman of the Dominion War Savings organization, speaking before a meeting of the Montreal Publicity Association on January 17th, remarked that unless this campaign was a success another Victory Loan would be necessary. He outlined the connection between the campaign and war finance, the provision of credit for purchases in Canada, etc. The results attained in Great Britain and the United States had been remarkable. All business houses should, he said, have thrift and war savings stamps for sale.

FUNCTIONS OF A TRUST COMPANY

An Address Before the Rotary Club, Toronto, on Friday, January 17th, 1919

By J. J. Gibson
Managing Director, Chartered Trust and Executor Co.

There is a certain amount of popular confusion regarding the range of functions of trust companies in Canada. This may be partly due to the fact that trust companies of the United States fill a different field than do the Canadian companies. There the powers of the trust company include practically those of commercial banking business, whereas trust companies in Canada are restricted by law in the investment of their own funds to mortgages on real estate in Canada, government and municipal debentures and certain classes of stocks and bonds, and in the investment of trust funds in their possession they are still more narrowly restricted, being confined to first mortgages and to government and municipal debentures, unless the creator of the trust authorizes other investments.

A Canadian company may not accept money on deposit subject to withdrawal without notice, and may not lend on personal security and by these prohibitions it is forbidden to carry on what are the essential parts of a commercial banking business.

American companies also enjoy pretty much the same powers as Canadian companies do, and these are broadly to act as a trustee for the fulfilling of any lawful trust, which includes all the following powers or functions: (1) Acting as executor of wills; (2) administrator of estates; (3) trustee under bond mortgage; (4) transfer agent of stocks; (5) escrow agent; (6) trustee of marriage or other settlement agreement; (7) liquidator of insolvent companies; (8) assignee for the benefit of creditors; (9) receiver; (10) committee of a lunatic; (11) guardian of orphan children; (12) fiscal agent; (13) agents for management of property; (14) agents for the sale and purchase of real estate; (15) custodian of property.

I think that in the popular mind trust companies are somewhat confused with loan companies. In Canada loan companies have none of the above powers. Their business is simply that of lending money on real estate mortgages, and they are empowered by law to issue their debentures for given terms of years for funds which they may use for the purpose of mortgage investment. The Loan Corporations Act provides that these debentures shall be a first charge against all the assets of the company. Trust companies, however, are forbidden by law to issue debentures as well as to receive money on deposit.

Let me now briefly describe the functions which I have enumerated above:—

Executor of Wills

First, and most important, is that of executor of wills. Every business man recognizes the necessity of giving his best ability and constant attention to the work of providing an estate for the maintenance after his death of those who are dependent upon him, but how many of them give the same attention to arrangements for handling and conserving that estate in the interest of his dependants after his death? The making of a will is a matter that should be given most careful consideration, and inasmuch as this document is to govern the conduct of its executor, it is highly important that it should be carefully and skilfully drawn. Two prolific sources of trouble exist in connection with the making of wills. First, the improper drawing of the document and second, the naming of the wrong person to administer it. Your lawyer should draw your will and a trust company should be executor, especially if it creates trusts extending over a term of years.

A personal executor may die before his duties are performed. A trust company does not die. An individual executor may become incompetent through sickness, infirmities of age, or failure of his powers; these things do not befall a trust company. His own affairs may become embarrassed; he may move away to other parts and above all he may have no experience regarding the more or less technical duties of an executor. A trust company is not only experienced, but has financial responsibility beyond that of the great majority of personal executors. Indeed, every advantage is with the corporate executor, provided one is satisfied of the honesty and competency of its officers, particularly as the remuneration allowed by the court is no more than that given to an individual executor.

Indeed, most trust companies are prepared to give an estimate of the cost of administering the estate in advance if the nature and extent of the estate and the terms of the will are given. A trust company maintains a staff of men experienced in the special duties involved in administering estates.

Administrator of Estates

If no will is made and an estate is left, the courts perforce appoint an administrator and in a great many of such cases a trust company is appointed. Those trust companies, who are approved by order-in-council of the provincial government, may be appointed by the courts without giving security, whereas a private administrator is required to give bonds, usually twice the amount of the estate involved. An administrator is bound to administer the estate promptly and to distribute it among the heirs strictly in accordance with the Devolution of Estates Act. The law does not allow any deviation from the prescribed basis of division no matter what the special needs or claims of one heir may be as against the others, hence the great importance of making a will.

I have in mind the case of a man who died without making a will whose estate amounted to several hundred thousand dollars. Our company was appointed administrator and were unable to make any provision for an aged maiden sister to whom he had always given a monthly allowance, because having left a widow and children the law provides that all the estate should go to them. If this man had made a will, beyond a doubt he would have made provision for this sister and also have made ample provision for his own widow and children.

Trustee of Bond Issue

Where a company or individual desires to borrow a large sum from a number of people and give each of them the security of a mortgage on his property without one having priority over the other, the method is to give a bond mortgage or trust deed to a trust company for the total amount. The trust company then issues bonds to the investors to the amount of their loan and these bonds are really certificates that the investor has an interest to that extent in the trust company's mortgage, and, in addition the trust company represents the bondholders and in case of default acts in their behalf and on their instructions. A corporation bond is really a part interest in a mortgage on real or personal property or both.

Transfer Agent for Stock Issue

A company whose shareholders are numerous and whose stock changes hands frequently, usually appoints a trust company to keep its stock ledgers and make its transfers. The advantage is that the trust company knows what constitutes a proper transfer; knows what is required in case of the transfer of the stock of a deceased person; when stock may not be transferred; what the Government Transfer Tax Act requires, etc. It is also a guarantee to the public against the over-issue of stocks or the fraudulent issue by dishonest officials.

Escrow Agent

A trust company is usually named to hold documents or other valuables that are the subject of some contract, when the valuables are not to be delivered until certain conditions are fulfilled. The purchaser knows by this arrangement that he can be assured of the delivery of his property when he has fulfilled the conditions and that the vendor is unable to make any use of the property in the meantime.

Where property is set aside for the benefit of a person, but it is not desired that this person should have control of the corpus or principal, it is usual to commit the property to the care of a trust company by a trust deed setting out

Penniless Old Men

You know many of them—men who in their prime made plenty of money, but who spent as freely as they earned. Old age finds them in a sorry plight.

You can escape their bitter experience if you will. A few dollars saved each year and invested in an Imperial Endowment will provide for your comfort in old age. Or it will take care of your family should death call you early.

Write for a free copy of our very interesting booklet entitled "Penniless Old Men." Address:

the terms upon which it is held and the uses to which the company must put the income and eventually the principal.

When a joint stock company becomes unable to pay its credits the law makes provision for winding it up; either by its own resolution or by a judgment of court. In this case a liquidator is appointed whose duty it is to realize the assets and after paying all expenses of the liquidation, to pay first preferred creditors and then ordinary creditors pari passu.

Assignee for Creditors

In the case of an insolvent individual or partnership the usual proceeding is to make an assignment to an assignee for the benefit of creditors and the assignee then proceeds in much the same way as in a liquidation. In both cases it is usual to appoint a small committee of creditors to act with the assignee as a sort of consulting committee. The function of an assignee or of a liquidator is, of course, to realize all the assets of the insolvent as promptly as may be and to distribute them fairly and equitably among the creditors, so that no one creditor gets an undue advantage over the other.

Receiver

Where a company becomes unable to pay its creditors and it is evident to wind it up and sell its assets would mean a heavy sacrifice of values, while the creditors are not willing that the company should continue to be operated by its owners, the court will appoint a receiver whose duty it is to carry on the business treating all creditors alike, until either the creditors are all paid and the property restored to its owners, or it becomes possible to realize by sale the full value of the assets, or till for some other reason the interested parties decide to terminate the receivership.

It sometimes becomes necessary for the courts to provide a guardian for the person or property of a lunatic or orphan children. Usually a trust company is selected in such cases.

Fiscal Agent

A trust company is experienced in the investment of moneys in sound investments, and is the most suitable agent to be entrusted with the care and investment of the funds of those who, because of their own inexperience, or because they are travelling, or ill, or engrossed with other things, do not wish to be encumbered with the care of their own funds. It is not uncommon, either for persons to turn over their property to a trust company to manage, during their absence, illness, or their pre-occupation with other duties.

Real Estate Agent

Practically every estate involves some real estate among its assets which has to be disposed of. It is necessary, therefore, that a trust company should have a real estate department including men competent to estimate the proper value of real estate, and able to sell it to the best advantage. This department makes valuations as the basis of the company's own mortgage loans and buys and sells real estate as the agent of clients, but the company itself does not deal in real estate on its own account. This department also makes valuations for clients, assists in real estate arbitrations and is consulted by clients to study their real estate problems and advise them. In addition to advising as to location and site it is sometimes possible from a purely real estate point of view to make very valuable suggestions to clients as to the type of building, having in mind the possible need of converting to other uses, etc., where such suggestions would never emanate from an architect or builder.

Custodian of Property

Most trust companies maintain a burglar-proof vault with safety deposit boxes for rent. These boxes can only be opened by the owner, and the boxes are open to him from [illegible] o'clock till 7 o'clock, and the boxes are rented at from $2 per year up.

In all these functions the trust company officer is acting [illegible] relations, and he must learn to keep the business of his clients absolutely private and confidential. He becomes the possessor of private information, and it is just as much his duty to preserve that confidence as it is to deal honestly with the property or funds which he holds in trust.

WANT AMENDMENTS TO COMPENSATION ACT

The Alberta Federation of Labor on January 10th adopted the report of the Workmen's Compensation Act committee, recommending to the legislative amendments to the act, by which the entire schedule of compensation would be increased 100 per cent., and widening the scope of the act to include railway employees and all wage earners, and to take into consideration all diseases covered in the British Workmen's Compensation Act. The railway mechanics shopmen have signified a desire to come under the act, although the railway brotherhoods have previously held aloof.

EDMONTON'S FINANCIAL POSITION

The city will be in the market in the future for a total of $3,500,000, according to a decision reached by the council recently. The money is needed, or will be needed, to pay certain current expenses. The intention is to endeavor to give some assistance to holders of property who are unable to meet their payments at the present time.

The city does not expect to ask for this money at once. The sum of one million dollars will be obtained as soon as convenient and the balance during the year 1919, at such time as the market may seem to be favorable.

Five-year treasury bills, probably bearing six per cent. interest, will be offered as soon as possible. These will be for one million dollars, and the taxes for 1918 will be behind them. Behind the issue of the remaining $2,500,000 will be the taxes for 1919. At the present time the bank overdraft is $722,000.

The debt of Edmonton is about fifteen million, and the sinking fund amounts to $414,000. Last year $6,000 was borrowed from the bank to cover part of the sinking fund payment.

QUEBEC PROVINCE HAS SURPLUS

The Quebec Provincial Legislature opened its third session of the fourteenth legislature on Jan. 21st.

Due chiefly to the large succession duty collected on the estate of the late Sir William Macdonald, a surplus of over two millions was reported, but it is to be taken as understood that such an amount is not a precedent for future years. This surplus will enable the government to provide for less productive years to come, for there are no such large estates in prospect for the government to levy upon.

The treasury will not only have to content itself without such large successions, but will have to provide for "dry" years in the sense that the large annual revenue from the liquor traffic will cease. This will not be seriously noted even in the session of 1920, for an end is not to be written on this kind of revenue until May 1st, 1919, and the financial year which closes on June 30th, 1919, is the one which is presented to the legislature at its 1920 session, or even to a session held late in 1919, should there be two sessions in one year, as sometimes happens.

Liquor brought the Government for the financial year ending June 30th, 1917, a total of $805,904, made up chiefly of $244,789 from hotels, $214,217 from restaurants, and $236,918 from retail liquor shops, and the total to June 30th, 1918, is approximately the same, for while there was a reduction of fifty hotels and restaurants, and a larger number of retail shops in Montreal, the chief source of liquor revenue, the license on the remaining places was raised so that the government would not suffer loss.

The government will lose money, through prohibition in a lump sum from the fact that some years ago, when the policy of cutting down the number of hotels and restaurants in Montreal and the city of Quebec, was adopted, the government gave compensation to those who lost their licenses. The government paid out the money, and has been recouping itself by special additions to license fees on places remaining. However, there is still a sum of $405,526 due the government on the amount it paid out, and with no hotels in existence most of this will be lost.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Record of Municipal Financing and Activities

Three Rivers, Que.—Tenders will be received up till January 27th, for the purchase of $40,000 bonds.

St. Boniface, Man.—The council has accepted the report of the finance committee advising to borrow $200,000 from the St. Boniface sinking fund and $100,000 from the Bank of Hochelaga.

Sherbrooke, Que.—Messrs. Spitzer, Rorick and Co., of Toledo, Ohio, have been awarded a block of 6 per cent. 5-year electric light bonds, to the amount of $90,000 at 97.50, a basis of 6.59 per cent.

Montreal, Que.—The city of Montreal 5-year gold bonds, which are now listed on the stock exchange, are quoted as follows: Issue maturing December 1, 1922, 101½-100½; issue maturing May 1, 1923, 101½-100½; issue maturing September 1, 1923, 100½-99¾.

Carleton County, Ont.—A meeting of representatives of the different townships of Carleton County was held in Ottawa last week. The object of the gathering was to form a municipal association in the county of Carleton, which can have periodical gatherings for the discussion of the numerous problems affecting the management of the townships.

Essex County, Ont.—The Essex Border Utilities Commission, representing a number of associated border municipalities, received ten bids, nine of them above par, for $210,310 6 per cent. debentures, for construction of intercepting sewers to serve Ford, Walkerville, Windsor, Sandwich, Sandwich West and Ojibway. The successful tender, that of Morrow and Jellett, of Toronto, was 3.16 points above par. The debentures will be paid in 30 equal annual instalments. The following is a list of tenders:—

Morrow and Jellett, Toronto	103.16
Wood, Gundy and Co., Toronto	102.38
C. H. Burgess and Co., Toronto	102.17
Canada Bond Corporation, Toronto	102.156
Æmilius Jarvis and Co., Toronto	102.13
Brent, Tovell and Co. and W. A. Mackenzie and Co., Toronto	101.81
Mulholland, Bird and Graham, Toronto	101.48

Township of York, Ont.—The township of York has secured a good price for their bonds. Three issues were made according to three separate by-laws, but they were all sold at the same price. They were debenture bonds, all for waterworks purposes. The first was for $4,864, the second for $49,497, and the third for $21,171, total $75,515, payable in equal annual instalments with interest at the rate of 6½ per cent. per annum. Æmilius Jarvis and Co., of Toronto, were the successful tenderers, the price being 103.95 and interest. The yield, therefore, is about 5¾ per cent. The following is the list of tenders, all bidders of Toronto:—

A. Jarvis and Co.	103.95
Canadian Bank of Commerce, for $25,000	103.75
C. H. Burgess and Co.	103.71
McDonagh, Somers and Co.	103.517
Housser, Wood and Co.	103.487
Toronto Mortgage Corporation	103.44
Wood, Gundy and Co.	103.32
Morrow and Jellett	103.27
R. A. Daly and Co.	103.27
Canada Bond Corporation	103.156
W. L. McKinnon and Co.	103.14
Brent, Noxon and Co.	103.07
R. C. Matthews and Co.	103.03
G. A. Stimson and Co.	103.02
A. E. Ames and Co.	103
Turner, Spragge and Co.	102.92
Dominion Securities Corpporation	102.780

Calgary, Alta.—With an increase of approximately $450,000 over 1917, the taxes collected in the city for the year 1918 will total about $250,000 short of the estimates on which the expenditures for the year were based. While naturally somewhat disappointed at the shortage, as it had been hoped receipts would equal expenditures, City Treasurer Mercer points out that the 1918 receipts are the largest in any year since 1913, and the improvement over the preceding year is most satisfactory in view of local conditions and the fact that the anticipated tax sale was not held.

NEW BRUNSWICK TO ISSUE BONDS

The province of New Brunswick will call for tenders for $450,000 of 15-year 5½ per cent. debentures, up till February 1st.

BOTH VICTORY BONDS NOW LISTED

The Victory Loan of 1918, as well as that of 1917, is now open to trading on the Toronto Stock Exchange, its two maturities—those of November, 1923, and November, 1933, have been listed.

REGINA WINS SUIT

The Regina School Board has been awarded $20,000 and interest at 6 per cent. against Spitzer, Rorick and Co., in the United States District Court of Ohio. This award is to recompense the school board for loss in purchase price, when the bond house refused to accept delivery of full $500,000 issue, and the board had to sell elsewhere cheaper.

PROVINCE OF ONTARIO BONDS

The National City Company, New York, which has just recently formed a Canadian organization with an office in Montreal, and in the very near future will secure investment banking quarters in Toronto, has purchased $3,000,000 Province of Ontario 3-year 5 per cent. gold bonds. With its associates in this transaction, Harris, Forbes and Co., of Montreal, and the Equitable Trust Co., it is making a public issue in the United States.

EDMONTON BROKERS ANNOUNCE ENLARGEMENT

The W. Ross Alger Co., of Edmonton, has absorbed the local stock brokerage interests of Aiken and Co., and has also completed arrangements with the New York firm of Logan and Bryan for a private wire service to Edmonton. The Alger services through the New York firm will give them direct wire connection over 32,000 miles of leased wire, touching all the large financial centres in eastern Canada and the United States.

J. A. Anderson, manager of the Canadian Pacific Railway telegraph in Edmonton, has retired from that service to take charge of the wire for Alger and Co., and Mr. Aiken, whose business is being merged into that of the latter company, will be manager of the stock department. G. P. Nance, cashier of the National Trust Co., will have charge of the accountants' department.

Mr. Alger will continue to direct the firm's bond business, and will have as assistant Mr. P. Ponton, late of the accountant's department of Revillon Wholesale.

The firm will also specialize in the cash grain business, which will be under the management of Mr. L. D. Scott.

New offices for the reorganized company will be taken in the Agency building, Edmonton. Quotations will be available on the stock board from New York and Montreal stocks and bonds, and from Winnipeg, Chicago and Minneapolis grain and provision markets. It is claimed that a service of these proportions has never before been available in any city west of Winnipeg.

The Royal Bank of Canada has opened branches at Langley Prairie, B.C., and Quinpool Road, Halifax.

MANITOBA GOVERNMENT'S RECORD

Prohibition—Education—Franchise—Workmen's Compensation—Taxation—Minimum Wage

During the course of an address at the annual convention of the Manitoba Grain Growers' Association, the Hon. Edward Brown, provincial treasurer of Manitoba, in referring to the Provincial government's record, said:—

"During the last five years there have been many important legislations passed by the Province of Manitoba. We were the first to bury the liquor traffic, and we have been the province to set the lead for the others in many similar instances.

"We were the first to insist on English being taught in all the schools, and in the rural districts we have seen to it that the new school, the teacher's house, and the financial arrangements for them have been made. We spent $250,000 more on educational purposes than was spent in 1913.

"We were also first to declare for the absolute equality of women in the matter of the franchise.

"If a breadwinner fails now, the woman of the home has no longer to go out and work and allow the kiddies to drag around. The government steps in under the Mothers' Allowance Act. This is the most humane piece of legislation ever passed by any government. This year we intend to vote $200,000 for this work.

"This is also the first province in Canada to get a rural survey of health conditions and to press for the improvement of the character of its citizens from a physical standpoint. We intend to spend $50,000 on it this year." Hon. Mr. Brown also alluded to the Workmen's Compensation Act by which a man could get a claim for compensation settled without spending five cents, also to the fair-wage clause on all government contracts. He then touched on the minimum wage for women and girls.

"These are measures to improve social conditions. Perhaps the government has been over-zealous by trying to do so much in so short a time, but we believe the efforts have been in accord with the wishes of the people," he said.

Referring to taxation, he said that the government did not ask for one dollar in new revenue in 1915, 1916, and 1917, but last year they had established a new principle. They taxed amusements. This was not an obligatory tax because the man who did not want to pay it did not have to go to a theatre. They were not by any means the first province to do it. The tax on unoccupied lands, he urged, was aimed to increase production and had succeeded. Last year they had taken a step towards direct taxation by placing a mill on every dollar of assessable property. Even the old and wealthy province of Ontario had taken up this form of taxation and had placed a mill on the dollar. Saskatchewan and Alberta had 2 mills.

"Taxation is a very broad subject," went on Mr. Brown. "We have attempted to get at it properly and we believe we are nearer to asking the man to pay who can afford to pay. We have a commission to sit on the whole subject and we expect it to report shortly."

"Manitoba is not only the premier farming province. It is a manufacturing province with the cheap power and satisfactory labor market right here, also the wealth of minerals which make it the envy of many others."

NEW PRESIDENT TORONTO BOARD OF TRADE

The nomination meeting of the Board of Trade was held on January 13th, the president, Mr. C. A. Bogert, presiding. The following were elected by acclamation: President, K. J. Dunstan; 1st vice-president, C. Marriott; 2nd vice-president, W. H. Alderson; treasurer, Edward Hay.

The nominations for the council, 15 to be elected, were as follows: J. D. Allan, A. R. Auld, Hugh Blain, C. A. Bogert, James A. Catto, Lieut.-Col. W. F. Cockshutt, M.P., R. W. Eaton, Geo. W. Hambly, W. J. Heaven, Arthur Hewitt, J. S. McLean, W. W. Near, Douglas Ponton, J. Allan Ross, H. G. Stanton, C. O. Stillman, C. W. Wilkinson.

Price Bros. & Co., Ltd., will seek authority to increase its capital stock from $5,000,000 to $10,000,000.

NEW INCORPORATIONS

R. Drennan. Kipawa Co., Ltd., $20,000,000; G. W. MacDougall, L. Macfarlane, W. B. Scott. Cleaton Co., Ltd., $100,000; R. E. Cleaton, H. J. Hague, P. A. Badeaux. Hyde Engineering Works, Ltd., C. Sinclair, R. E. Allan, J. P. Charbonneau. Knox Brothers, Ltd., $1,000,000; H. N. Chauvin, H. E. Walker, H. Wylie. Adanac Producing Co., Ltd., $300,000; J. H. Michaud, L. J. Mouton, A. Racicot. Fyshe and Co., Ltd., $50,000; C. Sinclair, R. E. Allan, E. Languedoc.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the second week in January:—

Canadian Northern Railway

	1918.	1919.	Inc. or dec.
January 7	$ 565,800	$ 779,400	+ $213,600
January 14	1,033,607	1,420,433	+ 364,826

Canadian Pacific Railway

	1918.	1919.	Inc. or dec.
January 7	$2,343,000	$2,856,000	+ $513,000
January 14	2,368,000	2,891,000	+ 523,000

Grand Trunk Railway

	1918.	1919.	Inc. or dec.
January 7	$ 773,848	$1,003,631	+ $229,783
January 14	654,794	1,029,578	+ 374,784

FOURTEENTH ANNUAL REPORT

BY THE DIRECTORS OF

THE IMPERIAL GUARANTEE AND ACCIDENT INSURANCE COMPANY OF CANADA

FOR THE TWELVE MONTHS ENDING THIRTY-FIRST DECEMBER
NINETEEN HUNDRED AND EIGHTEEN

The Directors have much pleasure in submitting to the Shareholders their Fourteenth Annual Report for the twelve months ending 31st December, 1918.

BUSINESS: The Company issued 18,626 Policies for insurance of $37,174,370.00. The premiums on new and renewed business amounted to $362,785.65, with premiums paid for of $355,336.68, being an increase of $52,128.00 in premiums on business written, and an increase of $47,098.72 in paid-for premiums. The interest earnings amounted to $20,516.28, an increase of $976.83. It is satisfactory to note a favorable reduction in the ratio of expense to premium income.

The influenza epidemic has had the effect of abnormally increasing the claims paid, and requiring increased provision for the liabilities connected therewith.

ASSETS: The Assets of the Company now amount to $481,584.30, and the investments of the Company are all first-class securities bearing good interest returns. The Bonds and Debentures are carried in the Assets at a valuation actually below the valuation authorized by the Dominion Insurance Department.

SECURITY: After providing $172,940.00 for Unearned Premium Reserve and Reserve for Outstanding Claims; and after providing for other liabilities, the surplus to policyholders is $298,139.00, which, together with the uncalled subscribed Capital of $800,000.00, makes the available security for all contracts $1,098,139.00.

The lines of Insurance now written are: Personal Accident Insurance, Sickness Insurance, Elevator Insurance, Fidelity Guarantee, Plate Glass Insurance, and Automobile Insurance (including insurance of Automobiles against Fire.)

The Certificate of the Auditors is appended to the Financial Statement as to the audit of the Company's affairs.

HERBERT C. COX,
President.

Toronto, 10th January, 1919.

Statement for Year Ending December 31st, 1918.

AUDITORS' CERTIFICATE.

We have audited the accounts of the Imperial Guarantee & Accident Insurance Company of Canada for the year ending December 31st, 1918. We have examined the Securities and verified the Cash and Bank Balances, and we certify that the above Balance Sheet shows the true position of the Company at that date.

CLARKSON, GORDON & DILWORTH,
Chartered Accountants.

Toronto, 10th January, 1919.

PERSONAL NOTES

Mr. H. W. Binning, manager of the Charlottetown branch of the Bank of Nova Scotia, has been appointed manager of the Montreal office.

Mr. C. H. Cahan, K.C., lately director of Public Safety, will, it is understood, be appointed assistant general manager of the Bank of Nova Scotia.

Mr. J. E. Aldred, president of Shawinigan Water and Power and Laurentide Power, has been chosen chairman of the executive committee of the Merchants National Bank, New York.

Mr. W. A. Denton has been elected to the directorate of the Continental Life Assurance Co. Mr. Denton is the senior member of the firm of Messrs. Denton, Mitchell & Duncan.

Mr. Thomas Cantley, chairman of the board of directors of the Nova Scotia Steel & Coal Co., Ltd., sailed for Great Britain and France on January 21st, to be away for four or five weeks.

Mr. J. Gosselin, who is well known in Montreal financial circles, has gone into partnership with Geo. W. Fairbanks, of Geo. W. Fairbanks & Co., members of the Montreal Stock Exchange.

Mr. Arnold M. Ivey has been elected to the directorate of the Trusts and Guarantee Co., Ltd., Toronto, in succession to his late father. Mr. Ivey is president of the John D. Ivey Co., Ltd., and the Toronto Housing Co., Ltd.

Mr. James C. Johnston, manager for the Pacific Coast, of the Insurance Company of North America, has retired. He is succeeded by Mr. M. Kelly, assistant general manager at San Francisco. Mr. Kelly recently made a tour of inspection of British Columbia.

Captain Hugh W. Murray, of Toronto, member of the former firm of Murray, Mather & Co., has just returned from overseas. Mr. Murray is well known in Toronto, where he was engaged in the bond business for several years before forming his partnership with Mr. N. L. C. Mather in 1912.

Mr. Ralph A. Stephenson, of Harris, Forbes and Co., investment bankers of Montreal, has sailed for Europe, where he will spend the next six months in connection with the foreign business of his firm. During Mr. Stephenson's absence abroad, Mr. J. A. Eccles, of the Boston office of the company, will act as manager of the company's business in Canada.

Captain H. C. Scott, head of the stock brokerage firm of H. C. Scott & Co., Montreal, members of the Montreal Stock Exchange, has returned from overseas. Captain Scott, who went overseas in 1915 with the 148th Battalion and later transferred to the 13th Battalion, with which unit he went to France, latterly served on the headquarters staff in London, England. He intends to resume his brokerage business immediately, and is having his seat on the exchange transferred back to his name. During his absence, Gordon B. Forsyth, a member of the firm, has acted on his behalf on the board.

OBITUARIES

Mr. F. W. G. Johnson, who died in Montreal from pneumonia, was widely known in bank, insurance and fraternal circles.

Mr. John F. Raper, Sr., father of one of Ottawa's best known business men, John Raper, Jr., head of the firm of Raper Piano Co., died at his residence, Westboro, January 17th, at the age of 82 years.

CONTINENTAL LIFE RESULTS

The following are the principal items in the statement of the Continental Life Insurance Company for the year 1918 as compared with the previous year:—

	1917.	1918.
Premium income	$ 417,389	$ 456,636
Total receipts	515,717	554,672
Death claims	128,576	127,381
Total payments of policyholders	201,624	246,428
Shareholders' dividends	14,000	7,000
Head office expenses, etc.	38,143	38,851
Agents' commissions, etc.	90,449	89,524
Total expenditure	372,362	413,419
Excess rates over expenditure	143,355	141,253
Insurance in force	12,031,151	12,786,784

This report was taken up by the directors at the annual meeting held on Wednesday, the 22nd instant. Mr. G. B. Woods, president, in referring to the heavy death losses stated that of the deaths reported to a total of $150,120, $64,500 were from influenza and $40,650 were war claims. The total assets now amount to $2,515,304 as compared with $2,220,166 in 1916.

New directors elected at the meeting were Messrs. W. A. Denton, of Denton, Mitchell and Co., Toronto, and W. A. Dryden, of Brooklyn, Ont.

BANK OF NOVA SCOTIA'S POSITION

The eighty-seventh annual report of the Bank of Nova Scotia which was considered at the annual meeting held in Halifax on January 22nd, appears in this issue. Total assets are shown to have grown from $138,297,245 at the end of 1917 to $161,329,703 at December 31st last, an increase of $23,032,458, or 16.7%. Of the total assets $35,257,266 is represented by actual cash on hand and in the Central Gold Reserves as security for the excess circulation, an amount equal to 25% of the total liabilities to the public. Balances with other banks and quickly realizable securities also make a substantial total. Commercial loans in Canada show a material increase, an evidence of the important part taken by the bank in helping to carry on the general trade of the Dominion.

On the liability side of the statement deposits by the public are seen to total $122,228,161, a sum $17,890,000 larger than that of a year ago. The paid-up capital stock and the reserve fund remain unchanged at $6,500,000 and $12,000,000, respectively.

The profits for the year, after making all the necessary deductions amounted to $1,411,925, which with $560,269 brought forward from last year gave $1,972,195 available for distribution. The usual dividend was declared. The war tax on circulation took $65,000, contributions to the various patriotic funds absorbed $47,500, $50,000 was added to the Officers' Pension Fund and $150,000 was written off bank premises account, leaving $749,695, which is being carried forward to the current year as undivided profit.

The old directors were all re-elected, and at a subsequent meeting Charles Archibald was re-elected president and G. S. Campbell and J. W. Allison, vice-presidents. The proposed amalgamation with the Bank of Ottawa had been ratified at a previous meeting of the directors. At the shareholders' meeting satisfaction was generally expressed over the projected merger.

In moving the adoption of the director's report showing profits for the year of $1,411,925.04, the president referred to existing general conditions in Canada and the belief that the ending of the war would prove the beginning of larger and better things in banking and commercial life throughout the Dominion.

The Brantford Municipal Railway carried 2,500,000 passengers during the year 1918 without one accident, according to the statement of the retiring chairman, W. R. Turnbull, at the inaugural meeting on January 17th.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Consolidated Mining and Smelting Co.—At the annual meeting of the company the shareholders authorized the issue of $3,000,000 10-year 7 per cent. bonds to shareholders at par. The bonds may be called any time after January 1st, [illegible]2, and redeemed at $1.10, or they may be exchanged for stock par for par after January 1st, 1924

As no mention was made of dividends, it is believed that the company intends to continue its previous dividend policy

International Harvester Co. The company has purchased the Oliver interests in the Oliver Chilled Plow Works of Canada, Ltd., located in Hamilton. The name of the company will be changed. The Harvester company assumes immediate control and operation of the property.

The Oliver Chilled Plow Co. established its Canadian plant in Hamilton in 1910. It is one of the city's most important industries. The buildings occupied several acres of land in the industrial annex, close to the plant of the International company

Brazilian Traction, Light and Power Co.—The gross earnings of the company for November, 1918, showed a decrease of 114,000 milreis from November, 1917. Operating expenses, however, showed a decrease of 345,000 milreis, hence net earnings, at 3,723,000 milreis, represented an increase of 231,000 milreis. The report for November states that the decrease in gross was due to a serious influenza epidemic raging in Rio de Janeiro during the month.

During the first eleven months of the year gross earnings increased 9,232,000 milreis, and net increased 4,428,000 milreis

Shawinigan Water and Power Co.—The company has disposed of an additional $500,000 stock, the transaction having been carried out privately at terms stated to be advantageous to the company. The fact that the stock had been sold was made known through an official notice to the Montreal Stock Exchange applying for the listing of the additional [illegible],000 shares, and quoting from the minute book a resolution giving the directors authority to sell the stock at a price not less than 105."

The exact price realized in the sale was not officially announced, but it was stated that the company had realized a substantial premium. That the stock was sold privately and not offered to shareholders for subscription was due to the amount being so small that it would not have been worth while to have extended subscription privileges.

The outstanding capital of Shawinigan is $15,000,000 and the authorized issue $20,000,000. Complete conversion of the $4,500,000 convertible notes, with the block of $500,000 stock now sold, would practically bring outstanding stock up to the $20,000,000 limit.

International Loan Co.—The president of the company has reported to the directors that he has completed the sale of the first million dollars of the capital.

This stock has all been placed in Manitoba, chiefly with farmers, and the loans have all been made to farmers. The shareholders number almost 1,000. The company deals in nothing but first mortgages on real estate.

The shares are being sold at $110, so that all the costs of the sale are covered and a small reserve created from the beginning

A year ago at the shareholders' meeting it was reported that $[illegible],000 in shares had been sold, and that the effort would be made to place $400,000 during the fiscal year which ends on January 31st. This has now been accomplished, and a beginning is being made on the sale of the second million in the expectation that the second million will be placed this year.

The plan of the International loan is to sell in the course of years $10,000,000 in common stock. All shares placed after March 14th will be sold on a basis of $120. No bonds will be sold until the number of shareholders has been very greatly increased. The annual meeting of the shareholders will be held on March 14th next.

Lake Shore Mines, Ltd.—The company's mill started operations on March 7th, and up to November 30th produced $370,128 worth of gold. The ore taken from four levels was development ore. Drifting, cross-cutting and raising to the extent of 1,820 feet was done, and 80 per cent. of all drifting was on ore of milling grade.

The company's expenses amounted to $185,461, including $158,176 operating expenses, depreciation $22,285, and directors' fees $5,000. The sum of $43,365 was charged to development account during the first three months, when the mill was not yet in operation. Thus a surplus was left of $234,978. The sum of $90,000 was charged against provision for exhaustion and a net profit was made of $144,987. The company paid two dividends (5 per cent. each), amounting to $100,000, invested $50,000 in Victory bonds and carried forward into the current year a surplus of $44,978. The capitalization is $2,000,000 (par value $1). The company has opened up rich new lenses of ore on the 400-foot level and levels above, but, as operating conditions have been difficult with respect chiefly to labor, no great amount of raising has been done. For this reason no attempt has been made to estimate ore reserves.

The balance sheet shows current assets of $186,996 as against current liabilities of $84,841, thus leaving net working capital of $102,000. Of the current assets, $49,417 was cash, $52,154 bullion, $50,000 Victory bonds and $33,634 supplies on hand.

Brompton Pulp and Paper Co.—The company reports earnings of $1,051,274 for the year ended October 31st last, a decrease of about $20,000 from 1917. The balance, after interest, depreciation and preferred dividend, was $637,274, equal to 9.16 earned on the common stock, on which 5 per cent. was paid in dividends.

The balance sheet shows some fairly large changes. Inventories are up about $900,000, and as one result of this an item of $500,000, bank loan, appears among current liabilities. Net working capital, however, is higher. Current assets are $3,093,467, against current liabilities of $1,279,673, leaving working capital of $1,813,794. A year ago the position was: Current assets, $2,208,934; current liabilities, $489,178; working capital, $1,719,756. The item of "investments," which includes the purchase of subsidiary concerns, is up sharply from $149,277 to $479,925.

Accompanying the report is notice of an issue of $1,000,000 20-year 6 per cent. general mortgage bonds, authority for which will be asked from shareholders at a meeting on February 4th. The proceeds of the issue will be used to finance the purchase of the Odell Manufacturing Co.

Shareholders of record January 25th will be offered rights of subscription to the new issue at a price of 80, in the proportion of $100 in bonds for every nine shares of stock. The first payment will be $8 on February 18th, the balance to be paid in nine equal monthly instalments of $8. Rights of subscription expire February 18th.

In connection with the new issue the directors' report states that the directors and large shareholders have already underwritten their quota of the bonds, and arrangements have been made for the sale of any balance not subscribed for by the shareholders.

CONDENSED ADVERTISEMENTS

"Positions Wanted" 2c per word all other condensed advertisements 4c. per word. Minimum charge for any condensed advertisement, 50c per insertion. All condensed advertisements must conform to usual style Condensed advertisements, on account of the very low rates charged for them are payable in advance 50 per cent extra if charged

INSPECTOR FOR ONTARIO.—A strong tariff company requires the services of a capable and energetic young man as inspector for Ontario. Apply stating age, experience, and full particulars to P.O. Box 579, Montreal.

A HAIL MANAGER OPEN FOR ENGAGEMENT.—Ten years' experience managing Hail branch in three western provinces for large company. Have just been discharged from Army and am ready to negotiate for similar appointment. Apply E. W. Middleton, 516 Camden Place, Winnipeg.

INVESTMENT OPPORTUNITY

Extensive Western Pine Timber Holdings and Mill on Favorable Terms.

FOR business reasons Eastern associates offer their Western soft pine timber holdings and mill for sale Mill has annual capacity of thirty million feet and is now in operation with extensive market already established. Property includes 32,000 acres Western Soft Pine Timber with 500 million feet tributary to mill Entire property is offered on favorable terms with moderate cash payment. Full particulars to principals only

Address 13F. Box 215 Monetary Times.

OUR OLDEST TRUST COMPANY

Canada's oldest trust organization, the Toronto General Trusts Corporation, has maintained its position in the forefront of the financial world, and its business in the year 1918 adds further to its strength. The following figures give the comparison between the results for 1917 and 1918 respectively:—

	1917.	1918.
Balance brought forward	$ 98,557	$101,443
Amounts and other income	621,447	654,130
Management expenses	320,561	332,161
Net profits for the year	300,886	321,969
Total available	399,443	423,412
Dividends	150,000	165,000
Patriotic subscriptions	12,000	13,000
Income tax	11,000	12,000
Written off head office building	25,000	30,600
Transferred to reserve	100,000	50,000
Carried forward	101,443	152,812

The balance sheet now shows assets totalling $90,832,629. Capital liabilities total $3,759,444; $8,185,883 of funds are handled on guaranteed accounts, and $78,887,301 of ordinary trust funds are in the hands of the company. During the year assets increased by about $7,500,000. The dividend was increased by 1 per cent.

A surplus of $21,188 is shown in the Ottawa civic financial statement of revenues and expenditures, exclusive of the cost of the influenza measures, which amounts to $33,439 to date.

DIVIDENDS AND NOTICES

THE MONTREAL CITY & DISTRICT SAVINGS BANK

The Annual Meeting of the Shareholders of this Bank will be held at its Head Office, St. James Street, on Monday the Tenth day of February next, at 12 o'clock noon, for the reception of the Annual Reports and Statements and the Election of Directors.

By order of the Board.
A. P. LESPERANCE,
Manager

Montreal, January 3rd, 1919.

CANADA CEMENT COMPANY, LIMITED

PREFERENCE SHAREHOLDERS

DIVIDEND No. 36

Notice is hereby given that a dividend of 1¾% for the three months ending December 31st, 1918, being at the rate of 7% per annum on the paid up Preference Stock of this Company has been declared, and that the same will be paid on the 16th day of February next to Preference Shareholders of record at the close of business, January 31st, 1919

H. L. DOBLE,
Secretary

Montreal, January 16th, 1919.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 128

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 28th February next, and that the same will be payable at the Bank and its Branches on and after Saturday, 1st March, 1919, to shareholders of record at the close of business on the 13th day of February, 1919

By Order of the Board.
JOHN AIRD,
General Manager

Toronto, 17th January, 1919.

BANK OF HAMILTON ISSUE

Sir John Hendrie, president of the Bank of Hamilton, has announced that the new issue of the bank's stock to the amount of $1,000,000 will be allotted to shareholders of record of February 20th, at $150 per share. It is offered the shareholders on the basis of one share of new to three shares of old.

WATER POWER IN ONTARIO

Ontario is rich in water power, nearly five million horse-power being available, according to a statement made by Prof. R. W. Angus, of the University of Toronto, although it is possible that it cannot all be used. It is gratifying to know that this amount does not decrease. As far as is known the power available from the rivers is as great as was the case 50 or 75 years ago. From the first days of Canada, water power had been used in a small way, but it was only about 15 years ago that it was developed to any large extent.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Chicoutimi, Que.—January 16—The Roman Catholic cathedral was destroyed. Painting valued at $100,000 a total loss. Estimated loss, $350,000.

Halifax, N.S.—January 14—Home of Captain Robinson Black was damaged.

Montreal, Que.—January 17—The Fairyland Theatre, on Notre Dame Street, was damaged. Estimated loss, $1,000.

Roberval, Que.—January 21—The large convent of the Ursuline Sisters was damaged. Estimated loss, $100,000.

Toronto, Ont.—January 18—Residence of Guy Bilkey, Kingston Road, Stop 17, was destroyed. Estimated loss, $10,000

January 19—Car of the Toronto Street Railway was damaged. Caused by short circuit. Estimated loss, $100.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Kingston, Ont.—During the year the department received and answered 121 alarms, this being the second largest number received in any one year, being only exceeded in 1913, when 132 alarms were received. Loss on buildings, $12,547; insurance, $99,200; on contents, loss, $35,268; insurance, $79,100; $1,400,000 blanket policy on building and contents. Total loss, $47,815; total insurance, $1,578,300.

Ontario.—During the first eleven months of 1918 there were 8,922 fires in Ontario, compared with 9,681 during the whole of 1917. The damage done up to December 1st, 1918, was $14,237,813, as against $10,365,539 the previous year. Insurance covered $9,129,523 of the loss during 1918. Matches were the largest individual factor in causing fires, being responsible for 82 outbreaks.

St. Catharines, Ont.—Mr. W. J. Early, fire chief of the city, reports the following results for the year 1918: During the year the department responded to 109 alarms. The total value of buildings endangered by fire, $243,270; insurance on buildings, $160,325; value of contents, $384,500; insurance on contents, $268,025; loss on buildings, $24,289; loss on contents, $11,519; value of property upon which insurance was carried, $2,400; loss on freight cars and building with no insurance, $500; loss on contents with no insurance, $1,100. Of the total loss on contents of buildings, $2,175 was on auto cars, $2,175, the value of which was given as $25,100, which were insured for $17,000; value of household goods not insured, $2,200

Toronto, Ont.—January 7—Garage and five motor trucks of the Canadian Northern Railway system were damaged. Caused by defective stove. Estimated damage to stock, $20,500; to building, $2,000. A total insurance of $22,500 was carried as follows. Maritime Insurance Co., Ltd., $20,000; Western Assurance Co., $2,500.

DOMINION FIRE CHIEFS

The Dominion Association of Fire Chiefs has not as yet decided when its 1919 convention will be held, but suggestions are being invited regarding the topics to be discussed and other business. It was decided at the 1918 convention that this year they should meet in Calgary, Alberta. The membership now consists of active members, to which all chief fire officers are eligible; associate members, to which principals of municipal councils, heads of firms or corporations having private fire departments or brigades and others interested in fire prevention are eligible; honorary members and life members.

Mr. Thomas Armstrong, Post-office Box 56, Kingston, Ont., is secretary of the association.

BRITISH MORTGAGE LOAN COMPANY

In addition to paying the regular dividend of 10 per cent. per annum for the year 1918, the British Mortgage Loan Co., Stratford, Ont., was able to add $20,000 to its reserve fund, and carry forward to the credit of profit and loss a balance of $7,298, as compared with $3,475 brought forward from the preceding year. Total revenue was $166,128, of which mortgage interest and rent comprised $157,349 and profit on sale of Anglo-French bonds $4,953. Debenture interest and interest on deposits required $45,253 and $27,104, respectively.

The company's assets now total $2,680,091, of which $890,783 is invested in government and municipal bonds.

SCOTTISH METROPOLITAN MANAGER

Mr. J. Upton Fletcher, who has for some years past been accident superintendent of the Montreal branch of the London and Lancashire Guarantee and Accident Company, has assumed the management for Canada of the Scottish Metropolitan Assurance Company, Ltd. This company is a subsidiary of the London and Lancashire Life and General Assurance Association, Ltd., of London, England, the manager of which for Canada is Mr. Alexander Bissett. As mentioned in *The Monetary Times* recently, the Scottish Metropolitan has been granted a license to transact fire, accident, automobile, burglary, guarantee and sickness assurance in Canada.

CONTINENTAL COMPANIES MAKE NEW RECORD

At this period of the year, when the experience of companies is a current topic, it is interesting to note that the continental group of companies, which comprise the Continental Insurance Co., of New York; the Fidelity-Phenix Fire Insurance Co., of New York, and the Fidelity (fire) Underwriters, of New York, has attained with the close of last year an enviable position among fire insurance institutions operating in Canada. For the first time the continental group is able to report this year over a million dollars of Canadian business, the net premiums for the companies being $1,003,579. By comparing these figures with those of 1917, when the premiums were $815,516, we find an increase for the past twelve months of $188,053. That this increased business has been carefully selected is shown by the fact that the combined loss ratio for 1918 on the above premiums is 47 per cent.

The Fidelity-Phenix Fire Insurance Co. has increased its assets since January 1st, 1918, by the sum of $3,330,523, and its total assets now exceed $22,347,599. The Continental Insurance Co. has increased its assets since January 1st, 1918, by the sum of $3,878,596, and its statement now shows total assets of $36,500,504.

These companies have received a license from the Dominion government to write hail insurance, and their organization has already been perfected so that they will be issuing policies for the season 1919.

The Continental, the Fidelity-Phenix and the Fidelity (fire) Underwriters are a strong combination in the business with $58,000,000 of assets, and are making good progress in Canada under the able direction of Manager W. E. Baldwin.

Alleging "incendiarism, with further purpose to defraud," eleven insurance companies named in the suit of the C. S. Judson Co. to recover $130,000 unpaid insurance on its building at Winnipeg, which was swept by fire September 28th, filed rebuttals on January 14th. Each cites as an auxiliary defence a paragraph in companies' policies, declaring non-assumption of liabilities for fires in buildings in which inflammable commodities are kept.

Postponement of Tariff Issue Urged

Manufacturers' Association Maintains That Present Tariff Should be Retained—Reply to Western Grain Growers—Burden of Reconstruction Falls on Industry—Revision Should be Postponed for Some Time

A PLEA for the retention of the present tariff, including the war levy, is contained in a statement issued on January 29th, in reply to the Grain Growers. It says:—

The Canadian Manufacturers' Association wishes to state clearly its position with regard to certain demands now being made, especially by the Western Grain Growers, for a radical change in the tariff of Canada.

The chief of these demands are:—

"1. An immediate and substantial all-round reduction of the customs tariff, including the removal of all duties on farm and household machinery, lumber, cement, oil and a number of other articles which farmers buy.

"2. Complete free trade between Great Britain and Canada in five years.

"3. The acceptance of the reciprocity treaty with the United States, which was rejected by Canada in 1911.

"4. That any further reduction of the tariff of the United States toward Canada be met by a similar reduction of the Canadian tariff towards the United States." (Presumably free trade with the United States at any time the United States is ready for it).

It is fair to assume that the above resolutions are designed not merely to make slight changes in the tariff, but rather to abolish it entirely, thereby revolutionizing our present fiscal system

The Canadian Manufacturers' Association urges most strongly that all tariff controversies should be postponed until the country has settled the immense problem of readjustment from war to peace conditions. It is believed that this view is held, not only by the manufacturers and their employees, but also by nearly all the financial and commercial institutions and their employees, by the transportation companies and their employees, and, in addition, by great numbers of farmers who have found a steady market for their produce in factory towns and cities.

It is a general and familiar law that, in any country, when fundamental tariff changes are anticipated, trade depression follows. During such periods of uncertainty, investment is curtailed, enterprise is limited, commerce lives from hand to mouth, consumers buy sparingly, and building languishes. Timidity replaces confidence and resolution, and the general attitude may be described as "wait and see."

This is exactly the opposite of what is required to-day. If ever Canada needed courage, initiative and united effort, now is the time. The chief problem is: How can this country adjust itself from war to peace? It is no reflection upon the farmers to recall the fact that only a small percentage of the Canadian army came from the farms, because it is recognized that the chief duty of the farmers during the war was to produce food, a duty which was performed by them with singular courage and success.

Consequently, the bulk of the Canadian army will have to be reabsorbed by commerce, and especially by the manufacturing industries, which must also try to provide work for those of the war workers who really need it.

Yet, at the very time when "reconstruction" seems to be crystallizing into the hope that the manufacturers will be able to furnish employment, a fiscal policy is advocated, which, if put into effect, would close many factories and reduce the staffs of others.

How can the commercial interests make plans to provide employment if they fear that the ground may suddenly shift beneath their feet? How can they continue the struggle to maintain and develop an export trade, a course which is being strongly urged upon them, if the Canadian market is suddenly invaded by competitors from other countries?

The possibility of the introduction of anything approaching free trade would create immediate and wide-spread unemployment. Unemployment breeds social unrest, something which does not require encouragement in Canada at the present time.

In the manifesto issued to the electors of Great Britain before the general election, signed by Mr. D. Lloyd George and Mr. A. Bonar Law on behalf of the Coalition, it was declared that if the Coalition succeeded in the election, "a preference will be given to our colonies upon existing duties and upon any duties which for our own purposes may be subsequently imposed." It was further declared that the British government would preserve and sustain key industries in the way which experience and examination might prove to be best adapted for the purpose, and that in order to maintain production at the highest limit at home, security would be given against the unfair competition to which British industries might be subjected by "the dumping of goods produced abroad and sold on our market below the actual cost of production."

Since 1878, the national policy of maintaining the customs tariff, which will at the same time raise revenue, and provide moderate protection for Canadian industry, including agriculture, has been consistently supported by the greater portion of the population of Canada. Both political parties, while in power, adhered to it, differing only slightly in regard to the degree of protection which should be maintained. Under this policy Canada progressed so continuously, in agriculture, in industry and in commerce, that at the outbreak of war, it is doubtful if there existed a nation whose people were more intelligent, more prosperous, or less burdened by taxation. During the war this young nation enlisted an army of over half a million. We clothed them, fed them, paid them, and maintained them and their dependents until their great task was victoriously completed. Such a feat could have been accomplished only by a nation in which all departments of activity were well balanced and equally developed. Farms, factories, commercial institutions, banks, transportation companies, and wage earners have all prospered. We have come this distance safely and successfully. Is this then the time to urge the people of Canada to turn off that road which they have traveled in security alike in peace and war or to a new and untried road, the ultimate advantages of which can only be surmised?

Financial Aspect

During the last fiscal year the total Dominion government revenue was $260,778,952, of which $116,577,066 was collected by the customs tariff and $45,018,562 by the special war tariff. The total federal revenue, from all forms of taxation was $214,182,156, and of this amount the tariff collected over 75 per cent. In view of the fact that last year the tariff provided over 61 per cent. of the total revenue of Canada, and over 75 per cent. of the total secured by all forms of federal taxation, it seems reasonable to suggest that we should not throw away this means of securing revenue until we have found something which can be guaranteed to take its place, especially in view of the Dominion government's announcement that a revenue of $450,000,000 will be required to meet this year's expenditures, an increase of about $190,000,000 over last year.

If the tariff is abolished, how do the Grain Growers propose to raise this immense revenue? They answer this question by advocating a tax on unimproved land, an inheritance tax, and by the extension of the personal income tax and the tax on the profits of corporations—which are now in operation in Canada.

These forms of taxation, however, while capable of producing a certain amount of revenue, though by means of costly and complicated machinery, are so strictly limited by the well-known law of diminishing returns, that no country has found it possible to rely solely upon them for revenue.

The United States, for example, which under the democratic regime of President Wilson, increased such taxes, still finds it necessary to retain a protective tariff.

As the future fiscal policies of the great nations will not be determined until after the Peace Conference, Canada would be most unwise to consider any change until the general trend of international tariffs becomes apparent. While it is impossible to forecast what trade policies will survive, the tendencies at present are away from free trade, and it seems probable that Great Britain will be forced by her vast obligations to make new customs imposts.

Tariff Not Perfect

As the Canadian tariff has not been revised since 1907, it is not suited in many respects to present conditions, and revision is necessary. But the tariff is most intricate, and, as any change produces far-reaching results, revision should be preceded, if commercial stability is to be maintained, by the most careful study of the chain of industries likely to be affected by each proposed alteration.

The manufacturers of Canada, with the loyal co-operation of their great army of workpeople, did not fail the country during the war. At its start, industry was threatened with acute depression, but the manufacturers did not hesitate. They mastered the intricate problems of war production, reorganized their staffs, rebuilt their plants and placed them on a war basis. The result was that towards the close of the war they were employing about 700,000 people at the highest wages ever paid in this country, supplying the needs of Canada, supplying the army, and exporting manufactured goods to the value of $700,000,000 annually. Moreover, Canadian factories rapidly attained such a high degree of efficiency in war manufacturing that they were able to execute orders placed by the Imperial Munitions Board in Canada to the extent of $1,200,000,000, and also to accept over 250 contracts given by the United States ordnance manufacturers for the production of shells and component parts. Vast sums of money were thus brought into Canada, and, being distributed and spent in all parts of the country, filtered through all commercial channels and benefited all classes of the population. It is disagreeable to speculate as to what our financial situation would have been now, had Canada not possessed the ability, the enterprise, the factories and the skilled workmen necessary to achieve this result. It is more disagreeable to speculate how many days longer the war might have been protracted but for the important part Canadian factory production played in furnishing the munitions and equipment so vital for success.

The manufacturers who transformed Canadian industry from peace to war are not afraid of the task of transforming it back again from war to peace, but they ask for liberty to devote their entire energy to its accomplishment.

Therefore, the Canadian Manufacturers' Association believes that the country should concentrate on the one task of returning to peace conditions, with all its attendant questions, and leave the highly controversial problem of tariff revision to a time when it can be given the undivided attention it demands.

OFFER MOOSE JAW STREET RAILWAY

The shareholders of the Moose Jaw Street Railway are quite willing to sell at a price and to accept Moose Jaw five per cent. bonds. The city would not be required to pay a cent in immediate cash to secure possession.

The concern has 13½ miles of track and 22 cars. The capital stock is $760,372. The first operation was done in the fall of 1911. The enterprise seemed fairly satisfactory until the outbreak of war and quarterly dividends were paid at the rate of six per cent. per annum until that time.

If the city does not buy the railway, it is asked that certain obligations of the company be remitted, that permission be granted to charge seven cents fare and that the operation of one-man cars be allowed.

As the amount of money involved is small—less than a million dollars—it seems possible that Moose Jaw may take over the project from the private company. Most of the directors are from Ottawa, and the railway is controlled from that city.

In the last year for which figures are available the gross receipts of the company were $104,983; the operating expenses, $80,734; net earnings, $24,249; interest charges, $4,667; other deductions, $1,723; and balance at credit, $17,859. This was for the year ending June 30th, 1917, and indicates that with a return of better conditions the road might pay.

The Bank of Nova Scotia has opened a branch at Parkside, Saskatchewan

STANDARD STOCK EXCHANGE ANNUAL

The Standard Stock and Mining Exchange at the annual meeting on January 28th, heard reports of a most successful year, and a feeling pervaded the meeting that the outlook for 1919 was very promising. The surplus for last year was $16,447.76. The following officers were elected:—President, L. J. West; first vice-president, P. W. Cashman; second vice-president, D. G. Lorsch; secretary-treasurer, J. P. Cannon; directors, W. J. Chalmers, H. A. Fleming, J. T. Eastwood, P. G. Kiely, J. A. McCausland.

URGE REMOVAL OF EXCISE TAX ON ALCOHOL

The executive council of the Canadian Manufacturers' Association has notified the Council for Scientific and Industrial Research that the recommendation made by the Research Council to the government for the removal of the excise tax on alcohol for industrial purposes is being strongly supported by the Manufacturers' Association. The legislative council of the association has passed a resolution urging the government "to permit the use of excise-free alcohol subject to restrictions which would protect revenue and public safety." The resolution refers to the fact that a number of distillers are now lying idle, that new processes are now available for making alcohol from non-edible materials, that the Dominion has now an unusual opportunity of extending its industries in many directions, and that a new source of motor fuel is desirable.

ALBERTA FARMERS ON FINANCE

Hail Insurance Discussion—Tariff Policy Attacked—Organization Has Grown Rapidly

The United Farmers of Alberta, who met in Edmonton at their eleventh annual convention on January 21st, had before them an extensive program, including 139 resolutions. Presidential addresses were delivered by President H. W. Wood, of the men's section, and President Irene Parbly, of the women's section. Hail insurance was one of the foremost topics.

The United Farmers of Alberta have incorporated during the year, and one of the objects of incorporation was to give the United Farmers of Alberta the power to act as agents for hail insurance. The executive had found it impossible to make satisfactory arrangements with any live company, they said, and had then asked the United Grain Growers to see what they could do. They had secured the agency of a satisfactory company, but on their representative presenting his credentials to the board of underwriters he was confronted with the following clause in their constitutions, which had been passed that day in anticipation of his visit: "That no member may appoint as its general or local agent any individual partnership, company or association of any kind or any official or representative thereof identified with any body or combination of organized farmers with the end in view of inducing or securing applications for hail insurance through permitting or offering,, either directly or indirectly, benefits from the commission thereon."

The United Farmers adopted a new hail insurance scheme for the organized districts of the province which was submited by E. H. Malcolm, secretary of the Provincial Hail Insurance Board. This is what is known as the farmers' own scheme, and eliminates certain objectionable clauses of the act as it has operated for the last five years. The districts included are all those south of the North Saskatchewan River, and including a block of land north of the river to township 59, and as far east as the line between ranges 21 and 22, west of the fourth meridian.

The bill presented to the legislature last year found some objection from members of that body. Those living generally to the north of Edmonton objected to having the act apply there; other objections came to having the act apply without the ratepayers of the various districts voting upon it. These suggestions were agreed upon and the new plan presented, which shows changes in principle only, and little serious objection had been found. The board had covered a wide range of territory, and had taken advice from many quarters.

Since the legislature had demanded a vote, a date for polling was set in 145 districts for February 27th. If approved in forty-five or more of these districts the act will become operative, and the general district is formed of those approving the plan. On March 3rd the minister of municipal affairs will call a meeting in Calgary of the various districts, when directors will be elected. These directors will be called the Hail Insurance Board, and will have authority to borrow money, make by-laws and carry on the business as they see fit.

Crops Automatically Insured

In the whole hail insurance district, save where a farmer definitely withdraws his lands, all crops of grain will be automatically insured. In addition, any person outside the district and in another that is not organized may apply for insurance. Early in the spring blanks will be sent out to every farmer, asking for reports on his different kinds of crops, whether he wishes to withdraw, and whether he wishes a $6 or an $8 insurance. Mr. Malcolm believed the plan was very flexible, for by it a man may insure his wheat at $8, his oats at $6 and leave his barley unprotected, or he may make any other combination. Under the old plan he had to insure everything whether he wished to or not, whereas now he pays only on the acreage actually insured.

In regard to premiums, the law provides that the rate to be levied shall be only on the crops reported by the farmers. After the year's losses are found the amount is added to the administration expenses, and provision is made for levying for a small surplus, not to be less than 10 per cent nor more than 20 per cent, depending upon the size of the losses, and this move is intended to keep premiums at a level. The number of acres insured is divided into the total, and the rate so struck. All losses and administration are to be paid each year. The tax levied must be paid by the secretary of the municipal district, and is payable by December 1st.

Administrative Powers

Among other powers granted by incorporation was that of administrating estates. Having gained the powers, the executive of the United Farmers of Alberta, for what seemed to them good and sufficient reasons, turned this business over to the United Grain Growers, to be operated as a special department. This action was questioned by James Weir, the non-partisan member of the legislature, and he brought in a resolution to have this action of the executive rescinded and the work of administrating estates returned to the United Farmers of Alberta. The resolution was tabled by an overwhelming majority.

Protection Policy Assailed

A definite attack on the federal policy of a protective tariff was launched at the afternoon session. In addition to endorsation of the tariff plank in the platform of the Canadian Council of Agriculture, the central board of the United Farmers of Alberta submitted a resolution, and no less than seven resolutions from various locals demanding a lowering of the tariff was sent to the convention by the resolutions committee.

Another important resolution was presented by Rice Sheppard, of Edmonton, with respect to live stock and transportation problems, mostly dealing with express charges, which the report declared were excessive. Vice-president P Baker, in a report dealing with the dockage of light hogs, said the committee, in consequence of a visit to the local packing plants, was satisfied that certain animals were justly due a dockage. They were, however, not prepared to say what terms in cash should represent this dockage, and recommended the appointment of an official grader to grade all animals not agreed on as select.

The annual address of President H. W. Wood advocated a fixed price on wheat for the 1919 crop, saying, "Surely, if it was just to hold the price down in 1918 when adverse influences were forcing it up, it is just in 1919 to hold it up when adverse influences are forcing it down."

The report of the board of directors suggested an increase in membership fee from $2 per year to $3, or even $5. An outstanding point of the morning session was the passing of a resolution to pay back to the government the $2,000 grant received last year. The motion declared that the time had come when the United Farmers of Alberta should be independent of all outside help.

Jean Masson, of Montreal, secretary of the national inter-provincial committee, composed of representatives of the organized farmers of Ontario and Quebec, gave an address to the convention on the working out of inter-provincial farm problems and co-operation.

Banks are Criticized

Declaring that four great banking institutions in Canada held in their control every [illegible] of money and credit in the Dominion, and that a majority of three on the committee of five of the Bankers' Association could do as they liked with the prosperity of the country, J. W. Leedy, former governor for two terms of the State of Kansas, declared that the Canadian banking system was not suited to the needs of the Canadian farmers.

Mr. Leedy contended that the bank system, as it at present existed, was hurtful to the general welfare of the country and was one of the reasons why this Dominion, after spending years of effort and millions of dollars, could only boast of a population of 7,000,000 souls. He would put at least a portion of the deposits beyond the control of the great banks. He spoke of a pamphlet, issued two years ago by the Canadian Bank of Commerce, which said that in the prairie provinces there had been loaned to farmers $75,000,000. Taking it for granted that there was a similar amount loaned to the same people over the rest of the Dominion, the total was yet far below the amount outstanding in call loans outside of the state. The $150,000,000 loaned to farmers represented only one-tenth portion of the total deposits of the people of the Dominion. He contended that that was not a fair division, that the farmer, the great producer, was entitled to at least 40 to 50 per cent. of the total deposits, and at a low rate of interest.

Continuing, he likened the Canadian banking system to a flintlock gun on the shoulder of a Royal Northwest Mounted policeman. He declared that it was a generation behind any other system in the world, while the New Zealand system was a generation ahead of all others. Canada's trouble lay largely in the fact that when this banking system was brought from England all of the machinery was not brought with it. In the Old Country it was possible for the small producer to get a line of credit, but here it had been made a law that no agricultural product could be taken as security against a loan until it had passed into the hands of a trader. In 1912, an amendment was made which permitted loans being made against thrashed grain that had been raised by the farmer on his own land.

Comparison with Kansas

He compared that amendment with an incident in Kansas in 1914, when the grain markets of the world were demoralized and the price of wheat was low. Under the Canadian system the western farmers were compelled to thrash and dump their product on the market at an inopportune time. Twenty-five per cent. of the farmers held one-quarter of their wheat. In Kansas, the small state banks, capitalized from $10,000 up to $100,000, advised the farmers to stack their grains, and loaned money against it. If it were thrashed there would not be storage space and it must go at the low rate. The result was that it was worked off gradually when the price had advanced fifty cents per bushel. The farmers received $22,500,000 more than if they had been forced to sell. If they had paid the banks $2,500,000 of this, which was really a high figure, they would still be $20,000,000 ahead of the game. In the case of the frosts of last June, the wheat straw was worth at least what it cost to put it up, yet thousands of acres of roughage was cut with a mowing machine, or left to stand and burned in the fall. Small state banks could have financed the proposition and saved the country many thousands of dollars in feed and the farmers at least their living for the winter.

Small Credits Wanted

Turning to the small credit system, he declared it was for the lack of it that the cities of Edmonton, Calgary and other towns in Alberta were sold out for taxes. It was because the contiguous territory was not developed, nor never would be until a system was devised whereby the homesteader never had to get in the bread line. At the start of the war, when the banks and big supply houses cut down, or off altogether, the credits of the retailers, they did so on the advice of the bankers.

Building stopped at once and the number of unemployed grew to amazing proportions. The farmer was affected and the homesteader was forced to come to the city to look for work. With a system of state banks, owned by the community itself, such a condition would be impossible. The agricultural industry would be stabilized and selfish devices overcome. The farmer could be financed over the trying times.

The Bank of Montreal has opened a branch at Lestock,

NORTH AMERICAN LIFE

The North American Life Assurance Co., in its annual report for the year ended December 31st, 1918, records the largest year's business in its history. Losses also were unusually high, but the year as a whole was a satisfactory one. The following figures compare the results with the previous year:—

	1917.	1918.
Premiums less reassurances..	$2,194,634	$2,437,466
Income on investments	937,837	1,005,446
Claims paid	551,180	647,598
Expenses (office)	289,161	318,645
Field expenses	404,366	443,158

The total assets are now $18,185,610, an increase of about $500,000. Mortgage holdings have decreased slightly, but holdings on bonds, debentures and stocks are now over $10,000,000. Policy loans also fell off slightly.

At the annual meeting held on Thursday, January 30th, the president, Mr. L. Goldman, gave some interesting figures regarding the company's death claims. "The total out-go for the year," he said, "is some $200,000 in excess of the previous year, due mainly to payment of death losses, dividends to policies, etc. In connection with our death losses, amounting to $874,037, it may be interesting to know that our total claims for the year 1918 were some $300,000 in excess of the previous year, making the actual mortality experience of the year 115 per cent. of the expected. The excess mortality for the year was largely due to two causes, the epidemic of 'flu,' which cost us $234,800, being 26.9 per cent. of the total, and war, $177,178, being 20.3 per cent. of the total claims. It may be of interest to you to learn that since the war started the total war claims for this company up to the end of last year amounted to $467,234. That the 'flu' took off the younger lives is evidenced by the fact that on the 154 claims for the amount mentioned above, the average age was only 28. On 37 policies for $72,500, average age, 28, only one premium had been paid. On 36 policies for $44,985.58, average age 29, two premiums had been paid. Three premiums on 13 policies for $3,979.80, average age 29. Four premiums on three policies for $3,979.80, average age 24. Five premiums on four policies for $6,500, average age 32. Six premiums on nine policies for $13,000, average age 29. Seven premiums on six policies for $7,996.90, average age 27. Eight premiums on four policies for $4,000, average age 25. Nine premiums on six policies for $5,997.70, average age 27. Ten premiums on two policies for $2,000, average age 37. Eleven premiums and over on 28 policies for $48,400.91, average age 25."

The vice-president, Mr. W. K. George, referred especially to the company's operations. "The main functions of the directors of a life insurance company," he said, "is general supervision and familiarity with the plans and operations of the company, but mainly with the investment and disposition of its funds. Investments to be made by the company are presented to us at the regular meetings of the directors. In addition, two directors examine each quarter, the securities held by the company, and as these directors are changed quarterly it naturally follows that each director has an opportunity to know that the securities of the company are actually held, and as stated in this report. At the end of the year these securities, including the mortgages, are again checked over by directors, the professional auditors of the company, and subsequently by representatives from the insurance department at Ottawa. Thus assurance is made doubly sure as to the investments of the company."

BANK OF TORONTO DIVIDEND INCREASED

The Bank of Toronto has increased its dividend rate from eleven to twelve per cent. Up to 1911 the rate was ten per cent. In that year it was raised to eleven per cent., and from 1912 to 1914 inclusive, the rate was eleven per cent., plus one per cent. Since 1915, however, the extra one per cent. has been dropped until the present increase to a twelve per cent. basis.

WANTED—A NATIONAL VIEWPOINT

If there is one subject upon which Canada is liable to divide into two camps it is the tariff, for the division between the purely agricultural interests of the west and the industrial interests of the east correspond clearly to the sections separated by Lake Superior. The farmers of Canada are finding, through organization and co-operation, a new political power which they did not exercise before, and which they will apply towards securing a reduction in the existing tariff. The manufacturers, on the other hand, have been organized for a long time, and they are now prepared to resist any reduction in the customs duties, for they recognize that a large portion of the manufacturing industry in Canada cannot exist without protection. There are, in fact very few Canadian manufacturing industries which have passed the "infant" stage, in spite of the fact that writers have sometimes maintained that Canadian manufacturers can compete in the markets of the world. This is illustrated by a statement of Mr. S. R. Parsons, past president of the Canadian Manufacturers' Association, in a recent article in the "Toronto Star." "A common fallacy," says Mr. Parsons, "is that the tariff enriches all manufacturers to the full extent of same. This is positively ridiculous, as without the measure of moderate protection which the tariff affords, industries, except here and there, could not be sustained at all."

The interest of the farmers of Ontario, Quebec, and to a lesser extent of the maritime provinces, is to some extent linked up with the cause of the manufacturers, because the existence of large cities provides a convenient market for products of mixed farming which could not otherwise be profitably produced. In Western Canada this does not hold excepting in a few cases where mixed farming has developed in the vicinity of cities such as Winnipeg, Edmonton and Calgary, which are primarily trading rather than manufacturing centres. The position of the manufacturers is clearly stated in their reply to the Grain Growers' Association given elsewhere in this issue. They point to the fact that the burden of reconstruction will fall principally upon industry rather than upon agriculture, and therefore, nothing should be done to discourage manufacturing enterprises.

The westerners, of course, feel that they have continually borne the burden of the Canadian tariff for the protection of eastern interests, and have secured no benefit from it themselves. They are now averse to carrying for an indefinite period the extra war levy. It is a question, however, if a large reduction in the tariff, while increasing the profits of agriculture in Canada, would not so disorganize our manufacturing industries, that the net result to the nation would be a loss rather than a gain. Most certainly the industrial situation in our eastern cities which promise to be a difficult one for some months and possibly years to come, would be aggravated by such a measure.

The soundest solution would be a compromise such as an agreement to maintain the present tariff, including the war levy, for a period of say two years. One of the points which must be kept in mind is that uncertainty is always injurious, and an agreement promptly reached and carried out, while it might not be for the best interests of the nation, as a whole, would at least enable definite plans to be made. There are many United States organizations which are postponing their plans to erect branch plants in Canada in view of the uncertain outlook for the tariff here.

Compromise has been a frequent factor in British history and there is no reason why it should not be a useful expedient at this critical stage in Canada's development. A new government, no matter how radical it might be, could not achieve more than a partial reduction in the tariff. In fact, the Liberal government which came into power in 1896 on an avowed low tariff understanding, did not accomplish anything in this way except the Imperial preference. The tariff has become an integral part of Canadian industrial life, and as the Hon. Robert Rogers said recently in Winnipeg, "for forty years Canada has been [illegible] speeches on tariff reform, but it is a noted fact that throughout this long period our tariff has remained practically the same. The phrase 'tariff for revenue only' has always been vague and indefinite."

What is wanted, therefore, is a national viewpoint as was asserted by the Hon. A. Sevigny at Toronto recently. "There must be mutual concessions between eastern and western economic ideals," he said, "if we wish to build a big country in Canada and maintain our British connection. The big question of the future is the tariff and we observe that the people of the west want free trade, while those of the east want protection."

INSURANCE FOR DISABLED MEN

How disabled soldiers who have become unfit to secure insurance in the ordinary way are to be given the privileges of insurance, is a subject which is interesting insurance men throughout Canada. On the one hand it could scarcely be expected that the companies should accept such risks at the usual rates, and the strongest objection is felt in Canada against the establishment of any government insurance scheme as such a system could not be profitably operated on a small scale, and no extensive system of state insurance is wanted here. In an article in *The Monetary Times* last week Mr. I. M. Bidwell, who is himself a returned man and a writer of life insurance, discussed a plan for the writing of this business by the companies, the additional risk to be met by a contribution from the Dominion government. A circular letter issued by Mr. William Thompson, president of the Insurance Federation of British Columbia, was also given in last week's issue relative to the same subject. How this question is being dealt with in other countries is, therefore, a matter of interest. The following official notice has been issued by the British government:—

"The government have had under consideration the question of the application of the Workmen's Compensation Act in the case of disabled soldiers, sailors, or airmen returning to civil employment. A fear has been expressed that their disability may make such men more liable to meet with accident in the course of employment, or to make the results of an accident more serious than they would be normally, and though experience in the past has not shown that on the whole the compensation charge in respect of men who have met with injuries is appreciably higher than the normal, the government desire to remove any cause which might place a difficulty in the way of such men obtaining employment. They have, therefore, decided in principle that any increased charge incurred for compensation in respect of disabled men shall be borne by the state, and they have adopted a scheme which has been worked out by a home office committee under the chairmanship of Lord Peel.

"The scheme proposes that an arrangement should be entered into by the government with the insurance companies by which the companies would undertake to insure disabled men at the general rate for the occupation, and not to increase their general rates in the future as the result of the employment of disabled men, the government under certain conditions to reimburse the loss (if any) which the companies may incur. It will be open, under the scheme, to employers who do not wish to insure in respect of their general liability, to insure their disabled men only at the ordinary rate."

EXORBITANT SHIPBUILDING COSTS

A pointed criticism of the shipbuilding programme of the United States government was expressed recently by Mr. C. Hannevig, president of the Dominion Shipbuilding Company of Toronto. He ventured the prediction that the United States could not compete with Great Britain in the building, managing and sailing of ships, and ridiculed the statement credited to the chairman of the United States shipping board that the United States had set for its goal supremacy in ocean trade. As the shipbuilding programme of our own Canadian government was also prepared at a time when costs were at a maximum much of this criticism applies here.

"The American shipbuilding programme will prove in time to be a stupendous farce," stated Mr. Hannevig. "It had become an orgy of extravagance and miscalculation. The cost which is being incurred in building tonnage is so high, so wildly beyond the mark, that rates of freight can never justify it. When the shipping board embarked upon hundreds and thousands of contracts the price was estimated at about $168 a ton. The position quickly became exploited by labor, with the result that the original contract prices were abandoned by State officials and the cost per deadweight ton is running from $250 up to $400.

"No private shipowners will ever dream of purchasing ships at such a price. The whole scheme was rushed and miscalculated. Moreover, much of the workmanship is so inferior, especially in regard to the wooden ships, that repairs will bring about another ruinous cost."

CO-OPERATIVE ENTERPRISE

It is a rather extraordinary thing at the present time for any organization which has any purpose approaching a patriotic one to commence operations without first appealing to a government or a municipality for financial assistance. That independence and individual initiative for which the British race has been so long given credit, have been, it seems, in danger of being lost. Now, however, a group of progressive war veterans have organized the "Grand Army of Canada" for the purpose of carrying out enterprises and looking after the general welfare of their members. One of the planks in the platform of this organization is that it shall do its own financing entirely; no funds should be received from any outside source whatever. Among other enterprises co-operative stores will be opened. These will presumably be open to public patronage and will deserve public assistance. The profits, after a dividend of six or six and one-half per cent. has been paid, are to be devoted to a relief fund for members of the organization.

TAX REFORM VOTED DOWN

The city council of Toronto on January 27th discussed a proposal to apply to the provincial legislature for power to assess real estate improvements at a lower percentage of value than vacant land. The legislation committee of the council favored making the application, but the board of control recommended against it and the council voted it down bv 17 to 9. The assessment commissioner, Mr. J. C. Forman, is opposed to the taxation of land on a different basis from improvements.

One of the difficulties presented was the fact that the city taxes are now very heavy, and it is not considered wise by some aldermen to experiment until the city is in a better financial position. Toronto already owns one million feet of vacant land, and the result of such a change would be that still further vacant land would come into the hands of the city for taxes.

The half-yearly index of The Monetary Times, July to December, 1918, is now ready, and a copy may be had on application.

The habit of forming labor unions has extended to insurance agents. A meeting of the Industrial Insurance Agents of Montreal was held on January 25th for the purpose of forming a union.

$60,000,000 FOR WHEAT CREDITS

The minister of finance has announced, in answer to an enquiry as to wheat credits, that the Dominion government had, in addition to the outside funds which the British government had been able to provide, authorized to date from the proceeds of the Victory Loan, credits of over $60,000,000, of which $11,000,000 had not yet been expended and was at the credit of the Imperial government for the purpose of buying wheat. In addition to this assistance, arrangements had been made with the Canadian banks for the financing of the wheat in elevators pending the delivery and sale to the Wheat Export Co.

MANUFACTURERS LIFE CHANGES

MR. R. JUNKIN.
Retiring Supt. of Agencies.

FOR some time, Mr. Junkin, manager of agencies of the Manufacturers Life Insurance Company, has expressed a desire to retire from the active duties his office involved, and the directors of the company have acceded to his request. Mr. Junkin's services, however, will not be entirely lost to the Manufacturers Life, with which he has been so long connected, as the vacancy on the board of directors has been filled by the appointment of Mr. Junkin to the directorate.

Mr. Alexander Mackenzie, who has occupied the position of assistant manager of agencies during the past year, has been appointed manager of agencies.

Mr. A. J. Prest, who has been secretary, has resigned this position to become assistant manager for Japan, and will shortly leave to take up his new duties.

Mr. E. S. Macfarlane, assistant secretary since 1917, has been promoted to the secretaryship.

MR. A. MACKENZIE,
New Supt. of Agencies.

BOND DEALERS DISCUSS FINANCIAL TOPICS

Bond dealers were well represented at the annual convention of the Bond Dealers' Association of Canada which took place in Montreal on Wednesday, January 29th, with headquarters at the Ritz-Carlton Hotel. An executive meeting was held on Tuesday, the 28th, and a further executive meeting on Thursday, the 30th. The officers elected are: Hon. president, E. R. Wood; hon. vice-president, E. Hanson; president, Sir Augustus Nanton; vice-president (eastern), A. P. Frigon, vice-president (central), J. H. Gundy; vice-president (western), A. L. Crossin; and an executive committee representative of the various provinces, in accordance with the constitution of the association. Provision was made for voting by ballot at the meetings, instead of the present system of open voting. Various special committees of the association have been formed on municipal finance, safeguarding of legislation, public utility and industrial issues, etc.

One question discussed was the formation of a depositary for legal documents and solicitors' opinions accompanying securities. The recommendation took the form of a proposal to create a central depositary where all documents, or an index to documents, will be filed, and which will be open to everybody on the payment of a small fee. This central depositary would therefore act as a sort of information bureau for the benefit of would-be investors either in Canada or in any other part of the world. Persons in England, for instance, wishing information concerning securities offered could, on the payment of a small fee, write to the central depositary and obtain whatever information had been collected by the depositary on the securities in question.

Numbers of complaints have been received by the bond dealers in the past about the amount of money that has been put into well-advertised corporation bonds that had no adequate security behind them, and, for the purpose of protecting the interests of investors, there will be a report on possible legislation regarding industrial corporation bonds, so that trouble of this kind in the future might be eliminated to a great extent.

Among those in attendance were: J. W. Mitchell and J. A. Fraser, Dominion Securities Corporation; G. H. Wood and W. N. McIlwraith, Wood, Gundy and Co.; H. R. Tudhope and F. J. Coombs, A. E. Ames and Co.; W. L. McKinnon, of W. L. McKinnon and Co.; C. H. Burgess, of C. H. Burgess and Co.; E. B. Thompson, of Campbell, Thompson and Co.; A. W. McLennan, of the Canada Bond Corporation; H. B. Housser, of Housser, Wood and Co.; H. L. Somers, of McDonagh, Somers and Co.—all of Toronto; A. F. Macintosh, of J. C. Macintosh and Co., St. John, N.B.; Jas. McMurray, of Eastern Securities Corporation; Geo. H. Sneath, of Nay and James, Regina. J. M. Mackie, of C. Meredith and Co., Ltd., president of the association, occupied the chair. Edwin Hanson, of Hanson Brothers, vice-president, was also there. Montreal members were well represented at the meeting.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.

Rate in New York—Sterling, demand, $4.75¾.
Bank of England rate, 5 per cent.

CANADA LANDED AND NATIONAL INVESTMENT

The profits of this company for the year 1918 were $415,795, or $1,500 less than last year. The balance brought forward from the 1917 account was $89,151, making a total of over $500,000 available for distribution. Interest on debentures required $195,257, and dividends at nine per cent. on the capital stock absorbed over $100,000. These payments were approximately the same as last year, and the expenses were also about the same. A balance of $132,987 was carried forward, an addition of over $40,000. The reserve fund is now $1,205,000, being equal to the paid-up capital. Total debentures outstanding are $3,816,095, or slightly less than at the end of 1917. Mortgage investments have also dropped off considerably and investments in bonds and debentures have increased.

INTEREST IN PUBLIC AFFAIRS

Must Be Quickened, Said Mr. C. A. Bogert, Retiring President of the Toronto Board of Trade, at the Annual Meeting

Mr. C. A. Bogert, retiring president of the Toronto Board of Trade, in his address at the annual meeting held on January 23rd, said:

"Before the war to some extent, and to a greater extent since, there has been a tendency to impose upon government of various kinds the administration of commercial undertakings. As to whether or not this tendency is in our best interests is a question I do not propose to discuss. It is obvious, however, that the administration of public affairs is more complex and requires more sagacious handling than heretofore."

Mr. Bogert dealt with many of the important issues that occupied the attention of the board during the year. Mr. Bogert urged the members not to confine their efforts solely to readjusting matters pertaining to their interests during the reconstruction period of mercantile activities, but to cooperate with public bodies in the interests of the community as a whole.

"As citizens," he said, "it is our duty to give to the state the best that is in us. Are we making or are we prepared to make the necessary sacrifices? Cognizant as you are of extravagance, inefficiency, inequity and other obstructions to the attainment of the full benefit of representative government, obstructions which breed discontent and disturbance, are we doing our utmost to remove them? I confess to some fear of untoward developments unless a very great change takes place in the attitude of the average person to public affairs. The change from apathetic to aggressive public spirit may involve sacrifice of time and personal comfort, but it will have to be made if the full fruits of the great victory we have achieved for representative government are to be gathered."

Dealing with uniformity in legislation and the Bankruptcy Act, Mr. Bogert said:

"The proposed Bankruptcy Act—which in all probability will engage the attention of the Dominion Parliament at the ensuing session—has been drafted with the object of standardizing the practise of dealing with insolvent debtors. The most important objective sought by such a measure is to raise the standard of business morality. Hardly less important is the need of economy in dealing with insolvents, which would be effected if the same practise existed in all the provinces. A good measure can only be successful by having a vigorous and broad public opinion at its back, and, as business men, it is our duty to use every effort to see that neither is lacking."

Guard Immigration

In referring to the question of immigration, Mr. Bogert said:

"In view of the conditions as to cereal production which I have reminded you of, and the obvious desirability of the farmer utilizing his lands for more diversified production, it is the duty of the industrial and mercantile public to apply all their knowledge and skill toward commercializing to the best advantage the raw products of the field, no matter in what form. Let us remember that these questions greatly concern our ability to obsorb the returning soldiers, as well as the increased immigration that we are seeking. No attraction to the right kind of an immigrant is greater than the opportunity to gain a livelihood under conditions which ensure steadiness and opportunity for independence.

"The flow of people has always been westward, but if the greater portion of Europe is to be freed from conscription, and if every nation which has been engaged in the war takes steps to retain its man-power and discourage departure to other countries, as they undoubtedly will, it is going to be increasingly difficult for Canada to secure the right class of population. Is it not probable that our government in an endeavor to secure immigration to Canada will bring in a class of wholly undesirable immigrants unless steps are taken to prevent it. Governments are too apt to measure successful immigration by numbers. We must not lose sight of the now more obvious peril of bringing in immigration of a disturbing character and a menace to our future."

Dealing with hydro-electric development, Mr. Bogert said that very careful attention of the members should be given with respect to the use of water powers which Ontario fortunately possesses.

"I agree with the chairman of the Ontario Hydro-Electric Commission that power resources should be utilized under the most rigid conditions of efficiency and economy," he said, "but I would observe that as business men, it would be as well to satisfy ourselves that present conditions under which electric power services are being furnished promise to be the best that technical skill and business acumen can devise.

"We must remember that capital employed in any form of individual or corporate enterprise is not permitted to escape taxation for public purposes, and while not shirking its duty in this respect, depends absolutely for its conservation upon giving service acceptable and useful to the public and subject to market conditions. Failure to render acceptable service means loss of public patronage and the disappearance of capital and no obligation is left for the taxpayer to assume.

"It is particularly necessary for our business men to study these questions now, for we are informed that in the near future not only will the Hydro-Electric find it necessary to increase its rates, but that they are already seeking financial relief from the Federal government involving a very large amount.

"Let us not entertain any illusive hopes respecting the future of shipbuilding in Canada. When the present programme is completed, we must look for a cessation of unusual activities. It is quite probable that the ships that are now being built for the Canadian government will cost us at least double what they could be constructed for a year or two hence. Shipbuilding conditions in this country do not compare favorably with those prevailing in either Great Britain or other European centres. The enormous tonnage being launched all over the world will soon overtake the demand, and with rates decreasing in consequence, returns on the original investment of capital will be wholly inadequate. Let us hope that conditions may so change that our shipyards will eventually be able to operate on a basis that will be reasonably profitable."

MANITOBA MUNICIPALITIES

The Union of Manitoba Municipalities concluded its 15th annual convention on January 23rd. The final business of import was the adoption of a resolution asking the provincial government to adopt a tax levy of 1¼ mills for 1919. More than 300 delegates attended the conferences. Many of them were at the opening of the legislature in the afternoon.

NEW BRITISH BOND ISSUE

Sir Hardman Lever, financial representative of the British government in the United States, has announced that on and after February 1 the British treasury will receive subscriptions in this country for a new series of national war bonds. The new issue will not carry the right of conversion into past or future war loans, and the issue of 7-year bonds will be discontinued.

The new bonds will bear interest at 5 per cent., subject to income tax for five and ten years, and 4 per cent. income tax compound for 10 years. The issue price of the 5 per cent. bonds will be par, and that of the 4 per cent. bonds 101½. The five-year 5 per cents will be redeemed at 102, the 10 years at 105, and the 4 per cents at par.

The issue of $75,515 10-year York county instalment bonds, purchased last week by Æmilius Jarvis and Co., has been sold to the Trusts and Guarantee Co.

TRAVELERS INSURANCE COMPANY

A complete statement of the business of the Travelers Insurance Co., of Hartford, Conn., is found elsewhere in this issue. The principal points were mentioned in *The Monetary Times* last week. The company's business in force now totals $754,000,000. During the last twenty years the assets have increased from $25,000,000 to $148,000,000, the capital and surplus from $4,000,000 to $14,000,000 and the total income from $6,000,000 to $58,000,000.

CONTINENTAL LIFE INSURANCE COMPANY

In spite of the heavy losses owing to the war and the influenza epidemic, the death claims against the Continental Life Insurance Co. in 1918 were slightly less than last year. This company has just completed 18 years of business, and considering that it is one of our younger companies and much of its insurance is, therefore, upon young lives, it has been fortunate in making this record for 1918. During the first two years of its business the growth of the Continental was rapid. Since 1902 it has progressed steadily, and now has insurance in force totalling over $12,700,000.

DOMINION BANK PRESIDENT PESSIMISTIC

That Canada might expect a temporary setback in the near future, but that, looking farther, there were grounds for unbounded confidence, was the statement of Sir Edmund Osler, president of the Dominion Bank, at the annual meeting on the 29th.

Sir Edmund had previously referred to the unrest in the world, and expressed the opinion that it would take long to recover and reconstruct and re-employ and train the millions who had for the past few years been employed in destroying. There were no great public works in view or in contemplation; railway building had been in advance of requrements, and he thought the only great public works that could be undertaken with profit and advantage would be the building of good roads through the country. On the question of banking facilities, he denied that the banks were not doing their duty in loaning the farmers and others. On the contrary, branch managers had a direct interest in increasing business, making the bank popular and making it pay. Banks in the United States and in Europe, generally speaking, had returned a much larger dividend to their shareholders than the Canadian banks.

Some observations on banking facilities were contained in the address of Mr. C. A. Bogert, general manager. He referred to the fact that since the armistice Canadian banks had opened some 200 new branches.

"The result is," he said, "that Canada to-day is furnishing the public with banking facilities that are not equalled by any country in the world, and are indeed not warranted, either by present conditions or probable future expansion." He pointed out that from the last available returns Canada has a branch bank for every 2,300 people; in the United States, including national and state banks, there is one for every 3,600 people; and in the United Kingdom one for every 4,800.

"Is it not probable that an unjustifiable extension of branch banks in Canada will prove not only dangerous to the banks themselves, but to the public—increased and unnecessary bank facilities will shortly produce increased competition and unreasonable extension of credit?" Promoters of doubtful enterprises, Mr. Bogert said, or people without integrity or financial strength, would welcome such conditions. While appreciating the necessity of banks keeping pace with Canada's development, or even anticipating it to a reasonable extent, particularly in Western Canada, he thought the present extraordinary expansion did not seem justified.

The Canadian Bank of Commerce has opened a branch at Baden, Ont.

Bank Deposits Recover in December

December Statement Shows Considerable Increase in Savings Deposits —Circulation Declines for First Time in Months—Large Increase in Loans to Municipalities and in Current Loans Outside of Canada

	Dec., 1917.	Nov., 1918.	Dec., 1918.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$569,441,871	$ 666,366,359	$ 711,034,060	+24.95	+ 6.75
Deposits after notice	995,978,013	939,329,271	958,473,557	— 3.72	+ 2.03
Current loans in Canada	858,533,298	1,082,709,655	1,075,640,003	+25.31	— .65
Current loans elsewhere	111,581,098	110,010,815	119,153,924	+ 7.21	+ 8.18
Loans to municipalities	36,353,039	40,865,358	30,684,052	+16.66	+25.00
Call loans in Canada	71,779,020	85,675,063	89,120,423	+25.50	+ 4.44
Call loans elsewhere	134,483,482	171,035,732	150,248,322	+11.94	—12.38
Circulation	208,753,337	242,309,082	240,705,540	+15.38	— .83

General progress in all branches of the banking business is recorded by the above figures from the Canadian banks' statements to the Dominion government at the end of December, 1918, as compared with December, 1917. Current deposits have, however, decreased slightly, but it will be remembered that the payments on account of the 1917 Victory Loan were not made until January, 1918, whereas those on account of the 1918 Victory Loan were made in November.

During the months of December several remarkable changes have taken place. Loans to municipalities have increased by 25 per cent. It may be safely said that this almost entirely represents temporary financing on the part of the banks in anticipation of bond issues by the municipalities, as December usually sees loans to municipalities at a minimum owing to the fact that tax collections are well advanced at that time. Savings deposits have recovered sharply. Another noticeable feature is the small decrease in circulation, which is the first recorded for many months, and is an indication of the slackening in business following upon the armistice.

The course of deposits account during the past six years is shown in the following table.—

Dec.	On demand.	After notice.	Total.
1913	$381,375,509	$624,692,326	$1,006,067,835
1914	349,909,953	662,830,037	1,012,739,990
1915	423,690,384	720,990,267	1,144,680,651
1916	458,208,417	845,006,717	1,303,215,134
1917	569,441,871	995,978,013	1,565,419,884
1918	711,034,060	958,473,557	1,669,507,617

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1917—December	$569,441,871	$ 995,978,013
1918—January	559,777,237	900,314,256

QUEBEC ISSUE FROM ST. MAURICE COMPANY

The province of Quebec 4½ per cent. coupon gold bonds, dated June 1st, 1916, and due January 6th, 1946, which were recently sold by A. E. Ames and Co., are part of an issue made in 1916 and accepted by the St. Maurice Construction Co., of Montreal, in payment of the amount of its contract for the construction of La Loutre Dam on the St. Maurice River.

The Bank of Hamilton has opened branches at Weldon, Saskatchewan, and Penticton, B.C.

CENTRAL FARMERS SUPPORT LOWER TARIFF

A resolution was passed on January 16th by the Central Farmers' Institute, Charlottetown, P.E.I., supporting the United Farmers of Ontario in their demand for the reduction of tariff on farm implements, fertilizer, coal, lumber, cement, oils, etc., and another asking the government to have spruce hedges, rail fences and other encumbrances removed from the highways within three years, and wire fences substituted.

The Royal Bank of Canada has opened branches at Cupar and Plunkett, Saskatchewan.

We Take Responsibility

When a man or woman finds himself or herself unexpectedly burdened with financial responsibility or with the care of an estate, it is a relief to know that the Toronto General Trusts Corporation will take this responsibility and is qualified and authorized to administer their finances or their estate in their stead with the utmost efficiency

HON. GEORGE W. BROWN, WILLIAM FERGUSON, H. L. ADOLPH, E. O. CHAPPELL, J. S. MAXWELL, JNO. A. McDONALD, G. S. MUNRO, HON. W. M. MARTIN, M.P.P., JOHN E. SMITH, F. N. DARKE, ALEX. A. CAMERON, D. A. REESOR.

Acts as Executor, Administrator, Trustee, Liquidator, and in any other fiduciary capacity.

The Burden of Executorship

The duties of an executor are too onerous to be imposed upon anyone having affairs of his own which need his attention.

This Company is equipped to perform such duties effectively and economically.

Of the deposit in Central Gold Reserves $8,500,000 is in gold coin: the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance.*

The Bank of Montreal is arranging for premises in which to open a Paris branch.

At a meeting of Montreal dealers in building supplies held in the Builders' Exchange, Montreal, on January 13th, at which eight trades were represented, it was agreed that the supply dealers of Montreal should form the Montreal Section of the Association of Canadian Building and Constructive Industries.

The loans made by the rural credit societies of Manitoba during 1918 amounted to $215,581.

A wooden pole line to cost about $375,000, erected either along the Portage highway or one of the transcontinental railway lines from Winnipeg to Portage la Prairie, for the transmission of light and power from the hydro-electric plant will probably be one of the early undertakings of the Manitoba provincial government.

**YOUR MONEY—
HOW TO MAKE IT EARN**

To invest his savings where they will be absolutely safe, accessible, and earn their right rate of interest, is the desire of every investor.

Time saved is money earned Nothing shows this so clearly as the fact that—

$100 invested at 5½% doubles itself in less than 13 years
$100 saved at 3% takes 23½ years to do the same thing

Standard Reliance 5½% Mortgage Corporation Debentures

are issued in sums of $100 and upwards for a fixed period to suit your convenience. Interest at 5½% is payable on the day it is due.

No trouble, no worry, no inconvenience. Your security never fluctuates.

Not a dollar has ever been lost by an investor in these debentures.

An interesting booklet about "PROFITS FROM SAVINGS" will be sent free on request.

*Paid-up Capital and Surplus Funds.

CANADIAN PACIFIC CONSTRUCTION SCHEME

Heavy Building Planned in the West—To Build Branch Lines—More Pacific Liners

Mr. D. C. Coleman, western vice-president of the Canadian Pacific Railway, who has been to Montreal in connection with the betterments appropriations for the year, has given out the following statement as to the programme of the company:—

"The company will continue to follow the policy of making timely and prudent provision for the continually expanding traffic in western Canada, and for the maintenance of the property in the best possible condition.

"At Vancouver, the construction of a new ocean pier will be undertaken, and the necessary studies are now being made. When these are completed, the work of dredging and filling will be started immediately.

"New station building will be erected at Harding, Marchwell, Schwitzer, Rutland and Dafoe.

"The engine-houses at Weyburn, Moose Jaw and Cranbrook will be extended and the engine-house at Sirdar, B.C., will be rebuilt.

"The interior of the station at Medicine Hat will be remodelled with a view to securing better accommodation for the public.

"Coaling plants will be built at Raith, Ont., and North Bend, B.C.

Trackage Extensions

"Additional trackage for handling train movements will be provided at High Bluff, Rosser, Fusilier, Stephen, Melita and Rosetown, and extensions made to terminal trackage at Portage la Prairie, Revelstoke and Vancouver.

"Locomotive boiler washout plants of the most modern design will be installed at Medicine Hat and Revelstoke.

"To accommodate the largest type of locomotives, new turntables will be installed at Moose Jaw, Field and Revelstoke.

"The work of lining the Connaught tunnel with concrete will be continued.

"An additional transfer barge will be built for Okanagan Lake, and an additional car slip provided.

"A permanent concrete floor will be placed in the stock yards at Fort William, and improvements also made in the stock yards at Moose Jaw.

"Very extensive improvements will be made at Winnipeg Beach, with a view to giving better accommodation to bathers and picnickers. These improvements include the erection of a new power house, new bathing houses, and the removal to a new site and re-erection of a number of the present buildings, and it is expected that the change will greatly promote amenities of the pleasure resort.

Bridge Work

"The work to be done on bridges will be most extensive. The most interesting work of this nature to be undertaken will be the replacement of the bridge over the Assiniboine, at St. James, and the filling of the great structures over Scissors Creek and Bear Creek on the Neudorf line, and the large bridge over the Battle River at Hardisty.

"At Winnipeg station the temporary wooden platforms in the train shed, which were put into service until the fill had reached its permanent location, will now be replaced with permanent mastic platforms.

"The station at Moose Jaw having proved inadequate for the traffic handled there, plans are now in preparation for a new building and the work will be undertaken this year. At Regina additional paving will be done in the local yards to permit more convenient teaming of freight, and there will be improvements made in the ash pit facilities to provide for the more prompt handling of locomotives.

"The usual generous provision is made for ballasting, steel replacements and improvements to the roadbed.

"Notice has been given that the railway will apply for an act in parliament enabling it to build six branch lines in Saskatchewan and one in Alberta. The latter is to be from Duchess northward. The Saskatchewan extensions are as follows:—From Archive to Wymark, from Fortune southeast for eighty miles, from Lenigan to Cumberland House, from Leader to Big Stick Lake, from its Weyburn-Sterling branch southwesterly, and from its Manitou Lake branch northwesterly to Whitford Lake. From other notices presented to the government it is evident that numerous branch lines are to be built in the west this coming summer. Applicants to parliament include the Western Dominion Railway Company, the Athabasca and Grande Prairie Railway Company, and the Northwest Route, Limited."

More Pacific Liners

It is learned that the Canadian Pacific Ocean Services, Limited, proposes to expand its transpacific service by the addition of new tonnage which will equal, if not exceed, in magnificence the splendid liners of the fleet which have been operating out of Victoria for the Far East. According to information from Victoria the Canadian Pacific Railway has under construction in the United Kingdom a palatial vessel of large tonnage, which, upon completion, will be sent out to the Pacific and placed in the British Columbia Oriental trade.

SASKATCHEWAN SUPPLEMENTARY ESTIMATES

Supplementary estimates for the province of Saskatchewan for the 12 months ended April 30, 1919, were transmitted by the lieutenant-governor to the Saskatchewan assembly on January 14th. The total of $1,269,140 is distributed among the various departments of the government as follows:—

Civil government, $18,825; legislation, $4,025; administration of justice, $111,320; administration of services, $45,000; public works, $57,600; public improvements, $15,000; education, $36,800; agriculture, $15,900; public health and vital statistics, $38,170; neglected and dependent children, $15,000; miscellaneous, $101,500; miscellaneous, $510,000; telephones, $225,000; administration of the Agricultural Aids Act, $75,000.

LABOR SUGGESTS MUNICIPAL INSURANCE

A combine exists between fire insurance underwriters and the sprinkler system companies, according to Alderman O'Heir, of Hamilton, Ont. This opinion was expressed at a recent meeting of the Hamilton Trades and Labor Council, where a lengthy discussion took place regarding the Canadian Fire Underwriters' Association. Another member stated that he shares this belief also, because he had found that, whenever fire insurance was taken out on the larger properties, an effort was made by the insurance companies to have a sprinkler system installed. The advantages of municipal insurance were discussed and referred to an executive board, with instructions that it be taken up with the proper authorities of the city.

LUMBERMEN TO HAVE REPRESENTATIVE OVERSEAS

The Hon. G. Howard Ferguson, minister of lands, forests and mines, was told by Ontario lumbermen on January 17th, that they were desirous of accepting his offer on behalf of the government to assist them in securing orders for lumber products for the reconstruction work in Europe.

A committee representing the lumbermen, composed of officials of the following companies, conferred with Mr. Ferguson: J. R. Booth, W. C. Edwards and Co., McLaughlin Brothers, Gillies Brothers, Pembroke Lumber Co., George Gordon Co., Spanish River Lumber Co., Graves Bigwood Co., and McFadden and Malloy. They suggested that the government appoint a man to represent their interests, and that he be nominated by the lumbermen. This agent will act as a trade commissioner for Ontario lumber products and look after the publicity work in connection therewith.

TAXATION QUESTION IN WINNIPEG

Mayor Protests Against Alleged Unequalized Assessment—Manitoba Treasurer Refutes Charge of Tax Discrimination

At a meeting of the city council of Winnipeg, on January 21st, Mayor Gray claimed that the taxpayers were burdened by an undue proportion of provincial taxes, and also made the charge that the Manitoba Government was discriminating against the city. He said:

"Winnipeg bears considerably more than its share of provincial taxation. In 1914, Winnipeg paid in taxes to the provincial government, the sum of $55,750, and the burden has been steadily increased since the war has been in progress, until in 1918 the total of provincial levies upon this city amounted to $676,032.

"I feel that the provincial burden is inequitably distributed, and that the taxpayers of the city of Winnipeg are burdened in undue proportion."

He based this view upon the fact that the taxes are levied upon the basis of what is termed an "equalized" assessment, made by an equalization board, appointed by the provincial government.

"That equalization," he said, "discriminates against the city of Winnipeg, because no common standard was adopted for the whole of the province by that equalization board. In the rural districts, the municipalities were assessed upon the value of their lands as unimproved, farm buildings and so forth, for instance, are exempt from assessment under the Assessment Act. In the city of Winnipeg, the equalization board assessed us upon our land and also upon part of our improvements.

"To assess the rural areas upon their bare land only, as though that land were in its virgin state, and then to turn around and make Winnipeg pay a tax upon a large proportion of its improvements, is a discrimination against the city of Winnipeg. The absence of a common standard for the whole of the province, without discrimination against the cities as in favor of the rural areas, works injustice upon the taxpayers of this city. Nobody in Winnipeg could complain if, for instance, the selling value of all lands were taken as the standard of assessment. That would be an equitable common standard."

Mayor Gray illustrated his remarks by quoting from a pamphlet by E. M. Wood, municipal commissioner for Manitoba, showing that there was an absence of a common standard of taxation. It followed that there was a discriminatory tax in the city, and the question arose, could the province levy such a tax?

The mayor said that at the time of Chief Justice Wood in Manitoba, father of the present municipal commissioner, it was laid down by the courts of Manitoba that the province could not levy a discriminatory tax, and in consequence of this decision, legislation for the taxing of Hudson's Bay lands in excess of taxes on other lands, was upset and invalidated.

Provincial Treasurer Refutes Charge

Refutation of this charge of discrimination and a plea for the city council to come out openly with its proposals and say what it wanted so that the government could consider it in a fair and reasonable way, were the main points in a speech by Hon. Edward Brown, provincial treasurer of Manitoba, before the meeting called by the city council in the industrial bureau on January 24th.

Mr. Brown gave figures to show that the assessment of the land in the rural areas was made on a basis of 100 per cent. of value, the same as city land. As to buildings, the city owners paid on an assessment of one-third the value of the buildings, while the country paid on a basis of one-fifth of the price of the land. The equalized assessment committee had given every consideration to the matter, he said, and anyone who took the trouble would see that the farmer was assessed more in regard to his home and farm buildings than the man in the city on city buildings. How many farms in Manitoba, he asked, had buildings on them to the value of one-fifth of the whole land in the farm. The city buildings had been first assessed at a two-thirds value, but when the board saw the injustice of it they promptly cut down the figure to equalize it with the rural districts.

Mayor Reiterates Charges

Mayor Gray went over the charges he made at the council meeting on January 21st. He denied that he was playing politics, and did not believe the interview attributed to Hon. Mr. Brown was ever given by him. He did not know that the members of the equalization board for Winnipeg were ever chosen by the city. He did not want to embarrass the government, and suggested a joint commission of city and provincial representatives to go into the whole matter. He charged discrimination in that while the city paid taxes on land and buildings, the country only paid taxes on land.

The mayor hinted at an injunction to restrain the city from paying its patriotic tax levy. Certain gentlemen had threatened to ask for the injunction, he said, and intended to press it until the whole matter was settled.

Mayor Misinformed

Hon. Edward Brown, in his address, began by deploring the fact that the government had not been given a chance to meet the city council in joint session before a public meeting had been called. He credited the mayor with being sincere, but said his worship must have been misinformed, otherwise he would not have passed such strictures on the government. For the mayor to say that the city was paying three-fifths of the provincial taxation was entirely wrong. The facts were that the city was asked to pay through the municipal commissioner's levy, $676,000. The province, as a whole, had to pay $2,000,000. Therefore, the city did not have to pay three-fifths, or sixty per cent., but thirty-three per cent., or approximately one-third.

With regard to discrimination, this was a more serious charge, if true. He gave the origin of the patriotic tax which was a direct result of a plea to the government by the Union of Municipalities in which Winnipeg had fair representation. He agreed that it was a mistake to put all the patriotic tax on property, but the present was not the time to talk of changing it. That levy brought need of an equalization board. This board was appointed by the city being asked to name its representative, the Union of Municipalities being asked to pursue a similar course, and the government nominating the third man. This was another case to show that Winnipeg had a voice. All the municipalities, including Winnipeg, were asked to attend public sessions of the board. The board brought values up and equalized them, and then found that the city would suffer an injustice, hence the decision to increase rural land assessment by one-fifth of its total value, as compared with one-third of the value of city buildings. This, he urged, was in favor of the city, if in favor of anyone at all. All cities in the province were assessed the same as Winnipeg and there had been no complaint from the others. "As a member of the government, I deny absolutely any charge of discrimination, and there is no shadow of a doubt in my mind when I make these statements," said the minister.

Parliament Buildings Cost

Mr. Brown urged that the present government could not be blamed for the erection and inevitable cost of the parliament buildings which were ordered by the late government. He then touched on the patriotic fund and the fact that Manitoba was the only province where the government positively refused to handle the money. After attributing the failure of the new tax commission to sit owing to the flu epidemic, he said that next year further taxes would come through the new parliament buildings. He hoped to see the day when the only true basis of taxation was the value of property. The government had to act when such a representative body as the Union of Municipalities asked for legislation. The government was promised co-operation by the city council. The mayor had seen fit to repudiate that. Now the government would say to the city, "Bring your proposals and we will consider them in a reasonable way." The government had its proud record of advanced legislation during the last five years and it was doing its best for the people, and any proposal from the city on such a vitally important matter would have the government's earnest consideration.

EDMONTON WILL BORROW ONE MILLION

The city council of Edmonton, Alta., has authorized the borrowing of $1,500,000 for current expenses. The finance committee has recommended the authorization of $2,[illegible], but the smaller amount was all that the council would pass. A by law to borrow $1,000,000 against the 1918 tax arrears was prepared for the approval of the public utilities commission.

Certain improvements are planned in the telephone department involving the expenditure of over $1,000,000 on capital account

PARIS WONT USE AMERICAN BUREAU

The town of Paris, Ontario, plans to extend the activities of its Board of Trade, but has decided not to make use of the services of the American City Bureau. On January 22nd, about thirty of the leading business men and manufacturers of the town were addressed by Mr. G. Forster, campaign manager of that bureau. He described the benefits to be derived from a Chamber of Commerce. A committee was appointed which interviewed the Board of Trade, and it was decided that the larger programme should be proceeded with but that it would not be necessary to have the bureau undertake the work.

MONTREAL'S ASSETS $150,000,000

A certified statement of the city's assets, movable and immovable against which assets there is a debt of over $100,000,000, reads as follows:

1. Immovables. According to the assessors' list of 1916, $50,940,000. To this add the immovables of the former municipality of Maisonneuve, $4,775,000. Total, $55,715,000.

2. Waterworks, actual cost, taken from the ledger, certified December 31, 1917, $19,860,000.

3. Accounts receivable—Estimated special taxes due, $6,500,000; balance on the price of the sale of properties, $600,000. Total, $7,100,000.

4. Permanent improvements—System of underground conduits, $900,000; lighting plant, $545,000; ornamental lighting, $71,000; sewers, city's share, $8,750,000; permanent roads, $21,576,000; expropriations, $12,000,000; bridges, tunnels and subways, $1,400,000. Total, $45,242,000.

5. Movables—Furniture, machinery, horses, tools, trucks, fire apparatus, fire alarm, telegraph system, stock on hand, etc., total, $5,000,000.

6. Net debt of annexed municipalities, deducting assets included in these items, $15,000,000.

Grand total, $147,917,000.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the third week in January:—

	1918.	1919.	Inc. or dec.
Canadian National Railway			
January 7	$ 565,800	$ 779,400	+ $213,600
January 14	1,033,607	1,420,433	+ 364,826
January 21	1,034,923	1,541,392	+ 506,469
Canadian Pacific Railway			
January 7	$2,343,000	$2,856,000	+ $513,000
January 14	2,368,000	2,891,000	+ 523,000
January 21	2,324,000	2,949,000	+ 625,000
Grand Trunk Railway			
January 7	$ 773,848	$1,003,631	+ $229,783
January 14	654,794	1,029,578	+ 374,784
January 21	565,504	940,925	+ 375,421

JUDGMENT FOR BANK OF OTTAWA

Justice Latchford has given judgment in the case of Mather vs. the Bank of Ottawa, an action brought by the plaintiff, on behalf of himself and other directors of the Ontario and Manitoba Flour Mills, Limited, to have a guarantee given the bank delivered up and the loans made under it declared paid. The plaintiff's claim is dismissed and the counterclaim of the bank for $98,631 allowed.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended January 24th, 1919:—

Hudson Bay Mine, 65,571; Buffalo Mine, 110,000; McKinley-Darragh, 84,879. Total, 260,450.

The total since January 1st is 1,315,128 pounds, or 657.5 tons.

LARGE PERCENTAGE OF CROP STILL IN THE WEST

Only ten per cent. of the 1918 wheat crop of western Canada has been moved out of the country, and the eastern Canadian transfer elevators at the head of the lakes are full with American wheat, making it very doubtful when the Canadian crop can be moved forward, according to a statement made by Geo. Langley, acting Minister of Agriculture, to the Saskatchewan legislature.

This condition of affairs has been brought about as the result of the Canadian Government making use of the borrowed American money for the transportation of the 1917 wheat crop, giving the American Government the use of Canada's transportation channels for moving the United States crop. The money was borrowed from this source despite the fact that one of the inducements held out to the Canadian people to subscribe to the 1917 and 1918 Victory loans was that a portion of the proceeds of these loans was required to move the grain crop, Mr. Langley informed the assembly. Moreover, he stated, not one dollar of either loan had been used for the removal of the western farmers' grain.

MONTREAL'S TAXES DISCUSSED

Strong opposition is being aroused in Montreal against the $10 poll tax levied on bachelors living in that city. The amount received from this source up to January 20th was $92,590. The number of voluntary registrations received at the city hall has been 17,000, which includes, however, many men who enlisted and have not yet returned.

Much of the opposition is based on the grounds that some single men have dependents and should, therefore, be exempt from the payment of the tax. As the law stands at present, the only exemptions are members of religious orders.

A meeting of protest was held in this connection on Friday, January 24th, when about 600 discussed the subject. One speaker said he had made a study of the history of tax legislation and had been unable to find anywhere approval of the principle that a man might be taxed because of the accident of his state in life. It would be as just to tax one because of his color, or because he might be born blind, or because of his religion. The trouble here, he considered, was that the landlords owned the city and everything in it, as evidenced by what he called "that immoral yearly leasing law." Under such conditions it need not surprise anyone to learn that Montreal had the largest amount of tax-exempt property of any city on the continent, including more than sixteen million dollars' worth of commercial property. He had no objection to religious, school and charitable institutions being tax-exempt, for they were supported by public funds, and to tax them would mean the public taking out of one pocket to put into another.

Imperial Munitions Board Offer For Sale

PLANT AND EQUIPMENT (IN PART) OF

BRITISH CHEMICAL CO., Ltd.

TRENTON, ONT.

TENDERS accompanied by marked cheque for 5% of the amount of the bid will be received by the undersigned up to and including February 27th, 1919, for the purchase of the following, located at Trenton, Ontario:—

ITEM NO. 1. SULPHURIC ACID CHAMBER PLANT—2 Complete Pratt Patent Sulphuric Acid Chamber Plants equipped with Glen Falls sulphur burners and pyrite burners, cap. 31,000 pounds of sulphur and 40 tons pyrites per day. Chamber space, 200,000 cubic feet. Capacity of unit 60 tons of 60 deg. sulphuric acid per day.

ITEM NO. 2. SULPHURIC ACID CONCENTRATOR—This plant consists of 8 Skoglund Concentrating Units complete. Each unit has an operating capacity of 25 tons, 66 deg. Sulphuric Acid per 24 hours.

ITEM NO. 3. NITRIC ACID PLANT—Consists of 24 6,000 pounds Cast Iron Retorts, oxidizing and absorption towers. This plant has a nitre storage of 2,000 tons' capacity and 2 rotary soda dryers. Acid mixing house attached to this plant is equipped with 9 horizontal mixing tanks.

ITEM NO. 4. SMOKELESS POWDER PLANT—(a) Manufacturing Line—A complete plant for the manufacture and finishing of smokeless powder, operating capacity of the line 50,000 pounds per day.

(b) Ether Alcohol System—Complete Badger equipment for the manufacture of ether, consisting of 3 sets of Dephlegmators columns and condensers with 2 ether pots per set. Three complete alcohol rectifying units, capacity 30,000 pounds per unit per 24 hours. Alcohol storage for 1,500,000 pounds, with equipment for denaturing the same.

(c) Refrigerating Systems—2 Refrigerating plants, one consisting of 2-25 ton units and the other consisting of 1-50 ton unit, both complete in detail.

ITEM NO. 5. LAND—255 Acres—The Plant is situated on the Trent River—5 miles standard gauge track (leased) connecting with the C.P.R., C.N.R. and G.T.R. 2 Miles narrow gauge (owned).

There is available 6,000 electric H.P. with the necessary electrical installation. The plant is completely equipped with the required auxiliary buildings, such as store houses, shops, office buildings, together with housing facilities.

Tenders will be considered for any one or all of the above items, together with any of the auxiliary buildings.

Intending purchasers will be given every facility to inspect the buildings and equipment. Complete information may be obtained from the undersigned.

The highest or any tender not necessarily accepted.

Cheques from unsuccessful bidders will be promptly returned.

CONFEDERATION LIFE ASSOCIATION

The net premium income of the Confederation Life Association, Toronto, has increased by about $250,000, and the total assets by over $1,000,000 during 1918, as evidenced by the annual statement just issued. The following are some comparative figures as at the end of 1917 and 1918 respectively:

	1917	1918
Net premium income	$3,152,287	$3,495,670
Interest, rent, etc.	1,090,477	1,230,419
Total income	4,242,764	4,726,090
Death claims	972,517	988,876
Expenses	876,888	1,014,997
Profits	313,509	355,426
Assets	22,311,775	23,418,782
Insurance in force (net)	82,273,701	91,986,165

The company did not suffer badly through death claims, it will be observed, but the expenses have increased considerably. The dividend rate of 20% per annum has been maintained. The detailed statement appears upon another page of this issue.

Regarding death claims, the president, Mr. J. K. Macdonald, stated that the losses for the first nine months of the year showed a decrease as compared with the same period for 1917. Following that date, however, they were heavier. The first claim as a result of the influenza epidemic came in October, and up to the close of the year the amount paid on this account was $254,864, or just a little less than the total war claims for the year. The combined claims resulting from the war and influenza represent 43.75 per cent. of the total death claims.

A change was made during the year in the management of the company's British branch. Mr. L. H. Senior, who had been the company's manager there, resigned, and Mr. G. T. Varney was appointed as his successor.

VICTORY LOAN SUBSCRIPTIONS

A new table of the subscriptions to the 1918 Victory Loan shows a total of $695,389,227. Taking the Dominion as a whole, one person in every 7.08 subscribed, compared with one in 9.02 in 1917. In Ontario one in every 4.72 of the population subscribed, a record not approached by any other province except British Columbia, with one in 4.98. In the Dominion there were 1,104,107 subscribers, compared with 874,331 in 1917. In per capita subscriptions Ontario also was in the lead, with $131.25, British Columbia coming second, with $91.58. The Dominion as a whole averaged $88.91 per capita, compared with $53.37 the previous year. It is announced from Ottawa that of the total subscribed the Dominion will accept $660,000,000, the balance being turned back to some of the largest subscribers, as had been understood from the first.

The following is the statement issued by Mr. W. G. Hodgens, on behalf of the Victory Loan committee:

	Subscriptions.	Applications.	Per Cap.	One in How Many
British Columbia	$ 36,633,927	$ 80,315	91.58	4.98
Alberta	18,999,250	56,813	37.25	8.98
Saskatchewan	26,072,450	77,323	40.11	8.40
Manitoba	44,030,700	86.792	79.34	6.40
Ontario	336,055,350	542,648	131.25	4.72
Quebec	180,363,450	161,813	80.91	13.78
New Brunswick	17,002,550	31,957	48.58	10.90
Nova Scotia	33,221,550	61.040	70.24	7.75
Prince Edward Island	3,011,050	5,406	32.13	17.33
Totals	$695,389,277	$1,104,107	88.91	7.08

Amount of subscription for 1917 loan	$421,194,960
Amount of subscription for 1918 loan	695,389,277
Number of applications for 1917 loan	874,331
Number of applications for 1918 loan	1,104,107

EQUITY LIFE ASSURANCE COMPANY

Apart from the abnormal death losses which have been shared by all insurance companies, the Equity Life Assurance Company at its fifteenth annual meeting on January 22nd. reported a year of gratifying business. Even in the matter of death claims the record of the Equity Life has not been an extreme one. While heavy in comparison with previous years, it is quite low, considering the adverse circumstances. During the year $11,000 was paid in war claims, while pneumonia and "flu" pneumonia took $17,500. In all the company's previous history only $2,000 had been lost owing to pneumonia.

At the close of the year the company had in force 2,257 policies for $3,024,896, representing a gain of 174 policies and $209,521 of insurance. At the end of its fifteenth year the company had in force 61.97 per cent. of all its insurance ever placed, which is the best record of any company in Canada. Total assets of the company are placed at $589,367.

HAMILTON COMPANY'S BUSINESS DECLINES

A decrease, both in profits and in assets, is recorded by the Landed Banking and Loan Company's annual statement for the year ended 31st December, 1918. This decrease is due to the lessened demand for mortgage loans on the one hand, and high rates which investors had obtained on government, municipal and similar securities on the other hand. The following comparative figures are for the years 1917 and 1918:

	1917	1918
Interest earned, rents, etc	$ 249,548	$ 240,171
Dividends	80,000	80,000
Interest on deposits and debentures	79,520	73,134
Expenses	26,317	29,400
Transferred to reserve fund	55,000	50,000
Liabilities to the public	1,917,240	1,601,040
Total assets	3,794,472	3,527,775

The capital is $1,000,000, dividends at the rate of eight per cent. per annum being paid. A reserve fund of $880,000 has now been accumulated. As the company's investments consist of well selected first mortgage real estate and of government and other bonds, its financial position is very sound. The head office is located in Hamilton, Ontario, the general manager being Mr. C. W. Cartwright.

GOVERNMENT DECLINES ROSS RIFLE CLAIM

The government has declined to grant Sir Charles Ross' claim of $18,897,724 compensation for expropriation of the Ross rifle factory at Quebec. The claim had been presented in the form of a petition of right. The order-in-council of March 23, 1917, which gave authority for expropriation of the Ross rifle factory, it is pointed out, limited the amount of compensation to $3,000,000. In view of this fact, the government considers it to be in the public interest and not unjust to Sir Charles Ross that he should not be permitted to engage in litigation against the Crown to recover compensation in excess of three million dollars. Acting with the approval of the Governor in Council, the acting Minister of Justice, Mr. Meighen, will therefore decline to refer to the courts for consideration any claim for more than the amount cited.

Sir Charles Ross' claim was made up of three items: $10,000,000 damages for breach of contract before the factory was taken over by the government on March 23, 1917; $10,921,133 cited as the estimated value of the property as a going concern, and $11,697 said to be still owing for rifles and bayonets supplied to the government. From these items, totalling $20,932,830, Sir Charles deducted $1,692,074, representing advances made to him on deliveries, and $343,031 paid to him on account when the plant was expropriated. This made the net claim $18,897,724.

Canada has storage capacity for approximately 180,000,000 bushels of grain, according to an official statement issued by A. E. Boyle, secretary of the Winnipeg board of trade. The grain storage capacity in the Dominion has been increased by 1,500 per cent. in the past 20 years. The storage capacity this year has been increased by 13,000,000 bushels. In 1917 the total storage was 163,144,000.

The labor Appeal Board, on the application of a number of Toronto firms, has reversed a decision of the Board of Conciliation which awarded an increase to men employed as pattern-makers, and recommends that, at any rate until peace is definitely concluded, the minimum rate in contract shops should be 65 cents per hour and in job shops 70 cents per hour.

CONTRAST IN FINANCIAL CONDITIONS

Close of 1918 Saw Greatly Changed Conditions as Compared With Close of 1917 in all Branches of Finance

"The financial year 1918," says Mr. J. W. Mitchell, vice-president of the Dominion Securities Corporation, in his review of the bond market in Canada for 1918 which has just been issued, "so eventful and kaleidoscopic in its military developments, was exceedingly interesting from a bond standpoint, finally culminating as it did in the spectacular success of the Victory Loan at almost the very hour of the complete triumph of the Allies." This summary of financial conditions has been published for several years back by Mr. E. R. Wood, president of the Dominion Securities Corporation, but this year it appears over Mr. Mitchell's name. The review continues:—

"Looking back, one cannot now help being struck by the sharp contrast between the uncertain and hesitating attitude of the bond dealers at the end of 1917 in attempting to gauge the impending market situation, as against their present optimism as this year approaches its close.

Issues Restricted

"The restrictions placed by the Federal authorities upon the issue of securities generally by order-in-council in December, 1917, indicated clearly how seriously the finance minister of Canada regarded the financial situation at that time. The increasing demands of war finance made it imperative that the funds of the whole Dominion should be conserved to the greatest possible extent, and that the careful policy already voluntarily adopted by practically all provinces and important municipalities in capital account expenditure, should be even more closely adhered to.

"In spite of the tremendous subscriptions to the Victory Loan, 1917—results which far exceeded the best expectations of those in charge—it became evident early in January that the absorbing power of the market had not been exhausted. The difficult and all-important question was: "What is the new standard of other bond values as determined by the Victory Loan?" Conflicting views, moreover, were current as to whether the activities of the Victory Loan Special Committee would be successful in supporting the price of that important issue. Their effort was admittedly an experiment—without precedent—and there were not a few financial people who were exceedingly skeptical as to the results Those, however, who expected there would be a decline, were agreeably surprised, as the bonds were offered to the public at the outset at ¼ per cent. premium over the original issue price, were actively traded in on an increasing scale, and it soon became apparent that the floating supply would be satisfactorily taken care of.

First Provincial Offering

"Meantime the financial ice was broken by a small issue of 15-year province of Saskatchewan 5 per cent. bonds, which were readily taken. The success of this first offering, and the increased confidence generated by the steadiness of the Victory Loan, soon resulted in considerable bond activity. Practically every province in the Dominion came along with an issue, and though the terms obtained were not always as satisfactory as they would have liked, the prices conformed to the existing conditions, and a very considerable amount of securities was placed. Broadly speaking, bonds of the eastern provinces sold on a 6 per cent. basis; Manitoba, 6¼ per cent.; the Prairie Provinces and British Columbia, 6¼ to 6½ per cent. This relieved the most pressing needs of the provinces, and was supplemented by arrangements with the Federal authorities under which substantial amounts were loaned to the provinces by the Dominion at 6½ per cent. Examination of the figures shows that between January 1st and February 28th, practically $19,000,000 of provincial and municipal bonds were marketed, of which the great bulk was sold in Canada. A limited amount was absorbed by the American market, the consent of the Capital Issues Committee being first required before that field could be entered.

"The launching of the great German offensive in March naturally had a depressing effect upon the Canadian financial market, and only $1,900,000 of securities were disposed of in April, as against an average of $8,800,000 for each of the first three months of the year. When, however, it became evident that the German rush was being gradually checked and the allies would soon regain the offensive, the market quickly reflected the improved sentiment. Prices early in May advanced, being materially helped in June by the Victory Loan committee's action in marking the price of those bonds from 98⅞ to 99½ and interest—a most significant indication of the growing strength of that important security, and a vindication of the soundness of the finance minister's policy in protecting same from the outset.

Market Stronger

"The scarcity of good offerings at this time materially helped to raise bond prices, and this situation continued until July, when the holiday season and the approach of the time of preparation for the next Victory Loan began to be perceptibly felt, and the demand for bonds weakened accordingly. Important preliminary conferences took place with the finance minister during July and August, and the plan of campaign was mapped out. Meantime the price of the first Victory Loan advanced to par—a premium of 1⅜ per cent. over the original issue price—a situation which elicited much favorable comment from the financial press of the United States, where their last Liberty Loan was selling at a discount of 3 to 4 per cent.

"From September 7th the investment houses of the Dominion, by arrangement with the minister of finance, agreed to take on no new issues in order to devote their whole time and energies to the work of organizing the country for the new loan, subscriptions for which were eventually received during the three weeks October 28th to November 16th. How thoroughly this obligation was carried out, with the splendid co-operation of the press and in the most patriotic atmosphere ever created in Canada, is evident from the results of the loan.

"This effective demonstration of the solid support of Canadians overseas by Canadians at home will long rank as the crowning financial achievement of the Dominion of Canada.

After the Victory Loan

"On December 2nd the special committee re-opened the market for Victory bonds, including the new loan, a brisk demand being immediately noted for the long maturities of both issues. Scarcity of other high-grade bonds caused keen competition among the investment houses for the few blocks of municipal securities offered for tender. Windsor, for instance, netted 6.17 per cent. on December 9th for $174,609, and Toronto 5.48 per cent. for $1,000,000 Harbor Commissioners long-term bonds, on December 13th, indicating the trend of values.

"The complete closing or reduction in operations of munitions plants throughout the country, the necessity of changing industries from a war to a peace footing more quickly than anticipated, with consequent accumulation of capital and the uncertainty of the transition period, were all controlling factors affecting the market for securities, and contributed to a steady rise in prices. The demand for long-term bonds became more pronounced as the small supply became evident. All quotations for Victory bonds advanced over par, the committee on December 21st releasing from its direction the 1917 issue for open trading, the new issue in all probability to follow suit in due course.

"In spite of the many complex problems in the country awaiting solution, Canada closes 1918 in a spirit of optimism, amply justified by confidence in her great undeveloped resources, in the able financial leadership of the present minister of finance, in the strength of her banking system, and last—but not lease—in an honest but pardonable pride in the glorious contribution made by her soldier sons to the cause of justice and freedom by their memorable part in the Great War."

The Brantford Clearing House Association met on January 21st, and elected the following officers for the year:—President, H. T. Watt; vice-president, C. L. Laing; sec.-treas., P. D. Knowles.

LOWER PROFITS ANTICIPATED

Year 1919 Will Show Declining Prices, Smaller Profits and Dividend Cutting, Says Investment Expert

Mr John Moody, head of Moody's Investors Service of New York, in his annual review and forecast, just issued, takes a somewhat pessimistic view of the future so far as industrial profits are concerned. The year 1919, he says, will be a period of unsettlement because industry cannot resume its normal course until political conditions are more settled, this will not be the case until the peace conference is concluded and until stable governments are established in Germany, Austrin, Russia, etc.

He summarized the outlook for the year 1919 as follows:—

1. The year 1919 will be characterized by gradually declining commodity prices, cautious buying of commodities, limited output in many lines and lower average profits.

2. Operating costs in most industries will continue comparatively high, as wage scales will tend to remain rigid for most of the year and the cost of raw materials, while declining, will average high for the year as a whole.

3. Margins of safety over dividend payments will be sharply narrowed, as profits formerly due directly or indirectly to war demand will be eliminated. Many industrial corporations dividends will be reduced or suspended.

4. Among the types of businesses which will probably not ed by these factors will be the steel and iron companies, all of the munition makers, producers of copper and other metals, and with some exceptions, the motor companies.

5. Among the types of businesses which will probably not suffer to any great extent if at all during the year 1919, are the food producing concerns, such as sugar, bread making, packing, flour milling and the like. Nor should the stronger type of electric light or power concerns be seriously affected, as the labor problem with them is a minor one. Petroleum companies are unlikely to be adversely affected. Fertilizer companies and agricultural machinery concerns are likely to be benefited.

6. If steam railroads remain under government control throughout 1919 and for some time after, the position of their securities should not be vitally affected by the trade situation. And as the government improvement policy will probably continue, the business of equipment manufacturing concerns seems assured for the year.

Easier Money Conditions

7. The tendency towards declining prices and business curtailment will ease the strain on bank accommodation and thereby relax the money market; the only offsetting factor being the special strain which will be caused by the flotation of the Liberty Loan in April.

8. With the contraction of the government demand for the funds of investors, after the completion of the Liberty Loan campaign, there should be a more definite relaxing of the money market; relatively cheap money will then characterize the situation until commodity prices cease sagging and a business revival of some dimensions appears.

9. The practical effect of these developments on the prices of ordinary shares, which are dependent mainly on earning power for their value, will probably for at least the first months of 1919, be definitely adverse. Prices will rise and fall with recurring events, but the declines will be more persistent than the recoveries until the point of equilibrium is reached. In other words, we are in a bear market for all stocks which are influenced by the factors mentioned.

10. Bond investment of established character, on the other hand, and high grade stocks not directly responsive to the changing earnings (many industrial preferred issues are in this class) should not be adversely affected by business dullness or depression, and, after the new Liberty Loan has been floated, are likely to score important advances, if they have not done so before.

11. During the last half of 1919, if the peace negotiations are concluded, the crop condition proves sound and the liquidation of commodity costs has been largely accomplished, we may then be on the threshold of a turn for the better. This will especially be possible provided France and Great Britain have by that time gotten their financial houses in order to some extent and are making preparations for the reconstruction period which may set in the following year.

12. In short, while the trend of security prices is likely to be downward for four or five months to come and possibly longer, and the best that can be hoped for is that sound bonds will maintain their approximate values, yet the real opportunity of the decade to come for long pull investors may easily occur before or by the time the year 1919 is half over.

HIGHER WAGE SCALE NOT ADVISABLE

The Labor Appeal Board, of which Mr. Justice Maclennan is chairman, has just reversed a decision of the Board of Conciliation which recently judged the wage dispute between Toronto patternmakers and their employers. The Appeal Board consists, in addition to the chaïrman, of Messrs. G. H. Duggan and S. R. Parsons as manufacturers' representatives, and Messrs. John W. Bruce and Gustave Francq as representatives of labor. The Board of Conciliation had awarded an increase in wages, but a majority of the Appeal Board maintained that at any rate until peace is definitely concluded the present rate should be retained.

In submitting their report they express the following view of the general industrial situation:—

"The signing of the armistice, to be followed by peace at an early date, has changed the whole face of the industrial situation, and it appears to the majority of the Board of Appeal that the Board of Conciliation did not give this feature of the question the consideration which it deserved.

"The discontinuance to a large extent of war production, the release of many workmen in Canada, and the return of skilled workmen who have been in the Canadian army overseas, has had a disturbing influence on industry. When to this is added the uncertainty of employers obtaining new contracts, the offers of labor in some instances at reduced rates, and the views of some manufacturers that, particularly in order to compete for foreign trade, there should be a general reduction in wages, it appears to the board that the granting of an increase to the patternmakers was not justified and would tend to augment the unrest which is inseparable from the period of reconstruction through which not only our own country, but the whole world, is now passing.

"Ten per cent. of the patternmakers who were at work a month ago in Toronto are now without employment. The wages paid in Toronto at the beginning of November compared favorably with those paid in the neighboring towns and cities in Ontario.

"Employers and workmen, for a few months at least, and until the future trend of industrial activities is determined with some degree of definiteness, should endeavor to work together and create a feeling of confidence in the future which is of vital importance, both to labor and capital.

"For the foregoing reasons the majority of the Board of Appeal, after very full consideration, and having regard not only to this dispute, but to the general industrial situation throughout Canada, and with a view to maintaining confidence in the future and promoting goodwill between employers and employees, are strongly of opinion that for the present wages should not be either increased or reduced.

"This is as heavy a burden as, in our judgment, should be placed upon employers, temporarily, when they are to some extent marking time, and we believe should be considered fair and reasonable by the workers."

Soldiers in uniform, unless hospital patients or convalescents, who desire to travel must pay full railway fares in future. The Militia Headquarters has been notified of the decision of the Canadian Passenger Traffic Association to this effect.

PUBLICATIONS RECEIVED

Trust Company Service.—Published by the Standard Trusts Company, Winnipeg, Manitoba. This is in the form of a pocket notebook, including samples of the company's publicity material on the functions of a trust company.

Bulletin of the Imperial Institute, April-June, 1918.—Published by John Murray, Albemarle Street, London, W.E. This journal deals with progress in tropical agriculture and industries, and the possibilities for utilizing natural resources of the Dominion's colonies and India.

Legal Diary, 1919.—Published by the Canada Trust Co., London, Ont. This useful book, which is in the form of an office diary with pages for cash account, gives a list of county and judicial officers in Ontario for 1919, sittings of the Ontario courts, a list of divisional court clerks, registrars of deeds, the law of intestate succession in various provinces in Canada, etc.

The Twentieth Plane.—By A. D. Watson, M.B. Published by McClelland and Stewart, Toronto; $1.50. Readers who are interested in psychical research will examine with interest the results reported by Dr. Watson in this book. The author is president of the Society for Psychical Research of Canada, and the experiments were conducted in Toronto by prominent members of that organization.

Commercial Banking Practice under the Federal Reserve Act.—Issued by the National Bank of Commerce, N.Y., and revised as at October, 1918. This book of over 125 pages describes the law and regulations, the rulings of the Federal Reserve Board and the opinions of counsels regarding bank acceptances, rediscounts, advance and open market transactions of the Federal Reserve Banks.

Round Table, December, 1918.—This is the first issue of the Round Table since the armistice settlement, and the numerous points which have arisen in European politics since that event are fully discussed. As regards Canada, the relations of the economic sections into which the country is divided are discussed; the Imperial war cabinet; and the resignation of Lord Shaughnessy and other changes in the Canadian Pacific Railway. Macmillan Company; 65 cents per copy; $2.50 per year.

The Ward, Toronto.—Published by the Toronto Bureau of Municipal Research. Many of the larger Canadian cities have already developed those central sections which are so common in the large cities of the United States, where property is held with a view to use for industrial purposes, and is consequently neglected as a residential section. This report deals fully with such a section of Toronto, is profusely illustrated and contains thorough statistics regarding the area. It will be of interest to all concerned with civic development.

Future of German Industrial Exports.—By S. Herzog. Published by Doubleday, Page and Co., New York. This book was written, according to the preface, in the late summer of 1915. The author is a German consulting engineer, and the work has been translated from the original German. A brief introduction is signed by Mr. Herbert Hoover, Mr. Vernon Kellogg and Mr. F. C. Walcott, all of the United States Food Administration. The author deals with the industrial side of German external expansion and its relation to political developments.

Canadian Almanac, 1919.—Published by the Copp Clark Co., Ltd., Toronto, $1.50. This issue of the Canadian Almanac forms the 72nd of the series and is an indispensable part of office and library equipment. Among other information it gives the Canadian customs tariff; Canadian banks and their branches; Dominion of Canada Militia list; postal information; post-office and railroad stations in Canada; Canadian newspapers; lists of officers of various departments of the Dominion and provincial governments; list of the clergy of all denominations; the legal profession; educational institutions, etc. The volume comprises 548 pages in all.

Directors of Joint Stock Companies.—A booklet describing the duties and responsibilities of directors by David Cooper, chartered accountant of Winnipeg. Price, $1. Mr. Cooper is president of the Cooper Institute of Accountancy and a partner in the firm of Cooper, Sanburn and Co. He aims to give the ordinary knowledge which is required by a director of joint stock company regarding capitalization, meetings of directors and shareholders, and the control of the actual operations of the business. Specimen statements are included, together with charts showing convenient forms of illustrating the progress of a business. Charts are given for the sales, advertisement, credit and collection and various other departments.

A Simple Explanation of Modern Banking Customs.—By Humphrey Robinson. Published at $1.50 by Small, Maynard and Co., Boston, Mass. This is a new and revised edition of a work first published in 1905. It is intended to give the public concise and accurate information regarding banking practices with a view to closer co-operation between the banks and their customers. While the information is derived from American sources, much of it is equally applicable to the Canadian system. There is an undoubted necessity, even more so in the case of Canada than in the United States, for a linking together of large financial institutions and the public, and publications such as these render a useful service in this way.

Price Readjustment.—By B. M. Anderson, Ph.D., of the National Bank of Commerce, New York. The discussion in this booklet is a further development of the National Bank of Commerce booklet entitled "When Prices Drop," which was published in November. The author maintains that "price fixing has served its purpose and should be abandoned at the earliest possible date." He points out that price fixing as a war time development was aimed at restraining prices. It is now urged, he says, that prices should be maintained for the purpose of supporting industry. In addition to price fixing, however, it is also proposed that a decline in prices be prevented by a continuance of heavy loans by the United States government to the allies to be used for reconstruction purposes; or by an organized policy of liberal lending on the part of Canadian banks. The writer examines these thoroughly and finds that they are undesirable. Prices should rather be permitted to resume their normal level, he says.

Heaton's Annual.—Commercial notebook of Canada. Published by Heaton's Agency, Ltd., 32 Church Street; $1.50.

The 1919 edition carries important new features. The clear-cut commercial maps of each province are new, and add to the value of the descriptions of towns. A complete educational guide with illustrated announcements of the leading universities and schools of Canada is included. But this edition is chiefly remarkable for the section on natural resources, covering agriculture, fisheries, forests products, fur trade, mining and water powers, with cross references to the special government publications from which complete information can be obtained. A chapter on the war record of Canada will be useful. Heaton's Annual is known as the standard authority on the customs tariff and regulations. This has been brought up to date with the other old features—Official Directory, Postal Information, Insurance Directory, Shippers' Guide, etc. There is a valuable set of exchange and commercial tables at the end of the book. The clear side headings and alphabetical arrangements make this an excellent book of reference.

Evolution of the Dominion of Canada.—By Edward Porritt, author of "Sixty Years of Protection in Canada," etc. Cloth, 540 pages, six full-page maps. List price, $1.50 postpaid. World Book Co., Yonkers, N.Y.

This is the third volume in the government Hand-Book Series, and is a book of special timeliness. The war has given Canada the status of a nation and at the same time has brought Canada and the United States into closer economic relations and sympathetic community of interest. As both countries are democracies and have inherited from the same general political stock, it is of particular interest to the student of political science to note the similarities and divergencies of their development.

This volume shows Canadian political institutions at work and gives their development and working up to 1914.

[illegible] scholarly and readable text, meeting the need for a book which brings the subject to date, as the latest previous work in this field was published in 1895.

The author, a journalist of long experience in England, Canada and the United States, has been since 1896 a student of Canadian history and development. His lectures on the subject at Harvard, Johns Hopkins University and the University of California, summer sessions, has given him the opportunity to understand the needs and point of view of the student, as well as of the man of affairs.

Industry and Humanity.—By W. L. Mackenzie King, C.M.G., M.A., LL.B., Ph.D. Published by Thomas Allen, Toronto; [illegible] pages, $3.

The labor problem, as has been pointed out, is one of the principal phases of the reconstruction movement, and there is probably no Canadian more competent to write upon it than is the author of this book. Mr. King served the Canadian government for ten years, first as deputy minister of labor and then as minister of labor, until 1911. His work also comprised negotiations with foreign governments regarding immigration laws, etc. For the past few years he has been associated with the Rockefeller Foundation, and this book is the result of his investigations made there.

As the title would indicate he deals with the broader aspect of the labor question. Industry, he points out, stops at production, but questions of distribution are closely linked up with the welfare of the individual and of the community. In the working out of industrial organization, he says, the law of peace and health must be strictly observed. The appreciation by labor and capital of the fact that the competition which each must face is on a world scale would, he maintains, further the recognition of their commission as opposed to their contrasted interests. The book includes many descriptions of concrete cases in Canada which gives it an added interest to the Canadian reader.

Fire Insurance Inspection and Underwriting.—By C. C. Dominge and W. O. Lincoln. Published by the Spectator Co., New York, at $5. This new work is a dictionary of fire insurance terms and of the fire hazards used in manufacturing or in commerce. This is the only book published in the United States on fire insurance chemistry; also including definitions of numerous works and phrases used in the insurance business. Essentially it is a technical dictionary of insurance chemistry written in non-technical language. The book comprises 511 pages and includes many appropriate illustrations.

The authors are practically men qualified by many years of inspection and underwriting experience, and are prominently identified with the Great American Insurance Co. One of them is New York city underwriter and manager, and the other is chief inspector and engineer. The information in this reference book, therefore, has been gathered over a considerable period of first-hand study and includes a great deal that has not before been put in print. It will, therefore, be invaluable to all connected with the inspection and underwriting departments of fire companies and to map clerks, loss adjusters, etc. Moreover, as it indicates the usual chemicals and other materials used in various manufacturing processes, it will be of much value to fire chiefs and firemen in their work of seeking causes of fires and endeavor to avert and extinguish them.

ST. JOHN ESTIMATES FOR 1919

The estimates of St. John, N.B., for the coming year total $184,583.87, as compared with $135,467.36 for 1918, an increase of $49,116.51. A new item was $18,000 for ashes collection. For street cleaning, etc., $24,000 is asked, an increase of $6,000; for street repairs, $19,000, an increase of $4,500; for stone crushers an increase of $5,000.

The Canadian Bank of Commerce has opened a branch at Leslie, Saskatchewan.

UNION BANK OFFICIALS HOLD BANQUET

Mr. John Wilson, manager of the Union Bank of Canada in London, England, gave a dinner to the London staff of the bank at the Holborn Restaurant on December 16th.

The invited guests numbered 120, and included Sir Harry McGowan, K.B.E., Sir James McKechnie, Sir J. Gordon Nairne, Sir Robert Nevison, Col. the Hon. Sydney Peel, Col. Guy St. Aubyn, Mr. Ben Bailey, Col. H. W. Blaylock, O.B.E., Col. Claude Bryan, Sir John Ferguson, Sir Pearce Guy, Major Hanson, Major Hume Blake, and Mr. Frank Young.

OCEAN FREIGHT RATES REDUCED

Two facts which indicate the return to normal in trans-Atlantic shipping, are: Reduction of ocean freight on commercial traffic, and the releasing of a certain amount of space for commercial cargoes by the British government.

Rates all round show a considerable reduction, and the indications are that by the time the season opens again in the port of Montreal, freight rates will have been materially reduced. Three months ago the rate on general cargo was $6.50 per 100 pounds. After two months at this rate it was reduced to $4.75 per 100 pounds, and this week there was a further reduction, and it now stands at $3.50 per 100 pounds.

CONFERENCE ON WATER POWERS

At a conference in Ottawa on January 17th, between provincial and federal representatives of departments and public organizations concerned with water powers and their development, tentative plans were arrived at for co-ordinating methods of investigation, standardizing field and office methods, and arriving at a common scheme for indexing data with regard to Canadian resources in water powers so that facts and figures from all over the Dominion can be easily collected and made available for general use. It was also decided that western representatives should meet once a year, and another meeting be held annually of central and eastern Canada representatives, with a meeting of representatives from the whole Dominion every two years.

APPLICATION TO INCREASE FARES OPPOSED

Strong oposition was aroused when the application of the Quebec, Montreal and Southern Railway for power to increase fares to the basis of four cents per mile came up for hearing on January 16th, before the Board of Railway Commissioners.

The case of the company as submitted by **Mr. C. S. Sims,** vice-president, assisted by Mr. Fred. Beique, was that the smaller railways have been hit very much harder by the McAdoo award than the big trunk lines. Although the past year had been one of the best in regard to passenger receipts, the company had operated at a loss of $70,000 as an average during five years. The company had been in a condition of insolvency when taken over by the Delaware and Hudson Company, some years ago, and the capital put in by the latter company was seven million dollars. Figures cited by Mr. Sims were put forward to prove that the Quebec, Montreal and Southern Railway was earning less per mile than almost every other railway, and yet a large number of these roads had the four-cent fare in operation before the 15 per cent. increase came into force.

The Canada Food Board has been informed that field and garden seeds have been removed from the restricted export list of the United States, and that American shippers in future do not require licenses for shipments of seeds coming into the Dominion. The removal of United States restrictions on flour also extend to Canada.

THE KEYSTONE OF THE ARCH

Nothing known in building is stronger than the arch—The symbol of the Mutual Principle in Life Insurance. The centre of the arch is the keystone—and "The Keystone of a Life Insurance Organization," says W. O. Chapman, "is management. The three leading constituents in good management are INTEGRITY, ECONOMY and EFFICIENCY. It is well known that the secret of the extraordinary success of the Mutual Life of Canada has been the rigid adherence of managers and directors through fifty years of history to these essential things. It is due to these that in spite of more than four years of devastating war, followed by a blighting pestilence, with the immense losses entailed, yet the strength of the Mutual Life of Canada is unshaken. The keystone ensures the solidity of the organization, and there is no other better qualified to defy the touth of time than—

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Thorold, Ont.—An issue of $3,000 6 per cent. 15-year debentures has been awarded to D. W. Engle at 99.50.

Hawkesbury, Ont.—Tenders will be received up till February 17th, for the purchase of $109,000 sewer debentures.

Rainy River, Ont.—Messrs. Brent, Noxon and Co., Toronto, have purchased a block of $11,300 6 per cent. 15-instalment bonds.

Pembroke, Ont.—Tenders will be received up till February 10th, for $50,000 6 per cent. 30-year debentures, payable in equal annual instalments.

Uxbridge, Ont.—The town has sold an issue of $7,000 6 per cent. electric light plant debentures to J. W. Gould, owner of the electric light plant.

Regina, Sask.—A by-law to issue debentures amounting to $40,000 to pay off the indebtedness to the provincial government in connection with the cyclone loan has been passed.

Toronto, Ont.—Messrs. Wood, Gundy and Co., of Toronto, have purchased an issue of $7,000 6 per cent. bonds. The bonds are dated December, 1919, and are due December, 1919-33.

Hamilton, Ont.—Open accounts, totalling $343,473, which have been held over without authorization for several years, and added to frequently, are to be met by the issuing of debentures.

Victoria, B.C.—The Dominion Securities Corporation and Messrs. Wood, Gundy and Co., of Toronto, have purchased an issue of $[illegible]00,000 5½ per cent. bonds, dated October 10, 1917, due 1938-45.

Stamford Township, Ont.—Messrs. Wood, Gundy and Co., of Toronto, have purchased a block of $9,105.55 6 per cent. bonds. The bonds are dated June 15, 1918, and are due June 15, 1919-39.

Three Rivers, Que.—The Provincial Securities Co., of Quebec, have been awarded a parcel of $40,000 6 per cent. 10-year bonds of the Roman Catholic School Commission. The price paid was 99.26.

Saskatoon, Sask.—Messrs. Æmilius Jarvis and Co., of Toronto, have purchased an issue of $91,000 5 per cent. 30-instalment bonds at 86.82, at which price they will yield 6.01. They are payable in New York.

Ottawa, Ont.—When City Solicitor Proctor goes to Toronto in February with the city's bill, he will ask the Ontario legislature for authority to issue debentures to the amount of $348,000 for various purposes. The largest single amount will be $70,000 to pay off the mortgage on the buildings and land at Lansdowne Park. Another large amount will be $50,000 extra for swimming baths.

Hanover, Ont.—Messrs. Æmilius Jarvis and Co., of Toronto, have been awarded a block of $18,000 6 per cent. 20-instalment bonds. There were 15 tenders in all, but the town reported they were not high enough, and subsequently communicated individually with the firms who had tendered, and sought increases in tenders by private negotiation. When this became known, 13 out of the 15 firms who had tendered withdrew their offers, but an agreement was ultimately reached between the town and Æmilius Jarvis and Co., whose offer of 101¼ was accepted.

Sudbury, Ont.—Messrs. Morgan, Dean, Harris and Co., of Hamilton, have purchased an issue of $112,562.83 bonds as follows: Waterworks, $46,000 5 per cent., dated February 1st, 1919, due in 1 to 20 years; local improvements, $2,500 5 per cent., dated February 1st, 1919, due in 1 to 10 years; $2,442.11 5 per cent., dated March 1st, 1918, due in 1 to 20 years; $12,620.72 5 per cent., dated March 1st, 1918, due in 1 to 20 years; $20,000 6 per cent., dated February 1st, 1919, due in 1 to 10 years; park purchases, $29,000 5 per cent., dated March 1st, 1918, maturing March 1st, 1948. The bonds are offered to the public at a 5¾ per cent. basis, with the exception of the 30-year bonds which are offered at a 5⅝ per cent. basis.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from January 6th to 18th, 1919:—

School Districts.—Beaver Valley, $1,000 10-years not ex. 8 per cent. annuity. Scalat, $2,000 10-years not ex. 8 per cent. instalment. Wysla, $2,000 5-years not ex. 8 per cent. instalment. Kemmel Hill, $3,500 10-years not ex. 8 per cent. annuity. Dixmude, $2,900 10-years not ex. 8 per cent. annuity. Acadia, $2,900 10-years not ex. 8 per cent. instalment. Montague, $2,950 10-years not ex. 8 per cent. annuity.

Rural Telephone Companies.—Northern, $19,800 15-years 7¾ per cent. or better. Tipperary, $500 15-years 7½ per cent. or better. Viewfield, $600 10-years not ex. 7½ per cent. annuity.

The following is a list of debentures reported sold from January 6th to 18th, 1919:—

Rural Telephone Companies.—Ernscliffe, $300, $100; Mrs. Alma Gilbert. Luseland West, $1,000, Luseland, East, $1,500; W. D. Craig, Regina. Camberley, $3,700, Leipzig, $2,700; Wood, Gundy and Co., Saskatoon. Cotham, $1,350, Rozilee, $7,100, Vawn, $3,200; Nay and James, Regina. Cut Knife, $3,250, Kansas, $2,500; Western Canada Bond Corporation Winton Park, $2,500; Harris Read and Co., Regina. Echo, $600; Henry Wohless, Langenburg. Kenaston, $4,000; A. W. Steabner, Kenaston.

School Districts.—Red Butte, $2,500, Gumbo Flat, $2,500, Beaver Flat, $3,000; Waterman-Waterbury Manufacturing Co., Regina. Rockside, $600; Canada Landed and National Investment Co., Winnipeg. Waldheim, $18,000; Harris, Read and Co., Regina. Lonesome Pine, $1,200, Silver Cliff, $1,500; Wood, Gundy and Co., Saskatoon. Wolseley, $7,500; several purchasers.

City of Saskatton, $30,000 6 per cent. 15-year; Bond and Debenture Corporation, Winnipeg.

Town of Cabri, $4,000; Louis P. Simard.

SASKATCHEWAN BONDS

Province of Saskatchewan bonds of £50,000, or $243,333, are being offered by the Dominion Securities Corporation. They are 5¾ per cent. bonds, and the price is 100 and interest. The date of maturity is January 1st, 1934. The loan was authorized in 1909.

NATIONAL RAILWAYS ISSUE OVERSUBSCRIBED

The Canadian National Railways sold $7,500,000 6 per cent. 10-year serial equipment trust certificates. Tenders were called for the issue in New York and the successful tenderer was W. A. Reid and Co., of that city. The price secured was on a basis to yield 6¼ per cent.

The issue has proved popular. Already it has been oversubscribed. The high yield and excellent security are unique. As payments are made in New York, the proceeds of the loan will create a demand for Canadian funds, and to that extent will prove a favorable factor in relation to Canadian exchange.

GRAND TRUNK BONDS

A syndicate composed of A. E. Ames and Co., Wood, Gundy and Co., and the Dominion Securities Corporation, offered $5,254,000 of Grand Trunk Pacific Railway 4 per cent. sterling coupon bonds, due 1962, to the public. These bonds were guaranteed by the Dominion government, the price is 75.37 and interest, yielding 5½ per cent. All previous financing by this railway has been done in England or the United States.

The issue was sold almost immediately. It is estimated that 80 per cent. or more of the bonds were sold in Canada. The bonds are payable in Canada, England and the United States. These bonds were 4 per cents, but at the price of 75.35 yielded 5½ per cent., and may thus be put on a plane with Victory bonds.

PAPER TRIBUNAL INTERIM JUDGMENT

Additional Evidence Asked for—Commissioner Pringle Requested to Fix New Price—Final Price Should Be Fixed Soon

The Paper Control Tribunal, through Thomas P. Owens, Registrar, has handed out an interim judgment in the matter of the appeals by the publishers and by the manufacturers from the order of Mr. Pringle fixing the price of newsprint. The interim judgment deals, among other things, with the question of the class of evidence still to be submitted, and specifically mentions matters in regard to which no additional evidence is desired. The Appeal Board intimates that after further evidence has been received Commissioner Pringle will be asked to state what change, if any, should be made in the prices fixed by him. The interim judgment is as follows:

"At the opening of this hearing Mr. Clarkson and his assistant, Mr. Taylor, were examined at some length by counsel for the publishers, but we reserved our decision upon receiving this testimony as evidence, and pending such decision counsel for the manufacturers did not cross-examine.

"By the order of the Commissioner now under review it is provided that if the prices fixed by him were at any time found upon investigation to be either too high or low, there will be a revision of price from July 1st, 1918, and prices after that date were in part based upon estimates only.

"We think that it is important that the prices when fixed by us should be final, and that all proper evidence which either party may think important should be before us.

"Investigations have now been made by Mr. Clarkson which will enable the accuracy of certain estimates on which the price was fixed to be tested. We refer to the estimated increase of cost of wood, wages and freight after July 1.

No Further Evidence on Some Points

"In view of the admission of the record of the proceedings before the Federal Trade Commission, of the necessity of confining the further evidence within reasonable limits, of the great mass of evidence already taken, and of the views we entertain with respect to certain matters argued before us, we do not think that further evidence should be received with reference to the following topics:

"1, capital investment; 2, working capital; 3, return upon investment; 4, going value; 5, depreciation; 6, sinkage; 7, stumpage; 8, machine losses.

"We desire that further evidence should be mainly directed and shall be substantially confined to the matters (other than those mentioned above as excluded) dealt with in the publishers' brief in the criticisms of the estimated cost of manufacture at the different mills and the estimated increased cost of wood, labor and freight.

"If, as the result of the criticism of Clarkson's former reports, he desires to modify his conclusions, he should be afforded an opportunity of doing so.

"We shall withhold our decision for sufficient time to enable either party to give such relevant evidence as it may desire and as is permitted under the above rulings, before the Commissioner. The evidence taken before us is to be treated as taken by the Commissioner, with liberty to manufacturers' counsel to cross-examine thereon.

"Upon this evidence we would ask the Commissioner to state what change, if any, should in his opinion be made in the prices fixed by him, and without any further formal appeal we shall receive further argument, either oral or written—as may be arranged by counsel.

"It is desired that this evidence shall be given as soon as practicable. If either party fails to proceed with diligence, a motion may be made for judgment on the evidence as it now stands, or the Tribunal may of its own motion determine the questions before it without awaiting further evidence."

The Canadian Northern Railway has offered to pay to the city of Winnipeg the sum of $100,000 in lieu of taxes which it owes the city.

RELIEF FOR ALBERTA MUNICIPALITIES

Bill to be Introduced at Coming Session of Legislature to Provide Assistance for Those in Difficulty

The Department of Municipal Affairs of the Province of Alberta has in preparation a bill for dealing with municipalities throughout the province which are in financial difficulty. In such cases they are to have the privilege of time extensions, and will so be given necessary relief for the immediate future. A commission to administer this general act for the entire province will be created, as one of the essential features of the bill.

Tax sales will be made compulsory, according to another piece of legislation, which will eliminate the present tax enforcement system in toto. It has been found that many injustices have developed in the application of the enforcement law, and the substitution of tax sales is believed to be a better and more practical method.

An amendment to the vital statistics act will be asked for, making secretary-treasurers of school districts registrars of vital statistics in their respective districts. Other changes in this act are also under consideration at the present time.

There is to be a consolidation of the municipal tax system now in force. Under the present system notices are sent out separately for the municipal rates, the school rates, the wild land tax, and the supplementary tax, a somewhat elaborate machinery being necessary in each case. These will now all be consolidated, with one notice to cover the entire four items.

The new procedure as proposed by Hon. A. G. MacKay will impose upon the municipality the entire responsibility for raising all taxes within its bounds, provision likely being made by which a percentage commission will be allowed it for the collection of that portion of the taxation that hitherto has been collected from the government offices. There will, under the new system, be only one official channel for the billing and collection of the tax accounts, and the individual ratepayer will not have as many bills sent him as he has been accustomed to in the past.

Few Alberta Municipalities in Difficulty

In reply to an inquiry from *The Monetary Times* regarding municipalities in financial difficulty, Mr. John Perrie, Deputy Minister of Municipal Affairs of the Province of Alberta, says that there are just two or three of their town municipalities which are having difficulty in meeting their interest payments, some of which have become in arrears. The difficulty is that they are unable to realize on their outstanding taxes.

"The reason for the trouble," says Mr. Perrie, "that has arisen in some of our towns has invariably been the unwarranted subdivision of lands, the too optimistic ideas of the future greatness of the town; such ideas being, of course, fostered by real estate promoters, and this, of course, led to large borrowings to provide public utilities for a population that was expected to come within a few years. They were not content to wait for developments, but wished to be prepared for them beforehand. The developments did not materialize, the population did not come, vacant lots ceased to be worth paying taxes on, and the town proper has to shoulder the burden. This means an increased rate of taxation and probably some adjustment of the way in which the burden is to be carried.

"It should be borne in mind in this connection that none of the debenture indebtedness to which I have referred was incurred subsequent to the appointment of our Public Utilities Commission. At the time these debentures were issued, there was no authority that had any particular control over the issue of debentures by municipalities."

A protest against the act of the Ontario Legislature permitting certain municipalities to tax mortgages to aid in the upkeep of registry offices was passed at the thirty-third annual meeting of the County of York Law Association, held on Monday, January 27th.

The Continental Life Insurance Co.

HEAD OFFICE, TORONTO

Some Interesting Figures taken from 1918 Annual Report

Insurance in Force December 31st, 1918	$12,786,784.00
Total Income for year	551,672.80
Insurances Issued and Revived during the year	2,946,762.00
Payments to Policyholders in 1918	246 428.77
Net Reserves held by the Company	2 200,828.00
Total Assets of Company	2,515,304.98

The following comparative table, given in two year periods shows interestingly how the Continental Life has progressed since its founding nineteen years ago

	Net Premium Income	Income from Investments	Death Claims Accrued	Total Assets	Reserves	Insurance in Force
1900	$ 15 050	$ 1,612	... .	$ 79,925	$ 17 321	$ 705,200
1902	78,208	5,136	$ 7,329	259,439	128,831	2,704 467
1904	127,631	12,402	15,750	408,202	269,342	4 053,556
1906	153,879	17,268	29,470	574,760	426,592	4,774,022
1908	179,016	34,618	19,000	836,586	624 153	5,487,697
1910	208,028	50,538	12,500	1,084,822	831 820	6,367,883

H. O. POWELL, General Manager

Sale of Pulpwood Lands in Northern Ontario

The Lake Superior Corporation and Algoma Eastern Railway Company are open to negotiate for the disposal of certain lands.

Approximately 682,000 Acres

situated for the most part in that section of Northern Ontario, known as the Clay Belt, and comprising the Townships of Storey, Langemarck, Dowsley, Nassau, Shetland, Staunton, Orkney, Magladery, Caithness, Rykert, Doherty, Whigham, Coppell, Newton, Dale, McOwen, Frater.

The lands in question are accessible to the Algoma Central, Trans-Continental, Canadian Northern, and Canadian Pacific Railways, and should be of particular interest to pulp and paper makers, also to settlers, in view of their agricultural possibilities.

General information will be furnished [illegible] bited at the office of Mr Alex T[illegible] [illegible] Lake Superior Corporation 1128 [illegible] Building Toronto or at the office of Mr [illegible] gomery vice president of the Algoma Eastern Railway Company Sault Ste Marie Ont

THE DOMINION BANK

The Forty-eighth Annual General Meeting of the Dominion Bank was held at the Banking House of the Institution, Toronto, on Wednesday, the 29th January, 1919.

Among those present were noticed: A. E. Gilverson, Graham Campbell, J. C. Moore (Oshawa), Sir Edmund B. Osler, Jesse Ashbridge, S. Jeffery (Fort Perry), A. C. Paull, Major R. J. Christie, W. J. Leonard (Hamilton), Frederick Rohleder (Kitchener), E. W. Hamber (Vancouver), James Carruthers (Montreal), William Davies, Robert H. Shipman (Cannington) W. J. Waugh (Hamilton), W. D. Matthews, Sir Augustus M. Nanton (Winnipeg), H. Crewe, William Mulock, Jr., R. S. McLaughlin (Oshawa), Dr. F. LeM. Grasett, Charles P. Stuart, A. W. Austin, William Ince, W. J. Fleury, A. T. Reid, Edward C. Jones, W. W. Near, J. Harry Paterson, Albert Whitney (Prescott), H. C. Scholfield, Thomas Meredith, Sir Henry M. Pellatt, C.V.O., W. Gibson Cassels, F. L. Patton (Winnipeg), C. C. Van Norman, Frank J. B. Russill, D'Arcy Martin, K.C. (Hamilton), M. S. Bogert (Montreal), H. W. Hutchinson (Winnipeg), E. G. Gooderham, R. L. Defries.

It was moved by Sir Augustus M. Nanton, seconded by Mr. H. W. Hutchinson, that Sir Edmund B. Osler do take the chair and Mr. C. A. Bogert do act as Secretary.

Messrs. Graham Campbell and W. Gibson Cassels were appointed Scrutineers.

The Secretary read the Report of the Directors to the Shareholders, and submitted the Annual Statement of the affairs of the Bank, which is as follows:—

To the Shareholders.—

The Directors beg to present the following Statement of the result of the business of the Bank for the year ended 31st December, 1918:—

Balance of Profit and Loss Account, 31st December, 1917			$ 393,004.84
Profits for the year, after deducting charges of management and making full provision for bad and doubtful debts		$1,169,798.38	
Less:—			
Dominion Government War Tax (on circulation)	$60,000.00		
Taxes paid to Provincial Government	23,300.00		
		83,300.00	
Making net profits of			1,086,498.38
			$1,479,503.22

Which amount has been disposed of as follows:—

Dividends (quarterly) at Twelve per cent. per annum		$ 720,000.00	
Contribution to Toronto and York Co. Patriotic Association and Canadian Red Cross Society	$25,000.00		
Contribution to Navy League of Canada	10,000.00		
Contribution to Catholic Army Huts Campaign	1,000.00		
Contribution to Y.M.C.A. Red Triangle Fund	2,000.00		
		38,000.00	
Contribution to Officers' Pension Fund		25,000.00	
		$ 783,000.00	
Written off Bank Premises		250,000.00	
		$1,033,000.00	
Balance of Profit and Loss carried forward		446,503.22	
			$1,479,503.22

E. B. OSLER,
President.

C. A. BOGERT,
General Manager.

Your Directors feel that the statement submitted showing continued increased earnings and a general expansion in the Bank's business will be received with satisfaction by the Shareholders.

During the year Branches were opened at St. Catharines, Ontario, and in Manitoba at Teulon and Union Stock Yards, St. Boniface. Our Office at Walkerville, Ontario, was closed.

Expenditures on Bank Premises were unimportant—$250,000 has been written off this account out of the year's profits.

The Head Office and Branches of the Bank have been carefully inspected and your Auditors, Messrs. G. T. Clarkson and R. J. Dilworth, have made their usual thorough investigation of its affairs.

E. B. OSLER, President.

Toronto, 29th January, 1919.

The Report was adopted.

The retiring Auditors, Messrs. Geoffrey T. Clarkson and Robert J. Dilworth, were re-appointed for the current year.

The thanks of the Shareholders were tendered to the President, Vice-President and Directors for their services during the year, and to the General Manager and the other Officers of the Bank for the efficient performance of their respective duties.

The following gentlemen were duly elected Directors for the ensuing year: Messrs. A. W. Austin, James Carruthers, Major R. J. Christie, Sir John C. Eaton, E. W. Hamber, H. W. Hutchinson, W. D. Matthews, R. S. McLaughlin, Sir Augustus M. Nanton, W. W. Near, Sir Edmund B. Osler, A. T. Reid, and H. H. Williams.

At a subsequent meeting of the Directors, Sir Edmund B. Osler was elected President, and Mr. W. D. Matthews, Vice-President, for the ensuing term.

GENERAL STATEMENT

LIABILITIES.

Capital Stock paid in			$ 6,000,000.00

President.

C. A. BOGERT,
General Manager.

AUDITORS' REPORT TO SHAREHOLDERS.

We have compared the above Balance Sheet with the books and accounts at the Chief Office of the Dominion Bank, and the certified returns received from its Branches, and after checking the cash and verifying the securities at the Chief Office and certain of the principal Branches on December 31st, 1918, we certify that, in our opinion, such Balance Sheet exhibits a true and correct view of the state of the Bank's affairs, according to the best of our information, the explanations given to us and as shown by the books of the Bank.

In addition to the examinations mentioned, the cash and securities at the Chief Office and certain of the principal Branches were checked and verified by us at another time during the year and found to be in accord with the books of the Bank.

All information and explanations required have been given to us and all transactions of the Bank which have come under our notice have, in our opinion, been within the powers of the Bank.

G. T. CLARKSON, } of Clarkson, Gordon &
R. J. DILWORTH, } Dilworth, C.A.

Toronto, January 21st, 1919.

PERSONAL NOTES

Mr. E. Ray Marien, industrial engineer, has been appointed to the position of trade commissioner for the city of Quebec.

Mr. W. W. Otter Barry has been appointed assistant secretary to the Sun Fire office. Formerly, Mr Barry was assistant secretary to the fire offices committee.

Mr. William MacInnes has been appointed accident superintendent at the Montreal branch of the Norwich Union. Mr. MacInnes was for some years inspector of the Phenix of Paris, and General of Paris, which position he has relinquished and has now entered upon his new duties.

Mr. Edson L. Pease, vice-president and general manager of the Royal Bank of Canada, has sailed from Halifax on the "Olympic," and will spend some two months in Europe looking over and studying the general situation. He will also make final arrangements in connection with the opening of the new Paris branch.

Mr. P. A. Wisener, who has been lately connected with the American Ordnance Department, and Mr. S. B. O'Hara, who was formerly manager of H. O'Hara and Company, stock and bond brokers, of Toronto, have joined the staff of Mulholland, Bird and Graham, Toronto, bond dealers. Mr. Wisener will cover eastern Ontario, and Mr. O'Hara will cover western Ontario.

Mr. William Ewen Stavert, formerly of the Bank of Montreal, and recently a director of finance at the British Ministry of Information, has been created a Knight of the Order of the British Empire. He began his banking career with the Bank of Nova Scotia, with which he worked for over 20 years, until he became general manager of the Bank of New Brunswick, before entering the service of the Bank of Montreal.

FIDELITY-PHENIX FIRE, MONTREAL AGENCY

The Fidelity-Phenix Fire Insurance Co. of New York announces that, dating from February 1st, 1919, it has been decided to discontinue the general agency heretofore carried by Messrs. Dale and Co., Ltd., and that on and after that date the entire city of Montreal business will be handled from the head office of the company at 17 St. John Street. The writing facilities of this well-known company have been largely increased this year, with a view to rendering prompt and efficient service under the new arrangement. Mr. Charles Lacaille will look after the interests of the French city department of the Fidelity-Phenix at the head office.

DIVIDENDS AND NOTICES

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Two and three-quarters per cent. for the current quarter, being at the rate of Eleven per cent. per annum, upon the Paid-up Capital Stock of this Institution has been declared, and will be payable at its Banking House in this city and at its Branches on and after the 1st day of February next, to Shareholders of record at the close of business on the 15th day of January.

By order of the Board.

D. C. MACAROW,
General Manager.

Montreal, 27th December, 1918.

(For further Dividends see page 51)

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Porcupine Crown Mines.—The directors of the company propose to reopen the mine and resume active operations. Ore in sight is estimated as of a value of $500,000. The annual statement showed production valued at $105,247, but a net profit of only $4,814. These figures compared with $6[illegible] and $109,421 for the previous year.

Southern Canada Power Company.—Gross earnings of the company amounted to $51,091 in December, an increase of $11,710, and net to $23,442, an increase of $6,089. For the three months ending December last, gross at $144,648 showed an increase of $32,053, and net at $66,455, an increase of $16,664.

The company states that the work on the water-power development at Drummondville is progressing satisfactorily.

Winnipeg Electric Company.—Net earnings of the company in November last, net, after operation, amounted to $23,120, as compared with $86,887 in the corresponding month of 1917, which is a decrease of no less than $63,767 or 73 per cent. As compared with November, 1916, a decrease of $78,512 is shown.

Gross for November, 1918, amounted to $283,721. After fixed charges were taken into consideration, a deficit of $33,813 was shown.

Guarantee Company of North America.—The company has announced that a bonus of 10 per cent. has been declared out of accumulated profits, 5 per cent. to be payable April 15th to shareholders of record March 31st, and 5 per cent. on October 15th, to shareholders of record September 30th. The company has been paying a 10 per cent. annual dividend with a bonus of two per cent. The last annual statement of the company showed shareholders' surplus as $1,613,372. The paid up capital stock to which the bonus will apply amounts to $304,600.

Crown Reserve Mining Company.—Shareholders of the company have authorized the directors to dispose of 231,143 fully paid shares which were held by the trustees. These shares were at one time the subject of a lawsuit, when an attempt was made to have them released. The court upheld the directors in their refusal to authorize the release, the directors claiming that they might at some time be required by the company.

The annual reports show that the directors have decided to draw on surplus to the amount of $255,450, chiefly to provide for the writing down of assets to rock bottom. The net profit was but $6,755. The total surplus at the end of the year was $547,706.

Nova Scotia Steel and Coal Company.—D. H. McDougall, president of the company, announces that advantage will be taken of the slack spell in steel production to overhaul the plant and make certain additions and changes with a view of securing greater efficiency. Chief among these latter will be the provision of new and thoroughly up-to-date by-product coking ovens. Further the Wabana Mines will be developed so that the Scotia Company will produce iron ore far in excess of its former outputs and at a materially reduced cost.

Hayden, Stone and Company, who represent the large United States interests in the Nova Scotia Steel and Coal Company, have aided in the developments of these plans, which will require considerable time and capital. The position of the company is strong at the present time, having regard to the provision of an additional $5,000,000 of working capital, due to the sale of that amount of stock in 1917, and also to the fact that the company is in a strong financial position with net current assets of $10,000,000.

Gillette Safety Razor Company.—According to a report made at the annual meeting by managing director A. A. Bittues, the year 1918 was the best in the company's history, sales increasing 20 per cent. over the figures for the previous year, while the blade production in Canada gained 160 per cent., and razor production 301 per cent. in the same period. It was also announced that the company's steel plant in Sweden was now able to supply steel in unusual quantities, while shipping facilities which were approaching normal, permitted them to ship to foreign countries and go after business in a more energetic manner than had been possible during the four years of war.

The directors for the current year are J. E. Aldred, King C. Gillette, Frank J. Fahey, Howard Murray, Thomas W. Pelham, Sir Herbert S. Holt and A. A. Bittues. The election of officers resulted as follows:—Chairman of the board, J. E. Aldred; president, King C. Gillette; vice-president, Thomas W. Pelham; treasurer, Frank J. Fahey; secretary and managing director, A. A. Bittues.

Consolidated Mining and Smelting Company.—The company has issued a prospectus giving the details of the new $3,000,000 bond issue, proceeds of which will be used for the purpose of reducing the company's overdraft, and extending the plant of the West Kootenay Power and Light Company, and to increase the capacity of the copper refinery from 20 to 50 tons a day.

The issue is of 10-year, 7 per cent. convertible gold debenture bonds, at par and accrued interest dating from January 1st, 1919. Subscription lists will close on February 3rd. The bonds are payable 10 per cent. on application, and the balance with accrued interest on allotment.

Bonds will be issued in denominations of $1,000, $500 and $100, and are offered to shareholders pro rata to the amount of shares held, at the rate of $100 face value debenture bonds for every 16 shares of stock of the aggregate face value of $400. Interest coupons are payable half-yearly on January 1st and July 1st, at the Bank of Montreal in Montreal, Toronto or New York. The bonds may be called for redemption after January 1st, 1922, at 110 with accrued interest, and may at any time after January 1st, 1924, be converted into stock of the company at par for par.

Wayagamack Pulp and Paper Company.—Net earnings of the company established a new high record in the year ended November 30th last, the total, after providing for the war tax, but before deductions for depreciation, writing off, etc., amounting to $1,057,742, against $966,349 the year before, and $979,362 in 1916, the last, however, being before the war tax provision.

After the same allowance for depreciation of plant as in 1917, namely, $160,000, payment of $208,980 bond interest, and writing off $134,726 for stumpage and $10,000 for discount on bonds, the surplus balance was $544,036. This represented earnings at the rate of 10.9 per cent. on the capital stock, against 10.3 per cent. the previous year, when writing off was about $60,000 less. From the total of $1,408,060 at credit of surplus account, $500,000 was set aside as a general reserve to provide for enlargements to the paper mill.

The balance sheet shows that current liabilities were reduced about $520,000, while current assets were increased about $278,000. Net working capital rose to $1,230,650, against $432,752 a year before. Bank loans, which have overhung the company's position for several years, have been finally liquidated. Cash on hand was increased from $12,499 to $499,414.

Peterson Lake Mining Company.—An announcement has been made calling a special meeting of Peterson Lake shareholders for Monday, February 3rd, to ratify an issue of 100,000 shares of preference stock at par, to be offered to shareholders in the proportion of one in twenty-five. These preferred shares, it is announced, will be entitled to a dividend of 15 cents per share per year, said dividend to be cumulative. The stock is to be retirable at $1.50 and have a voting power equal to five common shares, and at the end of one year will be exchangeable for common shares in the same proportion.

A circular to the shareholders announces that the money is needed to increase the milling capacity and carry on development work, and a letter from C. A. Filteau, E.M., strongly urges dewatering of the old Seneca-Superior workings with a view to exploring that particular section of the company's holdings.

A financial statement of the company for the six months ended October 31st shows bills and accounts payable of $10,257 and cash on hand of $964, since which time, however, $5,621 has been received for a car of ore sold in September and $928 for a car sold in November, to which is added the estimated value of $8,000 for another car of ore shipped in November.

Toronto Railway Company.—The complete figures for the Toronto Street Railway Company's business in 1918 will not be made public until the annual meeting on Wednesday, February 5th. Some of them have, however, been obtained from the company's report made to the city of Toronto in connection with the percentage which the city collects on gross earnings.

Approximately 166,000,000 fares were collected during 1918, as compared with 158,000,000 in 1917. This increase of 8,000,000 in passenger traffic has been effected without adding to the number of cars on the company's service. As compared with 1917, the company's contributions to City Hall finance have been approximately as follows:—

	1917.	1918.
Percentage on earnings	$970,512	$1,046,495
Pavement charges	98,841	98,816
General taxes	117,678	155,000
	$1,187,031	$1,300,311

The company's passenger earnings were $6,528,800 in 1918, an increase of $326,238 over 1917, and the gross earnings are usually about $90,000 in excess of passenger earnings ($89,197 in excess in 17917) so that $6,618,000 should approximate the gross income for 1918.

The company's financial position was improved as follows during the past year:—

Increased earnings about	$326,000
Saved by reducing dividend	480,000
	$806,000

As against this, however, there are two additional expenses, increased payment to city, $113,000, and increased wages, $300,000.

The wage increase of about $600,000 per annum granted in 1917 applied to only half that year, so the 1918 wages should be about $300,000 in excess of those for 1917. This may be slightly reduced by the fact that the number of men employed was abnormally low for some months.

The Brandram-Henderson Company, Limited, closed the fiscal year on December 31st, instead of on November 30th, as in previous years. The date of the annual meeting, which is usually held in February, has not yet been fixed.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word: all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance: 50 per cent extra if charged.

A HAIL MANAGER OPEN FOR ENGAGEMENT.—Ten years' experience managing Hail branch in three western provinces for large company. Have just been discharged from Army and am ready to negotiate for similar appointment. Apply E. W. Middleton, 516 Camden Place, Winnipeg.

DIVIDENDS AND NOTICES

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 128

January 25—Premises occupied by the Provincial Produce Co., 60 Colborne Street, were damaged. Estimated loss, $500.

Vancouver, B.C.—January 24—Building and contents of the T. A. Walsh Co. and the Walsh Construction Co. were destroyed. Estimated loss, $250,000.

Woodstock, Ont.—January 24—Tile plant and contents of B. Blair and Co., were destroyed. Estimated loss, $30,000, partially covered by insurance. Barn of Thomas West was destroyed. Cause reported as incendiarism.

BRITISH EMPIRE UNDERWRITERS

The offices of the British Empire Underwriters and of the St. Lawrence Underwriters have been moved from the second floor of 61 Adelaide Street East, Toronto, to the ground floor of 84-88 King Street East, Toronto. The new quarters are larger, in accordance with the growing business of these companies, both of which have expanded under the direction of Mr. J. G. Wilson, an underwriter of long experience.

CANADA PERMANENT MORTGAGE CORPORATION

The Canada Permanent Mortgage Corporation has, like most other mortgage companies in Canada, experienced a slight falling off in business during the past year. Its statement for the year 1918 compares as follows with that for the year 1917:—

	1917.	1918.
Net profits for the year ...	$ 852,325	$ 824,532
Total available for distribution	1,047,977	1,022,509
Dividends	600,000	600,000
Transferred to reserve fund	250,000	250,000
Balance carried forward ...	197,977	172,509
Deposits	6,197,543	5,461,936
Debentures and debenture stock	13,749,026	14,164,350
Mortgages on real estate..	26,742,535	26,318,586
Bonds and debentures .	1,687,493	2,045,344

The company's annual meeting will be held in Toronto on February 7th.

WHALEN PULP AND PAPER OFFERING

Five hundred thousand dollars of seven per cent. gold notes of the Whalen Pulp and Paper Mills, Ltd., are being offered by Peabody, Houghteling and Co., of Chicago. The notes mature in quarterly instalments of $25,000 commencing April 15th, 1919, and ending January 15th, 1924. They are dated January 15th, 1919. The price varies from a rate to yield 7¼ per cent. in the case of the short-term notes, to 7¾ per cent. in the case of the longer ones.

CROWN LIFE INSURANCE COMPANY

A substantial increase in total assets is reported by the Crown Life Insurance Co. for the year 1918, the total now being $2,554,434, as compared with $2,248,896 at the end of last year. The new assets have been invested almost entirely in war loan and other bonds. The business in force increased by $1,523,912. Regarding losses, the company suffered rather heavily from the influenza epidemic. The following is a statement of death claims paid:—

Resulting from normal causes	$ 47,318
Resulting from war casualties	46,400
Resulting from epidemic	85,843
Causes not yet reported	17,050
Total	$196,611

The company's expense ratio has been maintained at a low level, the figure for 1919 being 12.7 per cent. In submitting their annual report, which will be taken up at the annual meeting, which will be held on Monday, February 3rd, the directors refer to the past year as having been a "trial by ordeal" for the younger life companies. Nevertheless, the company's surplus, including paid-up capital, has increased from $191,809 to $209,595.

HURON AND ERIE MAKES GAIN

The Huron and Erie Mortgage Corporation of London, Ont., is one of the few mortgage companies able to report an increase in profits, debentures outstanding and deposits. The demand for funds at high rates for other purposes and the tendency towards the reduction of mortgage loans, have made 1918 a particularly difficult year for business of this kind. The following comparative figures illustrate the progress of the Huron and Erie as compared with the previous year:—

	1917.	1918.
Net profits for the year ..	$ 450,191	$ 474,069
Dividends	300,000	300,000
Transferred to reserve fund	100,000	200,000
Debentures outstanding ...	8,736,141	9,074,857
Deposits	3,025,255	3,104,973
Mortgages held	10,584,773	10,409,670
Total assets	17,646,717	18,207,750

The holdings of mortgages have, it will be observed, decreased slightly. The additional assets have been invested for the most part in bonds of the Dominion of Canada and its provinces. Cash on hand has also increased by $350,000. The company's reserve fund is now $3,300,000, while its capital is $2,500,000.

The company is preparing to open a branch in Toronto and has already purchased a property on King Street East, where alterations will be made during the next few months. Branches are already located in Regina, Winnipeg, St. Thomas, Edmonton and Windsor, in addition to the head office in London. The Canada Trust Co., which is associated with the Huron and Erie, made profits for the year 1918 amounting to $140,411, as compared with $135,266 the previous year. Assets increased by $1,000,000, and are now almost $10,000,000. The net profits and the assets of both of these companies have steadily increased since 1913.

Claim of Forestry in Reconstruction

Canada's Timber Resources Wasted by Carelessness—Need for State Supervision — New Growths Require long Period—Possible to Ensure Successive Crops For All Time to Come — Much of Canada is Fit Only for Forestry

BY ROBSON BLACK,
Secretary, Canadian Forestry Association

OF all the family of natural resources, the forest is the shyest advertiser. This has been damaging enough in a land where public policies go to the pushful. We cannot realize the national seriousness of it, however, until we thoroughly grasp the fact that the perpetuation of forests is primarily state business and that timber conservation in Ontario is more the concern of the Niagara school teacher and the Cobourg grocer than of the "lumber baron."

Canada's forests owe perhaps their greatest grudge to those who posed as their special pleaders. "Exhaustless forests," "forest resources scarcely scratched" have passed current even in this day as intelligent patriotism and what the sales manager calls "ginger talk." Moonbeams make insecure bracing for any reconstruction platform and the moonbeams of reckless estimates of Canada's tree farm have been not only intrinsically foolish but have acted as a standing invitation to nation-wide vandalism.

Happily the orator has been supplanted by the bookkeeper and his adding (or rather subtracting) machine. We know now that two-thirds of the forest inheritance of Canada has been swept away by fire, that in the province of British Columbia, holding half the timber of all Canada, more than twenty-two times as much timber has been given into the maw of forest conflagrations than has been used in all the British Columbia mills. Through fairly precise surveys we know now that when the prairie provinces ask for the return of their forest resources from Dominion control they are really asking for a property which, while thickly laden with excellent timber in earlier years, is now so badly wrecked by fire as to cost any governments more than $700,000 outlay annually for fire protection, with only about $500,000 coming back in revenues. For long years to come, the prairie provinces forests, growing mostly on non-agricultural soils, cannot turn in a dollar of net revenue but must patiently be nursed back to productive condition.

Only when a detailed survey is made of Ontario forest lands will we know approximately the enormous robberies of timber from the public domain through the agency of forest fires. White pine, our most precious eastern wood, is far along the road to exhaustion, showing a progressively smaller cut from year to year. This is one of the dividends of our amazing disregard for the foundations of national wealth. Here are hundreds of mills with dependent towns and populations, cut off from future sustenance by the same suicidal thrust that severs a province from its vast legacy of white pine. The destructive fires continue. The old-fashioned methods of cutting with no effort to secure new growth—butchering without breeding—have shortened the span of life of some of the largest Ontario mills, as far as white pine is concerned, to 1921 or at most 1925. In face of these alarming facts, the first step has yet to be taken to ascertain methods of rehabilitating the white pine on areas cut over. Fortunately the carnival of forest fires in Ontario has likely seen its wildest days. A strongly organized forest service with over 1,000 rangers and inspectors, generous expenditures on equipment and modern ideas of management, has been brought into being during the past two years. Nothing more creditable has been done by any Canadian government in such short time, and while it may cost half a million dollars a year it is cheap insurance. Fire protection, however, is but the first step in state supervision of public-owned forests. The interests of the province and of the lumber industry now call for a re-examination of present "regulations" in the light of modern experience, and the employment of technically trained woods managers in all cutting operations on the public domain. This may sound new; it is five hundred years old. It may sound like a fresh dose of state interference, but only this form of state "interference" can possibly rescue private industry from obliteration.

In Quebec, out of sheer necessity, the limit-holders have banded together to form fire protective associations. Their range of holdings now extends over 75,000 square miles, most of which may be said to be guarded by the best methods yet developed. A hydro-aeroplane will be added to central Quebec's fire-detecting machinery next spring; the device is experimental, but great possibilities are before it.

New Brunswick's acceptance of state responsibility in care of its forests has resulted in an excellent organization freed from political control, with a technical forester at its head. Nova Scotia has yet to create a provincial forest service, although the present condition of its timber supply and the disastrous consequences of further delay in methods of rehabilitation render such a public department even more essential than in New Brunswick.

Because much government machinery has been brought into being for the mastery of the forest fire menace, one must not conclude that the plague is subdued. It will not be until the economic and moral senses of the population are considerably honed up by aggressive education. Fire protection, however, is merely the primer stage of forest management, corresponding to the purchase of a sprinkler system in the art of making motor cars. Each is fundamental, like good health and macadam roads. But fire prevention is not sufficient to reconstitute the values in the denuded white pine or spruce forests of Ontario and Quebec. It is not alone sufficient to extend the life of the paper mills beyond the doleful "fifty years" guessed at by so many [illegible] during the recent paper inquiry. It will not arrest the persistent crowding out of the white spruce by the [illegible] rotting balsam, nor will it maintain the supremacy of the coniferous trees over the less important hardwoods.

This is the field of practical forestry. Once we have insured our forests against loss by fire, and that day is not far distant in some parts of Canada, the urgent duty of government forestry departments is to proceed to constructive forestry.

Provision for New Growth

For an illustration, the Ontario lumberman in white pine tracts usually cuts clean; in Quebec he cuts to a diameter limit. In the first instance, the areas too often grow up to worthless hardwoods; in the second instance, the diameter limit system fails in its purpose of retaining seed trees and leaves a scattering of young trunks to be wasted by windfalls. This clearly indicates the futility of any fixed method blanketing a whole province. Nature defies ramrod regulations, for local conditions must be separately considered. In other words, logging to be carried out with respect to future growth is a matter of constant technical supervision and can best be done by forest engineers working for the perpetual custodian, the Government.

It is supreme national folly to refrain longer from applying state supervision to the utilization of the public's timber possessions. If there is any other method of shielding the nation from the consequences of timber denudation, five centuries and a dozen nations have not discovered it. New Brunswick, once growing pine like wheat stalks, has now so little of the stock, that lumbermen cut six logs of other species to one of pine. Is this stupid acceptance of what constitutes a commercial blow, a slashing of export trade, a closing of mills, to be allowed to run parallel to all sort of expensive national schemes for reconstruction and readjustment? A basic resource out at elbows, the foundations of a great industrial enterprise being kicked out stone by stone, and as yet no hand lifted to provide the obvious remedy. White pine and spruce forests can be so operated as to maintain the capital stock for all time to come. Probably no man alive can write out a formula for it like a cure for toothache. What might be an excellent method in France or New England may be altogether fantastic for the Coulonge River in Quebec. Market conditions are in themselves a prime factor in practical forestry. Each region must be considered in its special details; the best method of handling each tree species can best be determined by experimental plots subject to varied treatment. This has been instituted for the purpose of spruce reproduction studies in parts of Quebec and New Brunswick by the Commission of Conservation working with the Provincial Governments and commercial companies. One of the surprises brought out in the preliminary reports is that a spruce tree under present conditions does not reach twelve inches diameter inside of 175 to 200 years. Such facts only go to show the gross shortsightedness of destroying by careless cutting operations the reproductive capacity of this truly wonderful but slow-acting forest organism. What is being done for a better knowledge of spruce reproduction does not apply to pine except for an experiment station started on the Petewawa Military Reserve by the Dominion Forestry Branch.

The greatest single stumbling block in the way of forest conservation in Canada is the inherited notion of our great grandfathers that the forest is a sort of way-station between the primeval wilderness and the ultimate farm. This is fundamentally vicious. Pioneer times are over. There is very little forest, except in the Ontario and Quebec clay belts, that should be cleared for farms, for two-thirds of the whole Dominion is unfitted for agriculture. At the same time, we have enormous areas of lands, cleared by fire or axe, that must be returned to forest. The emphasis, therefore, has shifted to the opposite scale; restoring the forest lands, guarding existing timber from fire, regulating the axe so as to keep the forest paying rich dividends for all time to come.

Sylviculture—the art of growing repeated crops of timber on non-agricultural soils—is not an exotic in Canada. It is long-headed business sense that first came to light in the wake of exhausted virgin forests. It is frugality and caution after a night of prodigal waste. It is keen business foresight, it is love of national freedom, it is reverence for past and respect for future. But above all it is business.

THE STANDARD TRUSTS COMPANY

The report for 1918 of the Standard Trusts Company submitted at the annual meeting held at head office, Winnipeg, January 30th, reflects the fact that the Standard Trusts Company continues to enjoy in a constantly increasing measure the confidence of the financial and commercial public in those centres in which it is in a position to offer its services.

In his address to the shareholders, Mr. Wm. Harvey, vice-president and managing director, made reference to several matters which do not tend to make it any easier for such institutions as the Standard Trusts Company to render the service to its clients that it should. In speaking of the tendency of the provincial governments to increase taxation against trust companies, he said: "Our provincial governments, I note with regret, continue to increase their taxation against all trust corporations, affecting both the lending and the trust sides of their business, making it more difficult for us to give to those clients, often widows and orphans, the return commensurate with their needs. The taxation is assuming a double and triple form, since the government imposes originally on the assets brought in for administration a succession duty, then a tax upon the funds as they become again invested, and finally a tax upon the services rendered in the administration by the company itself. We are not alone in our complaints, for other financial, insurance and banking institutions are being similarly taxed, although not quite so severely. Granted that there must be taxation, a more just and equitable method might be effected with less individual hardship. That man would be unpatriotic who would not willingly contribute his share towards the general well-being of his community, but radical and ill-thought-out legislation tending to harsh, unjust and unfair imposition of taxes can but react against the government introducing it."

All branches of the company's business show a very satisfactory development. The trust business showing is particularly gratifying. During 1918 the company took in 148 estates valued at $792,000, closed out 131 valued at $2,059,000, while the total number of estates and agencies now under administration stands at nine hundred and eighty.

As indicative of the strong financial position which the company occupies, it is especially interesting to note that the ratio of assets to the liabilities to the public, including the half yearly dividend, is quite comfortably in excess of two to one. For instance, the company's assets amount to $2,973,251, while the company's liabilities to the public amount to $1,367,611, showing a surplus of assets over liabilities of $1,605,640.

The detailed statement appears on another page of this issue, and is direct evidence of the progressive and careful policy of this representative western institution.

HURON AND ERIE TO DOUBLE CAPITAL

The shareholders of the Huron and Erie Mortgage Corporation of London will shortly discuss a proposal to double the capital stock of $2,500,000. According to the plan, however, this is to be accomplished without the investment of new capital. The company's reserve is now $3,300,000, and it is proposed to utilize $2,500,000 of this in the distribution of new shares. The liabilities to shareholders would then stand at a capitalization of $5,000,000 and a reserve fund of $800,000. The par value of each share is now $50, and presumably $100 share would be issued for each $50 share now outstanding. This would be accompanied by a reduction in dividend rate from 12 per cent. to 6 per cent, which would leave the yield to shareholders exactly as before. One of the reasons why this is being proposed is that it will remove the marked complications involved in quoting $50 shares. It will also enlarge the legal powers of the company to do business.

VICTORY LOAN SPECIAL COMMITTEE

Good Work on Stabilizing Market—Over $70,000,000 in Victory Bonds Traded

Transactions involving over $70,000,000 were put through by the Victory Loan Special Committee, which ceased operations recently.

It was pointed out in a statement issued by G. H. Wood, chairman, that instead of being at a discount, as some Government loans in other countries are, Canada's two Victory Loans at to-day's market prices have a value of about $17,000,000 over and above the issue prices.

The committee completed its plan, the first of its kind, as far as known, ever attempted in connection with Government loans. Trading was commenced on the 22nd of January, 1918, and ceased on the 20th of January, 1919.

In the interval, the market situation for the 1917 loan has become so firmly established that open trading was permitted on December 21st, 1918. For the 1918 loan, the demand became so much greater than the supply that on January 20th, 1919, it was decided to authorize open trading in that loan, thus entirely releasing the committee from further responsibility.

Executive Committee

The executive of the committee consisted of Mr. G. H. Wood, chairman, Messrs. J. W. Mitchell, H. R. Tudhope and W. A. MacKenzie, of Toronto; Messrs. Edwin Hanson, Purvis Macdougal and R. A. Stephenson, of Montreal, and Sir Augustus Nanton, of Winnipeg.

The committee operated from three offices, of which R. A. Daly, who was general secretary, was also secretary at Toronto. R. H. Holden was secretary at Montreal and T. R. Billett was secretary at Winnipeg. Members were pleased to render their services without remuneration.

There were 240 dealers, including bond men and stock exchange members, who entered into the agreement with the committee, 104 of these trading through the Montreal office, 97 through the Toronto office and 39 through the Winnipeg office.

Sold $70,000,000

During the period in which the committee was operating, which was just two days short of one year, the total amount of bonds which passed through the hands of the committee for both loans was $70,336,000, which represented the amount of bonds taken in by the committee and for which they found a market:—

1917 Victory Loan	
1922 maturity	$28,472,450
1927 maturity	5,034,900
1937 maturity	22,550,650
	$56,058,000
1918 Victory Loan	
1923 maturity	$ 1,806,000
1933 maturity	12,472,000
	$14,278,000
	$70,336,000

The committee handled 33,764 separate transactions, of which 22,613 were incoming and 11,151 were outgoing.

Accomplishments

At least three things have resulted from the committee's operations:—

1. The floating supply of both 1917 and 1918 Victory Loans have been widely and strongly distributed.
2. It prepared the way for the success of the 1918 campaign, and made possible the flotation of the loan at par, thus saving the country perhaps $10,000,000 in the price alone.
3. It undoubtedly enhanced Canada's credit in the allied countries, this being especially the case in financial circles in the United States.

EDMONTON FINANCES

City to Issue One Million 6% Debentures Against Tax Arrears Outstanding in 1918—Civic Utilities Show Gratifying Results

In our issue of January 24th, a reference was made to the finances of Edmonton. In as much as the paragraph in question was rather ambiguous and likely to cause some misunderstanding, we publish herewith some particulars in connection with that city's proposed borrowings. In writing to us on the subject City Comptroller Mitchell says:—

The usual by-law by council authorizing the necessary overdraft at the bank has been passed providing for $1,500,000 to meet current expenditures until such time as the taxes for the current year will be received. Furthermore, it is proposed to issue $1,000,000 six per cent. debentures repayable within five years, against the tax arrears outstanding for 1918, the Public Utilities Commission having approved of this being done. The issue will be placed on the market for immediate disposal. As the city already is indebted to the bank and otherwise to a similar extent, the proposed issue merely postpones maturity of the liability until the arrears of taxes against which it will be issued have been recovered, and does not increase the current indebtedness of the city as it now stands.

The gross debt of the city, sinking fund investment and net debt, as at 31st December, are shown as follows:—

	Debt	Sinking Funds Investment	Net Debt
General Debentures including City's share of Local Improvements	$11,622,125.85	$1,726,621.32	$9,895,504.53
Public Utilities— Waterworks, Telephone, Electric Light, Street Railway,	9,685,909.09	1,758,680.18	7,927,228.91
Property share Local Improvements	4,026,592.11	906,216.14	3,120,375.97
	$25,334,627.05	$4,391,517.64	$20,943,109.41

The statement that $6,000 was borrowed from the bank to cover part of the sinking fund payments is quite incorrect, especially as the city has fully paid over the sinking fund instalments up to and including 31st December.

The net result of operation of the civic utilities for the past year is very gratifying, there being approximately a net surplus, after providing for all charges, of $15,000, made up as follows:—

	Net Surplus
Telephone Department	$ 32,000
Electric Light Department	80,000
Waterworks	35,000
	$147,000
Street Railway (deficit)	132,000
Estimated Net Surplus	$15,000

MOOSE JAW FIRM EXTENDS FACILITIES

The Kern Agencies, Limited, of Moose Jaw, have completed an arrangement with Logan and Bryan for a private wire service to Moose Jaw. They will now have private wire connections with New York, Minneapolis, Chicago, Vancouver, Winnipeg, Toronto and Montreal. The company's offices have been remodelled and the business is now in charge of Mr. James Ogilvy. Mr. C. J. Sullivan, formerly of McDougall and Cowans, of Winnipeg, is in charge of the wire, quotations being available from New York and Montreal Stock Exchanges, and on grain and provisions from Winnipeg, Chicago, Minneapolis, etc.

MORTALITY BY HABITS REPRESENTATION

An Address Before the Convention of the Actuarial Society of America, at Montreal

By PERCY H. EVANS

The experience here submitted is the result of an attempt to classify insured lives by amount and kind of alcoholic beverages used as indicated by the answers given to the following typical questions in the applications for insurance:—(a) If you use wine, spirits, malt liquors or other alcoholic beverages, state kind used and how much in any one day at the most? (b) How frequently do you use the amount stated? (c) If you use them daily, weekly or monthly, state kind and average for the past two years? (d) Have you used any of them to the extent of intoxication during the past ten years? (f) If a total abstainer how long have you been so?

The material was grouped under four definitions which must be construed broadly as indicated by the sub-heads consisting of rulings made in the course of classification. It is believed that while nearly all users take various forms of alcoholic drinks on occasion there is a tendency to favor some particular kind, brewed, fermented or distilled. It will be noted that Group "B" (Moderate Users) consists as nearly as may be of those whose statements indicated that their consumption did not exceed Anstie's physiological limit of 1½ ounces of absolute alcohol per diem. The classification was as follows:—

A. Total Abstainers, exclusive of a small number where the period of abstinence was short and the cases were classified in accordance with previous habits, for the most part in "B."

B. Moderate Users.—Users of wine only, not exceeding four glasses of light or three of heavy wine daily.

Beer or light ale, not daily or more than three in any one day at most.

Porter or heavy ale, not daily or more than two in any one day at most.

Light wine, not daily or more than four in any one day at most.

Heavy wine, not daily or more than three in any one day at most.

Whiskey, brandy, etc., not daily or more than two in any one day at most.

Daily, one glass, either beer or wine or whiskey.

C. Regular Beer Drinkers.—Persons taking four or more glasses of beer or ale in any one day, or five or more a week, or a daily use of one or more.

Persons also taking wine or whiskey moderately, but not enough for class "D."

No "wine only" cases in this group.

D. Regular Spirit Drinkers.—Whiskey, brandy, gin, etc., daily, or three or more "in any one day at most."

Wine daily, five glasses light wine, four of heavy, or more.

Two glasses either whiskey or wine or beer daily.

Without doubt many criticisms may justly be made of this classification. Any two persons going over the material would inevitably disagree as to a considerable percentage. Groups "C" and "D" contain cases excluded from "G" and were generally more liberal users. The relatively small numbers in "C" and "D" suggest the weight given to the habits statement in selection and the general results indicate that no admittedly heavy drinkers were taken. Notwithstanding the evident difficulties of classification on the plan outlined it is believed that the groups are fairly homogeneous and represent real differences. The experience supports this view in so far as the rates of mortality vary in a consistent manner.

It is commonly assumed that the consumption of alcohol among those who use it at all tends to increase with age. It would perhaps be more accurate to say that the individual rate of consumption is extremely variable. In this particular [illegible] of alcohol differs from other consumption habits and the difference is important. Among those who are free users at the younger ages the individuals who become excessive drinkers find an offset in those who, with the maturity of their intelligence, materially reduce or eliminate their indulgence. On the other hand free users observed in the middle ages possibly include a larger proportion of cases that graduate into the excessive class and a smaller proportion whose habits improve. The outstanding consideration is the instability of this habit in consequence of which a classification based on representations made at the time of application can tell us very little of the influence of a given alcohol consumption on longevity. The general reader must therefore be warned that nothing better than broad inferences concerning the effects of alcohol can be drawn from data based on original applications where the subsequent histories have not been traced and periodical re-classification made on some significant basis.

Experience of Northwestern Mutual

The following experience covers 286,392 policies issued by The Northwestern Mutual Life Insurance Company, 1885 to 1900 inclusive, during which period the policies contained not only a warranty but a so-called "temperance clause" providing that if the insured became habitually intemperate, or so far intemperate as to induce delirium tremens, the company might cancel the policy during the insured's lifetime. From December 1st, 1889, to August 1st, 1900, the restriction was limited to five years. This clause and the knowledge of competing agents as to the company's strictness doubtless explains the relatively large proportion (95 per cent.) classed as abstainers and moderate users.

EXPERIENCE OF THE NORTHWESTERN MUTUAL LIFE INSURANCE CO. 286,392 POLICIES ISSUED 1885–1900. EXPOSED TO 1915. CLASSIFIED BY ANSWERS TO QUESTIONS CONCERNING USE OF ALCOHOLIC BEVERAGES.

INCREASING RESORT TO GOVERNMENT

A casual consideration of our national finances reveals a state of affairs which may well occasion alarm when taken in connection with some of the recent tendencies in this country. While the debt of Canada is now well above $2,000,000,000, and the interest payments on this debt, together with the increasing annual budget of expenditures, are running up into the hundreds of millions yearly, we see the strange spectacle of a people who seem to think that the government should come to the aid of all kinds of projects and provide the funds, in whole or in part, by cash or by guarantees, for the execution of these schemes of development. No matter how beneficial these plans for the expansion and increase of the national wealth may be, if appeal must be made to the government for the requisite funds to carry them out there must be something wrong with the system under which business is managed. The war has demonstrated to us that there is abundance of capital in Canada waiting for the favorable occasion when it may be invested; and, since capital will always be ready to go into enterprises in which the return is satisfactory, it seems unnatural that, instead of calling for private investment in worthy undertakings, the promoters of the latter should be continually thinking of how they can induce the government to furnish funds for the inception of these projects. The provision of capital for those things which properly pertain to private enterprise is a peculiar perversion of the function of a government; and we see no reason why this country should adopt Prussian methods by subjugating individual initiative to state predominance.

To recount the diverse aspects of this issue is to see that government aid is proposed or arranged for such various activities as housing, water power development, railway purchases and extensions, shipbuilding, etc. But these have always been recognized, in those countries which have inherited British characteristics and institutions, as spheres which should be left to private enterprise and in which private capital would be embarked so long as there is sufficient inducement in the way of return. It is this British trait of sturdy individualism which has led to the formation of a nation in which the principles of freedom have attained the ascendancy, and from which men have recently gone forth to lay down their lives in upholding these principles by overthrowing a government, in the supreme power of which the people had confided and acquiesced. And now, after our own men have contributed so nobly to the casting down of this paternalistic government, do we want to establish in this country much the same system by making the government the active initiator and participator in all our affairs, and by failing to recognize the basis upon which a strong people is built up, namely, the fullest exercise of individual judgment, business acumen and responsibility?

The creative genius which makes for the greatest utilization of a country's resources has never yet come from a government, but from those who, having imagination to penetrate and forecast the future, have been given a free hand, untrammelled by governmental connection; and in this country, with its vast possibilities, what is essential to its advancement in wealth is the incentive which will induce private capital to take up the work of production in all its branches, new and old, and the wisdom which will confine the government to its proper function of legislative encouragement and regulation.

BRITISH TRADE CONNECTIONS

The appointment of a third British Trade Commissioner in Canada, who, as recently stated in *The Monetary Times*, will shortly take up his duties at Winnipeg, places a staff of three of these officers in the Dominion, one at Montreal, one at Toronto and one at Winnipeg. A fourth may be appointed during the current year at Vancouver. British manufacturers will thus have a well-distributed and effective trade commissioner service at their disposal, and there are already signs of strengthening trade connections between the two countries. While it is recognized by these officers, by their department in London, and by British manufacturers, that Canada will make considerable progress during the next few years in industry, it is felt that Great Britain will be able to tain a more substantial share of the import business of the Dominion.

The British government and the various Dominions' governments, for example, have made up their minds not to allow German interests again to entrench themselves in the trade and natural resources of the British Empire. An advisory committee of the Imperial Board of Trade, in its recent investigation found that German producing houses had only adopted means to avoid the payment of income tax in the United Kingdom. An agency or branch was established there, frequently in the form of a limited company with a small capital, to which goods manufactured in Germany were forwarded for sale at prices which were arranged so as not to allow any considerable margin for profit after the payment of the expenses of the agency or branch, the profit being made by the parent house out of the prices at which they were charged to the branch. This practice, no doubt, is not confined to German houses, but the result has been to assist the competition of German manufactures. These agencies or branches have been usually carried on under British names, and frequently by the employment of British salaried agents.

The Trade Commissioner service of the British government is of recent origin. At the Imperial Conference of 1907, Sir Joseph Ward, Prime Minister of New Zealand, called attention to the need for official commercial representation of the United Kingdom in the self-governing Dominions. Mr. Lloyd George, then president of the Board of Trade, was able to inform the conference a few days afterwards that arrangements for the appointment of such officers were being made. The measures which were subsequently taken resulted in the institution, in 1908, of the present service of four Trade Commissioners, one being appointed for Canada and Newfoundland, and one each for Australia, New Zealand and South Africa. Each Trade Commissioner has the assistance of a number of Imperial trade correspondents, situated in various districts of the Dominions concerned. In India and the Crown Colonies and Protectorates the Board of Trade have had the benefit of the assistance of trade correspondents, mainly officials of the local government, who have acted in an honorary capacity.

The work of the Trade Commissioners was under investigation by the Dominions Royal Commission. In their report, issued in February, 1917, they made strong recommendations in favor of an increase in the number of Trade Commissioners in the Dominions and of an extension of the Trade Commissioner service to other parts of the Empire. The Board of Trade had simultaneously been engaged on a scheme for the strengthening of the service, and it was decided to increase the number of Trade Commissioners from four to fifteen or sixteen. Under the new scheme, so far as the allocation of posts has been decided at present, it is proposed, as noted above, that four of the commissioners shall be stationed at important centres in Canada, the senior of them dealing also with trade in Newfoundland; two Trade Commissioners will be stationed in Australia, one in New Zealand, two in South Africa, two in India, one in the West Indies, one in the Straits Settlements, and one will be unattached to any definite station overseas, but will be available in the department for any special service.

As a final comment on the value of the Trade Commissioner service, attention may be called to the following resolution, passed unanimously on the motion of General Smuts at the Imperial War Conference in April last:—

"The Imperial War Conference welcomes the proposed increase of the Board of Trade service of Trade Commissioners and its extension throughout the British Empire in accordance with the recommendations of the Dominions Royal Commission, and recommends that the governments concerned should co-operate so as to make that service as useful as possible to the Empire as a whole, especially for the promotion of inter-Imperial trade."

CORPORATE ADMINISTRATION OF ESTATES

This is the season of the year when annual statements of banks, insurance companies, loan and trust companies are wont to find their way to *The Monetary Times'* office for purposes of review.

As the various trust company reports come to our attention it is interesting to note how generally the financial and commercial public is coming to recognize the real service a well-managed and reputable trust company is in a position to render. Especially is this true in the realm of the administration of estates. It surely does look as though the day of the individual trustee was nearing an end; and yet, there is so much to be said in favor of the corporate as against the individual trustee that this development in the branch of trust company work is not to be wondered at.

Mere confidence in the integrity of a friend does not necessarily qualify him to serve as executor. To do that efficiently he needs actual trust experience.

It is not strange that successful men who have labored a lifetime to acquire an estate should best determine by whom it shall be managed after they are gone.

The modern trust company, with its sound business methods and accounting, is fast replacing the oftentimes incompetent individual trustee, who, in many cases, must learn by experimenting with his first trust. Longevity, efficiency and dependability are on the side of the trust company; it would almost seem an easy matter to convince the average man as to the desirability of trust company services. Strong precedents, however, are not so easily broken. It is not an easy task to change the habits of a generation disposed to entrust such cares to individuals, usually close relatives or friends.

The well-organized trust company has a corps of trained officials specialized in their particular field who are ever ready to give that same sound judgment to the management of an estate which one himself employs now, but which must go when he goes. That is something which cannot be left to one's heirs.

TRUSTS AND GUARANTEE COMPANY, LIMITED

From the report of the Trusts and Guarantee Company, Limited, as presented to the annual meeting held January 31st, it was shown that after deducting all expenses, including war tax and patriotic subscriptions, the net earnings for the year 1918 were $107,543, or practically the same as in 1917.

The growth of the estate business of the company is especially gratifying, the increase in that department during the year amounting to three and one half millions.

The total amount of such business now on the company's books for administration exceeds twenty millions of dollars, and goes to show that the public is appreciative of the services being rendered by the company in this particular branch.

The total assets of the company now stand at $20,473,199, as against $16,782,268 a year ago.

The usual dividend of 6 per cent. per annum was declared and paid.

The directors have every reason to regard last year's operations as satisfactory, especially when one takes into account the disturbed economic condition that existed during the last year of the war. Now that peace is in sight and a return to normal conditions imminent this institution, under the direction of Mr. E. B. Stockdale, will continue to play a growingly important part in the financial and commercial life of this and other communities.

The Royal Bank of Canada has opened branches at Cardigan, P.E.I., and Eastern Harbord, N.S.

ADDRESS
THE MANAGER, BOND DEPARTMENT,
TORONTO

TORONTO RAILWAY COMPANY

The annual meeting of this company was held last Wednesday, when the report for the year 1918 was submitted. This will be found on another page of this issue.

An interesting feature of the report is that, although gross income was larger by $234,543, the net profits were reduced $459,830, being $2,016,651 in 1918, as against $2,476,481 in 1917. This condition of affairs has unquestionably been brought about as the result of having to pay higher wages, higher prices for all kinds of railway equipment, while, on the other hand, the company has been unable to derive greater revenue from fares collected. In many cities in both Canada and the United States electric railways have been granted by public utilities commissions permission to collect higher fares, thus enabling them to meet demands for higher wages and still be able to give a reasonable return upon the money invested.

The balance carried forward at the end of 1918 was $21,[illegible], as compared with $134,816 a year ago. When, in addition to this, it is remembered that in 1917 a dividend of 8 per cent. was paid and only 4 per cent. in 1918, it will show how such a utility is affected, confronted as it is with meeting the difficulties of advancing costs of operation, while earnings and income are practically stationary. Sooner or later, bodies which have control of rates of utility enterprises, must recognize these facts and permit such rates as will assure sufficient return for bona fide investments.

Passengers carried during 1918 were 166,510,326, as against 158,087,984 in 1917.

HOME INVESTMENT AND SAVINGS ASSOCIATION

While the net profits for the year 1918 of the Home Investment and Savings Association whose report appears in this issue were not quite as large as in 1917, being $106,523 as against $113,809 in 1917, that is an experience which perhaps has not been uncommon with other companies doing a similar business. Since 1914 loan and savings companies have had to sail through treacherous seas. With peace in sight and the prospect of settlers bright, and the consequent return of the demand for money, this well-established company which is now in its 27th year, can, like other institutions of a similar character, look to the future with confidence.

In spite of these drawbacks, Mr. Bull, the president; Mr. Windatt, the managing director; directors, as well as shareholders, can only look back with satisfaction at the operations of 1918.

Among the liabilities to the public, debentures and accrued interest amount to $217,840.42, which is somewhat less than at December 31st, 1917.

Deposits at call stand at $289,036. Deposits for fixed terms are $29,502.

Total assets of the company are $2,172,434. Dividends were paid at the rate of 8 per cent. per annum, which accounted for $79,183, while the balance carried forward was $64,980, as against $42,200 at the end of 1917.

It is interesting to note from the report of the inspection committee that the number of loans in arrears has decreased during the year just closed, and that where arrears still exist they are in much better condition than they were a year ago.

The retiring directors, Messrs. M. Bull, P. C. McIntyre, W. A. Black, F. W. Drewry, F. H. Schofield, H. Byrnes, W. H. Cross and W. A. Windatt, were re-elected.

At a subsequent meeting of the new board Mr. M. Bull was re-elected president, Mr. P. C. McIntyre vice-president, while Mr W. A. Windatt, who has so ably and carefully guided the affairs of the company as managing director for a long time, was re-elected to that office.

Lachlan McNeill, commissioner of the Manitoba Farm Loan Association, states that loans exceeding $2,000,000 had been made from the time of his appointment in April, 1917, to November [illegible], 1918.

TORONTO GENERAL TRUSTS CORPORATION

The thirty-seventh annual report of the Toronto General Trusts Corporation, which appears on another page, and which was submitted at the annual meeting held February 5th, once more reveals a most satisfactory year's operations for this "old and tried" trust company. Established thirty-seven years ago, this institution has, from year to year, continued to make satisfactory progress, and this latest report reflects great credit upon the general manager, Mr. A. D. Langmuir, together with those careful, efficient and progressive lieutenants he has gathered around him. In fact, everyone connected with the organization is to be congratulated upon the character of the 1918 report.

It shows that the volume of business as shown by the assets and liabilities in the hands of the corporation has reached the magnificent sum of $90,832,629, which is an increase over 1917 of $7,545,847.

The net profits for the year just closed were $332,161, or $31,275 more than in 1917. To this amount is added a balance of $101,443 brought forward from January 1st, 1918, making a total of $423,412. After taking from this amount sufficient to meet dividend and bonus payments, contributions to various patriotic funds, federal income tax, transfer to reserve fund (which fund now amounts to $2,000,000), there was a balance carried forward to credit of profit and loss of $152,812, as against $101,443 a year ago.

In addressing the meeting, Mr. A. D. Langmuir, the general manager, gave a very clear and careful analysis of the various branches of the corporation's business. Speaking particularly of the part the corporation has come to play in the administration of estates, he said: "The most gratifying result of the year's business is the increased volume of new estate work which has been entrusted to the corporation for care and management, amounting to the sum of $12,737,961.97, the largest amount received in any single year in the history of the corporation, and being an increase over that of the preceding year of $2,647,314. Satisfactory as this evidence is, there are other indications of equal importance which go to show in a large measure the trend of the public mind in the matter of corporate administration of estates expressed in the large number of enquiries both by correspondence and personal interviews seeking information, as well as in the increasing number of wills which have been filed with the corporation for safe keeping."

The report, which appears on another page, will well repay careful study on the part of financial and commercial people generally. It furnishes convincing evidence of the strength of the position of this old-established institution.

GREAT-WEST LIFE ASSURANCE COMPANY

The Great-West Life Assurance Company, whose annual statement appears on another page of this issue, has again experienced a most successful year's business. This representative Canadian life insurance company now has business in force amounting to $170,863,673, an increase of $18,220,508 over that of 1917.

To have issued $30,659,537 worth of new business during such a year as 1918, with all the distracting influences growing out of the war, is an accomplishment that speaks volumes for the company, and demonstrates the position it occupies in the estimation of the insuring public. Furthermore such results as these are not possible without perfect team play as between the general manager, Mr. C. C. Ferguson, and the able staff he has gathered about him.

The reserve of the company now stands at $4,142,507, which is over 15 per cent. of the assets. The assets now stand at $27,432,824, and are $3,047,158 more than at December 31st, 1917.

Mr. C. C. Ferguson and staff have every reason to enter the year 1919 with full confidence. During the past year the company's position was materially strengthened.

PROVINCE OF QUEBEC FINANCES

Surplus of $2,134,558 Largest on Record—Watchword of Government Had Been Economy

Hon. Walter G. Mitchell, provincial treasurer of Quebec, in making his budget speech in the legislative assembly a few days ago, announced a surplus of $2,134,558, which is the largest surplus ever recorded in the history of the province.

He declared that the watchword of the government had been "Economy," and that, while the government had been recommending such a policy of economy to municipalities, corporations and individuals throughout the province, it had been doing what it had asked others to do, and administered the public funds with care and foresight.

The treasurer said that the province had forged ahead, and he was enabled, at the end of each year, to show a substantial surplus of ordinary revenue over ordinary and extraordinary expenditure. This year, however, it had exceeded all other records in its history.

The ordinary revenue for this period had exceeded the estimates by $4,246,226 and the estimate of the ordinary and extraordinary expenditure was exceeded by $2,174,620. This large excess of revenue over the estimates was due to the amounts collected under the Succession Duties Act exceeding the estimate by $3,336,547. The excess in receipts thereby had enabled the government to pay large sums for patriotic and charitable purposes out of consolidated revenue, and also to further increase the grants to the important services of good roads, agriculture, education and colonization.

The Fiscal Year

The treasurer then turned to the question of the finances, showing that the estimates for the fiscal year ending 30th June, 1918, had anticipated an ordinary revenue of $9,560,164 and an ordinary and extraordinary expenditure of $9,497,212, which would have left an estimated surplus of $62,951, whereas the actual results of the year's operations were greatly in excess of these estimates, the ordinary revenue for the twelve months closed on the 30th June last amounting to $13,806,390 and the ordinary expenditure to $11,423,497, which left a surplus of ordinary revenue over ordinary expenditure of $2,382,893. The extraordinary expenditure for the year, however, paid out of ordinary revenue was $248,334, which gives an actual surplus of ordinary revenues over both ordinary and extraordinary expenditure of $2,134,558, from which was paid the sum of $625,000, being the balance of the $1,000,000 subscribed to the Canadian patriotic fund, leaving, therefore, a surplus of $1,509,558.

Cash Operations

With respect to these, the treasurer explained that, on the 1st July, 1917, there were in various banks the sum of $938,764, but from this should be deducted the outstanding warrants at the same date amounting to $555,455, leaving a balance of $383,308. On the other hand, the total receipts from all sources from 1st July, 1917, to 30th June, 1918, were $15,300,846 and the total payments $15,436,187, showing an excess of payments of $135,340 and leaving a balance of $247,958. Thus, on the 30th June, 1918, the province had in the various banks on deposit $999,484, from which had to be paid outstanding warrants at same date amounting to $751,516.

He then gave a statement of the direct liabilities and available assets of the province at 30th June, 1918. He showed that the liabilities formed a total of $42,891,544, while the assets aggregated $10,749,026, leaving the excess of liabilities over assets at 30th June, 1918, at $32,142,517.

He stated that the net balance of the province on the 30th June, 1918, showed an increase over the net balance of the funded debt at 30th June, 1917, of $197,716. This increase was accounted for by the issue of $513,000 debentures under the act 3 George V., chapter 6, and $4,100 under 6 George V., chapter 2, less $152,326 of bonds redeemed of the loan of 1880, and $167,057 invested on account of sinking funds.

On 30th June, 1918, the unfunded debt, consisting of trust deposits, outstanding warrants, etc., amounted to $2,962,574, but against this the government had at the same date in the form of cash, claims against individuals and corporations, for loans and advances, Quebec's share ($1,169,009) of the common school fund, etc., a total of $8,835,711, leaving a surplus of assets over the unfunded debt of $5,873,136.

The Current Year

Dealing with the question of the current year, the treasurer stated that the receipts for the six months ended on 31st December, 1918, were very satisfactory, and the estimated receipts would probably be exceeded at the end of the fiscal year.

There would also be an increase over the estimates of ordinary and extraordinary expenditure for the current fiscal year by the amount of special warrants issued since 1st July, namely, $592,912, as shown in the statement laid on the table of the House, and also by the supplementary estimates to be submitted to the House for amounts required for the different services to complete the necessary expenditure for the current year. It was expected, however, that this increase in expenditure would be more than covered by the increase in the revenue, judging by the receipts up to the 31st December last.

For the next fiscal year (1919-1920) he estimated the total ordinary revenue at $10,449,393 and the ordinary expenditure at $10,399,345, which would leave an estimated surplus of $50,047.

NORTH AMERICAN LIFE ASSURANCE COMPANY

The annual statement of the North American Life Assurance Company, as submitted at the annual meeting on January 30th, reveals once more the strength of this excellent Canadian institution. The assets, as at December 31st, 1918, total eighteen millions of dollars, an increase of $917,139 over 1917. The real force of this statement is not alone in the fact that the figure, as quoted above, is a substantial one; the accompanying analysis showing the percentage of each security of the total, and indicative of the distribution of these assets for a period of five years past, clearly demonstrates the strong position of the company, and its perfect right to its claim to still be regarded as "Solid as the continent."

	1914.	1915.	1916.	1917.	1918.
Mortgages on real estate	31.58	29.38	26.94	25.19	23.98
Real estate and building fund	1.05	1.05	1.03	.91	.93
Bonds and debentures	33.59	36.22	41.87	43.80	46.91

Loans on policies	15.26	15.25	14.31	13.34	12.77
Fire premiums paid re mortgages	.01	.01	.02	.02	.02
Cash in banks—cash at head office	1.13	2.27	.90	2.14	1.28
Suspense account	....	....	....	....	.03
OTHER ASSETS—					
Outstanding and deferred premiums	2.56	2.32	2.27	2.22	2.19
Interest due and accrued; rent due and accrued	1.62	1.73	1.73	1.67	1.62
Special deposit	....	....	....	.04	.04

The year just closed was the largest in the company's history. The amount of insurance now in force is almost $71,000,000, of which $13,552,161 was revived and issued during the year 1918. The net surplus now stands at $2,751,990. During the past ten years no less a sum than $2,043,035 has been paid to policyholders as dividends or surplus. Under the careful, progressive and energetic direction of the president, Mr. L. Goldman, and his efficient associates, the company has earned an enviable position in the realm of life insurance on this continent.

BANK OF HAMILTON ISSUE

The Bank of Hamilton will place a million dollars of new capital. It offers it first to the shareholders, on a basis which not only insures an attractive annual yield, but gives shareholders possession of more stock in one of the institutions, which, as time goes on, will likely place additional opportunities of the same kind before its shareholders. One share of new stock at $150 is allotted for each three shares held.

FINANCIAL OUTLOOK UNCERTAIN

"It would take a bold man to predict what will be the trend of the market as a whole during the coming six months," says the January Review issued by McCuaig Brothers and Company, of Montreal, "but it is evident that the present accumulation of high-grade securities is likely to continue, as in view of the uncertainty of the present situation investors are disposed to favor the better secured issues. This movement is likely to result in advancing prices for such issues until the point is reached where they cease to be attractive and then attention is likely to be turned towards the more speculative stocks."

LA BANQUE PROVINCIALE TO INCREASE DIVIDEND

The La Banque Provinciale has decided to increase its dividend from 7 to 8 per cent. and raise its capital from $1,000,000 to $2,000,000. Its reserve of $800,000, together with capital of $1,000,000, would give its shares a book value of $180. Allowing for depreciation and contingencies, the management places an approximate value on the shares of $150. Considering that almost all the shareholders are founders of the bank, the board considers itself justified in recognizing this by offering them an indirect bonus by the issuance of $1,000,000 new stock at $110 per share, or the equivalent of an offer of a profit to shareholders of $40 a share, taking the basic value at $150. The bank's assets are $24,7[illegible]6,963, and its deposits $21,599,232.

MONTREAL BOARD OF TRADE ANNUAL

At the adjourned meeting of the Montreal Board of Trade on January 29th, it was announced that the following had been elected: President, as noted in *The Monetary Times* of January 24th, John Baillie, nominated by the retiring president, W. A. Black; first vice-president, nominated by H. B. Walker; second vice-president, James Cleghorn, and treasurer, W. A. Coates, all of whom were elected by acclamation.

There were fourteen candidates for the twelve seats at the council table, and of these the following were elected: E. H. Hodgson, leading the list; Wm. Rutherford, second; Wm. M. Birks, third, and the others, Messrs. Graham Drinkwater, H. B. Henwood, Albert E. Holt, W. S. Leslie, Arthur Lyman, Clement H. McFarlane, Alphonse Racine, Walter B. Ramsay and Lorne C. Webster.

The board of arbitration was elected by acclamation, including Messrs. G. F. Benson, John R. Binning, W. A. Black, James Carruthers, George J. Crowdy, C. B. Esdaile, Zeph. Hebert, Arthur J. Hodgson, Jos. Quintal, R. W. Reford, Farquhar Robertson and H. B. Walker.

In regard to the membership, Mr. Black, retiring president, said that now the war is ended, it is an opportune time to make a strong effort to increase the membership to at least 2,000, and it was his intention to bring this matter before the council at the earliest opportunity. He said that all large corporations, whether mercantile, manufacturing or shipping, should see to it that the heads of all their departments are members of the Board of Trade, and if this were done the membership could be largely augmented and the activity and power be much more extended.

EDMONTON BOARD OF TRADE ANNUAL

At the annual meeting of the Edmonton Board of Trade on January 28th, Mr. G. S. Hensley was elected president for the coming year. Mr. M. R. Jennings, retiring president, briefly reviewed the outstanding features of the past year's work.

A resolution on land settlement favoring the discontinuance of the free homestead system and the adoption of a homestead purchase policy in its stead, was passed by the board. Included in this scheme was a recommendation for specialized live stock production on small leaseholds of remaining dominion lands more than thirty miles from a line of railway.

James Ramsey, M.L.A., was named by the chairman as chairman of a new reconstruction committee of the board, and four other members will be appointed to it.

The following officers were elected for the coming year: President, G. S. Hensley; first vice-president, A. M. Frith; second vice-president, W. J. Thompson; third vice-president, M. J. Hutchinson.

HURON AND ERIE STOCK NOT DOWN TO 196

A report appeared in the daily press early this week to the effect that a recent sale of Huron and Erie stock at 196 represented a decrease in the price of this stock attributing the cause for this to the proposed conversion of a portion of that company's reserve fund into capital stock. The report as circulated is entirely incorrect, as the sale referred to was not of fully-paid, but of 20 per cent. paid stock. For many years now there has been a spread of about ten points between the market price of this company's fully-paid stock, and its 20 per cent. paid stock. For the last year, the 20 per cent. paid stock of this institution has been selling on the market from 190 to 192. That being the case, the sale of this stock at 196 shows an increase of from four to six points over the former figures, instead of a drop of eight points as was indicated in the newspapers. Fully paid stock of the company has recently been sold at 204.

MUTUAL LIFE ASSURANCE COMPANY

As usual, the 1918 annual statement of the Mutual Life Assurance Company of Canada reveals its very strong position. Like all other insurance companies, the year 1918 for the Mutual was characterized by very unusual claims on account of war and influenza, but from it all the company emerged victoriously and finds itself at the beginning of 1919 in a stronger position than ever.

Notable among the accomplishments for the year is the fact that the amount of business written was $21,541,069, as against $20,124,563 in 1917. Notwithstanding the unusual events of the year calling for many special expenditures, the expense ratio of the company was reduced from 17.65 to 16.84 per cent. of the total income.

The following statement showing progress of the company in ten-year periods since 1878 are illuminative and indicate a safe, continuous, careful management:—

Year.	Income.	Assets.	Paid to policyholders.	Business in force.
1878	$ 59,278	$ 142,619	$ 12,451	$ 1,885,311
1888	393,075	1,297,587	122,894	12,041,914
1898	923,941	4,126,132	360,398	23,703,979
1908	2,546,141	12,983,674	827,749	54,693,882
1918	7,021,103	34,755,737	3,291,418	137,640,614

From this statement it may be seen that the company has made satisfactory progress in all departments and in a marked degree improved its already strong position.

The general manager, Mr. Chas. Ruby, his associates in the head and branch offices, as well as the field men of the Mutual Life, have good reason to be proud of the 1918 record.

SUICIDE AND LIFE INSURANCE

Evidence in Judgment Against Dominion Trust Company—Judgment Releases Companies from Claims

By M. L. Hayward

A clause providing that the assurance company shall not be liable if the assured commits suicide within a specified period is a common one in policies of life assurance, and if a claim is made under such a policy the company must resist payment on the ground of suicide, if it wishes to rely on that defence.

When such a case comes to trial the court must decide whether the evidence is sufficient to prove suicide or not, and in this connection the case of Dominion Trust Company vs. New York Life Insurance Company decided by the Privy Council and just reported is of vital importance, as insurance totalling $170,000 was involved and the highest court in the Empire lays down some important principles governing cases where suicide is sought to be proved.

Uncertain if Suicide Committed

In this case W. R. Arnold, of Vancouver, B.C., died from a gunshot wound, either accidental or self inflicted, on October 12th, 1914, and less than a fortnight before he had taken out $100,000 insurance in the New York Life Insurance Company. He also carried $50,000 in the Mutual Life of Canada placed in November, 1912, and $10,000 in the Sovereign Life taken out on October 27th, 1912.

All these policies contained the usual clause exempting the company from liability if the assured committed suicide within two years from the date of the policy, and the three companies named resisted payment on the ground that Arnold had, in fact, died by his own hand on the 12th day of October, 1914.

Belief Justified by Facts

First of all, the insurance companies attempted to prove and did prove a strong motive for suicide on Arnold's part. Lord Dunedin, in delivering the judgment of the Privy Council, refers to the evidence of motive in the following words:—

"Arnold was in a quite hopeless financial position. Enjoying a salary of $14,000 a year, he owed at the time of his death about $1,000,000, which he had not the faintest chance of repaying. But, further, it was not a case of simple indebtedness. He had been guilty of a long course of embezzlement in his position as managing director of the Dominion Trust Company. As he had confessed about a fortnight before to Hodges, the government inspector, who had been sent to investigate the affairs of the company, 'He had committed crimes for which he was liable to be sent to the penitentiary.' He was on the brink of exposure and disgrace as well as of irretrievable financial ruin. He had made an appointment on the day on which his death occurred to meet Hodges, in order to give explanations and exhibit securities. He knew that the result of such examination would be to confirm what Hodges already knew; and he knew that the presentation of Hodges' report to the government authorities meant the end so far as he was concerned. The counsel for the trust company was very anxious to demonstrate that there was no particular disclosure which on that particular day he had to dread—that Hodges knew the worst already. That, however, is not the point. The point is that the end was approaching, and was ever nearer as Hodges' investigation proceeded and the time for sending in his report drew nigh. Further, he was in absolute want of ready money. He owed small sums right and left, and he had no more than a few dollars in his bank account. In the whole circumstances, if ever there can be said to be motive for self-destruction, such motive was present in this case."

Although the above quotation is a strong one, Lord Dunedin goes on to point out that "motive, however, can never be of itself sufficient. The utmost that it can do is destroy or attenuate the inference drawn from the experience of mankind that self-destruction being contrary to human instinct is unlikely to have occurred. The proof of suicide must be sought in the circumstances of the death."

The evidence regarding the circumstances of Arnold's death showed that he had been shooting at a small country ranch and was killed in a garage shortly afterwards, after previously dismissing chauffeur and gardener. The counsel for the trust company held that death was accidental as he did not know that the gun was loaded, whereas the insurance companies maintain that he did know that it was loaded, and that moreover the evidence showed that death was intentional.

The decision of the Privy Council was that the defence of self-destruction was made out, and that the insurance companies were not liable on account of the suicide clause in the policies.

MONTREAL STOCK EXCHANGE MAY ENLARGE

A tentative proposal has been put forward by one of the members of the Montreal Stock Exchange to the effect that the membership should be extensively increased, and a vigorous policy for the enlargement of its operations should be pursued.

One suggestion is that the membership should be increased from the present 66 to 132 by the issue of 66 additional seats, which would go to the present members as bonus seats. Each member would, therefore, instead of possessing a seat worth about $25,000 as at present, possess two of a value of probably $12,500 each. Another suggestion is that the 66 additional seats should be sold at $12,500 each, every present member to be the owner of the value or equity in the new issue, while the proceeds of sale would be provided pro rata. The new membership would be sold by the exchange authorities until disposed of by same. It is also suggested that rules be devised to prevent accumulation of the new membership in a few hands. The plan provides that a member with head office in some other city, such as Quebec or Sherbrooke, could have a resident partner and office in Montreal to transact the firm's business on the exchange.

ELECTRIC STATIONS CENSUS

A census of the central electric power stations in Canada has just been completed by the Dominion Bureau of Statistics and the Department of the Interior working in co-operation and with the assistance of the Ontario Hydro-Electric Commission, the Quebec Streams Commission and other provincial departments concerned. The statistics include only stations developing electrical power for sale.

The capital invested in power stations totals $356,004,168, of which 79.5 per cent. is invested in commercial stations and 20.5 per cent. in municipal or publicly owned stations. Total employees number 8,847, receiving wages and salaries totalling $7,777,715 per annum.

One of the most important facts disclosed as a result of the statistics is the outstanding position which water power takes in the central station field. Out of a total installed primary capacity of 1,844,571 h.p., 1,652,661, or 89.6 per cent., practically 90 per cent., is derived from water. This figure is indicative of the extent and availability of the water-power resources of the Dominion, and of the remarkable degree to which their adaptability for central electric station work has been appreciated in principle and realized in practice. The vast water power resources of the Dominion, the ready adaptability of the hydro-power to the production of electrical energy and the increasing extent and scope of economical electrical transmission form an industrial asset which probably more than any other will ensure a full measure of future prosperity.

Announcement has been made by President D. B. Hanna, of the Canadian National Railways, of the placing of orders for 2,830 cars. The business that has been placed will furnish activity for both the steel and car companies of Canada for some time to come, and will aid greatly in tiding over the period of readjustment of the steel industry from a war to a peace basis.

JANUARY FIRE LOSSES

January Loss is Third Highest on Record—Many Large Fires Reported

The Monetary Times' estimate of Canada's fire loss during January, 1919, is $3,915,290, compared with $1,733,917 for December, 1918, and $2,688,556 for January, 1918. The following is the estimate of January losses:—

Fires exceeding $10,000	$3,357,500
Small fires reported	47,100
Estimate of unreported fires	510,690
Total	$3,915,290

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month	1916	1917	1918	1919
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February	3,275,600	2,009,953	2,243,762	--------
March	1,406,501	2,050,650	1,682,286	--------
April	1,460,437	1,317,714	3,240,187	--------
May	1,850,205	1,163,110	3,570,014	--------
June	494,557	1,184,627	3,080,982	--------
July	3,039,634	1,101,734	3,369,684	--------
August	1,057,109	1,230,183	3,110,445	--------
September	981,703	1,301,700	917,286	--------
October	1,077,815	704,605	5,119,145	--------
November	923,235	959,049	1,059,580	--------
December	3,271,496	5,144,100	1,733,917	--------
Totals	$20,487,509	$20,086,085	$31,815,844	$ 3,915,290

$10,000 and Over

Fires in January at which the loss was $10,000 and over were:—

Fort William, Ont., January 2nd, grain elevator of Parrish and Heimbecker, $250,000.

Galt, Ont., January 1st, storage plant of Glennie and Moore, $40,000.

Halifax, N.S., January 1st, Bissett's fish warehouse, $60,000.

Halifax, N.S., January 7th, the Roy Building, $250,000.

Shawinigan Falls, Que., January 3rd, plant of the Belgo-Canadian Pulp and Paper Company, $27,000.

Winnipeg, Man., January 5th, St. James Street Methodist Church, $20,000.

Brock, Sask., January 9th, business section of the town, $100,000.

Edmonton, Alta., January 7th, the Veteran picture theatre, $10,000.

Montreal, Que., January 11th, workshops of the Cadillac Motors, Limited, and adjoining buildings, $500,000.

Montreal, Que., January 12th, plant of Jennings and Company, a large number of motor cars, and adjoining buildings, $1,000,000.

St. John, N.B., January 12th, the Gem Theatre, $15,000.

Toronto, Ont., January 14th, home of A. E. Ames, $15,000.

Chicoutimi, Que., January 16th, the Roman Catholic Cathedral, $300,000.

Roberval, Que., January 21st, convent of the Ursuline Sisters, $100,000.

Toronto, Ont., January 18th, residence of Guy Bilkey, $10,000.

New Aberdeen, N.S., January 18th, St. John's church and school building, $40,000.

L'Assomption, Que., January 20th, the College L'Assomption, $10,000.

Woodstock, Ont., January 24th, plant of B. Blair & Company, $30,000.

Vancouver, B.C., January 24th, building of T. A. Walsh & Company, $250,000.

Putnam, Ont., January 18th, the Clifford store and dwelling, $10,000.

Little Current, Ont., January 15th, business building, $10,000.

Toronto, Ont., January 7th, garage of the Canadian Northern Railway, $22,500.

Trenton, Ont., January 29th, plant of the British Chemical Company, $175,000.

Sault Ste. Marie, Ont., January 30th, Wade's garage, $75,000.

Winnipeg, Man., January 27th, offices of the New York Life Insurance Company, $40,000.

Destroyed or Damaged

Among the structures damaged or destroyed last month were:—

Business blocks, 2; drying kiln, 1; theatres, 3; plants, 8; residences, 12; business buildings, 6; grain elevator, 1; warehouse, 1; barber shop, 1; stores, 3; hospital, 1; garages, 4; churches, 2; Roman Catholic cathedral, 1; convent, 1; street car, 1; schools, 2; college, 1; barn, 1; business office, 1. There were 164 motor cars and 8 motor trucks destroyed during January as result of the destruction of Jennings' automobile plant in Montreal and of four other garages.

Among the causes reported last month were:—

Overheated stovepipe, 1; overheated bearings, 1; defective wiring, 3; defective stovepipe, 1; short circuit, 1; incendiarism, 1.

Decrease in Fatalities

The following is a list of fires at which fatalities occurred last month:—

Grouard, Alta., January 8th—Trapped in burning house	1
Hawkesbury, Ont., January 13th—Trapped in burning house	4
Winnipeg, Man., January 16th—Explosion of acetylene	1
Milestone, Sask., January 21st—Trapped in burning house	3
Winnipeg, Man., January 24th—Trapped in burning house	3
Port Arthur, Ont., January 24th—Playing with matches	1
Total	13

The following table, compiled by the Monetary Times, shows deaths caused by fire during the past seven years and this year to date:—

Month.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.

THE SUCCESS OF IRRIGATION

Dry Year Proves the Great Value of Irrigation in Western Canada

(Staff Correspondence)

In an interview with the representative of the "Monetary Times," Mr. Robt. J. C. Stead, of the Publicity Branch of the Department of Natural Resources of the C.P.R., asked as to the success of irrigation farming in Alberta this year, said:—

"With each succeeding year, as this province becomes more and more settled, it is increasingly obvious that in the irrigated areas in the southern part, Alberta has one of the strongest pillars of its future prosperity. This year their value has been particularly emphasized because less rainfall than is usually expected during the growing season has fallen, with the result that crops on non-irrigable lands have been more or less seriously impaired. But where irrigation has been intelligently employed a different story can be told. On these lands farmers have thrashed crops of wheat that have averaged from thirty to forty bushels and more to the acre, of oats of upwards of eighty bushels, and of flax from fifteen to twenty bushels. Many of the grain crops have not yet been thrashed, and a final estimate is not possible now, but it can be said with certainty that the wealth of farmers in southern Alberta has been increased by hundreds of thousands of dollars this year by the use of irrigation.

"A drive through the country tributary to Brooks, Alberta, would convince the most pronounced doubter of the value of artificial application of water to this land. Brooks is a small town on the main line of the Canadian Pacific Railway, lying between Medicine Hat and Calgary, and one hundred and three miles east of the latter city. That the soil in this district is exceedingly fertile has been proved in past years on dry land. In years when the rainfall was above the average abundant crops were harvested, as was the case in 1915, but when the rainfall was below the average the crop yields were correspondingly reduced. With the water supply at the control of the individual farmers, to use when it is most likely to be beneficial to the growth of crops, its value is not difficult to imagine.

Still Plenty of Vacant Land

"With the exception of the Duke of Sutherland's farm, on which, by the way, three thousand acres of irrigable land were sown to wheat this year—probably the largest single area of wheat ever put under irrigation—most of the irrigated land that is at present being cultivated in the district is in the hands of small farmers, the majority of whom have settled there during the last two years, and north of Brooks, and adjoining the little town of Duchess, there is a compact but ever growing colony of enterprising settlers whose grain crops have brought them each returns of from $5,000 to $10,000 this season. From the edge of this country one has a view of the actual and potential wealth of the country. On the one side, as far as the eye can see, are miles and miles of arable prairie land, untouched by the plow, on which herds of antelopes still roam; on the other, similar land cultivated, and with the aid of water creating wealth for its holder and bringing prosperity to the province.

"Not only grain crops have been grown. Coming from various parts of the republic to the south—from Philadelphia, from Washington, Nebraska, Oregon, and many other states—settlers have attempted, and have grown with surprising success, most of the crops they had been accustomed to grow in their old home gardens, such as watermelons, cantaloupes, pumpkins, squash, peppers, in addition to the many useful roots and vegetables—potatoes, carrots, turnips, cabbage, cauliflower, etc., for which Western Canada has long been justly famed.

Mixed Farming on Increase

"Because of the urgent need for wheat, and also because most of the settlers coming to Western Canada have but little capital, and wheat brings the quickest returns, most of the land is first sown to this crop. But wheat is by no means the only, nor perhaps the most profitable crop that can be grown on the irrigable lands of southern Alberta. Alfalfa is very successful, and on the irrigable lands near Lethbridge more of this valuable fodder is grown than anywhere else in Canada. Two cuttings a year are generally obtained, which yield an average of three to four tons to the acre for the season. Farmers have been obtaining from $25 to $30 a ton for their alfalfa hay in the stack, and as this crop does not require seeding every year, and needs much less labor at harvesting than grain, besides leaving the land in a better condition afterwards than before it was sown, it is easy to see in which direction the efforts of farmers with irrigable land will be diverted when the call for wheat grows less insistent. Various other fodders, such as clovers, vetches and tame grasses, grow in abundance, and millions of live stock can be supported. Peas have proved a great success, giving yields that are almost unbelievable to growers in other districts, while during the year an experiment of growing tomatoes on a commercial scale in the open resulted in a return of more than five thousand dollars during the months of August and September to a farmer who planted two acres to this crop on his farm near Lethbridge.

"Capable of growing such diversified crops as they are, and with uniform yields year after year, a brilliant future awaits the irrigated areas of southern Alberta, which will in time contain some of the most prosperous communities on the continent. The results of the past season will do much to hasten this desirable prospect."

MERIT RATING IN WORKMEN'S COMPENSATION

The Workmen's Compensation Board of Ontario has put into effect a tentative claim for merit rating of different forms in the same class with a view to bringing additional pressure to bear upon individual firms for the prevention of accidents. A provision to this effect was added to the Workmen's Compensation Act in 1917, and this is now being carried out in an experimental way. The plan is based upon the employer's actual accident experience, a merit or deed merit being assigned when the cost of accidents falls 10 per cent. below or goes 10 per cent. above the amount of assessment. The provisions are as follows:—

1. Every employer whose total cost of compensation and medical aid is more than 110 per cent. of his assessment shall be charged for each 1 per cent. above 110 per cent. one-fiftieth of 20 per cent. of his assessment, not, however, to exceed in any case 20 per cent. of such assessment.

2. Every employer whose total cost of compensation and medical aid is less than 90 per cent. of his assessment shall be refunded for each 1 per cent. below 90 per cent. one-fiftieth of the following percentage of the assessment, namely:—

Where the assessment is under $200, 5 per cent., and where the assessment is $200 or over, 5 per cent. increased by 1 per cent. for each $200 of assessment, but not to exceed 25 per cent. in any case.

3. No charge or refund less than $2 shall be made in any case.

Example 1. An employer's accident cost is $1,600 and his assessment $1,200. $1,600 is 133 (taking the nearest whole number) per cent. of $1,200; 133 per cent. is 23 above 110 per cent.; 23/50 of 20 per cent. of $1,200=$110.40 to be charged employer.

Example 2. An employer's accident cost is $2,100 and his assessment $3,600. $2,100 is 58 per cent. of $3,600; 58 per cent. is 32 below 90 per cent. 32/50 of the maximum refund applicable to a $3,600 assessment is therefore to be refunded; this maximum refund is 5 per cent. plus 1 per cent. for each $200 in $3,600=23 per cent.; 32/50 of 23 per cent. of $3,600=$529.92 to be refunded employer.

The Windsor Clearing House Association, at its first annual meeting, elected George Mair, manager of the Royal Bank, as chairman; A. E. Taylor, of the Canadian Bank of Commerce, vice-chairman, and George Carruthers, manager and secretary for 1919.

INVEST YOUR MONEY IN CANADA

The Dominion Government urges that Canadian Securities should be held by Canadian investors. Taxation is likely to be imposed on non-Canadian Securities. You can be patriotic and at the same time, obtain a certain 5½ for your money by investing your funds in

Standard Reliance Mortgage Corporation Debentures

This Canadian Security does not fluctuate in value. It is repayable at certain fixed periods Meantime it bears interest at 5½%, payable half-yearly, in cash, on the day it is due.

Thousands of people have invested their savings in these debentures without the loss of one dollar invested. The debentures are issued in amounts of $100 and upwards for a fixed période to suit your convenience.

STATUTORY CONDITIONS OF FIRE INSURANCE

How Standard Methods Have Come to be Adopted and Recognized by Law

By Henry Lye

Between forty and fifty years ago every fire insurance company had its own special set of "conditions." Scarcely any two sets were precisely alike, consequently the apportionment of a loss was an abstruse matter, leading to the adoption of various "rules," the "Albany Rule" being often invoked to the prejudice of the assured, each differing "rule" being utilized as it appeared most favorable to the fire insurance companies as represented by their "special agents," by whom, in those days, the settlement of fire claims were generally conducted.

Then a commission of judges and insurance agents formulated the "Statutory Conditions" applicable to all policies covering property in Ontario, which have been copied almost literally in all the provinces of Canada, and, after various suits and trials, have been upheld as superseding all "conditions" not in accordance therewith.

One of these statutory conditions made it imperative that all other existing insurances, made either prior or subsequent to the policy in question, must be endorsed upon it or made it void.

The tendency of the insurance companies has always been to listen to the complaints of the insurance agents and brokers, who have always been inclined to be "liberal" at the expense of the insurance companies, consequently there grew up a general practice of "permits for other insurance without notice until required," which has now been abbreviated to "other insurance permitted," giving license for unlimited amounts of insurance which may be, in some cases, justified but in others may be a menace to the safety of the property covered, or a cause of suspicion as to the integrity of the assured and of the agent making the endorsement, as if, after a fire, the cause of which is not otherwise explained, the amount of insurance is found to be excessive, it may be suggested that the over-insurance really caused the fire and that the assured and the insurance agent had conspired to victimize the insurance companies, whereas there may have been nothing worse than carelessness in procuring and lazy complaisance in issuing the policies bearing this endorsement.

Fifty years ago, and sometimes afterwards, some insurance agents advertised their payments of losses and claimed to have exercised great "liberality" in so doing, although their duty to the insured, to the insurance company and, most of all, to the people in general, was to be as strictly just as possible; this "liberality" at other people's expense led to various devices for ignoring the statutory conditions which were and are the law of the land and are properly so as designed to cause care in the conduct of the business and good faith on all sides, hence we have a state of affairs which by the continual increase in the destruction of life and property constitutes a menace to the safety and welfare of all honest, careful people and should lead to common sense, honesty and care in the conduct of the fire insurance business.

This system of permits for unlimited insurances acts to the prejudice of genuine adjusters who seek to do their duty because some inexperienced persons really believe that, in case of fire, they are entitled to the full amount of their policies, irrespective of the amount of loss.

On one occasion a deputation of a bank manager, an insurance agent and a lawyer waited upon the insurance managers, that year in convention in Toronto, and demanded that a certain adjuster should no more be employed by the insurance companies, because he had in one case upset a claim for loss by fire where over-insurance had caused arson, and in another had, by instruction of the insurance companies, arranged an arbitration to determine as to whether they had already satisfied the equities in a case of breach of warranty, the result of which was unfavorable to the parties insured.

In all directions it is in the interest and safety of every honest person that the fire insurance business be conducted with fairness, care and justice; when this is done the losses of life and property will be limited to such as are practically unavoidable and the whole people will be proportionately benefited. Some recent occurrences have emphasized these comments and should draw attention generally.

INCREASE ASSESSMENT ON IMPROVEMENTS

Saskatchewan Cities Must Assess at 60 Per Cent. of Value—Income from Real Estate Diminished

A proposal to require cities to increase their assessment on improvements up to 60 per cent. of their valuation, thus taking the matter out of the optional class, was one of the important clauses included in the amendments to the City Act which were given a second reading in the Saskatchewan Assembly on January 27th. The question is an important one, having been the subject of much debate not only in the city councils of the province but by a large number of citizens, in view of the apparent necessity for finding increased revenues for the cities.

Reviews Taxation

In moving the second reading of the bill, Geo. Langley, minister of municipal affairs, gave a brief but interesting review of taxation and taxation methods in Saskatchewan cities, in the course of which he referred to the disappointment which had been experienced at the failure of Professor Murray Haig to deal adequately with the question of finding new sources of revenue for the cities.

Pointing out that the income derived by cities from taxes had materially diminished during the past three or four years as a result of the collapse of the real estate boom, Mr. Langley went on to say that a great deal had been heard recently of what he described as a beautiful phrase: "Broaden the basis of taxation." This was a good, well sounding, rounded phrase which might be made to mean anything. It had been frequently used by delegations and also by the leader of the opposition, but he doubted whether some of the authorities who had used it so frequently knew what it actually meant.

Taxation in Urban Centres

Dealing with Professor Murray Haig's report on taxation in the urban centres of Saskatchewan, Mr. Langley described the first part of the report as a complete, comprehensive and exact layout of the situation in the cities and towns, but, in connection with the second part of the report which was supposed to provide the remedy, there was nothing much but disappointment. The suggestion, however, had been made in this section of the report and that dealt with the taxation on improvements. Mr. Langley pointed out that in 1915 the cities had been encouraged to again increase the assessment on improvements but so little disposition had been shown to take advantage of the powers given the city in this connection that the legislature had decided to take the matter in its own hands.

BETTER ROADS FOR ONTARIO

Addressing the annual meeting of the Ontario Motor League on January 20th, in Toronto, Honorable Finlay G. Macdiarmid, Ontario Minister of Public Works and Highways, stated that the government proposed immediately to ask for tenders for the construction of one hundred miles of the new provincial highway, and that on the remainder of that highway important and extensive preliminary work will be proceeded with during the summer. According to present plans the government does not intend to construct new highways of a uniform width or of standard cost. Honorable Mr. Macdiarmid stated that he will recommend to the government at the approaching session of the legislature that the roadways comprising the arteries that will connect with the trunk road be constructed of material suitable to the traffic of these particular roads.

SEVENTH ANNUAL REPORT

Your Directors have pleasure in submitting to the Shareholders and Policyholders their report of the Company's business for 1918.

ASSURANCES—New Policies were issued and revived amounting to $1,206,250.80, so that the total insurance in force now stands at $2,767,702.00, an increase over 1917 of $675,803.00, or 32%.

INCOME—The gross cash revenue from Premiums and Interest amounted to $103,187.91, an increase of $25,129.45 over 1917, or 32%.

ASSETS—The Assets of the Company have now reached the total of $295,650.09. The increase in Admitted Assets was $53,364.64, or over 27%.

SURPLUS—The Assets exceed the total Liabilities to Policyholders by $122,264.31.

POLICY RESERVES—The Reserves held for the Security of Policies in force, computed on the Om (5) Table of Mortality with Interest at three and one-half per cent., being in accordance with the Dominion Insurance Act, now amount to the sum of $153,055.00, an increase of $42,198.00 over 1917, or 38%.

DEATH LOSSES—During the year Death and Disability Claims paid amounted to $12,577.23, of which $9,000.00 was the result of the War, $3,577.23 only being due to natural causes. The total claims incurred during the year were $19,[illegible].98, of which $10,967.15 was due to the War.

A. E. MAY, President

ADAM REID, Managing Director

AUDITOR'S CERTIFICATE

The audit of the Company's books, which has been carried on continuously throughout the year has been completed to December 31st, 1918.

The various securities representing the Company's Loans and Investments have been examined, and the Cash and Bank Balances verified.

I certify that satisfactory vouchers have been produced for the various entries in the books, which I believe to be correct.

The accompanying statement of Receipts and Disbursements and of Assets and Liabilities, I believe to fairly set forth the position of the Company's affairs at the close of the year.

The Reserves are vouched for by C. C. Sinclair, F.A.S.

(Signed) CHARLES D. CORBOULD, C.A.,
Auditor.

Winnipeg, January 25th, 1919.

Second Vice-President, DR. T. J. REID, [illegible]
JOHN D. HUNT, Edmonton, Clerk Executive Council, Province of Alberta.
JASPER DOOLITTLE, [illegible]
ADAM REID, Winnipeg.
Managing Director, ADAM REID.
Medical Director, R. F. RORKE, M.D., C.M., M.R.C.S., Eng., L.R.C.P., London.
Treasurer, F. B. BLACKLEY.
Bankers, THE STANDARD BANK OF CANADA.

THE STANDARD TRUSTS COMPANY

Directors' Report to the Shareholders at the Sixteenth Annual Meeting held at the Head Office of this Company in Winnipeg on Thursday, 30th January, 1919, at 3 p.m.

To the Shareholders:—

Your Directors herewith present their report of the company's operations for the past year.

After paying all expenses and interest on Guaranteed Investment Certificates and providing for all known depreciation of securities, the balance at the credit of Revenue or Profit and Loss Account including $27,158.65 brought forward is		$120,943.77
From which there fall to be deducted Dividends Nos. 28 and 29 at the rate of 9% per annum, amounting to		77,802.98
Leaving a balance of		$ 43,140.79
Add premium of 25% on $250,000.00 new stock issued		62,500.00
Total		$105,640.79
Which has been disposed of:—		
By transferring to the Reserve Fund	$100,000.00	
And carrying forward in Profit and Loss Account	5,640.79	
		$105,640.79

Notwithstanding drought in Southern Saskatchewan and Southern Alberta as well as frost in the northerly portions of the same provinces, interest and principal payments on Mortgages have been fairly well met, although a fair amount of arrearages will have to be carried over and seed grain in a number of cases will have to be supplied to those so afflicted. There is nothing, however, in the present conditions throughout the Canadian Northwest to cause any anxiety. Trade is good and likely to improve with a return of Canada's sons to a pastoral and agricultural life from scenes of warfare. Re-adjustments following upon demobilization must necessarily take time and tact.

The increase of the Company's Capital from $750,000 to $1,000,000, for the reasons already given to you, was accomplished without the slightest inconvenience, as shown by the ready response given by you, indicating, too, a marked confidence in the Company's strength.

Your Directors deemed it but right, and felt it would meet with your approval, if they contributed still further towards the success of the latest Victory Bond issue, by investing further sums therein and strengthening at the same time the Company's Reserve Fund Investments.

The customary care on the part of your Executive or Investment Committee in regard to the Company's Mortgage Loans has been fully exercised, while your Auditors continue to be unremitting in their attention to all details of the Company's business, whether it be Trust or Investment matters.

The Trust idea steadily gains in popularity in the public's mind, as shown by the numerous Wills being drawn in the Company's favor as Corporate Executors.

Your Directors desire to record, with regret, the resignation of Mr. W. J. Tupper, K.C., from the Board. Mr. Tupper's firm received the appointment of General Solicitors to another Trust Company, and in accordance with the unwritten rule that a man cannot serve two Trust Companies, he voluntarily retired from this Board. Your Directors were fortunate in obtaining the services of the Hon. W. B. Willoughby, K.C., of Moose Jaw, and a member of the Canadian Senate, in Mr. Tupper's stead for the balance of his term.

All your Directors in accordance with the Company's By-laws retire, but are eligible for re-election.

Your Auditors, John Scott and Company, also retire and offer themselves for re-appointment.

Respectfully submitted,

J. T. GORDON,
President.

FINANCIAL STATEMENT FOR THE YEAR ENDED 31st DECEMBER, 1918.

AUDITORS' CERTIFICATE.

We beg to report to the shareholders that we have audited the Books and Accounts of The Standard Trusts Company at its Head Office and Branches for the year ending 31st December, 1918, and hereby certify that the above Balance Sheet is, in our opinion, properly drawn up so as to exhibit a true and correct view of the Company's affairs, according to the best of our information and the explanations given us, and as shown by the Books of the Company. All loan balances have been checked with the Mortgage Ledgers, and the Securities covering such loans have, as in previous years, been duly inspected and the cash and bank balances verified. All our requirements as Auditors have been complied with.

JOHN SCOTT & COMPANY,
Chartered Accountants,
Scotland and Manitoba.

The retiring Directors were re-elected as follows:—J. T. Gordon, Esq., Wm. Harvey, Esq., B.L., M. Bull, Esq., John A. Girvin, Esq., John Persse, Esq., Kenneth MacKenzie, Esq., P. C. McIntyre, Esq., John Stovel, Esq., G. F. Stephens, Esq., W. A. Matheson, Esq., E. S. Popham, Esq., M.D., W. R. Bawlf, Esq., Hon. W. B. Willoughby, K.C.

At a subsequent meeting of the Directors, J. T. Gordon, Esq., was re-elected President, William Harvey, Esq., B.L., First Vice-President; E. S. Popham, Esq., M.D., Second Vice-President; and the following the executive committee with Mr. J. T. Gordon, Esq., as chairman: J. T. Gordon, Esq., Wm. Harvey, Esq., B.L., E. S. Popham, Esq., M.D., J. A. Girvin, Esq., M. Bull, Esq., P. C. McIntyre, Esq.

ASSESSMENT ONLY ON NET INCOME

The Massey-Harris Company of Toronto has won out in its appeal to the Ontario Railway and Municipal Board, regarding its income assessment in the city of Toronto. The city has since intimated that it will appeal.

ROYAL BANK CHANGES

The Royal Bank of Canada announces the following important staff changes: N. T. Hillary, former general inspector at head office, Montreal, becomes assistant supervisor, Toronto; S. G. Dobson, formerly assistant supervisor, Winnipeg, becomes general inspector at head office, Montreal, with supervision over Canadian business; and S. L. Cork, formerly of supervisor's department, Toronto, becomes assistant supervisor, Winnipeg.

The Royal Bank of Canada has purchased for its New York agency the fifteen-story office building on the northeast corner of William and Cedar Streets. This is a splendid location, being in the heart of the financial district.

The
Great-West
Life
Assurance
Company

held its twenty-sixth Annual Meeting on
February 4th, 1919

Attention is drawn to the following statements:

New Business issued, 1918 . .	**$ 30,659,557**
Increase in new business .	350,015
Business in force Dec. 31st, 1918 .	**170,863,673**
Increase for the year . . .	18,220,508
Net Income for 1918 . . .	**7,129,106**
Increase for the year	691,786
Assets Dec. 31st, 1918 . . .	**27,432,824**
Increase for the year . . .	3,047,158

The expense rates were again lowered in 1918, and the interest rate earned was 7.16 In addition to the actual reserves, the balance sheet shows, in surplus, capital and special funds, the sum of $4,142,507, being over 15 of the assets.

This is after paying policyholders profits of $610,648, and providing for death claims of $2,012,240.

Canadian Government bonds held Dec. 31st, 1918—$4 772,458 (In addition $1,190,000 have since been paid for, the total of nearly six million dollars, being 23 of ledger assets.)

The Great-West Life has earned a reputation for prompt payment of claims and large profits to policyholders.

Head Office:
Winnipeg

SASKATCHEWAN'S FINANCIAL POSITION

Hon. Chas. A. Dunning in His Budget Speech Outlines the Position of the Province

Hon. Chas. A. Dunning, provincial treasurer of Saskatchewan, in his budget speech at the legislative assembly on January 29th, in referring to the financial position of the province, said:—

"There is a substantial cash surplus for the last financial year ended April 30th, 1918. The surplus amounted to $[illegible], of which stocks on hand of various kinds account for $[illegible], leaving an absolute net cash surplus of $156,[illegible]. The members of the House who are familiar with the anxieties of the government in connection with the war-time financing will be gratified at the successful outcome of one of the most difficult years of financial operations this province has ever passed through.

Regarding the present fiscal year, which expires on April 30th next, it is difficult to estimate at all closely what will be the outcome, for the reason that it is dependent very largely upon the collections between now and the end of the fiscal year of the Public Revenues Act and the wild land tax, both of which are collected by the municipalities acting as agents for the government. I have not yet any close approximation as to what these collections will amount to, and the difference between a surplus and a deficit rests entirely upon the success of failure in connection with two such large items of revenue. I have every hope, however, from the standing of the figures at the present time that we will come out on the right side at the end of the present fiscal year.

Farm Loans Board

"Up to December 31st last the Saskatchewan Farm Loans Board had loaned $1,758,288.37," said Mr. Dunning, in referring to farm loans. "Further applications approved by the board and in the hands of the solicitors will bring the total loans up to approximately $3,000,000. The total cost of administration since the formation of the board, up to December 31st last, exclusive altogether of refundable disbursements, such as inspection fees, which are chargeable against the borrower direct, and also legal disbursements, which are in the same position, is approximately $26,000. The policy of the board has not been one which made for economy in administration expenses. The policy of the board has not been to make large loans in old-settled districts, which are, of course, cheapest, from an administrative point of view, because costing far less to inspect, and would involve large sums at less administrative cost. It has been the policy of the board to rather make loans in new districts a long distance from railway lines where men are trying to get on their feet, and in districts also where loans of the board would have the greatest effect in increasing the productivity of the individual in an agricultural way.

"The total number of loans actually paid out is 1,015, and they cover 1,438 quarter-sections. That is the best evidence that the board is carrying out the policy of this legislature. The average loan per quarter-section is $1,223.

Agricultural Products

In speaking of agriculture, Mr. Dunning said: "The agricultural products of the province for the year 1918, products other than live stock, was $337,468,047. The value of similar products in 1917 was $366,161,725, or a decrease in 1918 of $28,693,678. The reason for this is that there has never been a more abnormal season, so far as agricultural production was concerned, than the season of 1918. In spite of that, it is a splendid testimony to the agricultural possibilities of the province that we got through that season with a decrease of only twenty-eight millions on a total of over three hundred millions for the previous year.

"The decrease was due to decreased wheat production, resultant on poor crop conditions in certain sections of the province. There is that feature in that connection. Although the crop conditions were poor, the average value per bushel was higher than the average crop of the year before. The average price received for wheat was $2.09 in 1918 as compared with $1.95 in 1917.

"While there is a decrease of twenty-eight millions' worth on agricultural products, other than live stock, during the year, the value of live stock increased $21,347,000.

Other Statistics

"The acreage of our wheat crop in 1918 was 9,249,260 acres; average yield, 10 bushels; the total production, 92,492,600 bushels; average price received, $2.09, making a total value of wheat of $193,309,534. The acreage of oats was 4,988,499 acres; average yield was 21.5; the total production was 107,252,728; the average price was 75 cents, making a total of $80,439,546. The acreage of barley was 699,296 acres; the average yield was 17 bushels; the total production was 11,888,032; the average price was 90 cents, making a total value of wheat of $193,309,534. The acreage of oats was average yield was five bushels; the total production was 4,204,785; the average price was $3,50, making a total value of $14,716,747. The acreage of rye, which is increasing every year in our province, was 123,500 acres; the average yield was 11.5 bushels; the total production was 1,420,250; the average price was $1.50, making a total of $2,130,375. Then, of course, there are such things as potatoes, turnips, peas, mixed grains, hay and clover and fodder corn.

"The wool clip was worth $406,000; poultry and products, $6,553,679. In this connection it is interesting to note the response made by the farmers of Saskatchewan to the call for increased production in the spring of 1918. Under very adverse conditions, so far as the labor question was concerned, the farmers of the province increased their total acreage under cultivation from 14,218,000 acres in 1917 to 15,901,000 acres in 1918, or an increase of 1,682,000 acres, under the most adverse conditions, in my judgment, of any province in Canada."

Estimates

At the session on January 30th the assembly went into committee of supply and dealt with the individual items in the estimates. The following is a summary of the votes, showing the total appropriations provided for each department as compared with the amount of the corresponding estimates for the preceding fiscal year:—

	1918-19.	1919-20.
Public debt	$1,527,555	$1,788,900
Civil government	450,755	468,633
Legislation	133,020	137,990
Administration of justice	836,370	810,435
Administration of services	101,710	59,600
Insurance	13,000	13,500
Public works (chargeable to income)	767,570	823,099
Public works (chargeable to capital)	173,400	1,260,300
Public improvements (chargeable to income)	548,000	846,630
Public improvements (chargeable to capital)	395,140	573,000
Education	1,188,590	1,243,800
Agriculture	204,760	193,600
Public health and vital statistics	303,170	413,000
Neglected and dependent children	91,900	88,000
Municipal	22,100	30,000
Miscellaneous (chargeable to income)	1,362,600	624,800
Miscellaneous (chargeable to capital)	2,740,000	4,100,000
Administration of the Saskatchewan Farm Loans Act	205,000	275,000
Telephones (chargeable to income)	15,000	16,000
Telephones (chargeable to capital)	815,000	795,000
Telephones (chargeable to telephone revenue)	1,167,060	1,500,000
Administration of the Agricultural Aids Act	350,000	414,000

The assembly went into committee of supply and passed the votes dealing with the sections of the estimates devoted to the public debt and civil government.

The Twenty-Sixth Annual Meeting of

The Home Investment and Savings Association

The 26th Annual Meeting of the Shareholders of the above Association was held at the Head Office, Winnipeg, on Monday, February 3rd, at four o'clock p.m. The President, Mr. M. Bull, acted as Chairman, and the Managing Director, Mr. W. A. Windatt, as Secretary. The Directors' Report and Financial Statement, with Auditors' Certificate as follows, were presented.

To the Shareholders:—

Your Directors beg to submit herewith Balance Sheet and Statement of Profit and Loss Account for the year ending December 31st, 1918.

With feelings of profound thankfulness we realize that the war, with its great loss of life and general disruption of business, is practically over.

The problems of Reconstruction and a return to natural conditions are many and of the greatest importance, but they will, we feel assured, be successfully dealt with.

The fertile lands of our Prairie Provinces, with their vast areas, will undoubtedly attract great numbers of immigrants, both from overseas and from the States to the south of us, and the consequent demand for the money necessary to the incoming settler ensures the employment of all available funds for years to come.

Our securities have, as usual, been examined by an Inspection Committee, whose report will be submitted to the meeting.

M. BULL,
President.

January 31st, 1919.

BALANCE SHEET AT DECEMBER 31st, 1918.

ASSETS.

Loans on First Mortgages on Improved Real Estate	$1,758,869.08
Interest on Mortgages accrued, due	114,306.43
Interest on Mortgages accrued, not due	15,064.97
Municipal Debentures	7,851.92
Dominion Government War Loans and accrued interest	45,128.09
Real Estate	226,643.29
Office Furniture	1.00
Cash on hand and in Bank of Montreal	4,569.48
Mortgages in the amount of $161,780.50 are deposited as collateral with trustees for Debenture Holders.	
	$2,172,434.26

LIABILITIES.

To the Public—		
Debentures and Accrued Interest	$217,840.42	
Deposits at Call	289,036.61	
Deposits for Fixed Term	29,502.87	
Sundry Accounts	9,300.14	
		$ 545,680.04
To the Shareholders—.

			$144,164.26
Four Quarterly Dividends at rate of 8% per annum			79,183.95
Balance carried forward			$ 64,980.31

We have to report to the Shareholders that we have audited the books of The Home Investment and Savings Association for the year ended December 31st, 1918.

We hereby certify that the accompanying Balance Sheet and Profit and Loss Account are in accordance with the books, and in our opinion, are properly drawn up so as to exhibit a full and fair statement of the financial position of the Association as at December 31st, 1918, and the result of the operations for the year ended that date. All our requirements as Auditors have been complied with.

MARWICK, MITCHELL, PEAT & COMPANY,
Chartered Accountants.

Winnipeg, Man., January 28th, 1919.

REPORT OF INSPECTION COMMITTEE.

To the President and Directors of The Home Investment and Savings Association:—

Your Committee, having examined carefully the loan accounts in the ledgers of the Association, as well as the real estate accounts, begs to report:—

(1) That the number of loans in arrears has decreased during the year 1918, and that many of those still in arrears are in better condition than they were a year ago;

(2) That the majority of the borrowers whose instalments are considerably overdue are so protected by moratorium acts and other legislation that the Association cannot compel payment at present, although it is hoped that such conditions will not obtain much longer;

(3) That in nearly all cases of loans in arrears the latest valuations show ample security for the Association's claims against the properties, and that its Contingent Reserve, in our opinion, is sufficient provision for any shrinkage in these securities;

(4) That the value of the properties sold during the year is about equal to the value of those taken over in the same period;

(5) That the income derived from rents shows a substantial increase as compared with that of the preceding year.

A list of monthly loans three months or more in arrears, and yearly loans more than one year in arrears, is appended.

The work of your Committee was greatly facilitated by the completeness of the books of the Association and the assistance so cheerfully given by its officials.

Respectfully submitted,
P. C. McINTYRE,
F. H. SCHOFIELD,
Inspection Committee.

Winnipeg, January 27th, 1919.

The retiring Directors, Messrs. M. Bull, P. C. McIntyre, W. A. Black, F. W. Drewry, F. H. Schofield, H. Byrnes, W. H. Cross and W. A. Windatt, were re-elected. At a subsequent meeting of the New Board, Mr. M. Bull was re-elected President, Mr. P. C. McIntyre, Vice-President, and Mr. W. A. Windatt, Managing Director.

The Toronto Railway Company

REPORT OF THE PRESIDENT AND DIRECTORS

For the Year Ending 31st December, 1918.

TWENTY-SEVENTH ANNUAL REPORT PRESENTED TO THE SHAREHOLDERS AT THE ANNUAL MEETING, WEDNESDAY, FEBRUARY 5th, 1919.

BOARD OF DIRECTORS.

President, SIR WILLIAM MACKENZIE.
Vice-President, LT.-COL. THE HON. FREDERIC NICHOLLS.
BRIG.-GEN. SIR HENRY M. PELLATT, C.V.O.
HON. C. P. BEAUBIEN. E. R. WOOD.
GEO. H. SMITHERS. HUGH MACKAY, K.C.
HERMAN H. PITTS.
FRANK W. ROSS.
R. J. FLEMING, *General Manager*.
J. C. GRACE, *Secretary-Treasurer*.

To the Shareholders:

Your Directors present herewith the Twenty-seventh Annual Report, together with Balance Sheet and Profit and Loss Account of the Company, for the year ending 31st December, 1918.

The operations for the year do not show the usual increases, the main reason for such condition being the higher wages paid to employees and to the high cost of materials, attention to which was called in our last Annual Report.

The Gross Earnings amounted to		$6,526,302.37
Charges for operating, maintenance, etc., including Judgments and Fines given against the Company but still unpaid, other than Injuries and Damages		4,509,651.33
NET BALANCE FROM OPERATION		$2,016,651.04
Distributed as follows:—		
Dividends paid	$ 480,000.00	
Bond Interest, etc	138,660.47	
War and Provincial Government Taxes	75,155.27	
		$ 693,815.74
Payments to City:		
Percentage on Earnings ..	$1,046,495.24	
Pavement Charges	98,817.20	
General Taxes	155,953.74	
		1,301,266.18
Balance carried forward		21,569.12
		$2,016,651.04

The earnings of the Company, which amounted to $6,526,302.37, show an increase of $234,543.31 over the earnings of the previous year. The various charges against the earnings for operation, maintenance, etc., include provision for judgments and fines given against the Company but still unpaid.

The payments made to the City of Toronto amounted to the sum of $1,301,266.18, which amount when compared with payments made during the previous year, shows an increase of $114,234.56.

The large increase in wages granted to the employees in June, 1917, was paid throughout the year. Notwithstanding that this increase was granted under a binding agreement which does not expire until June, 1919, the employees asked for a war bonus of from 11 to 16 cents per hour, to date from October 1st, 1918. The Government, at the request of the employees, appointed a Conciliation Board, which Board awarded an increase of 2½c. per hour to those employees in their first six months' service, and 2c. per hour to all other employees covered by the agreement.

The eighth drawing of the Company's currency and sterling bonds, under the terms of the mortgage deed dated 1st September, 1892, took place on the 21st day of June. Under said terms the Company draws annually during the last ten years of its franchise, five per cent. (5%) of the amount of bonds issued, thus reducing during the ten years mentioned, the outstanding bonds to fifty per cent. (50%) of the original issue, and all bonds so drawn are to be redeemed on or after the 31st day of August following the date of drawing, from which date no interest is payable on bonds so drawn. There has been drawn to date a total of $1,819,466.64.

At a meeting of the Directors held immediately after the close of the Annual Meeting on 6th February, 1918, it was deemed advisable to increase the number of the Directors of the Company from seven to nine, when a By-law was enacted accordingly, which By-law was confirmed at a Special Meeting of Shareholders held on the 6th day of May, 1918, on which date Mr. Hugh Mackay, K.C., of Montreal, Quebec, and Mr. Herman H. Pitts, of Ottawa, Ontario, were duly elected Directors of the Company.

Your Directors declared out of the accumulated surplus earnings of the Company four quarterly dividends of one per cent. (1%), all of which dividends were paid on the several dates set for payment.

A regular monthly audit and verification of the books, accounts and vouchers was made by W. S. Andrews & Company, Chartered Accountants, and their certificate has been attached to the Company's Balance Sheet.

Respectfully submitted,
WILLIAM MACKENZIE,
President.

REVENUE STATEMENT

NEW DIRECTORS FOR BANK OF TORONTO

It is announced that in view of the increasing importance of their business in the western provinces, the Bank of Toronto has elected to the Board of Directors Mr. John I. McFarland, of Calgary, president of the Alberta Pacific Grain Company, Limited, and Mr. W. R. Bawlf, of Winnipeg, president of the Bawlf Grain Company, Limited. Both are young men of conspicuous ability and outstanding position in the business life of the west, and will bring to the Bank of Toronto directorate an intimate knowledge and wide experience of western conditions. Mr. Bawlf succeeds his father, the late Nicholas Bawlf, who was the Bank's first western director.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	2⅜ pm	2 3-64 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	4.8530	4.8545	4.87½
Cable transfers	4.8615	4.8635	4.88½

Rates in New York—Sterling demand, 4.75¾.

Bank of England rate, 5 per cent.

Customs receipts for January total $12,627,876, as compared with $10,298,743, an increase of $2,329,133. For the ten months of the fiscal year Customs receipts total $131,983,439, as compared with $136,562,706 for the ten months ending January 31st, 1918.

Sir Edward Holden has publicly urged the reorganization of the Bank of England, particularly that the bank should be authorized to issue notes not only upon gold security, but also on commercial bills of exchange, thus following the example of the present United States currency law.

ROYAL SECURITIES APPOINTMENTS

The Royal Securities Corporation, Ltd., announces the appointment as assistant manager of its sales department, of Norman S. Brooke, effective from February 1st, 1919. Mr. Brooke has been connected with the corporation in this department for a number of years.

Arthur D. Emory, for several years advertising manager of the Sun Life Assurance Co. of Canada, has entered the corporation's service as manager of the publicity department.

The Toronto General Trusts Corporation

Report of the Proceedings of the Thirty-Seventh Annual General Meeting

The Thirty-seventh Annual Meeting of the Shareholders of The Toronto General Trusts Corporation was held in the Board Room of the Corporation's Head Office, corner of Bay and Melinda Streets, Toronto, on Wednesday, the fifth of February, 1919.

The President, Hon. Featherston Osler, K.C., D.C.L., took the chair, and Mr. W. G. Watson, Assistant General Manager, acted as Secretary of the Meeting.

Mr. A. D. Langmuir, General Manager, submitted and commented upon the financial statements, showing the operations of the Corporation for the year ended 31st December, 1918.

The report to the Shareholders was then read as follows.—

To the Shareholders:

Your Directors have pleasure in submitting the Thirty-seventh Annual Report of the Corporation, together with the usual statements showing its operations for the year ended the 31st of December, 1918.

The gross profits for the year, after providing for all ascertained or anticipated losses, amount to $654,130.64. The administration expenses, including salaries, Directors' and Auditors' fees, advertising, rent, etc., amount to $332,161.62. This, you will observe, makes our net profits for the year $321,969.02. To this amount must be added $101,443.11 brought forward on the 1st of January, 1918, making a total of $423,412.13, which has been dealt with by your Directors as follows:—

To payment of four quarterly dividends at the rate of ten per cent. per annum	$150,000.00	
To payment to the Shareholders of one per cent. bonus on the paid-up Capital Stock of the Corporation	15,000.00	
		$165,000.00
To amounts subscribed to Canadian Patriotic and other War Relief Funds		13,000.00
To amount provided for 1918 Federal Income Tax payable in 1919		12,000.00
To amount written off Head Office Building and Safe Deposit Vaults		30,600.00
To amount transferred to Reserve Fund (increasing this Fund to $2,000,000)		50,000.00
To balance carried forward to credit of Profit and Loss		152,812.13
		$423,412.13

The Assets and Liabilities Statement shows an increase of assets over the preceding year of $7,545,847.11, making the total volume of assets now in the hands of the Corporation $90,832,629.80.

The subscriptions to the Canadian Patriotic and other Funds which the Board of Directors have made on your behalf will be submitted for confirmation at the Annual Meeting.

All of which is respectfully submitted.

A. D. LANGMUIR, General Manager.
FEATHERSTON OSLER, President.

AUDITORS' REPORT.

We, the undersigned, beg to report that we have made a full examination of the books, accounts and vouchers of The Toronto General Trusts Corporation to 31st December, 1918, and find same to be correct and properly set forth in the above statements of Profit and Loss and Assets and Liabilities.

We have examined, and find in order, all the mortgages, debentures, bonds and scrip of the Corporation, as well as those negotiated for the Supreme Court of Ontario, and Trusts, Estates and Agencies in the Corporation's hands, and we have checked same with the mortgage and debenture ledgers and registers.

The Trust investments and funds are kept separate from the Corporation's own securities and funds, and all securities are so earmarked in the Books of the Corporation as to show the particular Estate, Trust or Guaranteed Account to which they belong.

The Bankers' Balances, after deducting outstanding cheques, agree with the books of the Corporation.

All our requirements as Auditors have been complied with.

We have also examined the reports of the Auditors of the Winnipeg, Ottawa, Saskatoon and Vancouver Branches, and find that they agree with the Head Office books.

R. F. SPENCE, F.C.A., "Can.," }
J. GEORGE, F.C.A., "Can.," } Auditors.

Toronto, January 21st, 1919.

The President, the Hon. Featherston Osler, K.C., D.C.L., in moving the adoption of the Report, which was seconded by Brig.-General Sir John M. Gibson, K.C.M.G., LL.D., addressed the Shareholders as follows:—

The Directors have pleasure in submitting their Annual Report and Financial Statement for the year ended 31st December, 1918. This report—the 37th which successive Boards of Directors have laid before their shareholders—records, like its predecessors, the continued growth and prosperity of the Corporation, and the favor with which it is regarded by the public. It is hardly necessary for me to enlarge upon this, as the facts and figures set forth in the statement speak for themselves. The volume of business taken care of has very substantially increased, while, out of the net profits of the year, amounting to $321,969.02, after providing a reasonable return to the shareholders upon their investment, and for the other payments and charges which appear in the statement, the sum of $50,000.00 has been added to the Reserve Fund, which now stands at $2,000,000, and a balance is carried forward to the credit of Profit and Loss of $152,812.13.

Information of interest to the Shareholders will be given at length in the address of the General Manager, and a Resolution will be submitted for your approval confirming the grants to the Canadian Patriotic Fund and other War Relief purposes.

The great War 1914-18—the greatest and most destructive of life and property in the world's history—has now, so far as it depended upon the arms of Great Britain, her Dominions and Allies, been brought to that victorious conclusion of which we never doubted, and the only results to which we look forward with anxiety are those which may flow from the action of the Peace Conference, and which it is useless here to anticipate. We have, it is true, as a Dominion incurred an enormous national debt obligation in maintaining the splendid part taken by us in the War, and we have assumed great moral and material obligations for the future, but these we shall rise to meet in the same spirit in which we incurred them, and, inheriting such a country as ours, we may meet that future with a confident hope, and take such part as falls to our lot in solving the questions relating to the welfare of the world. These are matters of extensive view, but I may be pardoned for alluding to them at such a time as this if it helps to emphasize the fact that it is only by each of us doing his own part that the great whole can be accomplished. Some one may ask, What has this to do with a Financial Corporation? I think a great deal. Such Corporations are part of the business life of the community, and their success or failure means much. Every shareholder in such a concern ought to feel himself interested in it far beyond the more pecuniary return it makes to him, and should do what lies in his immediate power to manifest his confidence in it by using it in one or more of its various activities. These I need not again particularize, for they have often been brought to your notice, and if our Shareholders will only bear it in mind, the Corporation need have no anxiety for the future.

The President then called upon Mr. A. D. Langmuir, the General Manager, to address the Shareholders.

Mr. Langmuir said: It is proper that I should preface any remarks which I have to make on this the occasion of the Corporation's 37th Annual Meeting of Shareholders, by expressing our gratification and deep thankfulness that the war which has engrossed so entirely the energies of the whole world has been brought to a victorious end. It is to be hoped that the great principles underlying the ideals which are under consideration for the reconstruction of the world will make worth while the great sacrifices which terrible war has entailed on humanity, and that the terms and conditions of settlement to be arranged at the present Conference will bring about such an understanding as will prevent future wars, as well as provide a basis for the improvement of the social, industrial and financial conditions the world over.

We, as Canadians, cannot but feel proud that our Country recognized so instantaneously the duties which devolved upon us to supply men, money and munitions, so eminently necessary to the successful issue of the conflict, the result of which efforts has placed Canada before the world in a position that can never be forgotten.

We desire to place on record our admiration of those members of our staff who so promptly responded to the Empire's call, four of whom have been called upon to make the great sacrifice by giving up their lives for their country.

The positions which our men who have survived the war held with the Corporation have been kept open, and all of them who desire to come back into the service of the Corporation will be welcome to do so.

As to the part taken by The Toronto General Trusts Corporation in the matter of financial support to the Patriotic, Red Cross and other War Relief Funds, our subscriptions have come before you from year to year for confirmation, and speak for themselves.

The Report of your Directors showing the results of the year's operations, and the statement setting forth the source of profits, and the business assumed, all of which have been fully explained, will, I am sure, be received with satisfaction.

The most gratifying result of the year's business is the increased volume of new estate work which has been entrusted to the Corporation for care and management, amounting to the sum of $12,737,961.97, the largest amount received in any single year in the history of the Corporation, and being an increase over that of the preceding year of $2,64[illegible]. Satisfactory as this evidence is, there are other indications of equal importance which go to show in a large measure the trend of the public mind in the matter of corporate administration of Estates expressed in the large number of enquiries both by correspondence and personal interviews seeking information, as well as in the increasing number of Wills which have been filed with the Corporation for safekeeping.

Although the opportunity has been taken on previous occasions, when presenting the Annual Report, of emphasizing the fact that the charges or remuneration of The Trusts Corporation for acting as Executor and Trustee are only the usual allowances granted by the Courts to individuals acting in the same capacity, it will not be out of place to again refer to the matter at the present time. The character of the assets comprising an estate coming into the possession of an Executor, Administrator or Trustee for administration and management, combined with the size of the estate, must of necessity be to a large extent the determining factor in fixing the rate of compensation. Some estates comprised of Stocks and Bonds, Life Insurance Policies, etc., entail a minimum of trouble, whereas other estates having going businesses to be disposed of, Real Estate, Mortgages, etc., require a greater degree of time and attention, consequently entitling the Company to be remunerated in proportion to the responsibility and work assumed. All, however, receive expert attention in the various departments provided for that purpose; notwithstanding these facts, Trust Companies are one of the few businesses, indeed, I might say the only one, the charges for whose services have not been increased in recent years, although the cost of operation has increased in the same manner as in all other businesses, owing to increased salaries, war bonuses, largely increased taxation, increased cost of money, in fact all the thousand and one items of expense that are incident to the management of such an Institution such as ours.

In considering this matter and the volume of Estates business in the hands of the Corporation, it will no doubt be of interest to you, as well as to the public, to ascertain just what remuneration the Corporation receives from year to year through its administration of this great body of Trust and Agency assets. In order, therefore, that you may have a fair statement of the case, I shall go back for a period of three years, and show the percentage of gross income or remuneration the Corporation has received from the total volume of Trust and Agency assets under its control from year to year, and the percentage that this remuneration bears to the assets in hand, and for this purpose we shall treat the assets which were on hand at the beginning of each year, rather than the increased amount at which our Trust business stood at the end of the year:—

	Trust and Agency Assets.	Remuneration received.	Percentage of remuneration to assets.
1916	$58,740,311.78	$226,900.06	.38%
1917	64,692,318.60	232,985.84	.36%
1918	70,721,368.67	255,619.08	.36%

This remuneration, of course, includes the Corporation's commission for receiving and disbursing the income, as well as for the care and management of the Capital and realization and investment of same. It must therefore be obvious that the margin of net profits in connection with the administration of estates is so narrow that it is only in the volume of business that a Trust Company can hope to make any profit whatever in this Department of the Corporation's business.

You will have observed in the statement of the Corporation's Assets that the total volume of Trust and Agency business of which the Corporation is Custodian, amounts to the sum of $78,887,301.48. This large volume of assets is represented by the following investments and securities:—

Investments Made by the Corporation.

Dominion Government and Provincial Bonds	$ 3,690,697.59	
Municipal Debentures......	5,406,356.84	
Mortgages on Real Estate..	13,705,260.26	
Stocks and Bonds	1,128,988.81	
Loans on Debentures, Stocks and Bonds	833,843.19	
Cash on Hand and in Banks.	1,014,234.39	$25,779,381.08

Original Assets of Estates.

Real Estate	$13,495,127.98	
Debentures, Stocks and Bonds	30,419,349.15	
Mortgages	6,157,414.14	
Miscellaneous Assets	3,036,029.13	$53,107,920.40

The Assets and Liabilities statement shows a very large net increase in the volume of assets under administration during the past year amounting to the sum of $7,545,847.11, the total assets now aggregating $90,832,629.80. In this connection it should be mentioned that of the cost of improvements to the Ottawa Building amounting to $28,544.40, the sum of $25,000 has been added to the value of the building, leaving this asset in the books of the Corporation at $200,000.

Statements are sometimes heard that Trust Companies make a practise of realizing on investments made by a Testator, although the occasion for doing so is not warranted by the necessities of the estate. This, of course, is not the case, and I am sure the above amount of original unrealized assets is sufficient evidence of proof to the contrary. The trouble, however, in many instances is that the Testator in his Will does not provide or give any discretion for the retention of investments made in his lifetime, consequently his trustees are left no alternative but to realize the estate securities that are not Trustee investments, within a reasonable period. This question of the realization of securities or the postponement of same in the hope that better conditions may obtain, is the cause of a great deal of anxiety and much thought on the part of your Directors and the Management. Our clients may rest assured, however, that every case is specially and thoroughly considered before a conclusion is reached.

Investment and Interest Return.

The effect of four and a half years of war and its bearing on the interest of Trust Companies is reflected perhaps more in the Investment side of our operations than in other departments. High rates of interest offered by Dominion and Provincial Governments on their securities, and by Municipalities on their debentures have, for the time being, restricted the flow of funds received for investment by the Corporation on its Guaranteed Plan, with a consequent reduction of the amount of funds available for this account. It has been very difficult for Trust Companies to compete with these high rates, as not only the cost of administering such funds has considerably increased, but the rates of interest obtainable on Western Mortgages, in which a large proportion of Guaranteed Funds are invested, have shown a downward tendency, besides a great decrease in the demand for such loans during the war. This condition, however, we believe, can only be of a temporary character, and we confidently expect, now that the war has ended, to see normal conditions again assert themselves, and with that, an increase in funds for investment on Guaranteed Account.

On the other side, the demand for mortgage loans, by reason of the almost entire suspension of building operations during the war period, and the falling off of immigration, has been greatly reduced. Maturing mortgages in Ontario have, as a general rule, been renewed at the increased current rates of interest, although in the Western Provinces, for the reason, no doubt, of the excellent profits realized by the farmers for their produce, very substantial reductions have been made on account of the principal of their loans.

In consequence of these conditions, although a considerable amount of mortgage investments have been obtained, the larger portion of our Trust funds have been invested in the past year in Dominion of Canada, Provincial Bonds, and Municipal Debentures.

To better understand the change effected in the investments negotiated by the Corporation since the outbreak of war in 1914, the following comparison will be of interest:—

Percentage of mortgage investments to total amount invested in 1914, 77%.

Percentage of mortgage investments to total amount invested 1918, 65%.

Percentage of Bonds and Debentures to total investments 1914, 23%.

Percentage of Bonds and Debentures to total investments 1918, 35%.

Similar results, no doubt, have been experienced in a greater or less degree by institutions kindred to our own. Notwithstanding, however, these changes in the classes of our investments, we are pleased to report that the security has in no wise been lessened, nor have our clients experienced any diminution in the rate of interest return, but rather an increase which is of such great moment in these times when the cost of living is so high.

The income received from our Capital and Reserve Funds requires no special explanation except perhaps to state that the amount invested in our Office Buildings and Safe Deposit Vaults at Toronto and Ottawa is producing a fair return, and all the offices are satisfactorily leased. During the past year very considerable improvements have been made to our Ottawa Branch Building. The offices heretofore occupied by the C.P.R. have been taken over and incorporated with the former offices in which the Corporation was located. The advantages of the increased accommodation, which was greatly needed, and the more prominent location, your Directors feel will be reflected in an increasing volume of business from our Ottawa Branch.

With regard to our Mortgage Investments, I am pleased to say that the interest and instalments of principal have been met in a most satisfactory manner. Our investments in this class of security in the Province of Ontario aggregate $15,928,156.15, and 97.97% of the total interest which matured during the year, including arrears brought forward from the preceding year, has been collected. The average rate of interest on these mortgage investments is 6.39%, being a small increase over that of the preceding year. It will be of interest to the shareholders and our clients to learn that the average interest rate on our mortgage investments in Ontario has increased from 5.34% in 1910, to 6.03% in 1914, and to 6.39% in 1918, or an increase over 1910 of 1.05%.

Respecting our Mortgage Investments in the Western Provinces of Manitoba, Saskatchewan and Alberta amounting to $6,336,468.36, 80% of the interest charged during the year, including arrears brought forward from 1917, has been received. The average rate of interest on Western Mortgages for 1918 was 7.70%.

Safe Deposit Vaults.

A most satisfactory number of compartments have been leased during the year in our Safe Deposit Vaults both at the Head Office and at Ottawa, so much so that additional nests of compartments have been added in both vaults, in order to keep pace with the demand. Undoubtedly this increased business is largely accounted for by the great number of people who have subscribed for Victory Bonds, and who now require a safe depository for these securities and other valuable papers. A very considerable amount of literature giving details and particulars with regard to our building and Vault construction has been distributed, and we are looking for a large increase in connection with our Safe Deposit Vault business during the next few years.

In the matter of the Corporation's profit for the year, our gross profits show an increase of $32,682.75 over the preceding year, being $654,130.64, as compared with $621,447.89. The management and all administration expenses, including advertising, taxes, etc. for the year amounted to $332,161.62, as against $320,561.78 for the preceding year, or an increase of $11,599.84, the net profits for the year being $321,969.02, or an increase of $21,082.91 over 1917. These profits, with the balance brought forward from the preceding year of $101,443.11, left a total of $423,412.13 to be dealt with by your Directors. The disposition of this amount is clearly set out in the Profit and Loss Statement, and outlined in the Directora' Report, and I shall therefore not go into the matter in any great detail. In addition to the usual dividend of 10%, a bonus of 1% to the Shareholders was paid out of the above fund; Patriotic and War Relief subscriptions made to the extent of $13,000 and an amount of $30,000 written off our Head Office Building and Safe Deposit Vaults, thereby leaving this asset in the books of the Corporation at $550,000. You will observe that while $50,000 was transferred to Reserve, making our Reserve Fund a round Two Million Dollars, we carried forward to the credit of Profit and Loss $152,812.13, or an amount over $50,000 in excess of the balance carried forward in the preceding year.

In conclusion, I desire to thank the Advisory Boards at Ottawa, Winnipeg and Vancouver for the great interest which they have taken in advancing the interests of the Corporation, and also the officera and staff of the Corporation generally for the efficient and conscientious manner in which they have discharged their duties during the past year.

The Report was unanimously adopted.

It was then moved by Mr. F. C. Jarvis, seconded by Mr. Herbert Langlois, and resolved, that the following Shareholders be and are hereby appointed Directors for the current year, namely—Hamilton Cassels, K.C., LL.D., Hon. Senator W. C. Edwards, Brig.-General Sir John M. Gibson, K.C.M.G., LL.D., Arthur C. Hardy, John Hoskin, K.C., LL.D., D.C.L., Lieut.-Col. R. W. Leonard, Thomas Long, J. Bruce Macdonald, Hon. Sir D. H. McMillan, K.C.M.G., W. D. Matthews, Hon. Peter McLaren, Lieut.-Col. John F. Michie, Sir Edmund B. Osler, Hon. Featherston Osler, K.C., D.C.L., J. G. Scott, K.C., Sir Edmund Walker, C.V.O., LL.D., E. C. Whitney, Wellington Francis, K.C., E. T. Malone, K.C., H. H. Williams.

At a subsequent meeting of the Directors the following officers were elected: President, Hon. Featherston Osler, K.C., D.C.L.; Vice-Presidents, Hamilton Cassels, K.C., LL.D. and Brig.-General Sir John M. Gibson, K.C.M.G., LL.D.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt station for the week ended January 31st, 1919:—

Buffalo Mine, 87,685; La Rose Mine, 67,547; Beaver Mine, 86,460; total, 241,492.

The total since January 1st is 1,556,620 pounds, or 778.3 tons.

BANK BRANCHES OPENED AND CLOSED

During the month of December the Canadian chartered banks opened 145 new branches and closed 6, which compares with a total of 58 branches opened in November and 4 branches closed. Of the new branches opened, the Merchants Bank opened 27, Union 23, Commerce 21, Royal 18, Imperial 11, Hochelaga 11, Nationale 8, Montreal 7, Hamilton 6, Standard 3, Dominion 3, Sterling 3, Nova Scotia 2, Toronto and Molsons 1 each. Of the 6 branches closed the Bank of Montreal closed 2, while the Bank of Hamilton, Imperial, Toronto and Merchants closed a branch each.

The Dominion Bank has opened a branch at Fairbank, Ont.

WAR COST BRITAIN OVER EIGHT BILLION

The cost of the war to Great Britain was approximately £8,128,000,000, declared Sir E. H. Holden at the annual meeting of the London City and Midland Bank. Of this sum £1,107,000,000 was loaned to the allies.

Germany's war cost, he said, was £7,750,000,000, of which only £450,000,000 was loaned to her allies. In addition to this were the debts incurred by the several German atates.

NO CHANGE IN TAXATION

"There will be no amendment to the city act at the present session to compel the cities of Saskatchewan to assess improvements at 60 per cent. of their value."

This statement was made by Premier Martin, who said that such strong representations had been made to the government, following the introduction of amendments to the city act in the legislature, by leading business men of the province, that the government had concluded not to make any change this session. Business men had expressed themselves as extremely nervous concerning the proposed change, claiming that it would have the effect of preventing building.

"The government is most anxious that private capital will be freely used in productive channels," the premier said, "and there will be no change in the policy the cities have to follow in taxing improvements."

BANKS MUST PAY MORE

In the Manitoba legislature on February 4th the bill amending the Corporations Taxation Act was read for the second time on the motion of Hon. Edward Brown, provincial treasurer.

The bill provides for the increase of the contribution of the banks to the provincial treasury from $49,000 to $98,000; increases the tax on loan and mortgage companies from one-half of one per cent. to three-quarters of one per cent. on the gross earnings; fixes a flat rate of two per cent. on the gross premium income for life and fire insurance companies, and raises the rate on trust companies from one and one-half per cent. to two per cent.

DEBENTURES FOR SALE

CITY OF TORONTO
$650,000 SERIAL GOLD BONDS

Sealed Tenders, endorsed, "Tender for City of Toronto Bonds," addressed to **Thomas L. Church, Esq.**, Mayor and Chairman of the Board of Control, will be received by the undersigned until

12 O'CLOCK NOON, TUESDAY, 11TH FEBRUARY, 1919

for the purchase of—

$650,000 bonds issued for Hydro-Electric purposes, due July 1st in each year, as follows:—

Payable.	Amount.	Payable.	Amount.	Payable.	Amount.
1919	$19,000	1926	$27,000	1933	$39,000
1920	20,000	1927	29,000	1934	42,000
1921	21,000	1928	30,000	1935	44,000
1922	22,000	1929	32,000	1936	46,000
1923	23,000	1930	34,000	1937	49,000
1924	24,000	1931	35,000	1638	51,000
1925	26,000	1932	37,000		

The legality of the issue has been approved by Mr. J. B. Clarke, K.C., and his favorable opinion will be furnished.

The bonds are an obligation of the city at large, are issued in coupon form, with provision for registration of principal, bear date July 1st, 1918, and are in denominations of $1,000.

They are payable both as to principal and interest in gold, in Toronto and New York, and carry interest at the rate of 5½% per annum, payable half-yearly on the 1st of January and July, the first half-yearly instalment of interest being due and payable on the first of July, 1919.

Engraved bonds are now ready for delivery, and payment must be made not later than 18th February, 1919, with accrued interest from the 1st January 1919, to date of payment. Delivery and payment are to be made at the office of the undersigned, and in view of the premium on New York funds, tenderers may submit two bids—one for payment in New York funds, and the other for payment in Toronto funds. Tenders will be received for "all or none."

A certified cheque, payable to the undersigned, for 2% of the par value of the bonds tendered must accompany the tender.

Tenders specifying for bonds other than those herein described, or containing conditions varying from the above, will not be considered.

The right is reserved to reject any or all proposals.

Statement giving full information will be furnished on application.

T. BRADSHAW, Commissioner of Finance.

City Hall, Toronto, Canada, February 4th, 1919.

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three per cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Saturday, the first day of March next, to Shareholders of record of 31st January, 1919.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.
Montreal, 21st January, 1919.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 128

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank, being at the rate of twelve per cent. per annum, has been declared for the quarter ending 28th February next, and that the same will be payable at the Bank and its Branches on and after Saturday, 1st March, 1919, to shareholders of record at the close of business on the 13th day of February, 1919.

By Order of the Board.
JOHN AIRD,
General Manager.
Toronto, 17th January, 1919.

UNION BANK OF CANADA

DIVIDEND No. 128

Notice is hereby given that a dividend at the rate of 10% per annum upon the paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches, on and after Saturday, the 1st day of March, 1919, to shareholders of record at the close of business on the 14th day of February next.

The transfer books will be closed from the 14th to the 28th day of February, both days inclusive.

By order of the Board.
H. B. SHAW,
General Manager.
Winnipeg, January 16th, 1919.

MILLERS AND MANUFACTURERS INSURANCE COMPANY

(Stock and Mutual)

The Annual General Meeting of the Members and Shareholders of this Company will be held on Friday, the 28th day of February, 1919, at 2 o'clock p.m., at the Company's offices, No. 32 Church Street, Toronto, Ont., for the election of Directors for the ensuing year, fixing their remuneration, and the transaction of other business relating to the management of the Company. And notice is hereby given that at such Meeting a By-law will be submitted to reduce the number of Directors from nine to six.

By order.
C. H. C. FORTNER,

Queen City Chambers, 32 Church Street,
Toronto, February 4th, 1919.

THE FIRE INSURANCE EXCHANGE CORPORATION

(Stock and Mutual)

The Annual General Meeting of the Members and Shareholders of this corporation will be held on Friday, the 28th day of February, 1919, at 12 o'clock noon, at the Company's offices, No. 32 Church Street, Toronto, for the election of Directors for the ensuing year, and the transaction of other business relating to the management of the Corporation.

By Order.
ARTHUR DWYER, Secretary.
Toronto, February 3rd, 1919.

THE HAND IN HAND INSURANCE COMPANY

(Mutual and Stock)

The Annual General Meeting of the Members and Shareholders of this Company will be held on Thursday, 27th of February, 1919, at 11 o'clock a.m., at the Company's Offices, 32 Church Street, Toronto, for the election of Directors for the ensuing year and the transaction of other business relating to the management of the Company.

By Order.
F. E. DINGLE, Secretary.
Toronto, February 3rd, 1919.

THE QUEEN CITY FIRE INSURANCE COMPANY

The Annual General Meeting of the Shareholders of this Company will be held, pursuant to the Act of Incorporation, on Thursday, the 27th day of February, 1919, at 12 o'clock noon, at the Company's Office, 32 Church Street, Toronto, to receive the Report of the Directors for the past year, to elect Directors for the ensuing year, and for the transaction of such other business as may be transacted at a General Meeting of Shareholders.

By Order.
JOSEPH WALMSLEY, Secretary.
Toronto, February 4th, 1919.

THE ROYAL BANK OF CANADA

DIVIDEND No. 126

Notice is hereby given that a Dividend of Three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Saturday, the first day of March next to shareholders of record of 15th February.

By order of the Board.
C. E. NEILL,
General Manager.
Montreal, Que., January 14, 1919.

THE RIORDON PULP AND PAPER COMPANY, LIMITED

COMMON STOCK DIVIDEND No. 12

Notice is hereby given that a quarterly dividend of [illegible] has been declared on the Common Stock of the Company for the quarter ending December Thirty-first, 1918, payable February fifteenth, 1919, to shareholders of record at the close of business on February eleventh, 1919.

By order of the Board
F. B. WHITTET,
Secretary-Treasurer.
Montreal, January thirty-first, 1919.

PERSONAL NOTES

Mr. H. P. Thicknhill has been appointed manager of the Montreal office of the National City Company of New York.

Captain Hugh W. Murray, recently returned from overseas, has been appointed manager of the Toronto office of the National City Company of New York.

Mr. George Torrance Milne, the British Trade Commissioner-General in Canada and Newfoundland, has been awarded Order of the Empire (Civil Division) in recognition of services rendered during the war period. Mr. Milne has received a number of congratulations upon the award of this well deserved honour.

Previous to his recent appointment to Montreal, Mr. Milne was British Trade Commissioner in Australia for five years. He has also resided in various parts of South America. He is a Medallist of the Royal Society of Arts, London, and a Fellow of the Royal Geographical Society.

Mr. Milne has recently returned from a short business visit to England and is much impressed with the industrial progress made in the United Kingdom during the past few years. He is confident that Great Britain will return to the world's markets as a strong, aggressive competitor. War time trade restrictions are being rapidly removed and export business is gradually being increased.

Mr. J. W. Ross, has been elected to fill the vacancy on the board of directors of the Molsons Bank, which was caused by the retirement of Mr. E. J. Chamberlin.

Mr. J. M. Sutherland, formerly manager of the Bay Street branch of the Standard Bank in Toronto, has been appointed manager of the Standard Bank in Vancouver.

Mr. George Green has joined the sales force of Foster, Barrett, Riepert and Low, Limited. He is a son of Mr. E. C. Green, the Montreal manager of the Standard Bank of Canada.

Mr. H. S. Arkell, Dominion live stock commissioner, has been depatched to England in connection with the situation that has developed affecting the export of meats and other animal products from this continent.

Mr. Blake Robertson, assistant superintendent of immigration, has resigned his post in the Government service, after fourteen years' connection with the department. He is joining the expert staff of the Canadian Manufacturers' Association.

Mr. Wilson W. Butler, the new president of the Canadian Car and Foundry Company, has been connected with that concern since 1901. His early business experience was obtained in the United States. Mr. Butler is president of the W. W. Butler Co., Ltd., and director of the Page Hersey Iron Tube and Lead Co.

Mr. Mark Workman, president of the Dominion Steel Corporation, sailed for Europe on the Aquitania on Feb. 2nd. He said that the main object of his trip to Europe was to secure some large steel contracts for export to Europe, which would go far towards keeping the plants at Sydney busy for a long time to come.

Mr. E. W. Beatty, K.C., president of the Canadian Pacific Railway, was the guest of honor at a banquet tendered him by the Board of Trade of Thorold this week. Forty-two years ago Mr. Beatty was born in Thorold and the town was in gala attire on the day of the banquet which was attended by representative public men from that part of the province.

Mr. W. E. Findlay, of Montreal, has been appointed Canadian Manager (British Columbia excepted) for the Niagara Fire Insurance Co. of New York. The Niagara Fire of New York is one of the old and experienced companies. On December 31st the company's total assets amount to $9,275.077 with a net surplus of $2,923,672. It is well and favorably known in fire insurance circles.

Mr. Adam Reid has been elected president of the Western Life Assurance Company, head office, Winnipeg, Man. Mr. Reid has been managing director of the company since its inception and has now been elected to its highest office in the place of Mr. A. E. May of Edmonton, who still remains a member of the board of directors.

Mr. Alfred G. Fletcher has been elected vice-president of the American Foreign Banking Corporation. Mr. Fletcher was born in Brampton, Ont., is well known in Toronto. His early banking training was gained during seven years' service in the Canadian Bank of Commerce. Leaving there in 1902 he took an active part in the organization and management of the Metropolitan Bank, being superintendent of branches in that institution when the Bank of Nova Scotia merged with it in 1914. After the amalgamation he was engaged for a time in special investigation work for the Bank of Montreal, and went to New York in the summer of 1917 to assist in the organization for war work of some large industries in the United States.

NORTHERN ONTARIO'S METAL MINES

Over $7,000,000 Profit for 1918—Silver Mines Continue to Lead

During the year 1918, the silver and gold mining companies of Northern Ontario paid over $7,000,000 in profits or dividends to their shareholders or owners. The Nipissing Mining Company headed the list. The Mining Corporation came second with the Hollinger Consolidated a close third. The only new dividend payer was the Lake Shore Gold Mines. Altogether twelve companies paid dividends, nine of them being silver mine operators, and the remaining three being gold mining companies. This compares with twenty dividend payers in 1917, among which were fifteen silver mining companies and five gold mining companies. The dividends paid during 1917 amounted to $7,726,843 in addition to which was the large profits from the private operations. This compares with $6,581,477.04 in 1918, in addition to which was the large profits from the O'Brien Mine at Cobalt, and the Miller Lake-O'Brien Mine at Gowganda, which probably served to make the total well over $7,000,000 for the year 1918.

It is evident, therefore, that the precious metal mines of Canada are in a very strong position. The total dividends paid to the end of 1918 now aggregate approximately $91,065,110.04.

Dividend Payments

The following table shows the amount of dividend payments during 1918:—

Cobalt Mines

Company	Amount
Nipissing, 25 p.c.	$1,500,000.00
Mining Corporation, 85½c per share	1,244,731.44
Kerr Lake, 20 p.c.	600,000.00
Coniagas, 12½ p.c.	500,000.00
Buffalo Mines (Capital Reduction)	250,000.00
Temiskaming, 3 p.c.	75,000.00
McKinley-Darragh, 12 p.c.	269,712.00
Penn-Canadian, 3 p.c.	40,491.15
La Rose, 2 p.c.	30,000.00
Total	$4,509,934.59

Porcupine Mines

Company	Amount
Hollinger Consolidated, 5 p.c.	$1,230,000.00
McIntyre-Porcupine, 15 p.c.	541,542.45
Total	$1,771,542.45

Kirkland Lake Camp

Lake Shore Mine, 5 p.c.	$100,000.00

The following table summarizes the above details:—

Cobalt	$4,509,934.59
Porcupine	1,771,542.45
Kirkland Lake	100,000.00
Grand Total	$6,381,477.04

Silver Mines

With the O'Brien Mine at Cobalt producing at the rate of more than a million ounces of silver annually, and the Miller Lake-O'Brien Mine of Gowganda also producing over one million ounces annually, it is evident the profits from the operation of these two mines must be large, and undoubtedly serves to raise the total profits from the silver mines to between $5,000,000 and $6,000,000 for the year just ended.

Gold Mines

It is considered very significant in the North that the gold mines were able to pay the large total of $1,871,542.45 during 1918. The year constituted the most unfavorable twelve-month period through which the gold mines have been compelled to struggle. It should perhaps be pointed out that the gold mines earned a much larger amount than that shown in the dividends paid. The Hollinger began the year with something like one quarter of a million surplus, whereas the company now has $2,250,000 in Canadian Government bonds. The Lake Shore also earned considerably more than that distributed in dividends.

EFFECT OF PEACE ON ST. JOHN

Early Resumption of Old Lines of Traffic is Expected—New Developments in Industry

St. John, which has been giving vent to its jubilation lately because of the great war victory and because of the phenomenal success of the Victory Loan campaign, sees further cause for jubilation in the hopeful outlook for the winter port season. Already the great ships, still bearing their fearful and wonderful war camouflages, have begun to arrive, among the first being the ocean steamships Montcalm, Holbrook, Ajana, Dunbridge, Changuinola, War Python, Queen Margaret and Tunisian. A dozen others are on the way, some with cargo, some with ballast and some with returning troops. All of them, it is expected, will take back full cargoes of grain, lumber and other goods.

The freight handlers' strike, which threatened to develop into large proportions, has been settled through the mediation of the mayor. The men will receive 47 cents per hour.

The close of the war will doubtless release immense quantities of lumber which have been held for export for two years and more because of lack of transportation facilities. Scarcity of tonnage will still prevent its rapid movement overseas, but it is expected that some large shipments will be made this winter. The British shipping authorities have been asked to expedite lumber shipments by permitting sailing ships to enter the war zone. The Imperial authorities have also been urged to help out the steamer situation in the West Indies, South American and South African trades.

With a view to the early resumption of sea traffic between St. John and Boston, the city council has made large expenditures on wharf repairs and improvements at the Eastern Steamships Corporation pier. The corporation has not yet been able to obtain a suitable steamer for the service, but it is looking for an early release by the Shipping Board of at least one of the former steamers of this line.

Harbor Activities

One of the incidents of foreign trade was the recent arrival direct from South America of the steamship Henrik Ibsen with a full cargo of coffee, cocoa and hides, all of which were shipped through this port to upper and western Canadian points. This was the first general cargo steamer from South America to be brought to this port, the traffic hitherto having been carried on through New York. That it may be the forerunner of a South American-Canadian line in the near future is the hope of Canadian shippers. The consignees of the cargo of the Henrik Ibsen were greatly pleased with the shipping facilities at this port.

Another subject that is receiving attention at the hands of the federal government is the placing of the harbor of St. John in the hands of a national harbor commission. The port has made a wonderful showing during the past four years, its exports increasing from $43,000,000 in 1915 to almost $201,000,000 in 1918, and its imports from $9,000,000 to $17,000,000. It now ranks second among the ocean ports of Canada in the volume of its export and import traffic.

The construction of the dry dock is being pushed by the St. John Dry Dock and Shipbuilding Company, who took over the contract of Norton, Griffiths & Company, Limited.

Mr. A. P. Barnhill, of St. John, has been added to the new directorate of the Canadian Government Railways. Mr. Barnhill is a talented lawyer in whom the public has full confidence.

Arrangements are being perfected for the establishing here of an aeroplane factory. Captain Hay, of the Royal Flying Corps, will be the technical expert.

It is expected that now that war is over the federal authorities will at once take up the matter of completing the piers on the west side, upon which work had been suspended. The government is also under promise to proceed with the extension of the breakwater to Partridge Island.

The St. John objective in the Victory Loan was $5,000,000. The total amount subscribed was $6,523,650. New Brunswick also exceeded its objective by approximately two million dollars.

CANADA'S PROSPECTS AS STEEL PRODUCER

Everything Necessary for Producing High Quality Material Abundant

In the course of an address before the Canadian Manufacturers' Association, Toronto, on January 27th, Colonel David Carnegie, of the Imperial Munitions Board, in speaking of the prospects for trade with Great Britain, France and Belgium for Canadian iron and steel products, said:—

"We have fine deposits of magnesite in Canada, developed during the war, which is of excellent value for our furnaces, making it unnecessary to import as hitherto; our carbon electrodes are second to none and cheaper than are produced in England: we have nickel in abundance; everything, in fact, calls for Canada to rise to the first rank as a producer of high quality steels. She has the opportunity by sustained and wise propaganda of displacing much of the heavy, cumbersome, short-lived, common carbon steels used in our rolling stock, ships, dredges, docks, mines and general machinery, and of becoming one of the principal exporting countries in the world. The things I have named—power, electrodes, magnesites and nickel—enter so much into the total cost of producing high grade steels that Canada stands but almost alone in its great opportunities in this direction."

Discussing prospects of trade with France, Colonel Carnegie said that the resourcefulness of that country, especially with the restoration to her of Alsace and Lorraine, would enable her to repair her own waste places without calling upon other countries; indeed some believed that France would not only be able to reconstruct her own country, but would be a formidable competitor with Britain and other industrial nations in the export of her surplus productions to foreign markets.

As for Belgium, it was believed she would need to buy iron and steel products for one or two years while she was rebuilding, but after that she would return to her former place as an exporter, particularly of rolled steel and cast steel products.

"Regarding Britain, the amount of work likely to be secured through Government channels for public works will no doubt exceed the pre-war annual requirements, owing to most of the ordinary Government contracts during the war having been suspended," said Colonel Carnegie.

"Canada has increased her steel production per annum from one million tons before the war to two and a quarter million tons at present. United States steel production had increased from thirty-two million tons to forty-five million tons, and Britain's from seven and a half million to twelve million tons per annum."

Touching on Britain's high cost of production compared with pre-war costs, Colonel Carnegie said that while Britain has a capacity to supply her domestic requirements, she will have a struggle to maintain both her home and export trade against United States and Canadian competition.

"Facts show that Britain has a capacity for steel production exceeding her pre-war capacity of 62 per cent., while Canada's capacity has increased 125 per cent.," said Colonel Carnegie. "If Canadian manufacturers will follow Britain's example by determining to supply her domestic trade more fully than in the past, Canada will go a considerable distance in using her surplus steel capacity.

"Canada should have at least one structural mill for rolling heavy structures.

"The home demands alone of the electrical industry for higher quality steel sheets is not by any means insignificant, and should be supplied by our manufacturers who have finishing mills.

"The growing demands for alloy steels for motor cars, tractors and all kinds of engines and high-class machinery where excessive wear calls for a better and more enduring steel, should arouse the most earnest attention of the makers of electric and crucible steel.

"The importation into Canada of tool steel, file steel and files, spring steel and springs should be reviewed by the makers of high-class steel. There is no doubt that a much larger volume of that business should be undertaken by the manufacturers of Canada."

CANADA'S WHEAT YIELD

Estimated at 189,301,350 Bushels in 1918—Average of 11 Bushels Per Acre

The Dominion Bureau of Statistics has issued the definite value and estimate of the yield of crop in Canada for the season of 1918, as compared with 1917. The figures now issued are subject to slight revision upon completion of final adjustments with provincial governments.

The total yield of wheat for Canada in 1918 is returned as 189,301,350 bushels from 17,353,902 sown acres, an average yield per acre of 11 bushels. In 1917 the corresponding figures were 233,742,850 bushels from 14,755,850 acres, a yield per acre of 15¾ bushels. The yield of oats in 1918 was 380,273,500 bushels from 14,790,336 acres, an average of 25¾ bushels per acre, as compared with 403,009,800 bushels from 13,313,400 acres in 1917, an average of 30¼ bushels per acre. Of the remaining grain crops the total yields in 1918, with the figures for 1917 in brackets, were, in bushels, as follows:

Barley, 77,290,240 (55,057,750); rye, 8,496,700 (3,857,200); peas, 3,110,100 (3,026,340); beans, 3,568,380 (1,274,000); buckwheat, 11,428,500 (7,149,400); flax, 5,972,200 (5,934,900); mixed grains, 35,730,300 (16,157,080); corn for husking, 14,214,200 (7,762,700); potatoes, 104,512,700 (79,892,000); turnips, etc., 130,989,600 (63,451,000); hay and clover, 14,681,400 tons (13,684,700); fodder corn, 4,776,000 tons (2,690,370); sugar beets, 180,000 (117,600); alfalfa, 446,400 tons (262,400).

The average values per bushel of grain crops for Canada in 1918, according to the prices returned by crop correspondents of the Dominion Bureau of Statistics, were as follows: Fall wheat, $2.08, as compared with the same price in 1917; spring wheat, $2.00, as against $1.93; fall wheat, $2.00, as compared with $1.94 in 1917; oats, 77c., against 69c.; barley, $1.00, against $1.08; rye, $1.50, against $1.62; peas, $2.54, against $3.54; beans, $5.42, against $7.45; buckwheat, $1.58, against $1.46; flax, $2.65, against $3.50; mixed grains, $1.14, against $1.16; and corn for husking, $1.77, against $1.84. Of potatoes the price per bushel in 1918 was 98c., as against $1.00 in 1917; turnips, etc., were 42c., against 46c.; hay and clover, $17.00 per ton, against $10.33; fodder corn, $6.14 per ton, against $5.14; sugar beets, $10.25 per ton, against $6.75; and alfalfa, $7.84 per ton, against $11.59.

SASKATCHEWAN REDUCES TRUST COMPANY TAX

A reduction in the increased tax to be levied against trust companies under a bill which was considered before Christmas, was made by the Saskatchewan legislature on January 14th.

In committee of the whole it was decided to retain the provision for increasing the tax on trust companies to 1½ per cent. of the gross income derived from all sources, but it was decided to reduce the tax to one half of one per cent. on moneys handed to the companies for investment as trust funds.

SHAREHOLDERS OF BANK OF OTTAWA TO MEET

A special general meeting of the shareholders of the Bank of Ottawa will be held at the head office of the bank at noon on March 4th to authorize the board of directors to carry through the agreement of sale recently made for the sale of the bank's assets to the Bank of Nova Scotia, and to do everything necessary for securing the assent of the government to the amalgamation.

This matter was not voted on at the annual meeting of the Bank of Nova Scotia held on January 22nd, but will be dealt with at a later special meeting called for the purpose. The report to the effect that Mr. C. H. Cahan, K.C., was to be assistant manager of the Bank of Nova Scotia has been found to be incorrect.

ASK NO FIXED PRICE FOR WHEAT CROP

Alberta Farmers Consistent in Fight Against Protected Interests—Restoration of Open Market Wanted

At the closing session of the convention of the United Farmers of Alberta held recently, the stand that there will be no fixed price for the 1919 wheat crop was taken unanimously. The decision was reached after a prolonged discussion [illegible] the majority of the delegates changed their [illegible] completely, for when the matter was first brought up in the form of a resolution there was a big demonstration for a guaranteed price. The resolution covering the subject declared that as the ground had been prepared at war time prices of labor, cost of living, implements, etc., that there should be some assurance that the wheat growers received a fair return for their investment.

C. F. Brown, of Richdale, moved an amendment that there be added to the resolution this clause: Resolved that the Dominion government control the operation of grain exchanges at least until July, 1921, to the end that trading be confined to cash grain and future deliveries, and the suppression of trading in options.

President Wood spoke to the resolution and explained his view on the matter. He explained world marketing conditions and gave reasons why the United States could afford to fix a price and lose money on it. But the big point to be considered was the position the farmers would be in by asking the government to make them a protected interest while the farmers were going to the government and demanding that the tariff walls be torn down; that there be competition in every industry. It would make the farmer look ridiculous.

Text of Resolution

The following resolution was then framed and when presented passed without a dissenting voice:—

Whereas the fixing of the price of wheat was a war measure for the steadying of the market and the keeping down of the high cost of living,

Whereas, while we view with a large measure of concern the restoration of an open market that will make speculation possible in the handling of our chief food product, yet we realize that the continuation of a fixed price on wheat might unduly bear on the consumer and,

Whereas we, as producers, are willing that the prices of our products be governed by the law of supply and demand, but protest against scalpers and speculators taking toll which frequently amounts to more than the profits to the producer,

Therefore be it resolved that we, the U. F. A., in convention assembled, demand that legislation be passed confining the dealing in all grain, on exchanges or elsewhere, to cash grain and sales for actual future delivery of grain and grain products, and that steps be taken to provide the necessary credit to finance all farmers who have grain for sale until such time as they desire to market same.

President Outlines Reasons

President Wood went to some length in outlining his reasons why the U. F. A. should not ask for a fixed price. Practical conditions entered into the situation which had to be considered. In the first place, if Canada had a good crop next year three-quarters of it would have to be sold in the world market. He compared this with the situation in the United States where the price had been fixed. To the south, unless a very abnormal crop was raised, the American people could consume it all, and could enforce that consumption by an embargo on all import, so that there was not a chance of the government losing. But Canada must export whether she wishes to or not, and the difference between the price guaranteed and the price received the government would have to pay, and reimburse itself by taxation. "If, as we contend," declared Mr. Wood, "the farmer is now paying the bulk of the taxes, would it pay us?" When the price was fixed before there was the world demand, and the government made no profit, but this year there could very easily be a loss of $300,000,000.

"The farmer," continued the president, "had been held up as profiteer under the guaranteed price of $2.21 by financial papers and the trades people and consumers generally who did not understand that the price had been set to keep it from going to $5.00 a bushel. If it were fixed again the farmer would have a hard time defending his position."

He believed the government, or at least the trained politicians who look into the future, were considering the offering of a fixed price to the farmers that would close their mouths when they went to Ottawa and demanded the elimination of the tariffs on farm machinery; the move also aimed to divide the farmer and the labor party, and make the laboring man turn to the farmer and say "You are the real profiteer." In closing he asked that the delegates consider all the facts very closely before making any decision.

Cattle Guards

In the matter of cattle guards, it was decided that the government be asked to have the Railway Act so amended that the present style of guards would be declared illegal, thereby forcing the railway companies to install guards that will turn stock. That the railway companies be made responsible for any damage caused to any stock within their fences, and that the department of justice be asked to send out an impartial inspector to report on these conditions and secure payment for stock that has been killed.

Under the head of railway and irrigation development it was resolved that the convention urge the Dominion government at once to proceed to complete all railroad lines, branches and feeders, that have already been begun, and further that the same procedure be applied to such applications for water, either for domestic or irrigation purposes, the board being commissioned to carry this into effect.

In regard to land taxation, the convention questioned the wisdom of a fiscal policy that imposes its main burden on land, used almost exclusively for the production of food. An amendment that there be a graduated tax on land holdings, even where the land was cultivated, was not approved.

CANADA'S FOREIGN TRADE HAS DECREASED

A summary of the trade of Canada for the 1918 calendar year, issued by the Dominion Bureau of Statistics, places the value of Canadian exports for the 12 months at $1,229,708,244, as compared with $1,547,340,885 for 1917, and $1,091,706,403 for 1916. Imports for consumption were to the value of $906,954,900, as against $1,005,071,716 in 1917 and $766,501,512 in 1916.

There was a considerable falling off in the amount of duties collected in 1918, the total being $154,849,472. In 1917 collections reached the larger total of $167,041,330, while in 1916 the customs revenue stood at $139,002,178.

During 1918 goods exported to the United Kingdom were to the value of $594,250,690. These figures were away below the exports in 1917 to the United Kingdom, when they were valued at $873,706,892, and also below the 1916 figures, which stood at $709,566,967. Imports from the United Kingdom likewise dropped, being to the value of $72,879,109, as against $91,136,728 in 1917 and $102,956,836 in 1916.

The United States exports to Canada fell below the 1917 figures, when they were to the value of $828,886,594, as against $738,142,064 in 1918. In 1916 the United States sold to Canada goods worth $592,088,039. Canada sold to the United States goods valued at $433,232,149, which was approximately $2,000,000 worth more than 1917. As compared with 1916, when our sales amounted to only $260,924,864, the increase was large.

Canada's exports to France in 1918 stood at $101,501,396, or just a little more than one-half of the value of French goods imported in 1917, but almost twice the value of 1916 exports, which stood at $55,771,533. Our imports were, from France, small, being to the value of $3,754,761, as against $5,715,779 in 1917 and $6,371,086 in 1916.

The Bank of Hamilton has opened a branch at Weldon, Saskatchewan, in charge of Mr. O. Olafson, who has been appointed manager.

CHANGES IN LABOR APPEAL BOARD

Mr. H. J. Thomas, of the J. R. Booth Company, Ottawa, and Mr. J. A. McLelland, vice-president of the International Association of Machinists, Montreal, have been appointed to the Labor Appeal Board in succession to Mr. George H. Duggan and Mr. Gustave Francq, respectively, who have retired. The first mentioned, and Mr. S. R. Parsons, represent the manufacturers upon the board, and the second, with Mr. John Bruce of Toronto, represents the interests of labor. The fifth member, who is chairman, is Mr. Justice McLelland, of Montreal.

CANADIAN TRADE COMMISSION WANTED

The Border Chamber of Commerce, representing the municipalities of Windsor, Ford, Walkerville, Sandwich and Ojibway, Ont., recently passed a resolution urging upon "the Dominion government the necessity for the immediate appointment of a permanent commission, the sole function of which would be toward the expansion of the general trade of Canada; and further, that such commission be amply and generously financed for the widest and most active conduct of such effort."

BRITISH COLUMBIA INSURANCE INSTITUTE

The Insurance Institute of British Columbia held its opening session of the season on January 14th, says the British Columbia "Financial Times." Mr. Fred. Burgess, president of the Mainland Board, was in the chair, with an attendance of about 25 members. The feature of the evening was an address by Mr. R. W. Douglas, of Douglas, Mackay and Co., entitled "The Humorous Side of the Insurance Profession." The next meeting will be held on the 28th, when ex-fire chief Davis, of Victoria, will speak on "Experience of a Fire Chief."

MONTREAL SCHOOLS ASKING FOR HIGHER RATES

A bill has been introduced into the Quebec Legislative Assembly by Mr. Gault, of St. George, Montreal, brought in for the Montreal Protestant School Board, asking for substantial increases in the Protestant school rate, and also in the neutral school rate. The Catholic School Commission of Montreal intend to support this demand for an increase in the neutral rate, but so far it is not anticipated that the commission will ask for an increase in the Catholic rates.

The bill of the Protestant board asks that the rate be increased from 60 cents per hundred dollars, or six mills, to 80 cents, and that the neutral rate be raised from 70 cents to 80 cents. Last session the rate was increased to 60 cents from 50 cents, and at the same session the Catholic rate was increased from 40 cents to 50 cents. In view of the circumstances quoted by the Protestant school authorities, there will doubtless be an increase allowed, but probably this will be 70 cents instead of 80 cents, as a jump of 20 cents is looked on as somewhat high in one session.

In support of their request for the higher rate, the Protestant School Board claim that it is absolutely imperative that the salaries of school teachers be increased, also that the annual deficit be done away with. They expect that the 1919 deficit will be $250,000, taking in increases in salaries. The deficit in 1915 was $108,965, and it went to $288,834 in 1918. With the rate of tax asked for, the board hopes that such deficits will be avoided. Also, permission to borrow half a million dollars.

The Imperial Bank has opened a branch at Smooth Rock Falls, Ontario, in charge of Mr. R. C. Vaughan, formerly of Timmins, Ont.

The province of Saskatchewan will give financial assistance to the cities of Moose Jaw and Prince Albert with a view to making them livestock centres for the province.

MEAT INDUSTRY IN CANADA

Capital Invested in 1917 Amounted to $85,673,271—Exports and Imports

The Dominion Bureau of Statistics has completed a preliminary census of the meat industry in Canada for the year 1917, the statistics being compiled under the following heads:—

1. Slaughtering and meatpacking with 69 plants.
2. Slaughtering not including meatpacking with 10 plants.
3. Other related industries including sausage, sausage casings, tallow refined and beef extract with 11 plants.

Capital and Salaries and Wages

The total capital invested in the industry was $85,673,271, of which $68,145,347 was in the first class, $17,044,264 in the second and $483,660 in the third class. The statistics of employees, salaries and wages by sex distribution are summarized in the following table for each of the above named classes:—

	Employees		
Class	Males	Females	Salaries
Slaughtering and meatpacking	1,486	375	$2,211,683
Slaughtering not including meatpacking	247	59	402,593
Other related industries	13	6	27,197
Total	1,746	440	$2,641,473

	Employees		
Class	Males	Females	Wages
Slaughtering and meatpacking	6,218	687	$5,772,545
Slaughtering not including meatpacking	1,184	51	1,053,581
Other related industries	55	18	47,714
Total	7,457	756	$6,873,840

Materials and Products

The value of materials used in the production of meats for consumption was $156,095,921, of which class (1) accounted for $117,196,755; class (2) for $38,669,565, and class (3) for $229,601.

The value of production was $153,279,252 in class (1), $53,441,466 in class (2) and $452,585 in class (3), or a total for all classes of $207,173,303.

Itemizing the articles of production for value, fresh meats with $79,586,596 occupies first place, cured meats with $78,886,140 the second, various by-products with $28,865,045 the third, and other food products with $19,835,522 the fourth.

Exports and Imports

The value of meats being the produce of Canada exported to all countries for the calendar year 1917 was $77,119,877. Meats imported into Canada for consumption during the same period amounted to $35,069,085, so that the total value of meats available for home consumption based on production and imports, less amount exported, was $108,106,329.

INCOME MINIMUMS TO BE RAISED

The Toronto Board of Control will, at the next session of the Ontario Legislature, ask for an amendment to the assessment act to the effect that the income exemption of unmarried persons in Toronto be raised from $600 to $1,000, and of married persons from $1,500 to $2,000.

Financial institutions contemplate the establishing of a chair in the Halifax County Academy, or in Dalhousie University, or in whatever educational institution might be considered best, for the study of Spanish. This would be most timely and appropriate, in view of our trade with the West Indies and South America.

Imperial Munitions Board Offer For Sale

PLANT AND EQUIPMENT (IN PART) OF

BRITISH CHEMICAL CO., Ltd.

TRENTON, ONT.

TENDERS accompanied by marked cheque for 5% of the amount of the bid will be received by the undersigned up to and including February 27th, 1919, for the purchase of the following, located at Trenton, Ontario:—

ITEM NO. 1. SULPHURIC ACID CHAMBER PLANT—2 Complete Pratt Patent Sulphuric Acid Chamber Plants equipped with Glen Falls sulphur burners and pyrite burners, cap. 31,000 pounds of sulphur and 40 tons pyrites per day. Chamber space, 200,000 cubic feet. Capacity of unit 60 tons of 60 deg. sulphuric acid per day.

ITEM NO. 2. SULPHURIC ACID CONCENTRATOR—This plant consists of 8 Skoglund Concentrating Units complete. Each unit has an operating capacity of 25 tons, 66 deg. Sulphuric Acid per 24 hours.

ITEM NO. 3. NITRIC ACID PLANT—Consists of 24-6,000 pounds Cast Iron Retorts, oxidizing and absorption towers. This plant has a nitre storage of 2,000 tons' capacity and 2 rotary soda dryers. Acid mixing house attached to this plant is equipped with 9 horizontal mixing tanks.

ITEM NO. 4. SMOKELESS POWDER PLANT—(a) Manufacturing Line—A complete plant for the manufacture and finishing of smokeless powder, operating capacity of the line 50,000 pounds per day.

(b) Ether Alcohol System—Complete Badger equipment for the manufacture of ether, consisting of 3 sets of Dephlegmators columns and condensers with 2 ether pots per set. Three complete alcohol rectifying units, capacity 30,000 pounds per unit per 24 hours. Alcohol storage for 1,500,000 pounds, with equipment for denaturing the same.

(c) Refrigerating Systems—2 Refrigerating plants, one consisting of 2-25 ton units and the other consisting of 1-50 ton unit, both complete in detail.

ITEM NO. 5. LAND—255 Acres—The Plant is situated on the Trent River—5 miles standard gauge track (leased) connecting with the C.P.R., C.N.R. and G.T.R. 2 Miles narrow gauge (owned).

There is available 6,000 electric H.P. with the necessary electrical installation. The plant is completely equipped with the required auxiliary buildings, such as store houses, shops, office buildings, together with housing facilities.

Tenders will be considered for any one or all of the above items, together with any of the auxiliary buildings.

Intending purchasers will be given every facility to inspect the buildings and equipment. Complete information may be obtained from the undersigned.

The highest or any tender not necessarily accepted

Cheques from unsuccessful bidders will be promptly returned.

Trenton, Ont.—Owing to a typographical error in *The Monetary Times* last week the notice of a sale of $7,000 6 per cent. bonds was placed under the heading of Toronto.

Maisonneuve, Que.—City Commissioner DeSerres has given notice of his intention to propose a by-law providing for a loan of $3,300,000 with which to pay certain debts of the city of Maisonneuve, now a part of Montreal.

Lanark County, Ont.—Messrs. A. E. Ames and Co., of Toronto, have purchased a block of county of Lanark bonds, amounting to $100,000. They bear 5½ per cent., and are payable in 20 instalments. The money is to be spent for good roads.

Renfrew, County, Ont.—The county council at a meeting last week passed a by-law for the issuance of debentures to the extent of $20,000 to be spent on good roads this year. This will be in addition to the balance of $9,000 remaining from last year's allotment for the purpose.

Fredericton, N.B.—The Fredericton council has committed itself to a permanent paving policy which will entail an expenditure not to exceed $200,000, and extending for a period not more than five years, which will be financed by an issue of serial bonds extending over a period of 15 years and bearing interest not exceeding 6 per cent. per annum.

Brantford, Ont.—City Treasurer Bunnell informs *The Monetary Times* that the debentures in connection with the by-laws recently passed will not be issued in any event until about the close of the current year, as arrangements have been made to provide funds for any moneys in the meantime. The works have not yet been commenced and not likely to be for some weeks. It is his opinion that in future the city can dispose of any bonds locally, rather than go into the public market.

Burnaby, B.C.—Nearly one and three-quarter million dollars is the reduction in the assessment roll of the municipality of Burnaby for the coming year. The total assessment amounts to nearly sixteen millions, which, with exemptions of about a million, brings the net assessment to fifteen millions in round figures. There are about four and a-half millions worth of improvements in the municipality, according to the figures submitted by the assessor at the municipal council meeting.

Toronto, Ont.—Sealed tenders will be received up till February 14th, 1919, for the purchase of $650,000 bonds, issued for Hydro-Electric purposes. The bonds are payable both as to principal and interest in gold, in Toronto and New York, and carry interest at the rate of 5½ per cent. per annum, payable half-yearly on January 1st and July 1st, the first half-yearly instalment of interest being due and payable on July 1st, 1919. The advertisement, which appears on another page of this issue, gives full particulars.

Edmonton, Alta.—The $20,750 7 per cent. school debentures, of which particulars were given in *The Monetary Times* of January 17th, were awarded as follows: Block No. 1, Rural, 1[illegible]-year, $9,000, awarded to Dominion Loan and Securities Co., Ltd., at 99.76. Block No. 2, Rural, 10-year, $6,300, Block No. 3, Rural, 12-year, $2,250, Block No. 5, Rural, 15-year, $1,000, Consolidated School District Etzikom, $1,800, all four blocks being awarded to W. L. McKinnon and Co., at 99.88. Block No. 4, Rural, 5-year, $400, awarded to the Manufacturers' Insurance Co., at 99.50.

Toronto, Ont.—From present indications it would appear that the city's current expenditure this year would approximate $27,000,000. On the other side of the ledger, however, there are credits which may help to a considerable extent. Last year debentures to the amount of $2,740,683 matured. This year the amount of debentures maturing will be $3,154,938. The debt charges which last year amounted to the large sum of $6,479,954 should, therefore, decrease to some extent this year. As things look at present the tax rate will be even larger than it was last year, when it was 30½ mills. This can be reduced, however, by adopting a different method of financing to that of last year, when war expenditures were met by the current taxes instead of by debentures as proposed under the original policy.

Edmonton, Alta.—The city is still in the awkward position that, while it has brilliant prospects for the future, it cannot collect enough money at the present time to pay its current expenses. There is plenty of money due to the city, but it cannot be got by any method which has yet been devised. There is a sum of $1,500,000 in arrears from the year 1918, and the sum of $6,000,000 due in arrears altogether. If the municipality had only a part of these sums it would be on easy street. An appeal has been made to the local government and it is entirely probable that some relief can be granted and assistance extended. Hon. A. G. Mackay, minister of municipalities, has the subject under advisement on behalf of the government and says that something will soon be done.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from January 20th to January 25th, 1919:—

Rural Telephone.—Ethelton, $700 15-years not ex. 7¼ per cent. annuity.

School Districts.—Hubbard, $5,000 10-years not ex. 8 per cent. annuity. Tuscola, $2,500 10-years not ex. 8 per cent. annuity.

Town.—Ogema, $1,500, building a fire wall, not ex. 7½ per cent. annuity.

The following is a list of debentures reported sold from January 20th to 25th, 1919:—

School District.—Warmley, $750; Regina Public School Board Sinking Fund Trustees.

Rural Municipality.—Oakdale, $3,846.16; Tom Valance.

Three Rivers, Que.—The following is a list of tenders for the issue of bonds of which mention was made in these columns last week:—

J. L. P. Mercier, notary, Quebec	99.25
J. Spenard, Quebec	99.01
A. E. Ames and Co., Toronto	98.35
H. McCrea, Toronto	98.25
Foster, Barrett and Co., Rupert and Low, Montreal	98.21
H. R. Wood and Co., Montreal	98.17
Dominion Securities Corporation, Toronto	98.10
Versailles, Vidricaire and Boulais, Montreal	98.06

HIGH PRICES FOR NEW ISSUES

The high price obtained for the New Brunswick bonds emphasizes the sold-out character of the Canadian market in respect to high-grade offerings. Only odds and ends of old bonds are obtainable, outside of the war loans, and these are already at good premiums. New issues of last year in the provincial government and the municipal line are also commanding good premiums. The premium on New York funds enters as a big factor into current bids for new issues. The market is bare for institutional buying in Canada on the one hand, and on the other, because of the willingness of American investors to buy. The premium on New York funds adds about 2 points to a price that would be considered fair if exchange were at a parity.

NEW BRUNSWICK BONDS

Tenders for the purchase of $450,000 worth of 15-year 5½ per cent provincial government bonds closed on February 1st, and the block was sold to the highest of more than 20 bidders, J. M. Robinson and Sons, of St. John, N.B., with whom is associated A. E. Ames and Co., of Toronto. The highest tender was 100.35. The second was 100.279. The amount realized is to be applied in connection with the construction of the Valley Railway work. The firm of J. M. Robinson and Sons, in securing the issue, have lived up to their record of successful tendering for provincial bonds, having handled all issues in recent years, with the exception of one issue sold in the United States and those sold over the counter.

It is altogether likely that the bonds will be disposed of privately and without any public offering. It is understood that one corporation alone in the United States is taking over half of them. The yield will be fractionally under 5½ per cent. New Brunswick's net debenture debt stands at $9,896,556, and the assets of the province are given as over $38,000,000.

The following is a partial list of bids:—

J. M. Robinson and Sons, with A. E. Ames and Co.	100.35
H. R. Wood and Co.	100.279
G. A. Stimson and Co.	100.273
Eastern Securities	99.612
Canada Bond Corporation	99.41
Dominion Securities Corporation	99.385
A. Jarvis and Co.	99.13
Harris, Forbes and Co.	99.127
R. C. Matthews and Co.	99.03
C. H. Burgess and Co. and Campbell, Thomson and Co.	98.91

The Separate School Board of Toronto has adopted a resolution to borrow $500,000.

DISTRICT OF WEST VANCOUVER

According to its financial statement for the year ended December 31, 1918, the municipality of West Vancouver, B.C., has just met its expenses for the year. The total receipts were approximately $90,000, of which $40,000 were taxes collected on current accounts, and $26,000 were tax arrears collected. About $10,000 was obtained from a tax sale, and the balance of the revenue consisted of water rates, etc. The municipality's tax arrears now amount to $95,911, in addition to which there are $44,596 of tax sale lands vested in the municipality. An overdraft of $83,250 was brought forward in 1918, and one of approximately the same amount is carried forward in the current year.

According to the balance sheet as at December 31st, the debenture debt, including local improvements, is $713,275, and there are current liabilities to the amount of $45,665. The assets, including tax arrears, municipal works, investments and sinking funds, total $1,052,341, so that there is a surplus over liabilities of $293,300.

RIORDON BOND ISSUE

The Royal Securities Corporation, Montreal, acting in conjunction with Messrs. Wm. A. Read and Co., of New York, E. H. Rollins and Sons, Parkinson and Burr and Coffin and Burr, of Boston, is offering $4,000,000 of Riordon Pulp and Paper Company 6 per cent. 10-year general mortgage bonds.

These bonds are secured by a general mortgage on the Riordon plants, and by collateral deposit of the controlling interest in the Ticonderoga Pulp and Paper Co., of Ticonderoga, N.Y., and the controlling interest of the Kipawa Co., Ltd.

Funds arising from this new financing, together with a large investment by the Riordon Co. itself, are being devoted to the construction of a 30,000-ton bleached sulphite pulp mill on Lake Temiskaming in northern Ontario, which mill is expected to be in operation by December, 1919.

With this new issue of $4,000,000 of bonds the Riordon Co. will have a total of $6,000,000 of bonds issued, against fixed assets which are valued at $15,000,000 and net liquid assets amounting to $2,250,000. Net liquid assets alone are, therefore, approximately 35 per cent. of the total bonds outstanding.

Average earnings of the company for the last three years are $1,600,000, or over four times the interest on all bonds outstanding, including this issue.

Terms of the offering are not yet announced. The securities are now being underwritten in Canada; a public offering may be made soon.

It is understood that the American syndicate associated with Royal Securities Corporation offered their bonds in the American market privately last week and sold their entire participation within two days.

JANUARY BOND SALES

Record of Government, Municipal, Railroad and Corporation Financing for the Month

Provincial bond sales in Canada in January totalled $5,625,000, the greater part of which was sold in the United States.

The municipal bond sales in January amounted to $1,581,587, compared with $561,000 in January a year ago. There were many small issues during the month, but nothing of importance occurred. The following table summarizes the municipal bond sales by provinces:

Province.	Amount.
Ontario	$ 524,781
Quebec	40,000
Nova Scotia	264,500
Alberta	20,750
Saskatchewan	331,556
British Columbia	400,000
Total	$1,581,587

The most important event during the month was the sale of the $5,254,000 Grand Trunk Pacific bonds. The issue was absorbed by the Canadian market with ease, being guaranteed by the Dominion government.

The $7,500,000 Canadian National Railway issue, purchased by Wm. A. Read and Co., of New York, was sold entirely in the United States market.

The only corporation issue during the month was that of the Riordon Pulp and Paper Co., of $4,000,000.

Summary

The following table summarizes the bond sales in January:—

Issue.	Sold in Canada.	Sold in the United States.
Provincial	$2,475,000	$ 3,150,000
Municipal	1,581,587	....
Railroad	4,254,000	8,500,000
Corporation	....	4,000,000
Total	$8,310,587	$15,650,000

The following are the details of the January sales:—

WESTERN LIFE ASSURANCE COMPANY

The seventh annual report of the Western Life Assurance Company, which will be found on another page of this issue, shows some very gratifying increases as compared with the previous year.

New policies issued and revived during the year amounted to $1,206,250, which gives a total insurance in force of $2,767,702 as against $2,091,899 at the end of 1917

The total admitted assets now are $246,517.78, an increase of 27 per cent. over 1917, while the total surplus to policyholders stands at $122,261.31.

The reserves held for the security of policies in force based on the Om (5) Table of Mortality, with interest at 3½ per cent., which is in accordance with the Dominion Insurance Act, now amount to $153,051, which is $42,1[illegible] more than in 1917, or an increase of 38 per cent

The Western Life has now passed its seventh milestone, and has made satisfactory progress.

Mr. Adam Reid, who has guided the destinies of the western company since its inception, was at the [illegible] being elected president and managing director, in [illegible] to Mr. A. E. May, of Edmonton, which was a fitting tribute to a man who has shown energy and enterprise in the task set him of rounding into shape a new life insurance company.

With Mr. Reid as president, situated at head office, it may confidently be expected that the Western Life will make still greater progress in the years that are ahead of it.

THE KEYSTONE OF THE ARCH

Nothing known in building is stronger than the arch. The symbol of the Mutual Principle in Life Insurance. The centre of the arch is the keystone—and "The Keystone of a Life Insurance Organization," says W. O. Chapman, "is management." The three leading constituents in good management are INTEGRITY, ECONOMY and EFFICIENCY. It is well known that the secret of the extraordinary success of the Mutual Life of Canada has been the rigid adherence of managers and directors through fifty years of history to these essential things. It is due to these that in spite of more than four years of devastating war, followed by a blighting pestilence, with the immense losses entailed, yet the strength of the Mutual Life of Canada is unshaken. The keystone ensures the solidity of the organization, and there is no other better qualified to defy the tooth of time than—

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

To Protect Dependent Ones—

is the bounden duty of every man, and this is best done by means of suitable Life Insurance. Insurance in its most attractive form is offered under the Limited Payment Policies issued by The Great-West Life. Not only is adequate provision made for dependents but the insured is able to provide for his own future as well.

The cost—profit returns—and every other feature of this plan makes it a most desirable form of Insurance. Ask for the leaflet "Common Questions Briefly Answered," giving interesting information.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Peterson Lake Mining Co.—Shareholders of the company [illegible] this week to consider the directorate proposal to make an issue of 100,000 preferred shares at par in order to raise funds for further development. The new issue was unanimously agreed to.

Loew's Theatres, Ltd.—Loew's Theatres have purchased a site for a theatre in London, Ont., and will shortly commence the building of a theatre to cost some $300,000. To provide funds for the erection of the building, the company intends to shortly make an issue of stock.

Winnipeg Electric Railway.—The Winnipeg Electric Railway earnings last year showed an increase of $174,633, according to the report submitted to the city finance committee. The company's gross revenue for the year 1918 was $2,163,389, as compared with $1,988,756 for 1917. As its share of last year's revenue the city will receive $114,509.

Consolidated Mining and Smelting Co.—The management of the company announces that the recent offering of $3,000,000 in bonds has been fully subscribed by the shareholders. These debenture bonds bear interest at the rate of 7 per cent. per annum, and were offered pro rata in proportion to the number of shares held. The holders after January 1st, 1924, have the privilege of converting the bonds into stock of the company par for par. The company will now be able to proceed with the extension of the power development of its subsidiary, the West Kootenay Power and Light Co., Ltd., and with the increase of the capacity of its copper refinery from 20 to 50 tons per day, projects which it is estimated will involve an expenditure of $1,500,000.

Canadian Car and Foundry Co., Ltd.—A feature of the annual meeting of shareholders was a statement from President Curry in which the estimate was made that after deducting all liabilities the net equity in the company's assets against outstanding stock amounted to over $19,000,000. That would equal $180 a share on the preferred stock and $120 a share on the common stock. The Senator explained that war conditions had necessitated very large working capital to provide for enormous inventories. Conditions, he believed, would have changed so radically in the next six months that the company should have a cash surplus sufficient to pay off back dividends on the preferred and leave ample working capital.

The following are the directors for the year: Senator Curry, formerly president, becomes chairman of the board of directors, with W. W. Butler, formerly a vice-president and managing director, succeeding to the presidency. J. Frater Taylor of the Lake Superior Corporation, comes into the company as a vice-president, in charge of finances, while R. H. Parks is named a vice-president in charge of all the plants. An executive committee made up of W. F. Angus, H. W. Beauclerc, Senator C. P. Beaubien, K. W. Blackwell and Mark Workman was named.

Twin City Rapid Transit Co.—President Lowry, of the company, in his report to shareholders regarding the operations of the past year, says:—

"The management has made every effort to increase revenue through advance in fares, but so far, without success, people being too much absorbed in the war and its results to give thought to the public necessity of helping maintain the service of their urban transportation system, and not realizing that without increase in revenue during the period of war prices the company could not continue to maintain the system and service at its pre-war standard.

"Failing to secure relief through increase in revenue, it has been necessary to put into effect every possible economy in operation, and efforts of the management in that direction are reflected in the operating statement.

"The management will continue to make every possible effort to obtain increase in revenue, and it is hopeful of success when the public realizes additional revenue is absolutely necessary to enable the company to meet reasonable demands for service and extensions.

"During the year a contract was entered into providing for the opening of a coal mine in Illinois, from which we obtained our supply of steam coal at the cost of production, which is much below prevailing market price, but even at this price our coal costs nearly double the amount paid in pre-war times."

Belding-Paul-Corticelli, Ltd.—Gross profits at $278,731 and net profits at $189,478, as reported for the year ended November 30th, 1918, represent the best showing in the history of the company. Net of $189,478, arrived at after deductions for interest, sinking fund, depreciation and writing, totalling $89,253, represented earnings at the rate of 21.9 per cent. on the preferred stock, and after allowance for a year's dividend on the preferred the balance would have equalled 17.2 per cent. on the common. This showing compares with 16.5 per cent. earned on the preferred in 1917, previously the company's best year, and 10.9 per cent. on the common. The company again paid two years' dividends on the preferred within the 12 months, reducing arrears to 10½ per cent., against 24½ per cent. two years ago.

After setting aside $30,000 to reserves, including a $25,000 appropriation for a special renewal reserve, profit and loss balance at the end of the year was $287,811, against $249,475 in 1917 and $78,065 in 1914.

The working capital position of the company continues comfortable as a result of the improved earnings of the past three years. Current assets amount to $1,395,169, against current liabilities of $630,522, the working capital margin being, therefore, $764,647, against $736,663 a year ago and $500,676 two years ago. Bank loans increased slightly within the year from $175,000 to $220,000, an increase of over $200,000 in inventories furnishing the explanation. Plant account increased about $42,000 and investments about $36,500 in the year.

Calgary Street Railway.—The street railway will have a deficit of $34,680.21 for 1918, which may possibly be decreased when credits from the Bowness track and road electric lines and reconstruction of cars now in process, have been adjusted. The superintendent, in making this report, points out that a large supply of car wheels which were taken into stock late in the year will also have to be placed.

A deficit for the year 1919 of $10,000 is also the estimate for that department. This is based on present wage and salary schedules, which will in all probability be increased. An item which has proven to materially increase earnings in the past, the Sarcee camp line will not likely be in operation this year.

The earnings for 1918 are the largest that the railway has experienced since 1913, although the influenza epidemic and continued fine weather through the winter reduced the daily receipts. While receipts have increased, operating expenses have also gone up, and the 4 per cent. tax which was levied last June by the council totalled $24,667, a considerable portion of the deficit.

The railway carried 677,781 fewer passengers last year than in the preceding year, although, due to an increase of one-ninth per cent. in the fares, the total earnings surpassed those of 1917 by $107,124, the largest increase in five years, the total for 1918 being $635,677 and for 1917, $582,553. Against that, operating expenses jumped from $356,096 in 1917 to $441,623 last year.

Timiskaming Mining Co.—Current assets of $870,114 are shown by the company, in their annual statement.

ALEX. BISSETT - Manager for Canada

A year ago the total was $835,342. During 1918 the profit was $1[illegible]94. But as the mill is shut down the earning power was naturally reduced. The earnings for the year were $[illegible], of which $[illegible]68,724 came from ore sales. The operating expenses were $261,831, of which $98,836 went for exploration, and $42,198 for mining. The total assets are now $[illegible], of which $2,427,802 is in properties. It is interesting to note that of the current assets of $870,000 no less than $[illegible] is in Victory bonds. The capital stock stands at $2,[illegible]0. In view of the large undistributed profits there have been not a few inquiries as to when the company would declare a dividend.

The shareholders at their annual meeting consented to the proposal of the directorate, to extend the operations of the company, by taking over the Dolly Varden and Wolfe silver mines in British Columbia. These mines have been handicapped for some time by lack of finances and Timiskaming has entered into an agreement whereby operations will be resumed. The purchase price of the property is $900,000, but the obligation to the former holders of the mine is only $450,000 because of the liabilities that Timiskaming has to assume. A narrow-gauge railway, extending from the coast at Alice Arm to the Dolly Varden property is to be completed, and all debts will be met by the purchasers. According to the agreement, the vendors receive no payments on the purchase price, before the Timiskaming Company recoups itself for this outlay. The vendors will only be paid out of the profits.

The known ore reserves are said to be heavy, the properties, it is stated, having over two million ounces of positive ore in sight. The two properties lie within nine miles of each other, and both are said to be rich and extensive.

The Nova Scotia Steel plant at Sydney Mines has closed down temporarily. During this temporary suspension of operations the open hearths, blast furnaces, stoves and coke ovens will be dismantled and undergo exhaustive repairs.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

February 5th, 1919.

	Div. Rate	Price about	Yield about
Preferred			
Canadian Locomotive	7	90½	7.72
Canada Cement	7	94½	7.40
Canada Steamships	7	78	8.97
Mackay Companies	4	65	6.15
Steel of Canada	7	93	7.52
Maple Leaf Milling	7	98	7.14
Common			
Bell Telephone	8	130	6.15
Canada Cement	6	63½	9.44
Canadian Locomotive	6	63	9.52
Canadian General Electric	8	103	7.76
Consumers Gas	10	150	6.66
Dominion Foundries & Steel	8	64	12.50
Canadian Pacific Railway	10	159	6.28
Maple Leaf Milling	10	129	7.74
Penmans			
Dominion Steel Corporation	6	59	10.17
Steel Co. of Canada	6	59	10.17
Mackay Companies	6	74	8.10
Toronto Railway	4	47	8.46
Bonds			
Canada Bread	6	95	6.43
Canada Cement	6	98	6.72
Canada Steamships	5	80	6.25
Canadian Locomotive	6	91½	6.66
Penmans			
First War Loan 1925	5	97	5.60
Second War Loan 1931	5	96½	5.38
Third War Loan 1937	5	97½	5.18
Victory Loan 1922	5½	99¾	[illegible]
Victory Loan 1923	5½	99¾	5.53
Victory Loan 1927	5½	100¾	5.38
Victory Loan 1933	5½	101¾	5.35
Victory Loan 1937	5½	102	5.28

The Toronto Harbor Board estimates provide for an expenditure of $[illegible]450,000, of which about $2,000,000 is to be expended during the next eleven months.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Brantford, Ont.—January 31—The Matthews-Blackwell Packing Co.'s plant was damaged. Cause reported as incendiarism. Estimated loss, $10,000.

Chatham Township, Ont.—February 3—Barn of C. Titus, containing a quantity of grain and many farm implements, was damaged.

Halifax, N.S.—January 29—The Rex Building, on Barrington Street, was damaged. Estimated loss, $75,000.

February 4—Dry goods store of W. Y. Kennedy, Granville Street, was damaged. Estimated loss, $75,000, partially covered by insurance.

Leamington, Ont.—January 28—Entire stock of N. G. Pankhurst, and building, owned by Geo. Maxon, were destroyed. Estimated loss on building, $1,000; on stock, unknown.

Montreal, Que.—February 1—The premises of the Yale Bedding Co. were damaged.

Port Burwell, Ont.—Captain Henning's fish-house was destroyed. Caused by the explosion of coal tar. Estimated loss, $12,000, partially covered by insurance.

Quebec, Que.—February 1—Residence at 49 St Oliver Street was damaged. Estimated loss, $200.

Sault Ste. Marie, Ont.—Wade's garage and twenty cars were destroyed. Estimated loss, $75,000.

Scarboro' Township, Ont.—February 3—Residence of H. Lepard, Robinson Avenue, was damaged. The loss is covered by insurance to the extent of $700.

St. Thomas, Ont.—February 2—Residence of W. H. McNeice, Wellington Street, was damaged. Caused by overheated chimney. Estimated loss, $2,500. Residence of Geo. Smuck was destroyed. Estimated loss, $3,000, partially covered by insurance.

Toronto, Ont.—February 1—Waste mills of J. M. Lawlor were damaged. Estimated loss, $10,000. Residence at 86 Augusta Avenue was damaged. Estimated loss, $400.

February 6—Grocery store of Gibbon and Son, 829 Yonge Street, was destroyed. Estimated loss, $3,000.

Trenton, Ont.—January 29—Plant of the British Chemical Co. was damaged. Estimated loss, $175,000.

Ville St. Pierre, Que.—February 1—Factory of the Lumber and Construction Co., Ltd., was damaged. Estimated loss, $40,000.

Winnipeg, Man.—January 27—Offices of the New York Life Insurance Co. were damaged. Caused by match thrown into waste paper basket. Estimated loss, $40,000.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Chicoutimi, Que.—January 16—The Catholic Cathedral at Chicoutimi was destroyed. An explosion of the heating plant caused the fire. The property loss will exceed $300,000, which includes an original painting by Reubens, valued at $100,000. The insurance carried only amounted to $105,000. as follows: Liverpool and London and Globe, $15,000; Commercial Union, $10,000; Phœnix of London, $5,000; Royal, $15,000; Fabrique, $60,000.

Regina, Sask.—The following are the principal facts in the fire chief's report for 1918: Loss by fire on buildings, $11,,009.34; loss by fire on contents, $24,681.39; total fire loss, $35,690.73; average loss per actual fire, $243; loss by lightning, $1,128; damage by acetylene gas explosion, $525; total fire alarms received, $236.

Shawinigan Falls, Que.—January 3—Plant of the Belgo-Canadian Pulp and Paper Co. was damaged. Estimated loss, $27,000. Insurance to the amount of $14,000 is carried as follows: Union Assurance Co., $9,000; Hartford Fire Insurance Co., $5,000.

State Aid for Water Power Development

A Suggestion for Assuring Fullest Utilization of Power Resources—Government to Furnish Capital and Control Rates—Complete Ownership by Government not Essential.

By A. M. BEALE, B.Sc., A.M.E.I.C.

IN a recent article (*The Monetary Times*, September 20th, 1918) the writer endeavored to show that the production of power was a key industry and that Canada's opportunity lay therein. He also drew attention to the fact that every country of which we have information is endeavoring to stimulate its production of electrical energy and, wherever necessary, is providing state aid to supplement or replace private enterprise.

In Great Britain a great deal of attention has been given to the subject and figures have been submitted to prove that the continuance of the upward trend of wages is dependent upon the greater per capita use of mechanical energy. The old idea of restricted output in order to keep up prices and wages seems about to give way to the new one of stimulated output, the greater production of marketable manufactures per capita by the introduction of labor saving devices, automatic machinery, etc., and it seems probable that labor will accept the new regime and share in the rewards of enhanced output.

There seems to be no good reason why the government of Canada should not take steps to aid in the development of Canadian power resources. Power, usually in the form of electrical energy, is essential for the industry, convenience and comfort of the whole of our population. All manufactures are dependent on power and its supply at reasonable cost builds up industries which develop our unexcelled natural resources, provide products for our own use and for barter in the world's markets and secure profitable occupation for our people.

It is perhaps unnecessary to dwell on the fact that the use of waterpower is the use of an inexhaustible resource while the use of fuels represents a draft upon an exhaustible one, nevertheless in a country such as Canada where artificial heating is for approximately eight months of the year essential to existence, and where such heating can only be secured economically by the combustion of fuel, the replacement of fuel power by water power wherever feasible, even if the fuel resources were inexhaustible would represent the relief of transportation systems and mine labor to this extent and help to keep the price of fuel down in the face of a demand growing steadily with the population.

Though there is no reason why state aid should not be given to all power developments which are dictated by sound economic principles, this aid is not so frequently essential in fuel-power plants since the capital investment at the outset is not so large in proportion to the initial market, and although the cost of power per unit may be as large or larger than for water power, owing to the fact that the plant grows with the market, the question of financing the project is not often very difficult.

In the case of waterpower, though, owing to the low cost of maintenance and operation, the unit cost of power may be low, nevertheless the capital expenditure is much greater than for fuel power plants. Again, an excellent water power site may be capable of producing much more power than the immediate market can absorb; unfortunately however water power sites do not lend themselves to piecemeal development and it is generally necessary to incur a large percentage of the total capital expenditure at the outset. This frequently means a certain delay before the development reaches a paying basis; obviously, therefore, financial strength is absolutely essential.

Opportunity for Canadian Capital

Until the great war it was the practice of Canada to seek capital for national development elsewhere, but when the money markets of the world gradually became closed it became necessary to seek capital at home. Under the impetus of patriotism Canadians were taught to lend their money to the government for the successful prosecution of our war enterprises, but as time went on the patriotic appeal began to receive the support of the economic appeal. Canadians who had spent their surplus in real-estate which they found to mean the absolute tying up of their capital plus a yearly tax-bill, began to look upon the new investment with approval; it provided an investment which one could realize upon readily when required; a security upon which one could borrow from the banks, and above all, a periodical interest cheque to help offset the rapidly rising cost of living.

Hitherto the practice upon the North American continent has been to indicate personal financial prosperity by saying a certain individual is worth so many thousands or millions of dollars. In Great Britain wealth is usually indicated by saying a man is worth so many pounds a year. In other words, one speaks in terms of capital, the other in terms of income. It is probably this fundamental appraisement of wealth which has brought about the financial greatness of the Mother country. The predilection of the French people for "Rentes" is proverbial, and it is to this in large measure that France's rapid recovery after 1870 is attributable and we can look for this same predilection to produce a rapid recovery of the same great nation from the storm and stress of the past four years.

In other words, national thrift accumulates national wealth, makes for national stability and produces the capital for the development of national enterprise.

Should not Canadians provide Canadian capital for Canadian enterprise? Possibly this country will need more capital than it can itself supply, but as it progresses from the lot of the debtor towards that of the creditor nation, the proportion of its exports required to pay its debts and interest charges will diminish until ultimately, perhaps, a considerable portion of its imports will, as was the case in Britain, represent payment for financial services rendered.

The government of Canada has expended much money and energy in educating the people to invest in Government bonds; it has built up a bond selling organization of an efficiency undreamed of five years ago. A prominent member of this organization in reply to a question as to its future after the war, expressed the conviction that it should be kept alive and adapted to peace conditions and that when the government required money for national enterprises that it should use the machinery now at its disposal to secure that money from the people of Canada.

The people of Canada have acquired a taste for Government bonds and it cannot be doubted that having acquired the habit of investing in such securities they would, even with the withdrawal of war enthusiasm, absorb any reasonable amount offered. Particularly if they can be shown that besides securing a safe income they aid in increasing the national development. What more logical purpose than the development of power, is there for the savings of the Canadian people

Monopoly and Must be Controlled

Power, particularly water power, is a natural monopoly and the modern tendency is to avoid competition in its production and sale. Any monopoly, however, is liable to exploit the public for its own benefit unless adequate safeguards are provided. Hence we see the growing tendency both at home and abroad, to treat power production on the basis of a regulated monopoly.

Undeveloped water power sites in this country are principally vested in the Crown, either in the right of the Dominion or in the right of the Province in which they lie. In Ontario the production of power is becoming more and more a state enterprise, and this principle is growing in other jurisdictions. Where the state does not actually develop the power sites it is adopting the principle of lease or license providing for the regulation of rates charged and for the recapture of the development at some future date if it so desires.

In Europe the practice appears to be that of leasing a site for a given period after the expiry of which the complete development reverts to the state without compensation, this entails amortization of the investment during the life of the lease and a corresponding increase in the cost of power to the consumer.

In Canada the preference seems to be for compensation if the state takes over the development at the expiry of the lease, comparatively low rental charges and the regulation of rates charged in the case of public utilities, thus providing the people power for all purposes at the lowest rates consistent with economic principles.

How Private Development is Supervised

In order that disaster, material or financial, may not occur, and in order that it may assure itself that any development it may wish to acquire is substantially constructed, of good design and capable of performing the functions for which it is designed, government regulations provide for the submission of the whole scheme to its own experts and grants concessions only on the satisfactory demonstration of its economic soundness; further, complete plans and specifications and data as to the natural conditions at the site have to be submitted and approved before construction can proceed, while during the construction a fully qualified government inspector is appointed to watch the work and enforce the maintenance of the necessary standard of construction.

The most difficult problems water power administration has to face is the control of rates and the fixing of the amount of compensation to be paid if it takes over the works at the expiry of the lease. These problems immediately lead one into the field of finance; stock and bond issues; promotion charges; discounts; construction costs; depreciation, actual or functional; watered stock, and so forth; for without a complete knowledge of the financial end of a big development it is impossible to fairly fix rates or compensation. Further, the public is distrustful of the figures adduced by a public service corporation in support of an increase in rates, and this distrust may lead to actual injustice. If the government could, through a suitable non-political commission, control financing and supervise all accounts, the problem would be much simplified but the exercise of such control is at present difficult.

Were the government to provide a portion or all of the cost of development it would immediately become in a position to exercise this control, therefore why not couple up the Victory Loan organization to water-power development?

Government to Furnish Funds

Let us suppose that a bona-fide promoter, syndicate or municipality desires to develop a water power, it submits its data, both economic and physical, plans, etc., to the commission, which might be the Dominion Power Board enlarged as far as necessary to include eminent financial and legal as well as engineering and administrative representation. This body passes upon the whole scheme and if it approves, provides for the necessary concessions and recommends to the treasury that the necessary funds be provided in exchange for the bonds of the undertaking at a rate sufficient to cover the cost of raising the money and administration.

Thus the bona-fide development would be able to do its financing on a reasonable basis without having to pay the tribute that financial interests sometimes exact. The soundness of the development would be assured and as bondholder the government could exercise that financial control which at present is so difficult to provide for; control of rates and compensation on taking over, would automatically be solved.

To provide the necessary funds the government could avail itself of its existing machinery for providing the people with a safe investment. In short, the public would provide the funds for developing its own resources for its own benefit, with reasonable assurance that its interests were adequately safeguarded by its own representative from the time it invested its money until and during the time it was enjoying the benefit of the utility.

It appears to the writer that this process might apply to both public and privately owned developments, both for public utilities and private purposes. There seems to be no reason why the same funds should not be applied both to the development of a national or international water power on the St. Lawrence and to water power on the frontier of civilization for the purpose of supplying energy say to a nitrogen fixation plant or a pulp mill.

The purpose of this article has been to suggest the linking of two good things for their mutual benefit,—national thrift to national development. That the advantages to be expected from the linking of the new sources of capital with water power should appeal more forcibly to the writer than other combinations is natural; no doubt others who may approve the idea will be able to suggest arguments in the direction of the development of other national enterprises.

Public and private ownership have each their champions, but the fact remains that, public or private, large enterprises are generally financed on borrowed money and every dollar deposited in a bank goes to swell the sea of capital from which funds are dipped to pay for the development of water powers, railways, plantations, etc., all over the world

The war has brought in its train many new conceptions international, national and individual, many prejudices have gone by the board. Democracy has overthrown autocracy in the matter of national government, there are other autocracies that must yield if democracy is to weather the storm.

"All men are born equal" is a saying as common as it is untrue. "All men become equal when they die" is more true in the mundane sense, and high and low have alike shown themselves willing for the sake of a great cause to accept this equality. Nevertheless there are many inequalities that are artificial and these must be ameliorated. The "common people" have demonstrated that they are the nation and will demand an equalization of opportunities and a more equal share of the world's goods. Capital has dictated to labor, labor now in a growing measure dictates to capital, neither can exist alone and prosperity is dependent on the mutual respect and sympathy of each to the rights and duties of the other. Will not such a "rapprochement" be aided by encouraging the public to subscribe at least a portion of the capital necessary for the development of its own labor?

DOMINION HOUSING LOAN

Federal and Provincial Offers Open an Entirely New Field for Government Activity

THE offers of the federal government and of the Provincial government of Ontario to lend money for erecting houses for the working classes in Canada, open up an entirely new field for government activity. Notwithstanding that the offers are made primarily as a result of the conditions created by the war, and are therefore in a sense post-war measures, they are not without significance as a revelation of a new attitude of our governing authorities towards social questions. If the movement now inaugurated proves a success, it is difficult to see where it will end and what importance it will have in improving the housing conditions of the country.

There has been little criticism of the action of the governments and a great deal of favorable comment. This is also significant in view of the fact that the entrance of public enterprise into a field heretofore left entirely to private enterprise introduces the possibility of far-reaching changes in our economic and social conditions, which might be regarded with apprehension by those who believe in the virtues of free competition.

The object of the governments is to promote the erection of small dwellings to enable workingmen and returned soldiers to acquire their own homes at actual cost.

The Dominion government has offered to lend $25,000,000 at 5 per cent. to the provinces. The administration of the fund will be in the hands of the provincial governments, most of which it is hoped, will add a contribution of their own to the fund.

Provincial Distribution

The $25,000,000 will be divided among the provinces pro rata to the population. This means that the approximate ratio of distribution apparently will be as follows:—

Prince Edward Island	$ 326,000
Nova Scotia	1,716,000
New Brunswick	1,225,000
Quebec	6,980,000
Ontario	8,781,000
Manitoba	1,586,000
Saskatchewan	1,716,000
Alberta	1,304,000
British Columbia	1,366,000

By lending two million dollars, Ontario is providing nearly one-fourth additional to the federal amount, making the total about $10,781,000. If each province could contribute on the basis of $1 per head of population, as against about $3.48 being provided by the federal government, the total sum available for the Dominon would be over $32,000,000. Allowing for an average loan of $3,200 per house, the number of houses which could be erected would be 10,000, occupied by 500,000 inhabitants. This will not solve the problem of shortage of houses, but will be a substantial contribution to its solution.

Probable Benefits of Loan

After all, the main purpose of the loan is to provide only the smallest houses for the wage-earners who require accommodation at a low price. If by means of the loan, a large proportion of workmen's houses are erected, if the sites on which the houses are built are properly planned, and if the dwellings are grouped as part of a comprehensive scheme as an object lesson in proper and sanitary housing—this will have an intrinsic value far greater than is represented by the number of houses built.

The Garden City and Garden Suburbs of England do not house a large number of the population, but they have had a value as an example to those carrying out housing schemes all over the world. Probably the number of inhabitants in the garden cities and garden suburbs is less than will be provided for by the Canadian schemes, and yet they have beneficially affected the housing conditions of millions of people. Whether or not the same result will be achieved in Canada will depend, not on any increase of the amount of the loan, but on the skill and judgment shown in utilizing what has been appropriated.

The suggestion has been made that the actual money contribution of the government is a small one. This may be met by suggesting a comparison between the cost of money to a working man under ordinary conditions and the cost under the government scheme. The advantage to the working man is not to be measured, as some commentators have put it, at the 1 per cent. which approximately represents the government loss of interest, but by 3 or 1 per cent., which is the difference between the interest chargeable by the government and the interest which a working man would have to pay to a private lender.

The annual repayments on a loan of $3,000 at 5 per cent would be about $20 a month, and on a loan at 8 per cent, $25—$45 per month—representing a saving in the former case of $65 per annum. If a working man went to a private source for his money, he would not get the whole value of his house advanced, and would have to pay, perhaps, 8 per cent. on, say, three-fourths as a maximum loan. The other fourth could not be borrowed at all, but assuming that it could, it would be at a much higher rate of interest. Putting the case at its very worst, the government loan will save the working man $65 per year on a $3,000 house—i.e., the difference between 8 and 5 per cent., over a period of 20 years. The saving would be equivalent to about 20 per cent. on the total cost of a house, and will go a long way to counteract the present high cost of building.

Objections Raised

Among the few objections raised to the federal and provincial schemes is that the chief responsibility for administration of the actual building will fall on the municipalities. Had the government assumed this responsibility themselves, the objection might have been that they were interfering with the "home rule" of the municipalities. The governments would be criticized either way by those who do not want public enterprise applied to housing or who favour some scheme that is less injurious to speculation. Obviously, the governments are acting in accordance with sound principles in recognizing the municipalities as the proper authorities to control the administrative details of housing schemes.

In all countries where the state governments have endeavored to assist in solving the housing problem, the chief difficulty has arisen from the lethargy of certain municipalities. It is stated that the representatives on municipal councils, being in power for a short term, are more influenced by the short view of keeping down the taxes than by helping to solve a social problem of a permanent character.

It is hoped and expected that the municipalities of Canada will approach the matter in a more progressive spirit than has been the case elsewhere. The municipalities are chiefly responsible for the making of the good or bad housing conditions of our cities and towns. Whether or not they accept the government loan, they are likely to do something to deal with the housing situation, both by promoting new construction and raising standards of old construction, since that is the only way they can carry out their promised reconstruction policy.

Purchase of Land

One of the most important questions which will arise in connection with housing schemes is in regard to the purchase of land. Some simpler procedure should be introduced in the province to enable land to be acquired at a low price for erecting small houses. At present, the working man has to many "interests" against him in wanting a site at a reasonable cost for a home. The real estate operator wants his big profits out of the land; the city council wants its high assessment values of land in order to keep down the tax rate; the trust company wants its mortgage securities maintained; many manufacturers want fixed assessments and other advantages, which have to be largely paid for by their employees. Against such a combination it appears difficult to get land at a cheap rate for housing schemes for working men and returned soldiers, but it is a difficulty that must be overcome if any substantial progress is to be made with housing reform, and if strife and friction are to be averted in the future.

PENDING AMENDMENTS TO ONTARIO MINES ACT?

Number of Changes That Should Prove to be of Great Assistance to Prospectors, Being Discussed

Questions of importance to prospectors as well as mining men in general, are being discussed.

A number of amendments to the Mining Act of Ontario are under contemplation. Any action taken will have the single object in view of being beneficial to prospectors as well as to the best interests of the mining industry. Among the questions being discussed is the advisability of inducing prospectors to have their claims surveyed soon after staking takes place, thus eliminating the danger of friction or dispute over uncertain and irregular boundaries. Toward this end, it would appear likely that the Department shall allow the cost of survey for each claim to apply as the equivalent of about twenty-five days' work. This would be beneficial in two ways. First, many claims would probably be surveyed shortly after being staked, the cost of surveying to apply against the first instalment of work, and with these regularly established lines to go by much of the inaccuracy of blue-prints gotten out on the strength of carelessly run claim lines, would not occur. Second, the burden of the prospector would be made lighter to the exact extent of the cost of survey, which, under the present act the prospector is now obliged to pay in addition to assessment work and patent fee.

Another matter that is receiving consideration is the advisability of placing a tin tag on all four corners of mining claims, instead of only on the No. 1 or north-east corner as at present. This, it is obvious, would cause the boundaries to be less liable to become confused in case of fire destroying one of the corner posts, on which might chance to be the one tin tag as at present specified.

Protection From Unfair Forfeiture

Incidentally, in pointing out the two foregoing amendments, which are now understood, among other things, to be the subject of consideration, it might be well also to point out the necessity for amendments that would serve to protect co-holders in mining claims, where one or more of the co-holders have duly performed and recorded their assessment work, but where one or another of the co-holders has failed to do so, thus causing the entire mining claim to become automatically forfeited and imposing upon those whose work has been performed, the only alternative of applying for relief from forfeiture involving a good deal of expense and uncertainty, as well as the usual legal proceedings before the mining commissioner. To overcome the possibility of such occurrences it would be necessary to add a "provisional" sixty-day period to the time when each instalment of work is required to be performed. Thus, in the event of one co-holder failing to record his work in the prescribed time the remaining co-holders would have ample time in which to perform the delinquent's work and thus protect their own interests, but the protection of such "provisional" extra period not to apply to the delinquent or delinquents themselves. Those performing the necessary work to protect the claim to automatically become entitled to divide the entire forfeited interest of their co-holder among themselves equally or in proportion to the share of expense borne by each, or otherwise as they should agree among themselves.

Retarding Factor

Another matter of deep concern, not only to prospectors, but to mining men in all parts of the province, is the retarding effect of the province industry of the granting of mineral rights to settlers. It is pointed out that settlers take up land either for its cultivation or for "skinning" the timber and not for mining purposes. Invariably they fail to do any mining work. However, in various mining districts throughout the north large sections have been held idle, due to the fact of settlers having each paid some $20 or so to the Government for the right to settle on a piece of land. Unfortunately this is a big contributing factor toward retarding development of the mineralized areas, and constitutes an evil that could be eliminated without retarding the settlement of the country. This would not rob the settler of the right to mineral occurring on his farm, providing he follow the regular procedure of a prospector, and in addition to holding the farming rights, stake out claims and perform the required assessment duties devolving upon such a course. In the event of others staking the mineral rights of his farm, he would always be entitled to the payment for any damages done to his land or buildings.

SOVEREIGN LIFE ASSURANCE COMPANY OF CANADA

Dr. H. J. Meiklejohn, managing director of the Sovereign Life Assurance Company, was again in the happy position a few days ago of being able to submit to his shareholders an annual financial statement that reflects cautious but progressive direction.

New business issued for the year reached the sum of $1,836,936, which brings the total assurances in force at December 31st, 1918, to practically nine and a half millions of dollars.

Particularly gratifying are the figures in the company's statement covering the company's income. They were good, both in respect to premiums and interest. The net cash income was $51,961 greater than in 1917, while the cash interest receipts show an increase of $11,334 over the previous year.

The assets of the company now stand at $1,554,226, while the surplus to policyholders and shareholders over and above all liabilities is now $104,011.

During the year the sum of $278,605 was paid to policyholders, of which amount $189,769 was needed for matured endowments and other policies, while $83,591 was paid for death claims. This was a record figure for the company, and is doubtless due to the abnormal year through which the company, like all others, has passed. As an evidence of this, it is but fair to point out that, of the $118,973 death claims actually occurring during the year, no less than $99,000 odd were due to war and influenza.

The following analysis of the assets of the company, showing percentage changes for the past three years, indicates a healthy trend, and is evidence of the care displayed in the investing of the company's funds:—

Invested assets, 1918.	Amount.	Percentages by classes. 1918. Per cent.	1917. Per cent.	1916. Per cent.
Bonds, debentures and stocks	$ 751,600.19	51.7	45.2	36.6
First mortgages on real estate	458,768.46	31.5	35.0	45.0
Real estate, policy loans and cash. .	244,698.41	16.8	19.8	18.4
	$1,455,067.06	100.0	100.0	100.0

During 1918 the company completed its fifteenth year, and, judging by the figures as revealed by the report before us for 1918 (a very trying year for most companies), the Sovereign Life, under Dr. Meiklejohn, is destined to see many years of useful service on behalf of the insuring public.

DOUBLE PAGE ADVERTISEMENTS ALLOWED

For several years past, the Post-Office Department has refused to permit advertisers to use double-page "spreads." This ruling has now been revoked; double-page advertisements can now be published. Needless to say, *The Monetary Times* will now be pleased to accept all the double-page advertisements which any of its readers or advertisers may care to insert.

SCOPE OF GOVERNMENT FINANCE

Whether essential industries should be supported by state action, or left to their fate without bonus or price fixing, is a point which has not yet been settled in Canada, nor for that matter in the United States or Great Britain. In response to vociferous agitation on the part of so-called "basic," "key," and "essential" industries, some action has been taken; it is, however, partial, and bears the stamp of unwilling concession rather than the acceptance of a principle. Reference is not made to protection from foreign competition, but rather to such cases as government aid to housing, and provincial farm loans at below-the-market rates. In this issue of the *Monetary Times* a suggestion is made, that the development of water powers is deserving of similar assistance, and that the necessary capital should be provided by the Dominion government. This proposal, coming as it does from Mr. A. M. Beale, deserves the closest attention.

The claim of water powers for special assistance is probably as good as that of any other industry. If Canadian railways and steamboat lines have been subsidized far beyond the point of their own ability to exist on their own earnings, and if the construction of houses, an industry which has always been conducted under competitive conditions, is to be assisted, why should not something be done to provide that power which is essential to all manufacturing and utility enterprises, at low rates? The construction of a hydro-electric plant is an enterprise which requires a heavy capital expenditure and the return is spread over a long period of years. But this is also true of railways, forest re-planting, and public utility enterprises. There are, in fact, few industries which are not in some degree "key" industries, upon which our whole economic structure depends. For the government to assume the responsibility for furnishing capital for all essential works, would mean nothing else than taking over the role of the capitalist in the great majority of cases. In the housing programs of the provincial and of the Dominion governments, only a part of the capital is to be provided, which places the state in a reasonably safe position as to its investment, and the risk of the enterprise falls primarily upon the municipality, individual or corporation which undertakes the work. But for the state to assume the entire risk, as has even been proposed in some quarters, would be an undertaking beyond the scope of any government unless it assumes a thoroughly socialistic attitude.

War-time control of industry on this continent has been far from successful, and there are some who assert that price fixing and much of the licensing system has been worse than useless. The government ship-building program has been undoubtedly ill-advised, and the best that can be said of the housing scheme is that it is ineffective. Until some more satisfactory method of management has been devised, it is better to leave industry in the hands of private enterprise, subject to careful control by state or municipality. This regulation is necessary in the case of all industries which are subject to monopoly and combination, as in transportation and public utilities; where political questions are involved, as in water powers; and wherever conservation is necessary to protect our resources from the short-sightedness of private industry.

BLUE SKY LEGISLATION

Protection of investors against fraudulent promotions is a subject for provincial, not Dominion, legislation in Canada. Manitoba has already enacted measures of this kind. Uniformity, however, is desirable, and the subject could very well be discussed by provincial representatives before action is taken. There has been a tendency in the United States for competition among the states to secure as many head offices as possible, with the result that the conditions of incorporation and stock flotation have been too lenient.

It cannot be expected that measures can be devised which will thoroughly eliminate danger of deceit; and even if this could be done, the unwary investor may be led into risking his capital in enterprises which are in their nature speculative. The maxim "let the purchaser beware" must still apply in some degree in the investment field. The most effective protection so far devised has been the service of reliable investment firms, who have the skill and knowledge necessary to analyse investment propositions, and to distribute them among investors to meet individual needs.

SHIP LOSSES AND CONSTRUCTION

The enormous loss to British merchant shipping during the war is illustrated by the following figures of gross tonnage lost recently given in the Daily Telegraph, of London, England:—

"The United Kingdom and Dominions, 9,055,668; the United States, 501,038; Belgium, 105,081; Brazil, 31,279; Denmark, 245,302; Holland, 229,041; France, 807,077; Greece, 414,675; Italy, 861,435; Japan, 270,033; Norway, 1,171,760; Spain, 237,862; Sweden, 264,001."

Commenting on this comparative statement, the Telegraph says:—

"Owing to little having been said of the injuries inflicted on this country in the war, there is an impression in allied and neutral countries that we paid a relatively small price for victory. It is true that we were not invaded, but that was due, not to good fortune, for the sea is the easiest and quickest medium for an invader, but to good policy. It is also true that we were not starved, but that was the result of judgment and organization. It is very necessary that due importance should be attached to the injury inflicted upon us as a people who follow the sea, because there is a temptation to exaggerate the damage sustained by the allies on the land and to ignore the results of enemy action by sea.

"It is certain that if it had not been for the British mercantile navy France and Italy would have been driven out of the war and America would never have been able to intervene. When the war came the vast volume of British mercantile shipping was placed at the service of the State and became the principal target of the enemy's naval forces. The result was that approximately half the tonnage under the British flag was destroyed.

"The British tonnage sunk, therefore, was more than ten times as much as that lost by either France or Italy and seventeen times as much as that lost by America.

"We depend on shipping for almost all that we require. Virtually all of our remaining ships need to be overhauled, which means that they are handicapped in trading, and it is doubtful if some are worth the expense of restoration. In effect, we have to build the whole of our mercantile marine as soon as we can.

"That is one item in the war bill due to us as a maritime nation and our case is separate from that of other countries, which are not islands and are not pivotal points of maritime Empires. Moreover the above figures do not exhibit the value of the cargo sunk, the number of lives destroyed or the inestimable injury caused by our withdrawal of ships from distant trade routes in order that we might help our allies and transport over the Atlantic a majority of the American troops which turned the scale on the Western front."

In view of this heavy loss, it may seem remarkable that shipping rates are already falling rapidly, even more than the drop in insurance rates would warrant. This illustrates, however, the extent to which war demands influenced shipping costs, and when these have entirely ceased, still lower rates may reasonably be expected. The outlook for an adequate return upon ships constructed at high war costs is therefore not promising; optimists who relied upon "enormous demands for reconstruction," may find that post-war shipping requirements will scarcely equal the demands in 1914.

DOMINION LIFE ASSURANCE COMPANY

"Gains all along the line" is the dominant feature of the thirtieth annual report of the Dominion Life Assurance Company. Nowhere is this more apparent than in the amount of new business, the increase being $4,271,739, or 19 per cent. Gross assets show a very gratifying increase of $849,472, or 18 per cent., over 1917.

Total income, too, jumped from $1,000,000.74 in 1917 to $1,246,829 in the past year, or practically 25 per cent.

The management of the Dominion is entitled to congratulations upon the progress which has been made in all departments. This is a splendid record, and strong evidence of capable direction of the company's affairs. To have achieved such results at a time when the exigencies of war to so great an extent must have narrowed the field through so many insurable lives, owing to enlistment, having become uninsurable, speaks eloquently as to the esteem in which the insuring public holds the Dominion Life.

CANADA PERMANENT MORTGAGE CORPORATION

In addressing the shareholders at the annual meeting of this firmly established, sound and progressive institution, Mr. W. G. Gooderham, the president, made special reference to the extent to which the buyers of Victory Bonds had withdrawn their savings from the company, but, at the same time, he very properly spoke with some optimism, of the expectation, that with the reduction in the money requirements of both the British and Canadian governments, there would be a decided increase in the company's savings department. In this connection it is interesting to note that about one and a quarter million dollars of deposits were withdrawn specifically for investment in Victory Loans during 1918. On the other hand, Mr. R. S. Hudson, who has been associated with the corporation for forty-two years, in an address, which sounded a high note, referred to the fact that the deposits were [illegible] increasing again.

The net profits for the year just closed amounted to $824,532, which is equal to almost 14 per cent. on the paid-up capital, or 7.20 per cent. on the total shareholders' capital. This sum, together with $197,977, the balance at the credit of profit and loss at the beginning of the year, made a total of $1,022,309 available for distribution. After paying the usual dividend of 10 per cent. and transferring $250,000 to reserve fund, the balance carried forward at credit of profit and loss was $172,509. The reserve fund is now $5,500,000, or only $500,000 less than the paid-up capital, truly a substantial amount.

The very large sum of $26,318,586 is held by the company and constitutes the principal item in its assets. For this sum the company holds no less than 15,590 mortgages, every one of which is on improved and productive property. This will give readers some idea of the scope of the company's operations.

The following comparative table shows some interesting figures, as taken from the annual statements of the past three years:—

	1916.	1917.	1918.
Liabilities to public	$20,919,130	$19,959,684	$19,638,877
Liabilities to shareholders	11,345,659	11,597,977	11,822,509
Profits	866,126	852,321	824,532
Assets	32,264,782	31,557,661	31,461,385

From these figures it will readily be seen that the Canada Permanent Mortgage Corporation is irrevocably linked with the financial development of the Dominion in a peculiar degree. During its long life it has contributed much to the economic life of the country. Its services have been rendered to many of our people. It has for many years now enjoyed the capable direction of Messrs. R. S. Hudson and John Massey, ably assisted by Mr. Geo. H. Smith.

In spite of the difficulties which have beset such institutions as the Canada Permanent Mortgage Corporation, growing out of war conditions, the statement (which is published in full on another page of this issue), reflects the same caution, combined with progress, which has consistently characterized this organization since its inception.

The Royal Bank of Canada has opened branches at Atwater, Sask.; Isabella, Man., and Tilston, Man.

GRADUAL ADJUSTMENT AND RECONSTRUCTION

With the Spring Will Come the Revival of Commercial Activity in Many Directions

The events of the past month have gone but a little distance to clearing up the new uncertainties consequent upon the ending of the war and the cessation of a four-years' influx of war orders. Business is pausing while necessary readjustments in the labor situation and the commodity markets are gradually getting under way. The outward effects of these readjustments are not pronounced. A surplus of labor is reported from the larger centres, but it is less than might have been expected in the circumstances and less than it may be before the adjustment to a peace basis is nearing completion. Commodity prices are tending to lower levels, but so far without notable results.

In general it may be said that the much dreaded adjustment is progressing with much less hardship than feared, and, despite any anxiety for the more distant future, what has happened so far is encouraging to hopes that the transition period will be less serious than feared.

Greenshields and Company in reviewing these conditions in their monthly review, say:—

"We are still inclined to the view that by the early spring there will be a revival of commercial activity in many directions. The programme of the Peace Conference should be well advanced by then; there will be a better understanding of Europe's requirements in connection with reconstruction, and probably some definite plans as to how these will be financed.

"Despite the swing of business opinion on this continent from early views that Europe's requirements would be immediate and enormous, to the present-day view that little or nothing is in prospect from that direction, a position between may be taken with reasonable safety. The restoration of a large part of Belgium and Northern France to an earning basis, agriculturally and industrially, might well be carried out largely from within those countries, provided questions of time were unimportant. They are not unimportant, as it happens. The economic future of both countries, with war debts pressing heavily, will depend to no small extent on the rapidity with which they will be able to set to work the former machinery of production, and that in turn depends on a large measure of assistance from friendly countries more favorably situated. The demand from Europe for the raw materials that this continent can freely supply, we believe, will assume considerable proportions as the year goes on, and to that may be added the substantial requirements of neutral countries, which, because of war conditions, have been under strict rationing for several years back."

Free Market Desirable

"There is nothing discouraging in the outlook from the standpoint of the Canadian producer. Adjustment from wartime prices has been inevitable and there is still reason to believe that the adjustment in the case of prices for foodstuffs will be fairly gradual. But there is much in the situation to urge that the removal of artificial restrictions on the market, allowing Canadian grain and flour to come into free competition with the markets of the world through the usual trade channels, will be ultimately to the advantage of the country. The guaranteeing of a fixed price for the 1919 wheat crop, a question still under discussion, would merely invite the assuming of a large loss by the tax payers of the country, and the bonusing of a class of producers whose gain from war-time conditions exceeds that of any other in the population.

"Contraction in foreign trade figures as shown towards the end of last year may be expected to continue for some time to come, possibly reaching an extreme just before the adjustment in business the world over is complete. That there will be a return to the condition of a large excess of imports over exports that characterized the years before the war, there is no reason to fear. A growing self-sufficiency in manufacturing lines has been characteristic of the war period, concurrently with the development of new markets for exportable products. The two tendencies should operate to the holding of at least some of the ground gained in the country's external trade in the past few years.

"Both tendencies are capable of considerable enlargement. We are still importing millions of dollars worth of goods that could profitably be produced within the country itself. Raw materials have been shipped across the border to the United States, and bought back by Canada in the finished state, to the loss of the profit and the employment that would have accompanied the completion of the manufacturing process within the country.

CAPITAL TRUST CORPORATION

The annual report of this institution shows satisfactory progress. The meeting was held last Wednesday, February 11. The net profit for the year was $19,354, which, added to the amount brought forward from the previous year's operations makes a total accumulated profit of $46,582. From this was taken $16,162 in payment of an initial dividend of 4 per cent. payable to shareholders March 1st, 1919, leaving a balance of $30,427 to be carried forward.

The report shows a marked increase in the number of estates under administration, the value of assets of estates and agencies in the hands of the company now being $1,060,680.

Managing director B. G. Connolly has every reason to be gratified with the development revealed by the 1918 report. It is healthy and along right lines.

MONARCH LIFE ASSURANCE COMPANY

A glance at the report of the Monarch Life Assurance Company, which appears on another page, reveals the interesting fact that the assets of this progressive western institution has gone beyond the million mark, which means an increase over last year of 28 per cent. The company now has on its books $15,171,309, as compared with $11,500,000 a year ago, which represents the very gratifying increase of 32 per cent.

Other gains, which unquestionably reflect the result of careful underwriting, coupled with a progressive policy, are as follows: Premium income has increased 25 per cent.; policy reserves have been increased 35 per cent.; average rate of interest increased from 7.58 in 1917 to 7.88 per cent. in 1918. Like all other companies the mortality from influenza was high, reaching 56.4 per cent.

At the annual meeting the following were re-elected directors for the ensuing year: Messrs. J. T. Gordon, president; W. A. Matheson, first vice-president; F. W. Adams, second vice-president; J. W. W. Stewart, managing director; directors, W. R. Bawlf, Col. H. A. Mullins, C. E. Gordon, H. W. Echlin, R. G. Ironside; secretary and actuary, J. A. Macfarlane, A.I.A.

The experience of the Monarch Life during 1918, is not only a testimony to the excellent management of the company under Mr. Stewart and his associates, but shows that in a continually increasing measure the public is slowly but surely coming to recognize the place insurance can be made to play in all human relationships.

At the annual meeting of the Prince Albert board of trade, E. A. Fox was elected president and H. M. Hueston, vice-president.

To enable it to meet the increasing demands for newsprint, International Paper Co. of America, will soon proceed with the plan to erect a mill at Three Rivers, Canada. Estimated pre-war cost of the mill was in the neighborhood of $6,000,000.

MARINE INSURANCE IN GREAT BRITAIN

War Risk Rate Dropped After Armistice Was Signed—Cargo Insurance Satisfactory

In the Annual Review of "The Times," of London, England, an interesting review of Marine Insurance in Great Britain for 1918, is given. The following is abstracted:—

An ordinary marine underwriting account may be divided into two broad classes of risks—namely, cargo and other interests for voyage, and the insurance of the hulls of vessels for a period of time, which is generally twelve months. In dealing with the results of underwriting operations this point must be kept clearly in mind when comparing the actual settlements made, because a good deal depends upon the composition of the account written.

One underwriter may have a larger proportion of time business in his account on which the settlements in the first year will be comparatively light, while another underwriter may have a greater proportion of cargo business, on which the settlements in the first year will be heavier. These facts must always be borne in mind when comparing the first year's settlements. Since the beginning of the war there have been added to these two classes of insurance war risk business. Compared with ordinary marine risks, the settlements for war risks are more prompt, for under ordinary circumstances the war risk is a total loss or an "arrival" within a very few weeks. Where underwriters accept a large volume of war risks their settlements are proportionately increased accordingly. The heavy premium income shown by underwriters in the last two years was almost entirely due to war risks, for the high values insured against marine perils were balanced by the risks taken by the government, as, e.g., those for shipments of grain and sugar, which in the usual course would be insured in the open market. The account for 1918 may therefore be divided into three sections, and the first of these may be considered under the heading of war risks.

War Risk Rate

After the armistice was signed the war risk rate dropped to a nominal premium of 2s. 6d. per cent., which covered mine risks. Down to March 7 last the government war risk rate was five guineas per cent., net, and was the rate which had been in existence for nearly a year previously. This rate was a flat rate for all voyages. After March, however, the War Risks Insurance Office decided to quote differential rates for various voyages, and these rates were subsequently amended in April and again in August, the amendments in practically all cases showing a reduction. The government rate controlled to a large extent the rate in the open market, which for the purposes of competition was generally 10 per cent. below it. The amount of premium received for war risks in 1918 will, therefore, be much less than that for 1917, as the business only covered ten months of the year, while rates generally were lower than those in 1917. War risk losses were, of course, less, as the total amount of tonnage sunk by war perils down to the end of October was only about half of that sunk in 1917. Taken as a whole, the results of war business during 1918 proved profitable for underwriters.

Ships Insured for Time

The second section is that of the insurance of hulls "against time." In the ordinary way, an underwriter finds that his first year's settlements on a time account are comparatively light. The second year's claims are the heaviest, while with a moderate settlement in the third year the result of the account can be ascertained with accuracy. A rough estimate may be taken as about 15 per cent. the first year, 50 per cent. the second year, 20 per cent. the third year, and 5 per cent. the fourth year. Underwriters, however, who have records over a long series of years are finding that their average settlements cannot be made to apply to present conditions, for during the year 1918, when the fourth year's claims on the 1915 account should, according to ordinary experience, have been comparatively small, it was found that they were about the average of the third year's settlement of an ordinary account. The result is that the 1915 time account, which appeared satisfactory at the end of 1917, cannot be expected to close very profitably, while on a similar assumption it may be said that results for the time accounts of 1916-1917 are not very brilliant.

It is rather early to express any opinion on the 1918 time account, except that the losses from collision were abnormally heavy. Total losses due to this cause in 1918 numbered 102, against 66 in 1917, while under ordinary conditions total losses for collision in twelve months would average about 30. To a large extent this was attributed to the convoy system and the extinction of lights, and a further difficulty appeared to have been the camouflage of steamers to deceive submarine commanders, which, on the other hand, deceived mercantile captains manœuvring to avoid a collision. Since the armistice and the consequent abandonment of the convoy system, the total losses from collision became normal once more.

Policy Clauses and Effect

The actual working out of time accounts is very uncertain. Values last year remained about the same, and there were increases in premium of 10 per cent. on renewals, while the 15 per cent. disbursement clause was retained. This clause tends to maintain the values on what may be considered the market value of the steamer. On the other hand, the cost of repairs has been mounting up year by year, and, in addition, necessary repairs are being postponed. All this tends to delay the putting forward of claims, and when they are made the cost is consequently much greater than would have been the case if the repairs had been effected in time.

Two important alterations were made in the institute clauses which took effect during the year. Owing to the decision in the "Florence" case, the clause with reference to sue and labor charges was framed so that any charges under this heading are adjusted in the same way as general average charges. The wording of the running-down clause was slightly altered without making any marked change. The wording in the clause covering returns for vessels laid up was altered so that a reduced return is made when the vessel is under repair, even although she may not be "under average." One important gain by underwriters during the year was that in all renewals the returns for laying up were based on periods of thirty days instead of on periods of fifteen days, a concession which had been made on certain fleets and was common to most "liners."

Cargo Insurance

The account for 1917 in respect of cargo insurances appeared to be running off very satisfactorily, and there is also hope that the result of the 1918 account may be good. This belief is due to some extent to the fact that owing to the sinking of many steamers underwriters on the marine risk secured an "arrival" under their policies, and escaped any claims for general or particular average which would undoubtedly have been forthcoming under normal conditions. The increasing values of commodities also tended to reduce claims for particular average, because consignees were only too pleased to secure delivery when the value of the merchandise at its destination had frequently become very much greater than the insured value in the policy.

Competition and Prospects

Many authorities believe that the series of profitable years experienced by the marine insurance market has come to an end; for it must be admitted that without the profit on war risks, the results would have been very different. New companies have been established, while life and fire insurance companies have entered the field. All these will need premiums to keep up their returns, and the question will soon arise whether there is enough business to give every one a share. While values may be maintained for a time, a period will come when prices will fall and the market will enter on a scramble for business, with rates being cut by the newcomers who have been unable to build up a satisfactory position. The United States is likely to be a strong competitor

for general business in the future, owing to the great expansion of underwriting facilities in New York; while the competition from new companies in France and Scandinavia cannot be ignored altogether. Fortunately, the leading underwriters in London understand their business, and their long and special training will enable them, as in the past, to maintain the pre-eminence of London as an international market for marine insurance.

MANUFACTURERS LIFE INSURANCE COMPANY

Another most satisfactory annual report was submitted to the policyholders and shareholders of this representative Canadian life insurance company at the annual meeting held a few days ago.

As an indication of the very substantial progress made by this company during the past five years, or the war period, the following comparative figures, referring to insurance in force, assets and surplus, are strikingly significant:—

Year.	Business in force.	Assets.	Surplus.
1913 . . .	$ 80,619,888.00	$17,540,387.21	$1,470,857.73
1918 . . .	108,572,703.00	26,748,392.95	2,502,293.60

This is the thirty-second annual report, and a study of it shows that the Manufacturers Life during 1918 strongly reinforced its position. Its securities are of an excellent character. For instance, it has invested in all classes of bonds $10,987,473; government securities, $6,018,966. First mortgages are represented by $9,047,774. Evidently those responsible for the investments of the company took full advantage of the peculiarly attractive opportunities which the past few years has offered for high-grade safe investments, such as federal government, provincial and municipal bonds.

Insurance in force at December 31st, 1918, stood at $108,572,703, an increase over 1917 of $10,444,702.

During the year there was paid to policyholders and beneficiaries the sum of $2,518,039, or $423,825 more than in 1917.

Backed as he is by a strong and representative directorate, a loyal and efficient head office and field organization, Mr. J. B. McKechnie has again demonstrated his managerial capacity. Undoubtedly, the future holds still greater achievements in store for this representative Canadian life insurance company.

MONTREAL TO IMPOSE POLL TAX

For the privilege of working in a factory or workshop of Montreal East without living in that municipality, the right to impose a tax of two per cent. on the annual salary earned is asked in the bill which that town has before the legislature, and now awaiting second reading. Such persons who pay other taxes to the town are exempt from this two per cent. Apparently the council also intends to take advantage of the general law regarding cities and towns to levy the $2 poll tax, for it recites this section in the same clause of its bill.

HAMILTON HAS OVERDRAFT

Hamilton's total debenture debt is $12,886,201 this year, as against $4,617,313 in 1906. The total current debt, including an overdraft of $80,000 from 1918 and a net overdraft of $203,414.52 for this year, amounts to $283,414.52, which is considered heavy.

City Treasurer W. R. Leckie said that the net overdraft of $203,414.52 this year was made up largely of the shortage in tax revenue. The gross shortage in revenue to $204,206.16, but a surplus in expenditure of $791.64, resulted in the overdraft being reduced by this much.

EARLY TAX COLLECTION DESIRABLE

Reduces Loans From Banks—Enables Better Financial Showing to be Made at End of Year

By A. B. BARKER

Manager, Toronto Clearing House

In his report on the tax collections for the city of Toronto during the past year the Finance Commissioner urges an earlier date for the payment of the first instalment. He points out that in 1915 the first instalment was payable on the 23rd July and that this date was advanced each year until in 1918 it was the 14th June, with the result that while out of a total levy of $14,500,000 in 1915 78 per cent. was collected during that year, in 1918 with the date 39 days earlier, there was collected 85 per cent. out of a levy of $20,000,000. The greater prosperity probably had an effect in producing these very satisfactory results, but the earlier start in collecting with the consequently longer time in which to get in the payments, was the chief factor without a doubt.

Attention is drawn to the fact that half of the current expenditure for the year is paid out by June, and as a municipality has no surplus working capital, recourse must be had to loans to meet these disbursements until the revenue for the year is available. Interest must be paid on these loans by the taxpayers and this is provided for in the estimates, the taxes being correspondingly increased.

When the suggestion for June instalment was considered in the council some members thought it rather unpractical and doubted the wisdom of attempting it, but the results have clearly shown that generally the taxpayers appreciated the effort to have the civic business conducted as far as possible along the lines of the best methods obtaining among private interests. With these it is usually possible to so arrange the budget that the maturities of the liabilities will fall coincidently with the maturities of the revenues, the spending of funds not preceding their acquisition. While from the nature of its organization it is impossible for a municipality to fully achieve this, it can by an earlier preparation of estimates arrange for a much closer adjustment between its revenue and expenditure than has been the case hitherto. It is to be hoped, therefore, that when the question is considered this year by the Council the Treasurer's recommendation will bear fruit.

Mr. Bradshaw's remarks were primarily for the city of Toronto, but they will apply with equal force to municipalities throughout the Dominion. In many, if not in most, of them the rule is that the taxes are payable in the last three months of the year, a survival of the customs of earlier days when all credit was based on the time the proceeds of the crops were available.

The benefit to a municipality from the reduction of its interest charges on temporary loans would mean little to the average community, but the introduction of methods more in accordance with modern business practice would mean much. With an earlier start in the collection of taxes it would be found that the item of arrears of taxes which appears in the balance sheet of every municipality at the close of the municipal year would show a marked reduction, as would also the corresponding loan against them in the list of liabilities and each council would begin the year's operations with a clearer idea of its obligations and resources and the work of the council for the year could be more closely checked. One result so far as the municipality is concerned would be reflected in the saleability of its debentures, bond dealers everywhere giving preference to the debentures of those communities whose statements give evidence of efficient business methods.

The present is a most opportune time to inaugurate improvements of this kind, as all communities have benefited from the recent prosperity and the system of earlier collection of taxes could now be introduced with the least friction. When conditions change, as they undoubtedly will, the habit of making early provision for their taxes will have become fixed among the taxpayers with consequent benefits to civic financing.

LETTER TO THE EDITOR

Are Large Cities More Efficient Than Small Ones?—How Our Financial Resources Can be Best Applied

I read your annual issue with much pleasure and have to express my appreciation of your efforts in the collecting and arranging of excellent articles which are very "a propos" at the present time. Some views which have been expressed, however, I am not quite prepared to agree to. This is, of course, natural, because unanimity of opinion on public questions cannot be expected, nor would it be desirable.

Civic Efficiency

I notice in your editorial on Public Utilities that your expressions do not imply that public ownership is to be advocated, excepting, perhaps, in our smaller cities, "where the standard of municipal life is higher than in our larger cities." Further on you remark that "private ownership of public enterprises has demonstrated its efficiency and has shown that under careful regulation it will be sufficiently elastic to meet the changing conditions of municipal life." These two statements are worthy of discussion. In the first place, why should the standard of municipal life be higher in smaller cities? Is it an uncontrovertible fact that such is the case? If it is, then the old Biblical teaching—that in the multitude of counsel there is wisdom—is erroneous. One is accustomed to believe that in proportion to the magnitude of an enterprise it is possible and even imperative to employ officials who are capable of administering the affairs with commensurate efficiency. For example, we would expect Toronto to employ specialists of greater calibre than would be engaged, say, in Edmonton, and Edmonton again could afford to employ more expert men than, say, Welland. I am not imputing anything against any of these places, but simply name them as indicating my line of argument. If such a condition is not to be found, then your statement about a higher standard of municipal life in smaller cities is proven. It may be contended with a considerable degree of confidence that there are in every community public spirited men who are willing to devote their energies and abilities in behalf of the community and that the number of such men is probably proportionately greater in a small city than in a large one. On the other hand, officials in charge of public utilities have a freer hand to manage their affairs in a large city than in a small one. The miasma of politics, unfortunately, permeates our public institutions much to their disadvantage, whilst in private concerns dividends alone count and not politics. Mr. Henry Lye states (page 208) that "it is futile to expect local officials to rise superior to local politics," which in my experience needs qualifying. A general imputation like Mr. Lye's carries its own refutation. Although there are some officials who may be guilty of laxity of conduct, there are others who are beyond reproach. But it is the black sheep that are noticeable, and these are found in high and low offices. Despite these occurrences, there is no sound logical reason why public utilities should not be managed by municipal authorities with great efficiency. There are many examples of very successful large municipal enterprises, as well as small ones.

Tendency Towards Public Ownership

The second quotation from your editorial impelled me to ask if private ownership of public utilities had really demonstrated its efficiency. The curious fact that public authorities are gradually taking over concerns which were previously owned and operated by private companies, does not seem to confirm the above statement. The Ontario Hydro-Electric Commission has acquired some of those enterprises, and incidentally it is interesting to have the press information that the New York State proposes to emulate Ontario. The latest issue of the journal "The Public" (January 11th, 1919) contains an article on "High Finances and Public Utilities." The Brooklyn Rapid Transit Co. and the Interborough Rapid Transit Co. transport a daily average of four million passengers, which no doubt constitutes a world record, and yet these large concerns are either confessedly bankrupt or such a calamity is officially predicted. The efficiency of the management of these utilities is emphatically questioned and many interesting details are presented. It is not my object to decry private ownership, but to argue that both public and private ownership may be disastrous or beneficial to a community according to the manner the businesses are administered. Pittsburg and Chicago street railways may afford arguments against private ownership, but we have publicly owned utilities which have not been organized or managed with due regard to efficiency.

Thus it is that I refer to your editorials as offering excellent basis for discussion by financiers and engineers as to the advantages and disadvantages of public versus private ownership of public utilities.

Peace Preparation

The Hon. T. C. Norris, the Premier of Manitoba (page 18) stated that "the outlook for the future is, in the opinion of many qualified observers, wrapped up in the return of our fighting men from the field of ruthless struggles to the accustomed walks of peaceful life in a country that has never really known war." May I respectfully point out that this important fact and pleasurable contemplation would be promoted in an increased measure if we had carefully organized our plans so that these valiant men would have the delightful prospects of returning without delay to civilian pursuits. This has been urged on several occasions by me, and there is time yet to prepare a handsome and practical reception for the men if the public authorities would now plan schemes which will be advantageous to the communities and beneficial to the men. But if they receive a royal welcome and no work, the effect will be disturbing, to say the least.

Control of Financing

Prof. Adam Shortt's article on Financing after-the-war Industries is instructive. He advances suggestions with respect to the control of investments; that is, he proposes that the government should periodically publish a list of investments which are approved as for essential productive enterprises. It was comparatively a simple matter to urge the people to invest their savings in Victory Bonds, because it was both patriotic and remunerative and the security was unquestioned. But to urge people to save and to advise them how and where to invest their savings in a multitude of enterprises which may be both patriotic and safe, is an undertaking of grave responsibility. Mr. Shortt does not suggest that the government should be responsible either legally or morally for losses incurred in investments which are virtually recommended. Still, the government can do much to restrain investments in questionable enterprises. For example, the Manitoba Public Utilities Commission in a large measure prevented the sale of oil shares in that province which were freely sold elsewhere and caused many disappointments.

Another point referred to by Prof. Shortt was the need for regulating public expenditure. I mentioned this in my article, and it is interesting to observe that several writers to your Annual dwelt upon this feature. This does not mean the curtailment of essential public works nor any unnecessary enterference with the element of home rule in the conduct of local matters, excepting in a certain direction. It means the judicious regulation of expenditures of money and therefore also the preparation of schemes of a public character. Even Russia in pre-war days adopted this measure to preserve the credit of the public authorities and also of the Imperial government. It is highly important that public works should be initiated, financed and executed in some order of priority, so that labor may be usefully and evenly employed in the Dominion. Moreover, it is still more important that public works should be so distributed in the order of time that there will be left sufficient capital and employment for slack times when they are so sorely needed. In the past we embarked on schemes when money was abundant, but labor was otherwise fully employed, and when labor was abundant money was not. Consequently the period of depression was accentuated by the relative absence of useful public works. Mr. James White remarks (page 101) that "it is idle to talk

about keeping down expenses merely by ceasing to do necessary work for the health and convenience of our cities. That foreshadows a process of decay. What is needed is not to stop the expenditure, but divert it into the right channels and use it efficiently."

Municipal Taxes

Mr. C. J. Yorath (page 103) raised a number of issues in this contribution. He calls for a basis of taxation which is broad, equitable and scientific. He further appeals "for municipal administration to be placed upon a sound business basis." These two most important matters have been and are engaging the attention of many students. North American municipal governments seem to be in a state of flux. I think it may be stated without equivocation that there are a greater variety of forms of municipal administration in North America than in any other country, and few of them are given sufficient time to prove their superiority before changes are made. Civic Improvement Leagues were created in Canada to study the subject. Municipal Associations exist in every province and several powerful municipal organizations are energetically discussing the problems in the United States. Taxation is a matter which appeals to all, because we cannot evade the tax-collector. But it cannot be claimed to be equitable or scientific even if it is broad. Mr. Yorath would render inestimable service if he propounded a method of taxation which would be equitable. The Western municipalities adopted single tax in a limited way, whereas few Eastern authorities have departed from the ancient rule of taxing every form of improvement. I will refer to taxation in relation to fire prevention later on. It is important that municipal administration and taxation should receive fuller attention, because they are vital for the proper development of our cities and towns. Town planning is a comprehensive study which includes the above.

Fire Losses

Mr. George Gilbert, Mr. Henry Lye and others dealt with fire prevention. It is a grievous fact that the losses by fire are stupendous; that these losses are paid for directly and indirectly by the public who are already loaded with the high cost of living; that the education of public opinion on the need for regulations with regard to the use of building materials is most important, and that the burden of the responsibility for fires does not fall upon the rightful shoulders. Two points only I intend referring to. It would be a useful measure if the government were to issue model building codes which may be modified, extended or otherwise improved by the local authorities, provided the regulations were standardized to the approval of the governmental departments. Building regulations are now drafted by the municipal authorities and can be enforced, modified or set aside by the simple expedient of passing resolutions and often without doing so. The absence of uniform regulations affords an opportunity for those who desire special concessions, to pitch one municipality against another. But if reasonable uniformity of requirements were to be established, such a condition could not often occur. Moreover, one reason for the low fire losses in European countries may be attributed to the fact that building regulations are uniform; they cannot be set aside by the authorities; they are usually administered without discrimination; and they must receive the governmental sanction before they can be enforced or altered.

The other point is that of taxation in relation to fire risks. It is a curious anomaly that he who creates the greatest risk pays the least taxes, and he who builds substantially and therefore at a greater cost, pays the most taxes. Furthermore, in a majority of cities and towns water mains are laid as local improvements which are assessed according to the frontage, in which case the cheap building owner bears a similar share of the cost as the owner of an expensive building. Now, water mains are much larger than they need be for a domestic supply. About two-thirds of the cost is incurred for fire protection. The substantial building needs the least protection. If taxes and local improvements were equitably assessed, the owner of a cheap building would have to bear a higher proportion of the cost of maintaining expensive yet efficient fire brigades and water works, than the one who erects a substantial structure. This would soon touch the vital part of the owner's anatomy and fire hazards would automatically be reduced. At present the incentive (due to our present basis of taxation) is to build cheap structures because the taxes will be lower. Supposing the cost of municipal fire organizations and two-thirds of the initial cost and maintenance of water works were assessed against such building, it requires not much foresight to anticipate many improvements, reduced fire losses, and a great relief to industrial and social Canada. No criticism is offered to the proposals to make the owners of buildings which have been consumed by fire responsible for the losses incurred because Mr. Lye has done so effectively.

R. O. WYNNE ROBERTS.

BANKS ABLE TO FINANCE COUNTRY'S NEEDS

Optimism as to the immediate future of Canada is indicated by the action of Canadian banks in deciding to immediately equip themselves with additional capital in preparation for the future.

The Federal and local governments are about to put under way new works calling for considerable capital expenditure; agriculturists are seeking funds for the extension of the areas under cultivation and the increase of live stock, and the manufacturing industries of this country will require large credits. The railways for nearly five years have made their requirements for new rolling stock smaller than was prudent and must come into the market for money—millions of dollars—for the increase of rolling stock and new mileage. Merchants expect large trade, and manufacturers look for a greater volume of export business.

The sudden end of hostilities leaves the banks in thoroughly sound and liquid condition, but quite evidently quite able to use more capital. The Royal, the Union and the Bank of Hamilton have all promptly recognized this by the putting out of new issues of stock.

JAPANESE OUT FOR TRADE WITH CANADA

The Vancouver board of trade has lately received a large number of inquiries from Japanese concerns who seek to get in touch there with manufacturing, exporting and importing firms. One Japanese firm states that it imports carbolic acid, woollen cloth, asbestos, linoleum, artificial silk, wool and agricultural products, while it exports Japanese silk goods, cotton, hosiery, oils, knives and chemicals.

Other concerns in Japan seek local firms dealing in brushes and porcelains, also Vancouver firms importing electrical, chemical and artistic household porcelains. Another firm wants to establish connections with firms interested in silks, beans, starches and other agricultural and marine products. Japanese firms manufacturing silk goods and dealing in watch glasses, violin strings and bridges, yarns, buttons, cotton goods, earthenware, also write wanting to establish connections. Another concern asks to get in touch with manufacturers of pulp.

Among the letters received by the board has been one from the Consulat-General de Belgique at Ottawa announcing the formation of a Belgian co-operative company having for its object provision for the re-equipping of Belgian industry. He intimates that the company is looking for specified offers concerning machinery, implements or raw material of every kind.

The Monarch Life Assurance Co. announces that applications received at head office during January, 1919, amounted to over $600,000 and policies issued to over $560,000. This represents an increase of completed applications over the corresponding month of 1918, of 63 per cent., and policies issued of 74 per cent.

ARE YOU FORESIGHTED?

The prompt, methodical man, the alert man, the man who consciously reckons with every risk that may enter his world, is found always prepared for the unexpected. Adequate preparation for life's eventualities includes the making of one's will. While in health is the time to do it. Wills appointing us as Executors are filed in our safe keeping without charge. MAY DEMAND FIXED WHEAT PRICE

Saskatchewan Grain Growers' Decisions Expected to Differ From Those of the Manitoba and Alberta Associations

The Manitoba Grain Growers' Association and the United Farmers of Alberta, in annual convention assembled, rejected a proposal to demand a fixed price on the wheat crop of 1919. [illegible] has been said concerning the attitude of the organized farmers on this question.

The decisions and demands of these annual farmers' parliaments on matters of first importance are usually alike, and when two of the three conventions have met and declared themselves, it is not surprising that most people should suppose that the third will follow suit. The Saskatchewan Grain Growers' Association, however, has always been the most vigorous and independent of these bodies—its membership is five times that of the Manitoba Association and more than twice that of the U.F.A.—and it may be assumed that when it speaks on a subject of such vital concern to its 40,000 members it will do its own thinking.

As a matter of fact, the decision recorded at Brandon and Edmonton was less an expression of the view of the conventions than a vote of confidence in certain of the leaders. Delegates came to both conventions convinced of the justice of the demand for a fixed price, supported in this view by the action of the Canadian council of agriculture when in August, through its appointed spokesman, before the board of grain supervisors at Winnipeg, it publicly declared itself as favoring such action by the government.

In his opening address at the Edmonton convention, President H. W. Wood certainly gave the impression that he thought of the fixed price as something the government could not decently withhold, and although he remarked, towards the close of a clear and vigorous statement of the considerations which would justify this view, that there were "some very strong reasons why the farmers should not ask for a fixed price on wheat," this reservation made no impression on the convention at the time.

Strong Protest Aroused

When, after a resolution embodying the demand for a fixed price had been presented and supported by a number of speeches, quite evidently reflecting the sentiment of the convention, President Wood advised strongly against its passage, his speech aroused a storm of protest. The confidence of the convention in Mr. Wood had been many times demonstrated in unmistakable fashion, but it was doubtful if alone he could have persuaded the convention to abandon its first intention, and it was not until Mr. Rice-Jones, manager of the western district of the United Grain Growers, Limited, came to his assistance with a similar appeal, that the excitement passed and a resolution presented by Mr. Rice-Jones was accepted. Out of deference, no doubt, to the mood of the convention, the resolution was much less definite in its repudiation of the fixed price than that which had been passed at Brandon. The Brandon resolution affirmed "that we do not ask for a fixed price for 1919." The Edmonton resolution followed Brandon through the preamble up to the point where it said: "But we realize that continuation of a fixed price on wheat might unduly bear on the consumer."

Saskatchewan Much Concerned

Saskatchewan grows as much wheat as all the remaining provinces of the Dominion, and the men who come to speak for 40,000 Saskatchewan grain growers will be even more concerned than were the Alberta delegates about the consequences to western grain growers of an open market while there is a guaranteed price in the United States. It may be assumed that they will arrive in Regina on Feb. 18th, as much determined as were the Alberta delegates when they reached Edmonton, to pass a resolution calling upon the government to give them the assurance of a fixed price.

If these men are to act as many people assume that they will act, and repudiate the demand for a fixed price, it can be only because someone whom they trust as the Alberta farmers trusted H. W. Wood, president of the U.F.A., and Mr. Rice-Jones, of the United Grain Growers, Limited, will have persuaded them to do the thing they do not now intend to do. Despite the unity of aim in the movement of organized farmers throughout the West, there is also a certain provincial consciousness, and no man in the movement from Manitoba or Alberta can enter the Saskatchewan convention and change its mind without presenting some very good reasons. And if there is any man in Saskatchewan who commands the confidence of the grain growers and who is prepared to oppose the demand for a fixed price, no one in the movement knows who he is.

Many Declare Themselves

Many of the men who stand high in the regard of Saskatchewan grain growers have already publicly committed themselves to support of the demand for a fixed price. The Hon. W. R. Motherwell, who was the first president of the Saskatchewan association, and the Hon. C. A. Dunning, have declared themselves unmistakably. The Hon. Geo. Langley is not without influence in the convention of the Saskatchewan grain growers, but it will not be necessary to wait for the convention to find out where he stands. Speaking on behalf of the Canadian council of agriculture in Winnipeg last August, he voiced the demand for a fixed price, and again, in the legislature last week, he spoke, as also did the Hon. C. A. Dunning and the Hon. W. R. Motherwell, in support of a resolution which refers specifically to the declaration of the Canadian council of agriculture, and repeats the demand in terms which had the unanimous support of the legislature.

A frank discussion of the whole question in the Regina convention on Feb. 18th is inevitable, and, while there are some uncertain factors in the situation, it is safe to assume that the organized grain growers of Saskatchewan will not simply shut their eyes and follow the lead of the conventions in Brandon and Edmonton.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt station for the week ended February 7, 1919:—

Kerr Lake Mine, 59,538; McKinley Darragh, 84,459; Buffalo Mine, 88,000; Dominion Reduction, 60,000; total, 291,997.

The total since January 1st is 1,848,617 pounds, or 924.3 tons.

DOMINION PERMANENT DECISION

Of special interest to shareholders in the Dominion Permanent Loan Company is the decision of the Official Referee, Mr. J. A. C. Cameron, who has given judgment against all holders of Dominion Permanent stock not fully paid, who are represented by the shareholders' committee. The amounted involved is between $150,000 and $200,000.

Any shareholders represented by their solicitors, or who have special defenses, will be disposed of at a later date. Judgment will not be issued for some days, and those shareholders who pay up in the meantime will escape the penalty of costs and interest, it is said.

The question of liability on prepaid stock, where $50 may have been paid on subscription, the balance to be paid out of profits, was argued and judgment reserved. The question is as to the liability for the $50 paid out of profits.

The liability as to the fractional holdings of shareholders who received stock in exchange for stock in the Provincial Loan was also argued and reserved.

The question of the return by shareholders of dividends improperly paid, amounting to over $1,000,000, will be disposed of within the next week.

The Bank of Hamilton has opened a branch at Enchant, Alta., in charge of Mr. D. Towers.

A Time To Be Cautious

It is no doubt a time to be cautious But it is possible to be over cautious. There is no reason why a man should leave his money on deposit when he could as easily and with equal safety obtain 5½% by investing it in

Mortgage Corporation 5½% Debentures

At the present time, Mortgage Corporation 5½% Debentures form a profitable and safe investment for idle money.

Interest at 5½% is payable in cash on the day it is due. Principal on the date agreed upon.

The busy or inexperienced investor has no worry, no watching of values and markets. His security never shrinks.

Not a dollar has ever been lost by an investor in these Debentures.

INSURANCE AND THE INFLUENZA EPIDEMIC

American Companies Experience Enormous Losses During Last Three Months of 1918

Some interesting observations have been made on the influenza epidemic by Mr. Arthur Hunter, chief actuary of the New York Life Insurance Company. They are incorporated in a recently issued pamphlet from which the following has been extracted:—

"In analyzing the experience in 1918 of life insurance companies during the influenza and pneumonic epidemic the proper measure will not be obtained by considering the death losses paid in 1918, because there is an unusual number of cases on which the companies were not able to obtain completed proofs of death at the end of that year. Consideration should therefore be given to the death losses which have been incurred during 1918. In the New York Life the death losses from all causes paid in 1918 were about $35,000,000, whereas the death losses incurred were $40,300,000. At the end of 1917 there were death losses of $5,800,000 on which no proofs had been received or on which proofs had not been completed, while at the end of 1918 the corresponding amount was $11,200,000 of which $7,400,000 was losses on which no proofs had been received.

"During the first nine months of 1918 the mortality was unusually favorable although it included losses due to warfare, the ratio of actual losses incurred to expected deaths being 61%. The expected losses are calculated on the basis of the reserve tables used, the great majority of the business of which is on the American Experience Table. During the last three months of the year 1918 the ratio of actual losses incurred to the expected was 188%, the average for the entire year being 95%, which is the highest in the recorded history of the Company. The average for the last five years (including war losses during three and a half years) was 72%. The lowest ratio on the basis of incurred losses was 91%, and the highest 115% of the American Mortality Table.

Method to Approximate Losses

"As there were hundreds of cases at the 31st of last December on which the cause of death was not then known, the total death losses in 1918 from the epidemic cannot be stated. There has been a tendency to ascribe too many deaths to the epidemic with the result that an exaggerated account of these losses would be obtained by listing all those which were said to be due to influenza or to epidemic pneumonia. In order to obtain an approximation to the losses actually due to the epidemic the following method has been used:

"It was assumed that during the last three months of the year the ratio of actual to expected losses might be higher than for the first nine months. A ratio of 65% for the former was assumed against 61% for the latter and the excess for the last quarter of 1918, less war losses, was considered to be due to the epidemic. On this basis the claims from the epidemic were $10,000,000, which was less than the total claims reported to us in which influenza and epidemic pneumonia were given as the causes. This does not, however, show the net loss of the company. Under normal conditions the reserve on death losses in the New York Life is $400 per thousand, but on the epidemic losses it is only $120 per thousand. The net cost on $10,000,000 of face value is therefore $8,800,000, whereas under normal conditions the net loss corresponding to $10,000,000 of claims would have been $6,000,000. This is due to the young average age of the insured and the short duration of the policies. In 1917 the average age at death was 51 and the average duration of the policy 14 years, whereas in the epidemic cases the average age is 34 and the average duration 5½ years. It will therefore be seen that a company which has a large amount of new business in proportion to its old business would suffer more severely from the epidemic than a company with a small amount of new business in proportion to its old business. To avoid misunderstanding, it may be well to mention that the average age at death varies in different companies, depending largely on the average age of all their insured lives.

"The effect of the epidemic is very noticeable in the case of deaths occurring within the first policy year after the insurance was granted. In 1918 such incurred death losses were three times as great as in 1917, and for the last three months of 1918 were three times as much as for the first nine months. The losses incurred in the first policy year from influenza and all forms of pneumonia were twice as great in 1918 as the deaths from all causes in the first policy year in 1917. During the seven years from 1911 to 1917 inclusive, the ratio of actual first year losses to expected losses, by the American Mortality Table, averaged 40%, while for the year 1918 the corresponding figure was 98%. In effect this was a seven-fold higher mortality relatively in the last quarter for all ages and a ten-fold for ages 20 to 35 than in the preceding three-quarters of the year.

Proportion of Deaths

"In some cases the greater proportion of the deaths is charged to influenza while in others the greater percentage is charged to pneumonia. For example, in San Francisco six deaths are ascribed to influenza to one from pneumonia, while the reverse is true in Indianapolis where one is ascribed to influenza to six from pneumonia. For the forty-six principal cities three deaths are said to be due to influenza against two to pneumonia. For the six months ending December 27th the Surgeon-General announced that there were 21,376 deaths in the camps in America from pneumonia and 1,131 from influenza. The former must be due principally to the epidemic, as the usual form of pneumonia causes relatively few deaths among young men. (The deaths from all causes other than pneumonia and influenza were less than seven per cent. of the total deaths in the six months.) This is a markedly different relationship of deaths from influenza to those from pneumonia than that found in the cities, the medical officers at the camps having charged against pneumonia nineteen times as many deaths as against influenza.

"A comparison among various insurance companies of the deaths from influenza with those from pneumonia would not serve a useful purpose, because of the different methods of tabulating the causes of death. In one company, for example, all cases of pneumonia following influenza are tabulated as influenza, while epidemic pneumonia is included among pneumonia cases if the attending physician does not differentiate between the two types of pneumonia or state that influenza preceded it. In another company the cases of epidemic pneumonia have been included with pneumonia. The deaths from influenza in the former company exceed those from pneumonia of all kinds, whereas the reverse is true in the latter.

Effect of Total Abstinence

"It is stated that abstainers have suffered more from influenza than non-abstainers. A study of the death rates in the 'wet' and in the 'dry' cities does not justify that statement nor do the more accurate studies of the death rates in life insurance companies. Dr. Brandreth Symonds, Chief Medical Director of the Mutual Life Insurance Company, of New York, has recently stated that total abstainers have had a lower mortality from influenza than the other policy-holders, but that total abstinence does not seem to have been any material help in preventing a vital termination to influenza at any age. As he also decides that a daily use of alcohol not to excess did not increase the death rate from influenza, we may assume that he did not find any marked difference between abstainers and non-abstainers. Mr. Henry Moir, President of the Actuarial Society of America, has also stated that "the statistics do not give any definite indication that the use of alcohol in moderation is either beneficial or objectionable so far as influenza is concerned."

It is estimated by the premier that $1,000,000 would be placed in the estimates as New Brunswick's share of the Dominion government's distribution of $25,000,000 in loans to the provinces at 5 per cent. for the working out of the better housing problem.

	$9,189,657.87

Liabilities.	
Policy and Annuity Reserves	$8,448,469.00
Accumulating and Accruing Profits	269,595.00
Investment Reserves and Other Liabilities	297,602.64
Surplus on Policyholders' Account (inclusive of paid Capital, $50,000)	173,991.23
	$9,189,657.87

SIGNIFICANT FACTS FROM ANNUAL REPORT

INSURANCES.	The amount of New Insurance issued during the year was the largest in the Company's history. Again the Business in Force has more than doubled in five years and quadrupled in ten years.
EXPENSES.	In both the Weekly Premium and Ordinary Branches very satisfactory reductions from the previous low record of 1917 were effected.
ASSETS.	All Bonds, Debentures and Stocks owned by the Company have been carried into the Statement at a figure considerably below the prevailing market values. The rate of interest earned during the year was 6.82%, two points higher than in 1917.
LIABILITIES.	The Reserves on over 90% of the business has been computed on a 3% interest basis a higher reserve standard than that adopted by any other similar Company on the continent. All accruing profits on participating policies to their anniversary in 1918 have been computed and fully provided for in the Liabilities.
CLAIMS.	War and Epidemic Claims formed over 50% of the total claims of the year. The total claims paid to end of 1918 on account of the War, the Halifax Disaster and the Epidemic amount to more than $650,000.
SURPLUS.	The earnings of the year were sufficient to meet all the usual obligations, including reserves for profits accruing, all War Claims and a large portion of the Epidemic Claims The Surplus Fund available for emergencies was used to the extent required to meet the balance of the Influenza Claims. The Surplus on the Government basis, exclusive of Market Values of securities over Book Values, is $926,000.
DIVIDEND DISTRIBUTIONS.	On account of the Company's ability to meet the extraordinary claims of the year in the manner indicated, there is no occasion to reduce the scale of profit distributions. An adjustment at the older ages has, however, been made in order to establish greater equity in the distribution of profits. The quinquennial distributions in 1919 will, on the average, exceed the original estimates on the present rates by 65%.

PERSONAL NOTES

Mr. H. V. Maynard, of the Royal Bank of Canada, Hamilton, has recently been transferred to Toronto, and will be in charge of the Spadina and College Street branch.

Prof. W. W. Swanson, of the University of Saskatchewan, was in Winnipeg this week, addressing the Manitoba Commission on Thrift and Savings on "Reconstruction and Thrift."

Mr. A. D. Braithwaite sailed on February 12th, on the "Empress of Japan" from Vancouver. He is the last member appointed to the Siberian Trade Commission. The others are Messrs. C. F. Just, L. D. Willgress and Cols. Dennis and Owens.

Mr. E. A. Field has been appointed Land Commissioner of the Canadian Northern Railway Western Lines, and Mr. L. C. Groom is to be auditor Canadian Northern Land Department. The office of Mr. Field will be at Winnipeg and that of Mr. Groom at Toronto.

Mr. D. MacGillivray, manager of the Canadian Bank of Commerce at Halifax, and for the past two years president of the board of trade of that city, has assumed charge of a new division of the bank's operations comprising the maritime provinces and Newfoundland, with headquarters at Halifax.

Mr. J. E. Clement, managing director of the Fire Insurance Co. of Canada, arrived in Montreal last week after an absence of seven weeks, during which time he visited England and France. In connection with fire insurance, Mr. Clement said that many influential insurance men whom he [illegible] that fire insurance business in the colonies will develop very materially, especially in Canada and Australia, anticipating a considerable movement of emigration to these countries.

Mr. W. G. Watson, assistant general manager of the Toronto General Trusts Corporation, has been appointed to the directorate of the Mutual Life Assurance Co. of Canada.

He takes the place of the late Mr. Geo. Wegenast. Mr. G. B. Ryan, of Guelph, replaces Mr. Montagu Allan, of Montreal, who has gone to reside in London.

Union Trust Company, Limited

Head Office, Toronto

Report of the Directors

Adopted at the Annual Meeting, Feb. 13th, 1919

To The Shareholders of The Union Trust Company, Limited

Your Directors present herewith the Financial Statement of your Company for the year ended December 31st, 1918.

The earnings for the year, after payment of interest on Guaranteed Funds, cost of Management, and all expenses, amount to $111,226.04 to which must be added the sum of $15,702.77, the amount brought forward from the preceding year, making a total of $126,928.81, which your Directors have disposed of as follows:

To Payment of quarterly dividends aggregating	$ 70,000.00
To Contributions to Patriotic Fund Young Men's Christian Association Overseas Knights of Columbus Army Huts, Navy League of Canada, Sailors' Week	2,175.00
To Taxes and Registration Fees paid to the Dominion and Provincial Governments and Municipalities ...	10,688.17
To Balance Carried Forward	44,065.64
Total........................	$126,928.81

The values of the securities held by the Company are set down in the Annual Statement on a sound and conservative basis.

Investments of funds belonging to estates placed in our hands for administration, and of funds entrusted to us through our Trust Savings Department, have been carefully made and are in excellent condition.

A continuous audit of the Company's accounts has been maintained throughout the year, and a copy of the Auditors' Report is appended to the statement.

The Directors have pleasure in recording their appreciation of the efficient and loyal services rendered by the staff at the Head Office, and the Branch Offices, at Winnipeg and London, England.

All of which is respectfully submitted.

HENRY F. GOODERHAM,
President.

Toronto, January 28th, 1919.

AUDITORS' CERTIFICATE

We have audited the books and accounts of The Union Trust Company, Limited, at the head office in Toronto and branch in Winnipeg for the year ending December 31st, 1918, and all our requirements as auditors have been complied with. We have verified the securities and cash balances either by actual inspection or by certificates from the depositaries. The trust funds and investments are kept separate from the Company's own funds and investments and are shown on the books as belonging to the several Trusts, Estates and Agencies. The Company's investments are carried at market values where such values have been obtainable and the remaining investments and loans are included at values which the Directors consider to be fair and reasonable, and on that basis, we certify, that, in our opinion, the above Balance Sheet is drawn up so as to exhibit a true and correct view of the state of the Company's affairs as shown by the books and according to the best of our information and the explanations given to us.

Toronto, Canada, January 28th, 1919.

CANADA PERMANENT MORTGAGE CORPORATION

ANNUAL MEETING

The Annual Meeting of Shareholders of the Canada Permanent Mortgage Corporation was held at the Head Office of the Corporation, Toronto Street, Toronto, on Friday, February 7th, at twelve o'clock noon.

The chair was taken by the President, Mr. W. G. Gooderham. The Assistant General Manager, Mr. George H. Smith, having been appointed Secretary of the meeting, read the Report of the Directors for the year 1918, and the Statement of Assets and Liabilities, which are as follows:—

REPORT OF THE DIRECTORS

The Directors have much pleasure in submitting to the Shareholders the Annual Statement of the business of the Corporation for the year 1918, which has been duly certified by the Auditors.

The net profits for the year, after deducting interest on borrowed capital, expenses of management, all charges and losses, together with War Taxes and contributions to various Patriotic Funds, amounted to	$824,532.36
The balance at the credit of Profit and Loss at the beginning of the year was	197,977.41
Making the total available for distribution	$1,022,509.77
This sum has been appropriated as follows:—	
Four quarterly dividends of Two and One-half per cent. each on the Capital Stock	$600,000.00
Transferred to Reserve Fund	250,000.00
Balance carried forward at credit of Profit and Loss	172,509.77
	$1,022,509.77

All which is respectfully submitted.

W. G. GOODERHAM,
President.

Toronto, January 22nd, 1919.

R. S. HUDSON,
JOHN MASSEY, } Joint General Managers.

We beg to report that we have examined the foregoing accounts together with the books and vouchers of the Corporation, and that we have obtained all the information and explanations we have required. In our opinion the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Corporation's affairs, according to the best of our information, and as shown by the books of the Corporation.

A. E. OSLER,
HENRY BARBER,
Chartered Accountants, } Auditors.

Toronto, January 20th, 1919.

The adoption of the Report of the Directors was moved by the President, Mr. W. G. Gooderham, who said:—

The Report which has just been read is one which it has afforded your Directors and Officers much satisfaction to submit. I believe it will prove equally gratifying to all the Shareholders.

In addition to payment of the usual Ten per cent. dividend, we have once more increased the Corporation's Reserve Fund by a quarter of a million dollars. This fund now amounts to Five and One-half million dollars and is only one-half a million less than the paid-up Capital. The balance remaining at the credit of Profit and Loss, while slightly less than a year ago, amounts to the very respectable sum of $172,509.77.

The money on deposit with the Corporation consists chiefly of the savings of thrifty people who seek primarily to be assured of unquestioned security for their money, and at the same time to obtain a reasonable rate of interest thereon. Our deposits, therefore, form one of the most stable portions of our borrowed funds. As was to be expected, the Victory War Loans appealed very strongly to the patriotism of our depositors, who also recognized the unusually favourable investment they afforded, and as a result they were large purchasers of these Bonds. The volume of money available for loaning having been thus considerably reduced, there was an accompanying reduction in the net profits for the year, which nevertheless amounted to $824,532.36, equal to more than 13.74 per cent. of the paid-up Capital, or 7.20 per cent. of the total Shareholders' Capital.

The extremely heavy withdrawals for the purpose I have referred to have been to some extent replaced by new deposits, which have been most satisfactory. Our Sterling Debentures which matured in 1918, though the amount was unusually large, were almost fully renewed or replaced by new money, and our Debenture money obtained in Canada has somewhat increased. All these are most encouraging features of the year's operations. With the lessened requirements of the British and Canadian Governments, we may expect a gradual restoration of our borrowed funds, which have been so greatly reduced during the past four years, and this will better enable the Corporation to supply the requirements of real estate owners for loans. The lessened volume of loaning has not been due to an absence of demand, but to the necessity for refusing much desirable business in order that our depositors as well as the Corporation might do their duty by participating as largely as possible in providing the money which was so urgently needed for the prosecution of the war, now, as we all hope and believe, so happily terminated.

Mortgages on Real Estate continue, as they always have been, to be the principal item in our Assets and amount to $26,318,586.75. It will be of interest to the Shareholders to know that for this large sum we hold 15,590 mortgages, every one on improved and productive property, averaging $1,688.17 each. The securities consist chiefly of cultivated farm lands and residences of moderate size and cost in our leading cities. Experienced lenders and real estate dealers know that there are no classes of security so readily saleable under any circumstances as these two upon which the funds of the Corporation and its Depositors and Debentureholders are principally secured. Nor is there any class of borrower who so carefully attends to his obligations and strives to pay off his mortgage as the owner of a cultivated farm or of a modest home. Though the ability of many of our customers in the west to make their payments was adversely affected owing to the somewhat disappointing crop returns, the payments received from our mortgagors during the year exceeded Five million dollars, or nearly One-fifth of the total mortgage loans and almost sufficient to have repaid every dollar of our deposits.

The amount of Bonds and Debentures owned by the Corporation is somewhat larger than at the beginning of the year, the increase consisting almost entirely of the Canadian Victory Loans.

That our Agents in Scotland have continued to manifest their splendid interest in the Corporation's affairs is evident from the fact, to which I have previously drawn your attention, that the amount of our Sterling Debentures has been so well maintained. For their influential and much valued services we again offer them our sincere thanks.

I think I have said sufficient to assure you that, in common with the other Directors and all who are most largely interested in the welfare and continued success of the Corporation, I am highly gratified with the results we have been able to present to you. From close personal knowledge, and daily association, I am thoroughly satisfied the position of the Corporation is to-day better and stronger than it has ever been and, remembering its sixty-four years' history, I could not possibly say more. Without further remark, therefore, I beg to move, seconded by the Vice-President, that the Report of the Directors be received and adopted and, together with the General Statement, be printed and a copy sent to each Shareholder.

The Vice-President, Mr. R. S. Hudson, in seconding the motion for the adoption of the Report, said:—

I regret exceedingly the absence of Mr. W. D. Matthews, our First Vice-President, upon whom has usually devolved the duty of seconding the President's motion.

I shall not attempt to imitate his general remarks, which were always interesting and instructive. I may say, however, that before leaving the city Mr. Matthews expressed himself as well pleased with the result of the past year's operations and the present position of the Corporation. I think you will all agree that I know, or ought to know, the business and position of this Corporation as few others do, and I can say, with confidence, that during the forty-two years I have been associated with the Corporation, it has never been in a sounder condition than it is to-day. It is true that for the third time in the last thirteen years, during each of which not less than $250,000 has been added to the Reserve Fund, the unappropriated profits have been somewhat reduced to make up the full quarter of a million dollars addition to the Rest.

This year there are special reasons for this. Some years ago the Directors and Management began gradually to adopt a certain policy of a most conservative nature with respect to the Corporation's Assets, which eventually became fully effective. During the year the Assets of the Oxford Permanent were purchased and, while these are all in good condition they had not been dealt with on the same basis as the other Assets of the Corporation. It was considered desirable that there should be uniformity of procedure in this, as well as in other respects, at all the Branches of the Corporation. To bring these Assets in line with the others required a considerable portion of the amount transferred from Profit and Loss Account. In addition, about a million and a quarter dollars of deposits, upon which we are supposed to make some profit, were withdrawn for investment in Victory Loans during the past year. It is gratifying to find that our deposits are gradually and surely increasing again, although money withdrawn for Victory Loan purposes does not find its way back to the Loan Company, but to the Banks.

I should like to impress upon the Shareholders of the Corporation that they are practically the owners of The Canada Permanent Trust Company and are, therefore, vitally interested in its prosperity. It would, therefore, seem incumbent upon them in their own interests to direct to our own Trust Company all business within its sphere of operation that they can possibly influence.

You are aware that the operations of institutions which lend money on the security of real estate have been much beset with difficulties owing to the unjust interference by some Legislatures with contractual rights, though in many instances this interference has proven as disadvantageous to the honest and deserving borrower as to the lender. Some of the Western Provinces have also entered into competition with us by loaning on farm lands on a basis that has already entailed, and must continue to entail, financial loss to those Provinces for which additional Taxation must be imposed upon the large majority of the public which does not borrow from the Government.

The Statement we have presented to you to-day, showing such satisfactory results of the Corporation's business during the fifth year in which world finances have been disarranged by the war, affords evidences that, notwithstanding these minor difficulties, a Corporation like the Canada Permanent, transacting its business on a legitimate and businesslike basis and treating its customers fairly and with due consideration need not be disturbed by such incidental and more or less temporary interferences which, while to some extent irritating, cannot have any serious permanent effect. Our Statement is one upon which the Shareholders may be sincerely congratulated and I have much pleasure in seconding the President's motion.

The motion having been put to the meeting, was unanimously carried.

The Shareholders, by a unanimous vote approved and ratified certain subscriptions which the Directors had made for various war relief purposes.

The election of Directors for the ensuing year was then held, and resulted in the unanimous re-election of Messrs. W. G. Gooderham, W. D. Matthews, R. S. Hudson, Col. Albert E. Gooderham, J. H. G. Hagarty, John Campbell, S.S.C. (Edinburgh), John Massey, F. Gordon Osler, E. R. C. Clarkson, Sir William Mulock.

Messrs. Henry Barber and A. E. Osler were re-appointed Auditors for the current year.

The Board met after the adjournment of the Annual Meeting, and re-elected Mr. W. G. Gooderham, President; Mr. W. D. Matthews, First Vice-President and Mr. R. S. Hudson Second Vice-President.

HURON AND ERIE MORTGAGE CORPORATION

At the fifty-fifth annual general meeting of the shareholders of this solid Canadian financial institution, the president, Mr T. G. Meredith, K.C., was in the happy position of being able to announce that since December 31st, 1913 the assets of the company had been increased by almost $3,000,000, or 19.30 per cent. To have accomplished this in view of the fact that the company was called upon, during the same period, to repay British debenture holders the sum of $1,442,959 is eloquent testimony to the management behind this organization.

Net profits for the year show a most gratifying increase over the previous year. Earnings in 1917 were approximately $10,000 more than in 1916, whereas, in 1918, the net profits exceeded those of 1917 by $23,877, and permitted an addition to the reserve fund of $200,000 as against the transfer of $100,000 the year previous. The reserve fund now stands at $3,500,000.

The assets of the Huron and Erie are now well over eighteen million dollars, while those of its associated company (Canada Trust) are almost ten millions, making the combined total assets more than $28,000,000.

In addressing the shareholders, Mr. T. G. Meredith, the president, said, in part:—

"After more than four years of business under war conditions, it is fitting we should take stock of how the Huron and Erie withstood that unprecedented strain, and where it stands to-day in comparison with the end of the year 1913.

"Looking to the future, your directors view the company's prospects with confidence. Believing that Canada's progress will be strikingly accelerated, they are convinced that corporations like the Huron and Erie and Canada Trust Co., founded on the security of the productive soil of Canada, and fulfilling necessary and important functions, will abundantly share in the country's prosperity."

At a special general meeting of the Huron and Erie shareholders, held subsequently to the regular meeting, it was unanimously decided, after a full explanation having been given by the president, Mr. Meredith, to increase the par value of the corporation's shares to $100 each, as referred to in last week's *Monetary Times.*

The Huron and Erie Mortgage Corporation is one of the oldest and strongest institutions of its kind in the Dominion, and during its long and honored career has been responsible for the placing of vast sums of money throughout the country. Its operations are widely scattered.

Its manager, Major Hume Cronyn, has earned an enviable position in the realm of loan company administration. To him much credit is due for the strong position the company occupies.

It is the intention of the company to open offices in Toronto about midsummer of this year, which will mean that the company will then have active organizations at eight different points in Canada.

SUN LIFE ASSURANCE COMPANY

The financial statement of the Sun Life Assurance Co. of Canada to be presented at the forthcoming annual meeting, will show that at the end of 1918, total assets of the company amounted to $97,620,379, an increase of $7,460,204, within the 12 months. Total income in 1918 amounted to $21,651,099, an increase of $2,362,102. Profits paid to policyholders amounted to $1,546,607, and the total disbursements to policyholders to $9,768,564, an increase of $928,318 over 1917.

Business issued in the year, with the full first year's premium paid to the company in cash, totalled $51,591,392, a gain of $3,779,824, while total insurance in force rose to $340,809,656, an increase of $28,938,710 within the year.

Results of the Montreal city agency's year show that the business written on which the first year's premium was paid was $4,031,361, and the new premium income $148,607.

The Ontario Loan and Debenture Co.

The Forty-eighth Annual General Meeting of the Shareholders of this Company was held on Wednesday afternoon, 12th instant, at the Company's Offices, London, Ontario.

The chair having been taken by the President, Mr. John McClary, the Manager, Mr. A. M. Smart, who acted as Secretary, read the notice calling the meeting and the minutes of the last Annual Meeting, which, upon motion, were confirmed.

The Annual Report was then presented, as follows:

To the Shareholders:

The Directors take pleasure in presenting herewith their Annual Report of the affairs of the Company.

The demand for Mortgage Loans has been very moderate throughout the year past, and partly in consequence of this it has been possible to further add to the amount of investments in Bonds, more especially in those of the Dominion of Canada. With the close of the War an augmented agricultural development may be looked for in which your Company anticipates being of service in furthering the necessary increased production, so vital to the welfare of the country.

The Revenue Account, details of which are herewith, shows that after payment of Provincial and Municipal Taxes, Expenses, Charges, and provision for all Interest, Losses and possible contingencies, your Company's

Balance carried forward		$ 43,942 05

A continuous audit of the Accounts and transactions of the Company has been made, and the Certificate of the Auditors is appended to the Financial Statement which is presented herewith.

Your Directors desire to record the sense of their profound regret at the loss by death during the past year of Mr. Thomas H. Smallman, a co-director, who always took the keenest interest in the welfare of your Company.

Your Directors desire to most cordially acknowledge the care and attention to the Company's business rendered by the Agents in Great Britain and to bear testimony to the zeal and efficiency with which the Officials and Staff of the Company have discharged their respective duties.

All of which is respectfully submitted.

JOHN McCLARY, President.

London, Ont., 25th January, 1919.

A. M. SMART, Manager.

To the Shareholders of The Ontario Loan and Debenture Company:—

We hereby certify that we have audited the books and accounts of The Ontario Loan and Debenture Company for the year 1918, including a monthly cash audit and the verification of the entries and balances in all the Company's books, and we find the whole correct. We have also examined the securities and find them in order.

All our requirements as Auditors have been complied with and in our opuinion the above statements are properly drawn up so as to exhibit a true and correct view of the state of the Company's affairs, as shown by its books.

F. G. JEWELL, C.A., } *Auditors.*
J. F. KERN, }

London, Ont., 25th January, 1919.

Upon motion by Mr. John McClary, seconded by Mr. A. M. Smart, the Annual Report was adopted.

A resolution confirming the action of the Directors in subscribing $3,000.00 in 1918 to the Canadian Patriotic and Red Cross joint fund, and $1,500.00 in 1919 to the Canadian Red Cross fund was passed.

The Scrutineers were then appointed and the election of Directors proceeded with, Messrs. John McClary, A. M. Smart, Lieut.-Col. William M. Gartshore, John M. Dillon, M. Masuret, C. R. Somerville and J. G. Richter being re-elected for the ensuing year.

It was moved by Prof. J. H. Bowman, seconded by Mr James T. Moses, that Messrs. Frank G. Jewell, C.A., and John F. Kern, be and are hereby re-elected Auditors of the Company. Carried.

The meeting then adjourned and at a meeting of the Board of Directors held subsequently, Mr. John McClary was re-elected President, and Mr. A. M. Smart, Vice-President, of the Company.

An Increase of Over Half a Million Dollars in Canadian Debentures

$5,215,130 represented the amount invested in **The Huron & Erie Canadian Debenture Department** at the close of 1918. On December 31, 1917, the amount was $4,703,191.

The increase of $511,939 is worthy of mention. It is another indication of confidence on the part of investors in the stability of this strong old institution.

Deposits in the Savings Department at the end of the year totaled $3,104,973.

At the close of 1917 the amount was $3,025,255. Notwithstanding the investment of large sums by depositors during 1918, there was an increase of $79,718.

One of the outstanding results is the addition of $200,000 to Reserve Fund. The Paid-up Capital and Reserve Fund now total $5,800,000.

DIRECTORS' REPORT

The Directors of **The Huron & Erie Mortgage Corporation** have pleasure in submitting herewith their Fifty-fifth Annual Report, showing the result of the Corporation's operations for the past year, accompanied by the balance sheet to December 31st, 1918, duly audited.

After defraying the expenses of management and all other charges, and making allowance for actual and possible losses, the balance available for distribution is $560,738.90, as follows:—

Brought forward from the previous year's account	$ 86,669.82	
Net profits upon the past year's business	474,069.08	
		$560,738.90
of which the following disposition has been made:—		
Four quarterly dividends of 3 per cent. each (making the total distribution 12 per cent.)	$300,000.00	
Government and Business Tax	8,099.25	
War Tax	13,477.11	
Set aside for Transfer to Pension Fund	10,000.00	
Set aside for Transfer to Patriotic Fund, Canadian Red Cross Fund, National Y.M.C.A. Fund and Navy League Fund	5,825.00	
Transferred to Reserve Fund	200,000.00	
Balance carried forward	23,337.54	
		$560,738.90

The Reserve Fund now amounts to $3,300,000.00, or one hundred and thirty-two per cent. of the Paid-up Capital.

The sum of $10,000.00 has been set aside for transfer to the Pension Fund, and the sum of $5,825.00 for patriotic purposes as above noted. The Shareholders will be asked to approve these transfers.

The Corporation has no real estate on hand other than office premises, all properties which have come into the possession of the Corporation by foreclosure, failure to obtain purchasers under power of sale, or otherwise, having been sold.

The Directors desire to bear testimony to the very efficient manner in which the Officers of the Corporation have discharged their respective duties.

All of which is respectfully submitted.

T. G. MEREDITH, President.

THE TORONTO MORTGAGE COMPANY

The annual statement of this firmly-established institution appears on another page of this issue, and again reveals careful management of its affairs.

The comparative figures for 1916, 1917 and 1918 are as follows:—

	1916.	1917.	1918.
Interest and rents	$ 211,594	$ 203,838	$ 206,155
Assets ...	3,244,596	3,141,401	3,171,712
Deposits ...	119,970	138,555	116,952
Reserve fund	560,000	590,000	620,000
Sterling debentures	1,473,918	1,368,749	1,396,708
Currency debentures	300,434	251,467	242,717

After the usual dividend of 8 per cent. the sum of $30,000 was added to reserve fund, bringing it up to $620,000, or practically 85 per cent. of the capital, a truly substantial sum, and one which indicates the financial strength of the organization.

The company's holdings of government and municipal bonds and stocks now amount to $831,122.

Again, during 1918, the company experienced great success in connection with interest collections. At December 31st, 1918, there were practically no arrears on the company's books, to be exact the trifling sum of $269.22.

Loan companies during the past few years, owing to the war and the decreased demand for mortgage loans, have been confronted with unusual conditions.

To cope with these changed conditions has called for particular ability, because it necessitated not only the conduct of the usual functions of a loan company, but also a constant eye to the future. So far as the Toronto Mortgage Company is concerned, an analysis of its statement shows that care, coupled with the necessary progressiveness, has but strengthened its already strong position. The directors, shareholders and clients have every reason to feel that in Mr. Gillespie's hands the company's affairs are safe.

THE ONTARIO LOAN AND DEBENTURE COMPANY

Last year, in reviewing the annual report of this well-established institution, we stated that for the past six years it had been able to add $100,000 each year to its reserve fund. In looking over the report for 1918 now before us, we are again pleased to note that another $100,000 has been added to this fund, which is now considerably larger than the company's paid-up capital, an element of strength of which the directors and management might be proud.

Net earnings for the year were $267,761, as compared with $268,290 in 1917. This sum, with a balance of $50,703 carried forward from last year, made $318,469 available for dividends, war taxes, etc. Dividends at the rate of 9 per cent. per annum were paid.

This is the forty-eighth annual statement of the company and the same care which has characterized its operations for so many years is revealed by this its latest report. The company has out in mortgages on real estate $5,214,704. An analysis of the assets will convince anyone of their substantial character.

Mr. A. M. Smart, who has so long and so ably directed the affairs of this organization, together with all those who are actively associated with him, are to be congratulated upon the operations for 1918.

Judging by the government's programme of expenditure for this year, which parliament is asked to vote, there will have to be another "Victory Loan" of some hundreds of millions floated next autumn. The prospective expenditure of at least eight hundred million dollars is contemplated.

THE SOVEREIGN LIFE
ASSURANCE COMPANY OF CANADA

Head Office: Winnipeg, Canada

DECEMBER 31st, 1918

TOTAL CASH INCOME	$ 399,455.36	NEW ASSURANCES ISSUED	$3,126,738.00

EXTRACT FROM DIRECTORS' REPORT FOR 1918

SURPLUS—The surplus which one year year ago stood at $145,399.59, is now $104,015.22. Your Directors feel that they have reason to congratulate the Company on the fact that it has so well withstood the strain of such a year as 1918, in which the burden of extra death claims, due partly to the war, but chiefly to the influenza epidemic, reached such phenomenal figures in all companies. The necessity of maintaining substantial contingency or rest funds was never so forcefully exemplified as during the year just closed. The moderate decrease in surplus experienced by this Company in 1918 and the thoroughly sound position which it now occupies, should inspire confidence in its ability to cope successfully with any future conditions which may arise.

DISRUPTION OF STEAMSHIP BOARD

Announcement of Dividend Causes Resignation of President and one of Directors—J. W. Norcross New President

An initial distribution on the common shares of Canada Steamship Lines, Ltd., was declared at a meeting of the directors in Montreal on February 11th, when a rate of 4 per cent. per annum was determined on, the first quarterly payment of 1 per cent. to be made March 15th next. This has been under discussion for the past two years or more. It was also made known that two of the directors, James Carruthers, president of the company, and J. C. Newman, had resigned, because of their opposition to the policy of a common stock dividend as agreed on by the majority of the board. The announcement of the retirement of the president occasioned no surprise. He had made no secret of his view, that he considered a distribution of the common inadvisable for some time to come, believing that a large cash reserve should be built up behind the dividend on the preferred shares. Mr. Newman, who shared Mr. Carruthers' view in the matter, concurred in the president's action of resigning from the board by also retiring as a director and member of the executive committee.

James Carruthers,
Who has resigned as president of the Canada Steamship Lines.

Reason for Attitude

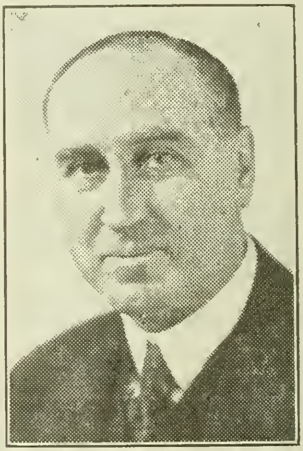
Mr. Carruthers said:—

"My principal reason for adopting the attitude is that I consider the company's best interests are bound up in maintaining the dividend position of its premier capital issue, the preferred stock. In other words, this issue should be strengthened during a period of exceptional earnings with such a reserve backing that the continuance of the regular rate would be assured for some years to come. My contention is that the disbursement should not be made until there is a strong liquid reserve behind the preferred."

Dividend Justified

J. W. Norcross, vice-president and managing director, who was elected by the board to succeed Mr. Carruthers as president, commented briefly on the decision to declare a dividend. He stated that the company was in a strong position financially, a dividend was justified by the earnings, and further, the 4 per cent. rate decided upon was an indication of a conservative policy. Mr. Norcross, it was announced, retains his title of managing director, coupled with that of president.

The vacancies on the board of directors will not be filled until the annual meeting of the company, to be held March 1st. A number of changes in officers and the executive, however, were announced. C. A. Barnard, K.C., and M. J. Haney, both directors and members of the executive committee, were elected vice-presidents of the company. W. E. Burke, formerly a director and assistant manager, was appointed director in charge of transportation and member of the executive committee. H. W. Cowan, formerly director and operating manager, was appointed director in charge of operations and a member of the executive committee. F. S. Isard, who is already a director and member of the executive committee, was appointed director of finance and comptroller.



British and Colonial Press Photo.

J. W. Norcross,
New president of the Canada Steamship Lines.

An increase of $313,113 over the actual expenditures of 1918 is shown in the estimates of the city of Toronto property department for 1919. It is stated that this increase is due in great measure to the increases in salaries, and also to the need for many repairs to various city buildings.

The Winnipeg special civic committee on taxation and equalization has decided to ask the government to name a committee consisting of its equalization board to meet with the civic committee and discuss the question of equitable equalization.

A scheme to bring together under one supervising organization all the branches of automobile insurance, fire, theft, liability, property damage and collision, without impairing the efficiency of the present separate organizations, is being considered by a number of the most prominent United States executives of the fire, marine and casualty companies. Mr. John B. Laidlaw, Canadian manager of the Norwich Union Fire Insurance Society, is also interested in a similar movement in Canada to bring together into one association all classes of companies writing automobile insurance in the provinces of Ontario and Quebec.

CANADA TRUST COMPANY

Once more the Canada Trust Company is able to present a most satisfying report. Going back for five years the interesting fact develops that in that time the company's assets have more than doubled. The figures are as follows: December 31, 1913, $4,830,162; December 31, 1918, $9,900,000. During the same period the surplus security has increased from $1,186,000 to $1,600,000. Such figures as these are significant and convincing evidence of the care exercised in the management of this firmly established institution.

Profits for the year amounted to $140,136, which, added to $10,274 brought forward from the previous year, made $150,411 available for dividends, taxes, transfer to reserve fund, and after doing all this there was a balance of $5,601 carried forward. Fifty thousand dollars were added to reserve, making that fund now $600,000, or 60 per cent. of the paid-up capital.

When the new Toronto office of the company is opened (reference to which is made in another column) it will then have eight active branches strategically placed throughout Canada. With such an organization the company is in a position to render most useful service to its growing clientele.

During 1918 the company experienced a most gratifying increase in the number and value of estates under its care, coupled with which was a decided increase in the number of wills on which the company's name appears as executor and trustee. The statement is altogether an excellent one and constitutes convincing evidence of the strength of the Canada Trust Company at every point.

General Manager Hume Cronyn, and all those associated with him in the active management of this institution, are to be heartily congratulated on the operations of the past year.

RATES SUGGESTED AT PHONE ENQUIRY

A proposal by Mr. Hagenah, the Chicago telephone expert, that Toronto should pay approximately one-half of the increased earnings which he proposes that the Bell Telephone Co. of Canada should be permitted to earn, evoked considerable interest at the resumed telephone inquiry at Ottawa on February 12th. This interest was enhanced, perhaps, by the circumstance that Mr. Hagenah has been engaged as an expert by the city of Montreal.

Mr. Hagenah's reason for suggesting that Toronto should bear $457,000 of the burden, as compared with $100,000 by Montreal, $77,000 by Ottawa, $27,000 by Hamilton and $21,000 by Quebec, is that Montreal, as compared more particularly with Toronto, has been discriminated against in the past.

Increases proposed by Mr. Hagenah in business telephone rates run from $10 in Toronto down to $1 in smaller cities, and in residential rates from $6 in Toronto down to $2 in smaller places.

Another feature of the inquiry was the presentation of the report of Mr. Francis Daggar, telephone expert for the city of Toronto. Mr. Daggar disagrees with Mr. Hagenah's opinion that the Bell Telephone Co. should be given a temporary increase in rates. He maintains that the company could be tided over its difficulties by calling upon its depreciation and assets accounts to the extent of over $1,000,000.

Examined by Mr. Fairty, the expert maintained that during the war period in the United States, there have been advances in rates of public utility concerns without an appraisal of the company being secured. Mr. Hagenah asserted that there is nothing to justify a lower rate for Toronto than Montreal.

Promise that the government will spend $20,000,000 on road construction in Ontario this year, and $5,000,000 on the housing scheme, was given to a deputation from Kingston, Gananoque, Brockville, Prescott and Cardinal, by the Public Works Department this week.

The Toronto Mortgage Company

The Annual General Meeting of the Shareholders of the Toronto Mortgage Company was held at its offices at 13 Toronto Street, at 12 o'clock noon, Wednesday, the 12th day of February, 1919. On the motion of Mr C. S. Gzowski, seconded by Mr. T. H. Wood, the President, Mr. Wellington Francis, took the chair, and the Manager acted as Secretary. The Secretary read the notice calling the meeting, after which he read the minutes of the last Annual Meeting, which were confirmed—the Financial Statement, Profit and Loss Account for 1917, and the Annual Report. The Vice-President informed the Shareholders that not a single leasehold loan now remained on the books of the Company, and further stated that at the date of this meeting, all that remained outstanding in respect to interest on investments due last year, was the small sum of $269.22.

W. GILLESPIE, *Manager*. W. FRANCIS, *President*.

We have audited the Books and Accounts of the Toronto Mortgage Company for the year ending 31st December, 1918. We have examined the Vouchers and Securities relating thereto. All our requirements as Auditors have been complied with. We find the Books carefully kept, and hereby certify that the foregoing Statements are correct

E. R. C. CLARKSON, F.C.A. }
J. HARDY, F.C.A } *Auditors.*

TORONTO, 8th January, 1919.

REPORT OF SCRUTINEERS.

TORONTO, 12th February, 1919.

We hereby certify that the following gentlemen have been unanimously elected Directors of the Toronto Mortgage Company, at the Twentieth Annual Meeting, held at the offices of the said Company this day, at twelve o'clock noon:—

Wellington Francis, K.C., Thomas Gilmour, C. S. Gzowski, Hon. George S. Henry, M.P.P., Herbert Langlois, Thomas H. Wood, and Walter Gillespie.

(Signed) EDWARD R. GRE[illegible]
(Signed) WM. MARTIN } *Scrutineers.*

At a subsequent meeting held by the Board, Mr. Wellington Francis, K.C., was re-elected President, and Mr. Herbert Langlois, Vice-President.

THE MORTGAGE CORPORATION OF NOVA SCOTIA

The seventeenth annual general meeting of the Mortgage Corporation of Nova Scotia was held at Halifax last Wednesday when a most gratifying report was submitted.

The net profits for the year were $41,855. After paying dividends, writing $1,500 off real estate, there was carried to reserve the sum of $12,000.

As indicating the strong position of the company, it is of interest to note that while the total liabilities to the public are $302,764, the total assets amount to $1,280,754, or over four times as large. Of these assets the sum of $873,316 is represented by mortgages on real estate, Dominion of Canada war bonds, and interest thereon accounts for $21,142. During the year the total paid-in capital was increased $45,876 over last year and now stands at $499,145.

The statement indicates that the affairs of the company are in competent hands. The return to more normal conditions should see the sphere of service of this well-established Maritime institution broadened and under the guidance of Mr. Whitman one can be assured it will not only broaden but go on from year to year gaining strength and continuing to play a still more important part in the economic life of the communities it serves.

LONDON LIFE INSURANCE COMPANY

The report for 1918 of this company reveals a vigor that is refreshing. In every branch most satisfactory growth is evident. To have added almost $10,000,000 new business to the books in one year is no mean accomplishment, and makes it the largest amount put on in any year in the company's history.

The assets now stand at $9,189,657 as against $8,050,269 a year ago, or an increase of $1,139,388. Coincident with very substantial increases in business in force, cash income assets, interest rates, etc., there has been a decrease in expense ratio, this being true of both the industrial and ordinary branches.

An analysis of the company's assets shows them to be wisely selected; bonds and debentures and mortgages on real estate account for nearly $8,000,000 of the total.

During the past five years the business of this progressive institution has doubled, while during the past decade it has quadrupled.

An examination of the company's report as it appears on another page of this issue, or, better still, of the more detailed pamphlet report which will gladly be sent upon application to head office, will convincingly show that the management policy under the direction of Mr. John G. Richter, F.A.S., and his able assistant and actuary, Edward E. Reid, A.I.A., is one that is not only producing desired results, but at the same time strengthening the position of the company at every point.

The accompanying comparative table, covering the past twenty years, is of interest:—

Year.	Income	Assets.	New business.	Business in force.
1898	$ 241,182	$ 770,038	$ 1,548,374	$ 5,210,519
1903	[illegible]98,611	1,462,965	1,874,729	7,466,627
1908	672,732	2,663,994	3,654,272	12,152,949
1913	1,295,840	4,645,695	8,828,189	27,118,375
1918	2,782,540	9,189,658	16,433,580	59,804,430

The schedule of fire insurance rates which has been in vogue throughout Canada for some time, is now going into effect in Vancouver, with the result that there will be a reduction of fire insurance charges in the cases of many buildings in the city and increases in some others where the present rate is too low for the risk involved.

UNION TRUST COMPANY

On another page of this issue will be found the annual report of the Union Trust Company, Limited. The profits for the year exceeded those of 1917 by $12,779, while, on the other hand, the management expenses were reduced by more than $16,000.

A balance of $15,702 was brought forward from last year which, added to the profits for 1918, amounting to $111,226, made a total of $126,928 available for dividends, taxes, patriotic purposes, etc. After this has been done there will be a balance carried forward of $44,065.

A reading of the report will show that the total assets and liabilities are some $2,402,000 less than they were in 1917. Savings accounts amounting to $308,000 were withdrawn in Canada, while $120,000 was withdrawn from the London, England, office. In both instances these moneys were used directly for investment in Victory bonds and British war securities, respectively. As has been the experience of other similar institutions it is fair to assume that much of this money will come back as conditions become more normal. In addition to this, it may be stated that the Union Trust Company had acted for some time as investment agent for an insurance company. Some time ago the trust company handed over to the insurance company about $1,700,000 in securities. This was done at the time the investment contract was renewed. These three items account for $2,128,000, while the balance of $194,653 is accounted for by stating more accurately the values of the properties and other assets in the hands of the company simply as agents, which does not necessarily affect the standing of the company.

All assets of the company are based on market values as at December 31, 1918. Nothing has been written up in spite of the fact that in some cases market quotations would have justified that being done.

The gross receipts for the year amounted to $539,150, out of which was paid interest on guaranteed investments amounting to $300,261, while the management expenses amounted to $127,663.

Of the combined capital and guranteed assets, mortgages and other securities on real estate represent 59.80 per cent.; bonds, debentures and stocks represent 16.25 per cent.; real estate owned 7.13 per cent.; loans, 13.35 per cent.

It is interesting to note that although there have been heavy withdrawals from the trust savings department for investment in Victory bonds, the company had, at December 31, 1918, $106,000 more on deposit than on July 31, 1914.

Notwithstanding war conditions, the annual report of the Union Trust Company under review, indicates healthy progress, and Mr. J. K. Pickett, the general manager, who only took hold of the actual management of the company about a year ago, together with Mr. Henderson, the secretary, as well as all those actively associated with them, should feel gratified at what has been accomplished during the past year. The position of the company has been strengthened as a result of last year's operations, and there is every reason to believe that with the return to normal conditions, it will have a still better year during 1919.

CONTROL OF SILVER PRICE MAY CEASE

There is a growing belief among mine operators of Canada that the government control of the price of silver is shortly to be removed. The advocates of the standardization of silver are again being heard. Their contention is that silver should be valued at a ratio of 16 ounces of silver to one ounce of gold, or approximately 1.29 cents per ounce for silver. Such a development would mean much to the mines of Cobalt. An increase of nearly 29 per cent. in the price of silver would add about $5,000,000 to the value of the annual output of Cobalt camp.

Definite announcement has been made by Sir William Hearst that the Ontario government has decided to proceed this year with the expenditure of approximately $25,000,000 on buildings and various construction works.

PENSIONS EXEMPT FROM TAXES

The income of pensioners and dependents of pensioners will be wholly exempt from municipal income tax, this principle having been asserted in an amendment which was made to the Village Act in committee of the whole house of the Saskatchewan assembly.

Following the conclusion of the sitting, the Hon. Geo. Langley stated that a similar amendment would be made to the various acts governing the other classes of municipalities.

An addition was also made in the bill to include those whose salaries are exempt from taxation up to $1,000, widows and widowers without children.

SHIPBUILDING IN ENGLAND

Cheaper Than in Canada or the United States—Labor and Material Higher in the Dominion

England, by slashing ocean freight rates, has given notice to the world that she intends to fight to retain her maritime supremacy. Her statesmen have already declared that England would never abandon her role of policemen of the seas.

"The Wall Street Journal" of New York, commenting upon this, and upon the shipbuilding costs in England, Canada and the United States, says:—

"It is apparent that America has its work cut out to keep the new American merchant marine profitably employed.

"Detailed ship construction costs conclusively prove what in reality no one will contradict, namely, that Britain's shipbuilding costs are considerably lower than costs in the United States. Vice-President Powell, of Bethlehem Shipbuilding Corporation, places the advantage at $100 a ton. Such a disparity has existed for a long time. United Fruit Company, for example, orders its new ships from Belfast builders because of the very substantial saving."

Canada's Material Costs Higher

"Figures show that in Canada labor and material costs are more than $50 a ton higher than in England, and in all probability Canada can produce ships at a lower cost than the emergency yards in the United States.

"On the basis of prices in effect a few weeks before the armistice it was costing in England $66.50 a ton for the labor and material that went into a ship, while the Canadian cost was $118.90. For an 8,100-ton type boat this means an outlay in Canada for labor and material of $963,090. Adding $300,000 for expense other than labor and material, and on top of that a 15 per cent. allowance for profit, the cost of the boat would be brought up to $1,452,490, or $179.32 a ton, deadweight.

"The following table contrasts the labor and material costs of Canada and England, based on an 8,100-ton boat:—

	England.	Canada.	Canad. Inc. per d.w. ton.
Steel plates and shapes, per ton..	$53.50	$ 98.28	......
2,500 tons in 8,100-ton d. w. boat..	133,750	245,700	$13.80
Other hull material	114,000	195,000	10.00
Engines and boilers—labor	43,140	95,000	6.40
Engines and boilers—material...	98,600	160,000	7.50
Hull labor ·	148,700	267,660	14.70

American Labor Costs High

"The item of labor directly accounts for $21.10 of the $52.40 difference. This is a minimum figure, however, as labor naturally enters into the costs of all materials. It is interesting in this connection to note the percentage of increase in wages at Montreal over those in Great Britain at the date mentioned. Engineers, for instance, received 110 per cent. more; machinists 100 per cent. more; boiler shop riveters 137 per cent.; pattern makers, 92 per cent.; caulkers, 87 per cent.; riveters, 87 per cent.; blacksmiths, 73 per cent.; riggers, 80 per cent.; shipwrights, 68.5 per cent., etc.

"When British wage rates are contrasted with those of America the size of the American handicap in shipbuilding can be estimated. For instance, riveters in England, working 53 hours per week, received $16.50; shipwrights, $17.50; plumbers, $17.50; blacksmiths, $17; machinists, $15.25; caulkers, $16.50; electricians, $17.50; riggers, $14; and laborers, $13.50."

A limit has been placed on the rate which Saskatchewan cities may levy in imposing an income tax, of 30 mills on the dollar, or three per cent., by the Saskatchewan assembly.

CITY FINANCE AND CITY PROSPERITY

Equality in Assessment is Essential to Best Prosperity

By Dr. H. L. Brittain

It is amazing how little thought has been given by the average citizen and even by the average business man to the question of scientific assessment and taxation. The old adage about the inevitability of death and taxes well illustrates a prevailing attitude. "Death will come. Why protest? Taxes will come. Why worry?" says the taxpayer to himself, entirely ignoring the fact that it makes a great deal of difference when one dies and how one dies, just as it makes some difference how much taxes one is called on to pay, how often and on what basis. The ordinary person receives his tax bill, grouches about it, but pays it and dismisses it from his mind.

Assessment, or the determination of values for taxation purposes, is one of the most important and, on the average, poorly performed of all governmental activities; yet the method, or lack of method, of making assessments may seriously affect the prosperity of a whole community. It makes some difference whether unoccupied land is assessed higher or lower than land with buildings, whether buildings worth over $10,000 are assessed higher or lower, or on a par with buildings worth less than $4,000. It makes a difference whether some or all industries receive fixed assessments. It makes a difference whether, tax-rates being equal, industries are assessed higher in some cities than in others. It makes some difference whether assessed values compared with actual values are higher or lower in poor residential districts than in good residential districts. In fine, the assessment department has it in its power to exercise a determining influence within certain limits on the standing of cities or districts of cities as industrial, business or residential centres.

Except for the fact that low assessment gives an opportunity for unscrupulous elements to juggle the tax rate, it makes little difference whether assessments are high or low so long as they are all high or all low.

Assessment Inequalities

The Provincial Public Roads and Highways Commission of Ontario pointed out, in 1914, some inequalities of assessment between different municipalities which may be summarized as follows:—

Percentage of Assessed Value on Sale Price.

	Lowest percentage in county. %	Highest percentage in county. %
Elgin	29.2	95.2
Frontenac	23.0	69.0
Halton	45.0	92.0
Middlesex	27.2	96.0
Waterloo	30.2	96.0
Wentworth	6.2	94.2

Do similar inequalities exist within municipalities? Would a provincial commission for the equalization of assessments, as between and within municipalities, be of service? This is an important civic question, especially since the introduction of the provincial one-mill war tax.

The effect of internal inequalities is obvious. One man is simply made to pay another man's taxes. The effect of inequalities between municipalities is not so obvious unless there is direct provincial taxation on assessed values. The following questions in arithmetic indicate the result of inequitable assessment, both as within the municipality and between municipalities, whereas in Ontario there is a provincial tax on municipally assessed values.

Question 1:

If Municipality A assesses its property at 100% of its actual value and Municipality B assesses its property at 75% of its actual value, which city pays more per $1,000,000 of actual value into the provincial treasury as war tax?

Solution:

City A: Real value $1,000,000
Assessed value 1,000,000
Provincial war tax (1 mill).. 1,000

City B: Real value $1,000,000
Assessed value 750,000
Provincial war tax (1 mill).. 750

Answer: A pays $250 more per million dollars, or 33 1/3% more than B.

Question 2:

If the $10,000 property of one citizen in the given municipality is assessed at 100% of its value and that of another at 75% of its value, how much more does the former contribute to the city treasury and the provincial treasury via the 1 mill war tax, on the basis of the present tax rate?

Solution:

29½ mills on $10,000 .... $295.00
" " " 7,500 .... 221.25

Difference $73.75
1 mill (provincial war tax) on $10,000 $ 10.00
" " " " " " 7,500 7.50

Difference .... $ 2.50

Answer: A total of $76.25 more.

Where there is no provincial tax, internal inequalities in assessment are equally objectionable, as this "example" shows:

Question:

If one man's $10,000 property is assessed at $7,500 and another at $10,000, how much more does the former pay than the latter per $1,000 of actual value, the rate of taxation being 30 mills?

Answer: The former pays $225 and the latter $300, or $75 more.

Inequitable assessment penalizes one man without cause and rewards another without cause. It destroys faith in the assessment department and puts a premium on deceit, fraud and citizen apathy.

Important as scientific assessment is, equitable taxation is even more important.

High taxation is hard enough to bear, but it may be necessary, just, and even desirable, under certain conditions. Inequitable taxation is not only hard to bear, it is indefensible in so far as it can be prevented, and no community should submit to it without an earnest effort to effect a change. Inequitable taxation, even if low, is worse than high though just taxation, because it tends to give artificial advantage to some individuals, groups and localities, over other individuals, groups and localities.

Methods of Taxation

Among the important taxation questions which must be answered are:—

1. Should taxes on improvements be as high as taxes on land?
2. Can income taxes be levied and collected satisfactorily by local authorities, or should there be a broader basis of incidence such as the province or Dominion?
3. Should there be business taxes and, if so, should they be on the basis of a flat rate, the value of the premises occupied, or on the net profits of the business?

These questions, and others like them, could perhaps be answered by the experts, but they will not be answered so as to stay answered unless the citizens participate in the solution of the question.

Believing that no finality could be reached in municipal assessment and taxation without public thought and discussion, and as a means of stimulating such thought and discussion, the Bureau of Municipal Research sent out a questionnaire mostly to Ontario cities but also to cities in other provinces and states. The nature of the replies is indicated in the table below:—

Question.	Yes.	No.	Miscellaneous.*
1. Are all incomes assessed which should be?	4	64	32
2. Are incomes other than salaries assessed as completely as incomes from salary?	1	69	30
3. Does the present lapse of time between assessment and tax levy result in great losses from income and business taxes?	56	14	30
4. Is the business tax an equitable one?	4	69	27
5. Does it tend to stimulate industry and commerce?	2	67	31
6. Is unimproved property assessed as heavily in proportion, as improved property?	17	55	28
7. Are large properties assessed as high, in proportion, as small properties?.	7	59	34
8. Could more effective methods be employed in securing equalization of assessment?	76	1	23
9. Would greater publicity of assessments help in the detection of inequalities?	82	8	10
10. Would district conferences with ratepayers help to secure better assessment values?	62	8	30
11. In expropriating property should the city be compelled to pay prices more than 20% in excess of the assessed valuation which has been in force without protest from the taxpayer?.	26	56	18
12 If the city is compelled to pay such prices, should it not have the right to collect taxes on the property on an increased assessment, going back several years, or, failing this, to take, say, 50% of the difference between assessed valuation and sale price?..	55	21	24
13. When properties exempted from taxation are sold should not a certain percentage of the sale price go to the municipality?	58	17	25
14. Should real estate owners be required to give their own valuations to the Assessment Department and, if so, should the city have the right, in case of apparent undervaluation, to take over any such properties at an advance of 20% on said valuation?..	44	36	20

---

*Doubtful, did not reply to this question, etc.

The replies in general show a wide-spread dissatisfaction with assessment and taxation methods in actual practice.

The reason for the dissatisfaction is shown clearly by the replies to a questionnaire sent out to some seventy assessment officials which indicate the widely different interpretation of assessment laws, the influence of special interests on taxation and assessment, and the general chaotic conditions in actual practice.

Is it not time that the Dominion and provincial authorities and representatives from urban and rural municipalities got together for the formulation of a national plan of taxation and assessment which would clear up the twilight zones between the different authorities, secure as far as possible co-operation between them, and enable us to collect the money needed for government in ways at once cheaper, easier, more just and less disturbing to business and industry than those at present in vogue?

PUBLIC UTILITIES OUTLOOK

Public utilities in Canada and across the border are opening the year with much brighter prospects than they did in 1918. While many problems which confronted public utility corporations still remain to be solved, it is the general belief that results of operation for 1919 will show material improvement over those for 1918.

In the last year many rate adjustments, especially in the United States, have been made with the view of increasing rates to a point where the largely increased operating expenses would be absorbed, and these rate advances have relieved burdens on many properties, and there are probabilities of still further advances in rates through applications now pending. Because of these rate advances a general improvement in net earnings of many public utility companies may be anticipated in the coming year.

The Canadian Credit Men's Trust Association has made arrangements to institute, through the Boy Scouts' Association of the Province of Manitoba, a competition along the lines of fire prevention and first aid in fire fighting.

CANADA AS A GOING CONCERN

Proofs of Nation-wide Activity as Seen by a Traveller

BY FRANK YEIGH.

Canada is a going concern; a going-on, not a going up one.

Visible and tangible evidences of this fact are to be seen in every province of the Dominion, and in varied forms of industry, manufacturing and resource development.

He who journeys across the far reaches of Canada, from Sydney to Prince Rupert, cannot but be impressed with these signs of progress, that not only spell present prosperity but future greatness.

Nova Scotia.

Let us start in the silver east and journey toward the golden west. Down Nova Scotia way, where much history has been made, one finds at every turn striking examples of activity and prosperity. This rich maritime corner of Canada is a thriving corner. The three Sydneys alone prove it, as do Glace Bay, Dominion and Louisburg. The Pittsburg of Canada is this section of Cape Breton. The sight of Sydney at night time, with its blazing coke ovens and furnaces, tells the same story as does the day, where the forest of tall chimneys send skyward their incense to labor.

Important additions are being made to the already large plants at Sydney, where 150,000 tons of ship plates will be manufactured yearly. The coal mines in the surrounding centres are yielding up vast dumps of black diamonds, some of the tunnels reaching down and under the sea. Here, in a region of a few square miles, is found a cosmopolitan population running high up in the thousands, while the matchless harbor of Sydney was, even in war time, a scene of wonderful marine activity.

New Glasgow matches the Sydneys as a throbbing centre of industrial life. Viewed from the hill top back of the town, the eye takes in a magnificent sweep of country: of sea and landscape, and of mines and mills and manufactures. Trenton, Westville, Stellarton, are part of this rich coal region, with excellent transportation by land and water, and a visit to each brings a fresh revelation of the industrial activity here under way.

Halifax tells the same story in degree. This fine old city by the sea is making an amazing recovery from the indescribable disaster of a year ago. New streets of houses are under construction, while the $30,000,000 terminals under construction come as a surprise in their magnitude and the work already accomplished. Their completion will mean a new lease of life and a new era of growth for Halifax.

The traveller also sees evidence in many a Nova Scotian port and along many a tidal river of the revived shipbuilding industry. Everywhere is heard the sound of the rivetter, as boats big and little, of wood and steel, are being fashioned. So one finds it at Bridgewater and La Have, at Mahone and Lunenburg; along the shores of Minas and wherever there is water to float a keel. Along with this, the farms and orchards that pass in panorama, tell an additional story of a bountiful yield that combine to make the Nova Scotia of today "drunk with prosperity," as a native confessed and expressed it.

New Brunswick.

New Brunswick matches Nova Scotia in all these respects. The big harbor improvements at St. John, though now carried on in a reduced way, are only temporarily halted, and this fine all-the-year-round port will then be better equipped than ever for its important transatlantic trade.

The industrial part of St. John is working to its maximum capacity, and so as to other sections of the province. Great lumber and pulp mills are scattered through the interior; the new railways are tapping almost virgin areas of a rich region, while the fisheries of New Brunswick, as well as of Nova Scotia and Prince Edward Island, have yielded more than ever before, owing to our increased national appetite for our home-grown brands of fish food. I found Fredericton and Moncton busy, Newcastle and Chatham prosperous; and Campbellton alive with workers, just as Amherst and Truro are in the neighboring province.

Quebec.

And what of Quebec? The ancient city itself shows signs of this new activity, even though the marine basins are minus the ocean-going craft of pre-war days. It is a significant sight to see a train passing over the new Quebec bridge, the first structure to span the St. Lawrence between the sea and Montreal.

Shipbuilding is under way at many points in this our largest province; especially at Montreal, where some huge craft have been launched, but a trolley ride down the river, to the great industrial east end, is yet another revelation of manufacturing activity, for many of the plants are on a huge scale, employing men by the thousands. The new tunnel entrance to Montreal is, in itself, an achievement of note. But if you would realize more fully the new life of provincial Quebec, a visit should be made to the great industries at Shawinigan Falls, or the massive dam on the St. Maurice River, or the tremendously big pulp and paper mills on these and other waterways.

Ontario.

And what does one see in Ontario? Everywhere the wheels of industry are turning; everywhere there is a maximum of activity. Proof is had in almost every centre. Take the Niagara peninsula by way of illustration. Here the $25,000,000 Chippewa-Queenston power scheme is under construction, as one can view from the windows of the trolley. Here, too, the Ontario Hydro-Electric power lines have their start, radiating all through western Ontario, constituting the longest transmission line in the world. Here, as well, the $50,000,000 new Welland ship canal is partially completed, only awaiting the end of the war to see its finish.

A fine big ship was launched the day I was in Welland; and the group of industries in and around the city reveal an artisan activity on the part of many nationalities. Down at Port Colborne the huge refining plant of the International Nickel Corporation is but one of the big undertakings of the peninsula on which nearly $5,000,000 has already been spent.

So it is at St. Catharines, with its wealth of water power. So it is markedly in Hamilton. The panorama of the Ambitious City, as viewed from the Mountain, is one that cannot be excelled in any province or country, and here, too, the scene, at night time, is Dantesque in its weird beauty, with the illuminated buildings, the glow of furnaces and the white pillars of smoke.

Toronto tells the same story, especially in connection with the harbor improvements. A score of new industries represent an investment of nearly ten millions in the Ashbridge Bay district alone. Canadian Aeroplanes turned out hundreds a day; shells are being produced in scores of plants, on an enormous scale; ocean-going vessels are being built in three shipyards; the three-million dollar new union station is nearing completion; old-established plants are constantly adding to their productive capacity, and new ones are springing up everywhere to keep them company.

Or go to the comparatively smaller towns. Take Oshawa as an example of a modern industrial centre, where living conditions are above the average; or Guelph, where one plant has just received a two-million dollar order from the United States.

Speaking of the United States in this connection, it is worth recalling that there are already five hundred branches of American industries in Canada, representing capital investment of $300,000,000—figures that are almost sure to be greatly increased after the war.

Resuming our Ontario tour of observation, it is a welcome sight in Midland to see the big reduction works active again, as it is a sight to view the stirring signs of activity in a thriving centre like London. The same remark applies to Chatham, Sarnia and Windsor. All this border country is prosperous to a degree, with a healthy rivalry in securing new industries. Just read the attractive literature of the Windsor Chamber of Commerce, which takes in its neighboring centres, to feel the lure of a live organization and locality.

Next comes Sault Ste. Marie, where Clergue, the industrial wizard, created, a few years ago, a great mill centre out of small beginnings. Viewed from the deck of a huge lake liner (built in Ontario by the way), the picture of the Canadian Soo is a stirring one, active night and day and every day of the week, the smoky cloud darkening the sky for miles around.

Moving westward, the Twin Cities are in a class by themselves. It is not necessary for an outsider to make in-

vidious distinctions between Port Arthur and Fort William. Combined, they present a totality of industries on a large scale. Talk about big shipyards, you'll find them here; so, too, mills of all kinds, and at Fort William, the new plant of the Canada Car Company, building boats and freight cars and employing hundreds of workers.

The Middle West.

My allotted space is nearly gone and the West is only reached. Winnipeg, as viewed from a skyscraper roof, presents a far different picture of its industrial importance than that gained from a street level view. As the distributing point for a thousand miles of country, there is every reason why it should expand, and then when the plans for the Greater Winnipeg are considered, as related to the surrounding big water power resources, one can excuse the 'Pegger for his optimism and his rosy dreams for a near future.

I cannot here do justice to the other prairie cities, but all are growing, commercially and industrially, regardless of war or occasional lessened crop production. Elevators are steadily increasing in number; spacious warehouses line the wide streets, skyscrapers make landmarks in a level country, while each city has its special lines of manufacture, like Medicine Hat with its tile works and crockery wares. Just watch the West grow!

The Coast.

Finally, there is British Columbia. Our Alpine province has a fine story of its own to relate, despite unsettled labor and mining conditions. Vancouver, New Westminster and Victoria are lively shipbuilding centres. A monster 8,000-ton craft was launched from the Coughlan yards in Vancouver the day I reached the city. A score were on the stocks in Victoria. Nanaimo was as lively as Sydney, and many a Pacific coast port has its great pulp and paper plant working at top speed. The fishing industry was never so prosperous, and more recently the lumbering of spruce for aeroplanes on the Queen Charlotte Islands tells of a new line of activity.

It is reported that the big drydock and shipbuilding plant at Prince Rupert will soon be in commission, if not already the case, and so it is a true tale that our western main matches our Atlantic shores in every form of industrial and commercial development.

This, in briefest outline, is the picture one sees of Canada, as the leagues upon leagues are covered between oceans. It is a picture of thrilling interest, of visualized wealth, and of unbounded resources that are only in the initial stages of development.

Just watch Canada grow as she goes full speed ahead!

SOLDIERS' INSURANCE CLAIMS

Claims for insurance on soldiers who have lost their lives continue to reach the office of the Toronto finance commissioner. A number of these are for insurance on the lives of soldiers who died from influenza. The claims have been coming in at the rate of four or five a day, or from 100 to 120 a month.

The total claims since the war commenced now number 4,287, representing an expenditure of $4,287,000. This is one of the liabilities which makes a low tax rate this year an impossibility.

NATIONAL FIRE PROTECTION ASSOCIATION

By action of the executive committee, January 29th, the 23rd annual meeting of the National Fire Protection Association will be held May 6, 7 and 8, 1919, in Ottawa, Ont. The original plan, of meeting as usual in New York City this year, was altered on receipt of an urgent invitation from the Dominion Fire Prevention Committee and the Canadian Conservation Commission to meet at the Canadian capital. The Dominion government is undertaking important special activities in fire prevention at this time, and it is believed that a meeting of the association in Canada will assist the government and the efforts of our many Canadian members and be an inspiration to members attending from the States.

SOUTH AFRICAN TRADE OPENINGS

Can Get Requirements From United States, But Prefer Purchasing From Canada if Shipping Facilities Satisfactory

After being starved of many needed imports for the war years, South Africa is in the market for enormous quantities of goods. The Canadian Trade Mission has received this information from representatives of the South African Government in London. The country can get its requirements from the United States in large measure, that country having already started a regular service to South Africa, but it prefers to purchase from Canada if satisfactory shipping facilities were provided.

Canadian manufacturers would be well advised to investigate thoroughly trade opportunities in South Africa. Now is the time to get this trade not only back to the pre-war basis, but greatly ahead of it.

South Africa is a country where little attention has been paid to manufacturing, and it does not seem to be the intention to develop manufacturing industries for some time to come. Any business which develops there will therefore have more of a permanent nature than exports sent to European countries, which will themselves manufacture for export as soon as they can get their industries once more organized on a peace basis.

Requirements

South Africa requires almost at once enormous quantities of railway equipment, all kinds of mining machinery, agricultural equipment, clothing, etc. There are few factories of any size in South Africa for the manufacture of clothing. In all these lines just mentioned Canadian manufacturers are strongly advised by the Canadian Trade Commission at Ottawa to get after the business.

In the calendar year of 1918 Canada sent $9,704,215 worth of exports to British South Africa and received from her $1,331,842 imports, leaving a good balance of trade in Canada's favor. Germany sent to South Africa in 1913 $11,172,000 and received from her $16,570,000. Germany needed greatly the articles she bought from South Africa, but South Africa could get the articles received from Germany just as well elsewhere, preferably in Canada. The ten million mark is only a starting point for Canadian trade with British South Africa, according to trade advices, if the development of trade with that country is undertaken enthusiastically and patiently cultivated.

BRITISH CAPITAL FOR NEW RAILROADS

British capital from England is already coming into Canada. Quebec is getting some of the first post-war activities with the proposed construction of two new railroads in the new region of the Ungava.

One of these railroads will run from Seven Islands, a port of the North Shore, about 300 miles below Quebec, and stretch north as far as Hudson Bay, on Lake Mekikek. The other will run from St. Felicien, in the Lake St. John region, and run north as far as Lake Petitsikapu, striking on the way Lakes Mistassini and Nichikan.

The capitalists interested in the projects are the Right Hon. Lord Templeton, the Right Hon. Count of Clarendon, Bernard Spring-Rice, Harry Cranfuird Thomson, of England, and Mr. John T. Ross, of Quebec, a prominent financier, who are interested in the railroad that will branch at St. Felicien, while for the railroad project from Seven Islands to Hudson Bay the following promoters are named: Viscount Templeton, Sir Westley Percival, Bernard Spring-Rice, Ernest S. Holmwood and Harry Cranfuird Thomson.

Hon. Edward Brown, provincial treasurer of Manitoba, has announced that the unoccupied lands tax for the past financial year will bring the sum of $137,000 into the provincial treasury.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Brockville, Ont.—The town has sold an issue of $28,000 10-year 6 per cent. bonds locally at par.

Carleton County, Ont.—Messrs. Housser, Wood and Co., Toronto, have been awarded a block of $11,000 6 per cent. 10-instalment bonds.

Petrolia, Ont.—Sealed tenders will be received up till February 24th for the purchase of $10,000 debentures, bearing interest at the rate of 7 per cent., payable in ten annual instalments.

Windsor, Ont.—The city is asking for tenders on debentures for $115,270.84. Of this amount, $44,270.84 is to be used for public improvements, and is made up in 10-year debentures drawing 5½ per cent. interest. Twenty-five thousand is for school purposes, and is made up in 30-year debentures drawing 6 per cent. interest, and $46,000 is for patriotic purposes, made up in 20-year debentures, and draws 6 per cent. interest. All debentures will be paid for by the city in annual instalments.

Perth, Ont.—Messrs. W. L. McKinnon and Co. were successful tenderers for a small parcel of bonds of the town. The amount called for was $6,956.81. The securities bear 6 per cent., and are payable in twenty instalments. The bid of McKinnon and Co. was $7,035.78. So close was the bidding that the second tender, by Brent, Noxon and Co., was $7,033. There were thirteen tenders—all Toronto firms—as follows:—

W. L. McKinnon and Co.	101.135
Brent, Noxon and Co.	101.095
W. A. Mackenzie and Co.	101.029
Mulholland, Bird and Graham	100.908
Wood, Gundy and Co.	100.879
Burgess and Co.	100.839
Stimson and Co.	100.769
Canada Bond Corporation	100.506
McKay and McKay	100.189
Matthews and Co.	100.046
Sterling Bank	99.919
Ames and Co.	99.400
Turner, Spragge and Co.	99.369

Toronto, Ont.—In all, seventeen tenders were received for the $650,000 20-year instalment (average period, 12 years) 5½ per cent. Hydro-Electric bonds of the city of Toronto. The bonds were awarded to the highest bidder, Messrs. Æmilius Jarvis and Co., at the price of 100.83 and accrued interest from January 1st, 1919. The cost of the money to the city was, therefore, 5.40 per cent. Some of the tenderers submitted offers payable in New York funds. It was announced before the opening of the tenders that in such cases 1.84 per cent. would be added to such offers. The following are the tenders submitted:—

Æmilius Jarvis and Co., Toronto	100.83
Sterling Bank of Canada, Toronto	100.7802
G. A. Stimson and Co., Toronto	100.78
Housser, Wood and Co., Toronto	100.75
Canada Bond Corporation, Toronto	100.701
W. A. Mackenzie and Co., Toronto	100.532
R. C. Matthews and Co., Toronto	100.37
Kerr, Fleming and Co., Toronto	100.35
Harris, Forbes and Co., Montreal	100.34
Dominion Securities Corporation, Wood, Gundy and Co. and A. E. Ames and Co., Toronto	100.291
C. H. Burgess and Co., Toronto	99.86
National City Co., New York	99.82
McDonagh, Somers and Co., Toronto, and Greenshields and Co., Montreal	99.771
Mulholland, Bird and Graham, Toronto	99.71
First Trust and Savings Bank, Chicago	99.661
C. Meredith and Co., Montreal	99.
Municipal Debenture Corporation, Montreal.	98.59

Hawkesbury, Ont.—A block of bonds issued by the town for $109,000 has been purchased by Wood, Gundy and Co. They are 6 per cent. bonds, due in thirty instalments, and at the price of 101.14 paid by Wood, Gundy and Co., the yield will be about 5.90.

The following is a list of bids:—

Wood, Gundy and Co., Toronto	101.14
A. E. Ames and Co., Toronto	100.28
Brent, Noxon and Co., Toronto	100.19
Hew R. Wood and Co., Montreal	99.58
A. Jarvis and Co., Toronto	99.53
Turner, Spragge and Co., Toronto	99.49
G. A. Stimson and Co., Toronto	99.25
Municipal Debenture Corporation, Quebec	98.50
W. L. McKinnon and Co., Toronto	97.47
McKay and McKay, Toronto	96.19

Saskatchewan.—The following is a list of debentures reported sold from January 27th to February 1st, 1919:—

School Districts.—Montague S.D., $2,950; Waterman-Waterbury Manufacturing Co., Regina. *Paragon S.D., $1,500; Wood, Gundy and Co., Saskatoon. *Scalat S.D., $2,000, Rosemary S.D., $2,800; Canada Landed and National Investment Co., Winnipeg. *Carmichael Village S.D., $2,500, *Horse Lake S.D., $1,900; W. L. McKinnon and Co., Regina. Carnduff S.D., $800; Regina Public School Sinking Fund.

---

*Being sold by the local government board.

Rural Telephone Companies.—Roseville, $9,550; Somerville and Olson. Naisberry, $7,500; Birkett and Co., Toronto. Horse Lake, $1,200, Southcote, $475, Maymont, $4,800; Nay and James.

Towns.—Lumsden, $7,000; Royal Bank of Canada. Battleford, $1,000.

BONDS AGAINST TAXES

By amendments to the City Act in the Saskatchewan Legislature last week, cities will be able to issue bonds to the extent of the amount due by way of taxes on property as acquired, at tax sales, subject to the approval of the local Government Board.

SELL BONDS OVER COUNTER

Finance Commissioner Bradshaw, of Toronto, has reported that he is ready to sell civic bonds "over the counter" when the best interests of ratepayers can best be served in that manner. This would not be the case at present, he maintains, and quotes the sale of civic bonds for harbor improvements, which were floated at 5.42 per cent., while the Dominion Victory Loan cost 5.5 per cent., plus costs.

MANITOBA ADDS TO TRUST TAXES

In the Manitoba legislature a bill amending the Corporations' Taxation Act was read a second time on the motion of Hon. Edward Brown, provincial treasurer. The bill provides for the increase of the contributions of the banks to the provincial treasury from $49,000 to $98,000; increases the tax on loan and mortgage companies from one-half of one per cent. to three-quarters of one per cent. on the gross earnings; fixes a flat rate of two per cent. on the gross premium income for life and fire insurance companies, and raises the rate on trust companies from one and one-half per cent. to two per cent.

A delegation from the city of Sherbrooke waited on the Quebec government with a request that the government guarantee the bonds of the Sherbrooke Exposition to the extent of $100,000, and also that the provincial grant of $10,000 per year be increased to $15,000.

DALHOUSIE BONDS

The Eastern Securities Co., Ltd., of St. John, N.B., has purchased a small block of $8,000 6 per cent. Dalhousie bonds, dated June 1st, 1918, due 1938. The proceeds will be used for water extension.

EDMONTON BOND SALE

Messrs. Æmilius Jarvis and Co. were the successful tenderers for a block of bonds of the city amounting to $1,130,000. The latter were five-year 6 per cents, and at the price of 98.94 the city will have to pay about 6¼ per cent. for their money.

SASKATCHEWAN SECURING FUNDS TO FINANCE HOUSING

The Saskatchewan government is taking authority to borrow a sum not exceeding $2,000,000 from the federal authorities, the money to be loaned to cities and towns for the purpose of encouraging the building of houses where the need for same is most acute. The money will be loaned on the general security of the municipality and upon terms and conditions that are to be approved by the governor-general-in-council. Every application to the provincial government for a loan under the scheme will first have to be approved by the local government board.

NEWFOUNDLAND SEEKING MONEY IN CANADA

Newfoundland is seeking money in Canada by the flotation of a $7,000,000 loan. The colony has been in the habit of raising its loans in London or New York, but the change of policy now will likely be welcomed by the investing public. Newfoundland has had some trouble lately in arranging the sale of its one big product, fish, owing to the poor financial conditions of Spain and Italy, who were leading customers. The island's great natural wealth, however, is not prejudiced by this temporary condition. Of the sum to be raised by the new loan, $5,000,000 will be used to retire that amount of three-year notes maturing on June 30 next, and the balance of $2,000,000 is for other government purposes.

MONTREAL CATHOLIC SCHOOLS SEEK EXTRA LOAN

The Montreal Catholic School Commission has presented a petition for a bill to enable it to effect temporary loans by means of treasury bonds, notes and other negotiable securities in anticipation of the payment of the school tax due by the city, such loans to be for a period of not more than six months, nor to exceed 50 per cent. of the total revenue of the school tax for the current year.

The reason for this is that the city pays the school tax to the commission in three instalments, in December, February and May, and the commission, receiving no funds between May and December, wants to be in a position to obtain advances to carry on its administration during this period.

The commission is also asking to be given discretionary powers in regard to insuring its fireproof buildings, and not be compelled to insure them to the amount of one-half their value as the act at present provides.

Winnipeg may adopt the Edmonton plan of income tax, with certain modifications taken from the federal Income Tax Act to cover what are recognized as certain deficiencies of the Edmonton scheme. The Edmonton plan provides a graduated scale, starting at half of one per cent. on incomes of $500 a year and rising in proper proportion on the higher incomes. The Edmonton plan yielded a substantial revenue when applied for the first time last year.

BRITISH COLUMBIA CERTIFICATES

The following certificate has been issued by the Municipal Department of the province of British Columbia under date of November 22, 1918:—

The corporation of the district of Penticton—Debentures Nos. 886-935, $500 each and 936-1,035, $100 each, issued under Irrigation Loan By-law No. 180, payable May 1st, 1943, with interest at 6 per cent., payable half-yearly.

Also one under date of January 13, 1918, as follows:—

The corporation of the district of Summerland Irrigation Loan By-law No. 98, $35,000, payable November 1st, 1930, with interest at 8 per cent., payable half-yearly.

PEMBROKE BONDS

A block of bonds for $50,000 has been bought by W. L. McKinnon and Co., of Toronto, their tender of 102.98 being the highest. The bonds are 6 per cent., payable in 30 instalments, and are for waterworks improvements. At this price, which is considered a good one, the rate will be about 5.73. The following is a list of tenders:—

W. L. McKinnon and Co., Toronto	102.981
Canada Bond Corporation, Toronto	102.95
Wood, Gundy and Co., Toronto	101.88
Dominion Securities Corporation, Toronto	101.789

R. C. Matthews and Co., Toronto	100.05
Bank of Ottawa	100.00

SASKATCHEWAN GREATER PRODUCTION BONDS

Even as far afield as California and the Argentine, Greater Production bonds of Saskatchewan, or farm loan debentures, have been sold without solicitation or local advertisement, according to a return which was tabled in the Saskatchewan assembly.

The return shows that the amount subscribed in the province to farm loan debentures up to the end of 1918 was $1,343,820 and bonds totalling a further $67,380 have been sold outside Saskatchewan, as follows: Manitoba, $14,060; Alberta, $34,940; British Columbia, $6,580; Ontario, $7,100; Quebec, $500; Illinois, $500; California, $2,000; South Dakota, $200; Idaho $500; Argentine, $1,000. In addition to the above the Dominion government offered a loan of $1,000,000, of which $500,000 has been advanced, making a total subscription from all sources up to the end of the year $1,911,200. The total number of applications for loans refused is $1,735,783 as compared with the approval of loans totaling $3,879,200, while the amount actually paid out in loans at the end of the year was $1,758,366. The total expenditure of the farm loans board up to November 1, 1918, was $68,183.90, of which $42,513.27 represents interests. Of the remaining $25,670.63 the sum of $3,187.12 represents expenditure which is refundable to the board.

The by-law authorizing the raising of $40,000 in debentures to meet the cyclone indebtedness of Regina had to be passed regularly as suggested by the city solicitor. In connection with this by-law it may be pointed out that Regina is benefiting to the extent of 2½ per cent. on $40,000 by selling the debentures to the sinking fund trustees.

NEW INCORPORATIONS

The Matachewan-Rand Gold Mines, with Capital of $3,000,000, Receives Charter

The following is a list of companies incorporated during the past week, with the authorized capital and the names of the provisional directors:—

Sarnia, Ont.—Sarnia Paper Box Co., Ltd., $50,000; F. F. Pardee, N. Gurd, C. Judge.

Pembroke, Ont.—Thomas Pink Co., Ltd., $200,000; T. Pink, E. A. Dunlop, W. L. Hunter.

Ottawa, Ont.—Sheffield Molybdenite Mining Co., Ltd., $1,000,000; J. A. Seybold, O. Forest, G. Allan.

Guelph, Ont.—Shina Manufacturing Co. of Canada, Ltd., $50,000; A. L. Reid, W. W. Perry, C. H. C. Leggott.

Haileybury, Ont.—The Honer-Kirkland Gold Mines, Ltd., $2,000,000; F. Honer, G. G. Taylor Ware, J. Weedon.

Montreal, Que.—The Sterling Printing Service, Ltd., $50,000; W. B. Scott, J. A. Mathewson, L. H. Balantyne. Goulet Frere, Ltd., $20,000; A. D. Goulet, W. Damphousse, J. A. Boutet. Films de Luxe, Incorporee, $95,000; J. Renaud, A. Prefontaine, C. Prefontaine. General Society of Canada, Ltd., $49,000; J. Charbonneau, J. S. Pilon, J. Royer. John Mather and Co., Ltd., $100,000; J. J. Meagher, J. E. Coulin, R. Reid. The Mitchell Vacuum Cleaner Co., Ltd., $50,000; W. R. Lorimer Shanks, F. G. Bush, G. R. Drennan. Beck Brothers and Turner, Ltd., $50,000; C. M. Holt, L. Gosselin, A. Chouinard. Offer, Dalziel and Co., Ltd., $50,000; J. L. Apedaile, F. P. Turville, G. G. Lewis. M. F. Farrell, Ltd., $150,000; S. G. Tritt, S. Tritt, N. Swan. Central Hide and Skin, Ltd., $50,000; F. P. Brais, H. R. Mulvena, E. G. Place. Lagar Investment, Ltd., $49,000; J. D. Lapointe, E. Mitchel, J. P. Lanetot.

Toronto, Ont.—Marine Products, Ltd., $100,000; E. W. Wright, J. A. Kent, J. Edgerton Lovering. Perfection Flax Pulling Machines, Ltd., $500,000; H. J. Martin, T. N. Poole, H. S. Johnston. Bastian Brothers, Ltd., $50,000; G. T. Bickle, T. Wilby, A. Macintosh. Matachewan-Rand Gold Mines, Ltd., $3,000,000; H. Parkes, L. J. Brown, N. C. Urquhart. Frank Barton, Ltd., $40,000; W. K. Murphy, R. J. O'Reilly, R. H. Finkle. W. C. Warburton and Co., Ltd., $40,000; W. C. Warburton, G. A. Warburton, I. O. Warburton. Greenberg and Centner, Ltd., $40,000; J. J. Greenberg, I. Centner, S. Centner. Thrift Broom Co., Ltd., $40,000; W. A. J. Case, J. B. Taylor, C. M. Smith. Toronto Brick, Ltd., $400,000; W. Field, G. M. Orr, M. Jackson. The Frontenac Graphite Mining Co., Ltd., $40,000; A. L. Reid, W. W. Perry, C. H. C. Leggott. International Machine and Manufacturing Co., Ltd., $150,000; J. G. Bauket, G. H. Shaver, M. L. Cook.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the week ended February 7th, 1919:—

Canadian Pacific Railway.

	1918.	1919.	Inc. or dec.
February 7	$2,096,000	$2,579,000	+ $483,000

Grand Trunk Railway.

February 7	$ 480,714	$ 905,449	+ $424,735

Canadian National Railway.

February 7	$1,003,473	$1,436,757	+ $433,284

One of the big Clyde shipbuilding and engineering firms, Yarrow and Co., will build up a new sphere of shipbuilding on the British Columbia coast, gradually withdrawing from the Clyde.

SASKATCHEWAN MUNICIPAL HAIL ACT

Being Amended so as to Get More Revenue—Provision Being Made for an Excess Seeded Acreage Levy

An undertaking that the grain crops of soldiers will be protected from hail loss during the coming year, was given by Murdo Cameron, M.L.A., on behalf of the Municipal Hail Insurance Association, at the Saskatchewan Assembly on Feb. 4th.

The undertaking was given in the course of a discussion which arose during the consideration of the bill to amend the Municipal Hail Insurance Act in committee of the whole house, when the position of the soldiers with respect to indemnification for hail loss as a result of their exemption from taxation was raised by Harris Turner, representing the soldiers in France.

Soldiers Suffered

The complaint was made by some of the soldier members in the assembly that the fact that soldiers were exempt from taxation led them to believe that their crops were protected from hail loss, but that several cases had occurred last year in which soldiers found after they had suffered loss that they could not collect an indemnity. It appeared, however, from the discussion that hail insurance premiums were not construed as taxes and that therefore exemption from taxation did not carry with it exemption from hail insurance premiums.

As a result of the discussion, D. J. Sykes submitted an amendment to compel the municipalities operating under the provisions of the hail insurance act to collect the premium from the tenants where soldiers' farms had been rented and in the case of the soldier working his own farm requiring the municipality to pay the premiums out of the municipal treasury.

Care for Deserving Cases

Mr. Cameron, as a member of the executive of the Municipal Hail Insurance Association, stated that there were very few cases like those which had been cited by Harris Turner, probably not more than half a dozen in the province, and he assured the house that provision would be made to take care of the deserving cases and also that during the next year protection would be afforded for soldiers' crops. In view of the fact that exemption provisions only applied for another year, he asked the assembly to leave the bill as it stood without amendment, expressing the opinion that the municipalities were inclined to treat the soldiers' case very sympathetically but that any effort at compulsion might have a detrimental effect on the whole insurance scheme. Finally, as the result of these representations, the amendment was withdrawn.

The bill itself makes provision for bringing into effect the assessment of an excess levy on a seeded acreage basis, thus making the municipal hail insurance scheme a mutual insurance and providing practically positive insurance.

Excess Rate Effective 1920

With the new amendments the flat rate of four cents an acre will be continued on all the property held by the assured and this will give him protection against a complete loss on forty acres of land under cultivation. The excess seeded acreage rate will apply on all cultivated land under crop of the assured's holding over forty acres. The flat rate only is to be imposed this year, it is understood, and the excess seeded acreage levy will come into force in 1920, based on the indemnity paid out during 1919.

The foregoing is the most important provision in the bill. Another amendment, however, provides that [illegible] anyone reporting hail damage to his crop where there has been no hail or the damage from hail is less than [illegible] per cent. of the crop will be liable for the expenses of inspection. This provision is designed to protect the association from those who have in the past attempted to take advantage of free inspection, where there has been no warrant for submitting a claim.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4 c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

ADVERTISER, lately Chief Inspector of important Trust Company, and with many years' experience of mortgage investments, collections and Trust Company work, desires position with Trust or Insurance Company. Would prefer managership of Branch Office for supervision of investments and collections. Highest references. Edward S[illegible]rgery, 15[illegible] 9th N.E., Medicine Hat, Alberta.

GENERAL SECRETARY WANTED for the new Association of Canadian Building and Construction Industries. Preference will be given to young men who have had engineering education and construction experience. Good salary to the right man. Headquarters will be Ottawa. Must be good organizer. Send applications to President of the Association, 65 Victoria Street, Montreal.

The Canadian Trade Commission in Ottawa has received notice from the Canadian Mission in London, England, stating that India is in the market for 800,000 tons of rails with angles, bolts, spikes, etc., for delivery in 1919, 1920, 1921.

During the year 1918 there were 6,0[illegible] sales recorded of real estate in the city of Montreal amounting to [illegible]8,308 For purposes of comparison with previous years, the real estate transfers in Maisonneuve have not been included in the returns for the city of Montreal.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

International Nickel Co.—For the nine months ended December 31, 1918, the company reports surplus after charges, war taxes and preferred dividends of $4,671,391, equivalent to $2.79 a share earned on the $41,834,600 common stock of $25 par value, as compared with $3.10 a share earned in the corresponding period of 1917.

Guelph Junction Railway.—The annual meeting of the company was held last week, when another dividend was declared on the $170,000 worth of stock owned by the city, amounting to 10½ per cent., or $18,404.53. This makes a grand total for the year of $57,375, or 33¾ per cent. on the investment. This breaks all previous records. In addition to this, $94,904 was paid in taxes to the city.

Ottawa Traction Co.—The company's report for 1918 is from the standpoint of the shareholders lacking in information regarding the company's affairs as compared with previous statements covering the affairs not only of the Ottawa Traction Co., but of the Ottawa Electric Railway Co. The statement merely shows that a total of $260,040 was received by the Ottawa Traction Co. as dividends from the Ottawa Electric Railway Co., and that this was distributed by the payment of three quarterly dividends of 1 per cent. each and a fourth dividend of 1 per cent. with a bonus of 1 per cent., making a total of 5 per cent. for the year.

Dome Lake Mining and Milling Co.—The annual report of the company will soon be issued and will show a total production of upwards of $115,000 for the year 1918. It is learned that a tonnage of somewhere in the vicinity of 12,000 tons of ore was treated during the period, mill heads running about $9.65 per ton. Costs are reported to have been $8.27 per ton. This appears to indicate a profit of about $1.38 per ton, or a total profit of between $16,000 and $17,000 for the year. The completion of the installation of cyanide equipment in March has served to increase the efficiency of the mill, with the result that a recovery of about 90 per cent. is now obtaining. The outlook for the future is said to be bright owing to a better grade of ore being developed at depth, and also owing to a decline in costs.

Provincial Paper Mills.—The report of the company for 1918, to be submitted at the annual meeting on the 19th, shows a slight decrease in net profits, which are given as $404,142, as compared with $463,898 in 1917. After writing off $75,000 for depreciation, paying $119,000 as a 7 per cent. dividend on the preferred shares and $80,000 as a 4 per cent. dividend on the common, and making one or two other small appropriations, a surplus of $113,117 was left to carry forward, making the total surplus at the end of the year $852,406. The balance sheet shows an increase of some $300,000 in assets, which total $5,882,874, as compared with $552,278 at the end of 1917. Current assets total $1,162,184, compared with $911,744 a year ago, and consist of $96,099 cash, $101,368 bills receivable, $397,716 accounts receivable, $65,000 in government war bonds, and $502,000 in investments.

Asbestos Corporation.—The new high price of 49 for Asbestos common was accepted as an indication of a very favorable showing in the annual report to be issued shortly. When the stock was placed on a 5 per cent. dividend basis in the final quarter of 1918, the shares were selling around 38 to 40, and subsequently advanced to 45¾. The dividend in this case was one of the rare instances of such announcements not being fully discounted by the market. The new advance from 44 to 49 now seems to foreshadow a showing in respect to the earning and finances that will increase confidence in the permanency of the 5 per cent. rate. Counting in investments in war bonds, etc., the company had current assets of $1,692,347 at the end of 1917, against current liabilities of only $143,496. The surplus of $1,548,851 working capital is believed to have been added to substantially in the past year, despite the increased distribution on the preferred shares and the initial payment of the common.

Nipissing Mining Co.—According to the report presented to the president and directors of the company, during the month of January, the company mined ore of an estimated net value of $227,986, and shipped bullion from Nipissing and custom ore of an estimated net value of $207,269. No unusual developments took place during the month.

All producing working places underground continued to be satisfactory. The annual clean-up at the low-grade mill occupied several days at the beginning of the month, and the mine was also inoperative for the same length of time, making necessary repairs and alterations. On the east side of the lake, shaft No. 128 was completed and cage equipment installed. Exploration work has been started in the surrounding territory, hitherto unexplored by underground work. The winze being sunk on vein 544 at 73 shaft encountered Keewatin at a depth of 145 feet. The vein was fairly strong to that depth and fair assays of country rock were obtained from time to time. A level is being started at a depth of 120 feet. During the month 178 tons of high-grade ore were treated. The low-grade mill treated 5,959 tons. The refinery shipped 200,260 fine ounces of bullion. The following is an estimate of production for the month of January: Washing plant, $106,586; low-grade mill, $121,350; total, $227,936.

Hollinger Consolidated Gold Mines.—Their best year in gold recovered, in a remarkable career of big things in the North country, is revealed in the eighth annual report of the company. This report shows gold recovered last year to the value of $5,752,370, compared with $4,261,938 in 1917, and $5,073,401 in 1916, which had been the banner year previously. A gratifying feature is that the highest results ever secured —those of 1918—came from 578,755 tons of ore, compared with 601,854 tons of ore milled in 1916, thus showing a most satisfactory condition in the quality of the ore now being mined. The one disappointing feature to shareholders is the smaller return in dividends, the distribution last year being $1,230,000, compared with $738,000 in 1917 and $3,126,000 in 1916. Of course, the year 1916 was highwater mark in dividends, but since then the higher costs of supplies and labor have sadly reduced the net earnings.

At the same time, conditions are now on the up-grade, and the announcement of 1 per cent. dividend, the first for the new year, was interpreted in some quarters, when coupled with the satisfactory conditions revealed in the report, as an indication that shareholders may expect a better return this year than they received in 1918. As an illustration of the disabilities of the management last year, it may be stated that the number of men engaged underground reached the low figure of 482 in November, compared with 849, the highest number earlier in the same year.

Another interesting fact revealed by the annual report is that the estimated gross value of ore reserves at the end of 1918 was $41,080,005, compared with $40,231,435 at the end of 1917, despite the large quantity milled during the year. As in all mining operations, profits fluctuate, but the showing of Hollinger last year was highly pleasing, when compared with its own great record. The net earnings from operations were $2,588,563, compared with $1,720,314 in 1917. In 1916 the net profits were $2,676,409 and $180,000 in premium on shares. That the company's cash position was considerably improved is shown by the fact that the amount carried forward this year is $2,071,287, compared with $712,724 a year ago. The company purchased $1,575,000 of Victory bonds and now holds high-grade government and municipal securities amounting to $1,687,717.

Laurentide Power Co.—Shareholders of the company will have every reason for satisfaction in the statement of the

THE KEYSTONE OF THE ARCH

Nothing known in building is stronger than the arch The symbol of the Mutual Principle in Life Insurance The centre of the arch is the keystone—and "The Keystone of a Life Insurance Organization," says W. O. Chapman, "is management." The three leading constituents in good management are INTEGRITY, ECONOMY and EFFICIENCY It is well known that the secret of the extraordinary success of the Mutual Life of Canada has been the rigid adherence of managers and directors through fifty years of history to these essential things It is due to these that in spite of more than four years of devastating war, followed by a blighting pestilence, with the immense losses entailed, yet the strength of the Mutual Life of Canada is unshaken The keystone ensures the solidity of the organization, and there is no other better qualified to defy the tooth of time than—

Address: ALBERT E. AWDE, Supt. of Agencies.

profit and loss of the company for the twelve months ended December 31st, 1918. The gross earnings amounted to $880,289, as compared with $663,858, being an increase of $216,431. But by reason of a considerable increase in operating expenses, the surplus which amounted to $338,888, as compared with $204,795, showed a smaller increase, being $134,093. A comparison of the profit and loss statements for the two years is as follows:—

	1918.	Increase.
Gross earnings	$880,289	$216,431
Operating expenses	156,505	72,442
Net earnings	$723,784	$143,989
Fixed charges	*375,000	. . .
Net income	$348,784	$143,989
Rebate November power rentals	9,896	9,896
Surplus	$338,883	$134,093

*Unchanged.

As stated above, the surplus for the year is approximately 5¼ per cent. on the common stock. In the last quarter of 1918 earnings were much larger than in previous quarters, a fairly steady increase having been shown right along by reason of the increased quantity of current being taken. Further increases in output are expected to take place from time to time in the near future, and as these will represent increased earnings with comparatively small increase in operating costs, it is expected that the company should be easily able to pay the dividend at the rate of 4 per cent., which it has been predicted will be declared about the middle of the year.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Beaverton, Ont.—February 10—Varnishing plant of Beaver Co., Ltd., was damaged. Estimated loss, $10,000. Loss covered by insurance.

Fairbank, Ont.—February 10—Three dwellings, 45, 47 and 49 Seneca Avenue, were damaged. Estimated loss, $2,995.

North Sydney, N.B.—February 2—Building on the marine railway premises was damaged. Estimated loss, $7,000.

St. John, N.B.—February 3—Wooden tenement, 63 Erin Street, owned by Thos. Hatty, was damaged. Estimated loss, $1,500. Insurance carried, $700.

Sudbury, Ont.—February 8—Home of Mr. J. G. Legault was destroyed. Four lives lost.

Toronto, Ont.—February 4—Dwelling at 59 Paton Road, occupied by W. C. Hunt, was damaged. Caused by defective furnace. Estimated loss, $5,000. Insurance carried, $5,000.

CANADA'S CROP SURPLUS MAY BE DISPOSED OF

Representatives of the British Wheat Export Co. are expected in Ottawa shortly to discuss with the government resumption of wheat purchases in Canada. Although there is no indication as yet when buying will be resumed, every hope is expressed in official circles that the 1918 crop will be disposed of without any necessity on the part of the government to implement its guarantee. The exportable surplus of the 1918 crop is stated to amount to from 60 to 70 million bushels.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Brantford, Ont.—January 31—Tank-house of Matthews-Blackwell, Ltd., was damaged. Estimated loss on stock, $6,000; on building, $20,000. Covered by insurance.

Life Insurance in 1918.

Reports of Typical Canadian Companies Show Large Increase in Business and in Amount of Insurance in Force—Heavy Death Losses Incurred—Total Assets Grow Rapidly—Transfer of Funds from Mortgages to Bonds and Debentures—Government Housing Program May Check Increase in Mortgage Investments.

REPORTS of a large number of Canadian life insurance companies have already been made public and from these an idea may be obtained as to the actual results of the year's business. These reports have been looked forward to with keen interest as the results in the case of young companies as compared with older companies would be instructive from an actuarial point of view. Generally speaking, the older companies with an average age of policyholders greater than that of the younger companies have suffered less severely than the latter. This factor of age, however, is not conclusive as there are other considerations which have also acted in determining the amount of death claims. Some information was given in *The Monetary Times* last week regarding the experience of American companies during the year. This information came from Mr. Arthur Hunter, chief actuary of the New York Life Insurance Company. As pointed out by him, there was a tendency to over-estimate the amount of deaths resulting from influenza. However, the losses during the first nine months of the year were quite favorable, the ratio being 61 per cent. in the case of the New York Life. During the last three months of the year the ratio was 188 per cent., the average during the entire year being 95 per cent. which is the highest in the recorded history of the company. The average for the last five years in the case of the New York Life was 72 per cent. Supposing that the loss ratio during the last three months of the year was 65 per cent., which is a liberal estimate, he then calculated that the claims from the epidemic would be $10,000,0000 which was considerably less than the total claims reported to the company.

The table given at the end of this article is compiled from annual reports for the year 1918 of typical Canadian life insurance companies, and will at least indicate to some extent the principal changes which have taken place in this business in Canada during 1918. Among the more important are, first, a substantial increase in the amount of business written and net gains in the amount of business in force; heavy death losses; large increases in assets; a falling off in mortgage investments; and additional purchases of bonds and debentures.

When it is remembered that life insurance companies invested approximately $50,000,000 in each of Canada's Victory Loans, it is not surprising that holdings of bonds and debentures are found to be substantially increased. At the same time the fact that many mortgages were being repaid and very few new ones issued released funds for investment in bonds in addition to those obtained in the ordinary course of business. The effect was a general improvement in the financial position of the companies as bonds and debentures if well chosen are equal in security to the best mortgages and are always more readily marketable. In spite of the fact that good rates were prevailing for securities of this kind, however, the average interest return was lessened. In the meantime expenses of management, etc., were increasing so that the year 1918 on the whole was a difficult one, quite apart from any unusual claims from policyholders.

It was generally expected that after the war there would be a renewed demand for funds on first mortgage security and that high grade bonds would advance to such a premium that they would become unsuitable for the bulk of the investments of insurance companies. The latter is already becoming true as all except the short term bonds are already at a premium. This means that the interest return based on market value is lessened and insurance companies will be desirous of disposing of these securities provided that suitable mortgage investments can be obtained. If, however, the Dominion and Provincial Governments proceed with their housing program and the Dominion Government's scheme of making farm loans through the Soldiers Settlement Board is a success, a considerable part of the demand will be cut off and insurance companies will be forced to retain large security investments.

MILLION AND HALF FOR CIVIC HOSPITAL

Nepean Point as a site for a civic memorial hospital has been suggested by Ald. Pinard, who has made a motion to have the Ottawa City Council ask special legislation for permission to issue debentures to the amount of $1,500,000 for the erection and equipment of the building.

He has a motion, seconded by Ald. Denison, for the council, asking that permission to issue the debentures be asked, and that the Dominion government be asked to allow its erection on Nepean Point.

NORTH WEST FIRE INSURANCE COMPANY

The net premium income for 1918 of the North West Fire Insurance Co., of Winnipeg, amounted to $143,800, an increase of $9,525 over the income of 1917. Revenue from other sources amounts to $16,935 making a total of $160,735. Losses incurred (paid and outstanding) during the year amount to $62,178 at a ratio of 43.24 per cent. as compared with 66.07 per cent. in 1917 and 78.77 per cent. in 1916. Expenses amount to $50,045 at a ratio of 43.80 per cent. as compared with 33.84 per cent. in 1917.

Assets now total $357,763 and liabilities (including outstanding losses $10,154). Reserve for taxes $3,963 and reinsurance reserve $113,281 (full government standard) are $227,398, showing a surplus of $130,364.

REAL ESTATE LOAN COMPANY OF CANADA

An income of $84,742 was earned during 1918 by the Real Estate Loan Company of Canada, as compared with $99,169 last year. Dividends at the rate of seven per cent. per annum were paid as usual, however, and a balance of $6,434 was carried forward which is considerably more than the balance brought forward from the 1917 account. Last year, however, the rest and contingency funds were increased by $10,000 each whereas no transfers of this kind were made this year.

Loans on mortgages, etc., fell off, some of the money returned in this way being invested in government and municipal bonds. The amount of real estate under foreclosure also increased from $89,445 to $123,788. The amount of debentures outstanding declined considerably.

The annual meeting of the company was held in Toronto on Wednesday, February 12th.

WESTERN EMPIRE LIFE ASSURANCE COMPANY

The seventh annual meeting of this company was held in Winnipeg on Wednesday, January 22nd. During the year 1918, applications were received for insurance to the amount of $1,140,400 and insurance to the amount of $1,102,295 was issued. The net increase in insurance in force was $566,000, the total being now near $4,000,000. The company's death claims were $163,809 of the expected, but most of them were due to the unusual circumstances of the year. The company's net receipts, revenue account, were $100,839 and death claims total $45,093. Total assets increased by $87,633 and the interest earned during the year equals 5.57 per cent. of assets.

The company's premium income for the past three years has been as follows:—

1916, $72,546; 1917, $95,809; 1918, $100,039.

MONTREAL LOAN AND MORTGAGE COMPANY

The Montreal Loan and Mortgage Company's report for the year ended December 31st, last, which will be presented at the annual meeting on March 6th, has been forwarded to the shareholders.

The net profits for the year, after deducting all charges, including $500 subscription to the Canadian Red Cross and Navy League, amounted to $85,963.77, which, added to the balance brought forward from 1917, $44,530.52, made the total available for distribution $130,494.29. From this sum was taken four quarterly dividends of two and one-half per cent. and a bonus of one per cent. ($66,000), leaving a balance to the credit of profit and loss account of $64,494.29.

The company's assets amount to $1,716,424.20, divided as follows:—

Mortgages on real estate	$1,508,147.26
Real estate	3,200.00
Call loans	107,100.64
Bonds and debentures	79,419.07
Cash in bank	18,557.23

Another syndicate, composed of Detroit capitalists, commenced negotiations with Windsor this week for a franchise to operate a ferry between Detroit and the Border City. A company headed by Charles Millar, barrister, of Toronto, has been granted a charter by the Canadian Government to operate a ferry, and only opposition by the Windsor company is holding up his company's plans to take over property at the foot of Brock street on the Windsor dock.

MANITOBA MAY CHANGE TAX SYSTEM

Outcome of Meeting Between Winnipeg Civic Committee and Provincial Government

THE Winnipeg special civic committee on taxation and equalization recently asked the provincial government to name a committee, consisting of its equalization board, to meet with the civic committee and discuss the question of equitable equalization, as mentioned in *The Monetary Times* last week.

Two concrete proposals were the outcome of the meeting. These proposals, which the government undertook to take into serious consideration, were:—

1. That legislation should be enacted so as to secure uniformity in rural municipal assessments on the basis of 100 per cent. market value.

2. That an entirely new equalized assessment should be secured for 1920, and that authority for securing it should be taken at this session of the legislature.

The city solicitor maintained that Winnipeg was about $92,000,000 over-assessed, and that the right of municipalities to appeal against the equalized assessment should be restored. The right of appeal was fought against by Dr. Armstrong and members of the equalization board.

The board claimed that Winnipeg was assessed on $45,000,000 worth of buildings and $178,000,000 worth of land, and it was pointed out that in that event Winnipeg's land alone was over-assessed by approximately $20,000,000 over the civic assessment.

No decision was arrived at, since the meeting was for discussion only, but a second meeting will be held to discuss civic taxation in general and remedies for any 1918 injustice in particular. It was represented that in connection with administrative functions performed and paid for in Winnipeg by Winnipeg itself, the province takes a revenue of some $981,000 a year. This policy is what is forcing the city into the income tax, according to the city solicitor, who gave the figures in the course of a very pointed dispute with Hon. Edward Brown.

Admits Farm Buildings Assessed

Robert Forke, chairman of the equalization board, stated that the kicking did not all lie with the city of Winnipeg, as several outside and rural municipalities were complaining that their equalized assessment was too high.

Mr. Forke explained that all assessments by assessors in rural municipalities were taken by the board and raised to 100 per cent. unimproved valuation. In Winnipeg the equalization was made on the basis of land at market value and one-third of the value of buildings, as based on Winnipeg's local assessment of 1916. In the rural districts 20 per cent. has been added to the land values for buildings and improvements, except in isolated municipalities, where there were few buildings. He was satisfied that in some cases the 20 per cent. was rather an over-valuation of the buildings. It was more than equivalent to the full cash value of the buildings. Mr. Forke maintained that the ratepayers of Winnipeg did not understand the difference between the local assessment and the equalized assessment. He maintained that the MacMillan farm had a local assessment of $3 per acre but an equalized assessment of $27 per acre.

Mr. MacMillan denied that he had said that the equalized assessment was $3 per acre. He was sure that he had merely shown that no equalized assessment could be equitable while the basis was so uneven.

Several delegates argued in favor of having a reassessment.

The Erie Co-operative Co., with headquarters in Leamington, Ont., sold $437,924.31 worth of fruits and vegetables for its shareholders during the past year, smashing all previous records by $27,291.13.

LONDON AND CANADIAN LOAN AND AGENCY CO.

The earnings of this company for the year 1918 were slightly less than for the preceding year. The expenditures were practically the same, $50,000 being transferred to reserve account, which now stands at $900,000. The company's mortgage loans fell off somewhat, but holdings of municipal debentures, war bonds, etc., increased from $329,000 to $443,000. Cash on hand has decreased from $223,418 to $131,901. The liabilities statement shows debentures and certificates outstanding to the amount of $2,185,817, as compared with $2,231,307 last year.

This is one of the old companies which has been instrumental in bringing a large amount of old country funds to Canada. In addition to the ordinary board of directors meeting in the head office in Toronto, there is also a Scottish advisory board meeting in Edinburgh. The directorate consists of Thomas Long, C. S. Gzowski, A. H. Campbell, C. C Dalton, G. L. Smith, C. M. Black, and W. C. Noxon. Mr V. B. Wadsworth is general manager.

$65,000,000 FROM BUSINESS PROFITS TAX

Under the Business Profits War Tax Act, assessments have been made aggregating $65,000,000, of which about $59,000,000 has been collected. The balance will probably be received within the next two months. An official statement from the department of finance has been received to this effect.

The returns to date from the Income War Tax Act of 1917, which applies only to incomes in excess of $3,000 in the case of married persons and $2,000 in the case of unmarried persons, show that about 30,000 assessments have been made of which 19,000 are paid. The total amount of assessments made by the department and approved to date, aggregate $5,500,000. Three and a half millions have been collected. The difference is represented mainly by assessments made last month. The assessments still to be made for the current year are estimated at about $4,000,000.

The returns from both these measures will exceed the estimate made to parliament as to the amounts expected to be realized.

WANT RATING OFFICE IN SASKATCHEWAN

The annual convention of the Saskatchewan Fire Insurance Agents' Association was held in Regina last week, with a substantial attendance of members from all parts of the province. A proposal to widen the scope of the association to include agents for hail and accident insurance was considered and notice of motion was given to change the name of the organization to the Saskatchewan Insurance Agents' Association.

The convention decided to request the underwriters to establish a rating office in this province. Steps were suggested for the improvement of the standing of the agents in the smaller towns, and plans were laid for the distribution of information of interest to the agents with the object of improving their capacity for service to the public.

Election of officers resulted as follows: Chairman, A. W Irwin, Moose Jaw; vice-chairman, N. Andre, Regina; secretary-treasurer, S. E. Bushe, Saskatoon, with an executive of two each from the three large cities. The next annual meeting will be held in Moose Jaw.

During the business sessions matters of interest to the agents, looking to the improvement of legislation under the Saskatchewan Insurance Act, and more particularly with reference to the resident agents feature of the act, were considered, and will be taken up with the provincial government in the expectation of securing amendments at the next session.

Addresses on topics of interest were given by A. E Fisher, superintendent of insurance for Saskatchewan, and by proxy on behalf of A. H. H. Stead, of Winnipeg, secretary W.C.F.U.A., who was unable to be present.

PERSONAL NOTES

Mr. L. D. Wilgress, Canadian Trade Commissioner in Siberia, has resigned to enter the services of the Royal Bank of Canada.

Mr. Geo. W. Muddiman, has been appointed manager at Winnipeg for the Gresham Life He was formerly with the C.P.R. Lands Department.

Sir Wm. D. Reid, has been appointed to the board of directors of the Travellers Life Insurance Co. of Canada to succeed the late Senator Richardson, Kingston.

Mr. Edward W. Beatty, K.C., president of the Canadian Pacific Railway Company, is to be the new Chancellor of Queen's University, in succession to the late Dr. James Douglas, of New York.

Major J. L. Todd, of the Board of Pension Commissioners has resigned. The vacancy created has been filled by the appointment of Major Stanley Coristine, who has been acting as secretary of the Board.

Mr. Geo. W. Knight, has been appointed agency organizer of the Mutual Life Ins. Co. of Can., for the Province of Quebec, excepting Montreal. Mr. Knight has lately been on the Montreal staff of the company, prior to which he served as a lieutenant in the R.A.F.

Mr. Norman J. Ross, who has been for some time connected with the Guarantee Co. of North America, has been appointed accident superintendent at the Montreal Branch of the London and Lancashire Guarantee Company, under the management of Mr. Colin E. Sword.

Mr. Joseph Henderson, vice-president of the Bank of Toronto, was, on February 20th, presented with a golden loving cup mounted on onyx as a mark of appreciation of the services rendered the bank on the occasion of his completion of fifty years in its service. The presentation was informally made by the president, Mr. W. G. Gooderham, on behalf of the directorate. Mr. Henderson entered the service of the bank as a clerk on the 18th of February, 1869, and has served continuously with the institution since that time.

OBITUARIES

Sir Rodolphe Forget, ex-M.P., Charlevoix, died February 19th, at his residence, Ontario Avenue, Montreal, in his 58th year. The late Sir Rodolphe Forget, ex-M.P., banker, organizer, and financial genius, a dominant factor in many of Canada's most potential industries and wealth-producing enterprises, was born at Terrebonne, Quebec, December 10th, 1861.

Mr. Geo. E. Drummond, president of Messrs. Drummond, McCall and Company, Montreal, died in London, England, this week. He had large interests in the iron and steel trade, and was past president of the Canadian Manufacturers' Association, and the Montreal Board of Trade.

Major John Jones Brinkerhoff, M.A., F.A.S., actuary of the Association of Life Insurance Presidents from November 15th, 1908, until the end of 1918, died at his home in Glen Ridge, N.J., early Tuesday morning, February 18th, 1919, from heart failure.

GREAT LIBERAL LEADER PASSES AWAY

Sir Wilfrid Laurier, leader of the Liberal party in Canada for 32 years, died in Ottawa on February 18th. He was chosen as Liberal leader in 1887 in succession to the late Edward Blake. He was elected to the Quebec legislature in 1871, and came to the Canadian House of Commons in 1874, since when he has been a continuous member.

Late Sir Wilfrid Laurier
Liberal Leader, and Ex-Premier of Canada

For fifteen years, from 1896 to 1911, Sir Wilfrid Laurier was Prime Minister of the Dominion. He is known throughout the British Empire, in fact throughout the world, particularly as a result of his introduction of the Imperial preference in Canada. His party was defeated in 1911 on the reciprocity issue.

LAKE OF THE WOODS CONTROL BOARD

H. G. Acres, hydraulic engineer of the Hydro-Electric Commission, and L. V. Rorke, chief of the Ontario Survey Branch, have been appointed by the Ontario Government to represent the province on the Lake of the Woods Control Board, which was brought into existence by the Dominion Government recently, for the purpose of conserving and controlling the waters of the lake. The representatives of the Dominion Government are W. J. Stewart, hydrographer for Canada and consulting engineer of the Department of External Affairs, and J. B. Challies, superintendent of the Dominion Water Power Branch of the Department of the Interior.

ECONOMIC ASPECTS OF THE PEACE CONFERENCE

TO certain American publicists and editors one of the surprising, and certainly the most important fact emerging from the peace discussions at Paris has been the substantial unanimity of opinion, as to the League of Nations, existing between the United Kingdom and the United States. The British Empire entered into the colossal struggle with absolute purity and unselfishness of motive and has demonstrated that up to the hilt. As has been observed often enough, moreover, the Empire these many years has afforded a practical demonstration to the world of what is involved in a league of free nations. The builders of the British Empire accomplished more for the peace, security and prosperity of the world than all the theorizers from the beginning of time—including Dante, Kant, Rousseau, and, finally, President Wilson. The seas were never freer than under Britain's trust, and, as a matter of history, it may be as well to recall that it has been the British fleet above any other instrument that swept the seas clear of predatory adventurers while Prussia was still a third-rate Power. It can never receive sufficient emphasis that British seamen, in the Navy and merchant marine, have widened the bounds of commerce and enlarged the prosperity of the entire world. Moreover, if Great Britain has encouraged the "balance of power" idea in Europe it was done to curb autocratic governments and not to impose her will upon any nation or people. One may be permitted to say, perhaps, that however much Americans may justify their past policy of "splendid isolation" it was none the less a narrow and selfish one. That is sufficiently demonstrated in President Wilson's passionate devotion and advocacy of a new world order in which the Republic is expected to play a prominent part.

The United Kingdom and the United States have material as well as moral interests in guaranteeing the peace of the world. Both nations have given hostages to fortune: each has placed in Europe more than $8,000,000,000 by way of loans to the various Allies. To be sure, both nations are sufficiently wealthy to accept part or full loss on these investments; indeed, Mr. Bonar Law, Chancellor of the Exchequer, in his last budget speech announced the writing off of half the Russian debt as an uncollectable account. But it would be unfair to throw these financial responsibilities back upon the Anglo-Saxon Allies who have done so much—particularly the United Kingdom—to make the world "safe for democracy." Aside from these considerations, the United Kingdom holds total foreign investments, according to the estimate of Sir George Paish, of $26,000,000,000, and the American Republic is rapidly becoming a great creditor country. To the Anglo-Saxon peoples, then, peace and stable government throughout the world mean everything. It was only one of Germany's diplomatic methods, based as most of them were on deceit and fraud, to spread the opinion broadcast that Great Britain was jealous of its commercial greatness and wished to put an end to its growing trade. It was never to the interest of the United Kingdom to be surrounded by poor and poverty-stricken nations; and it is the simple truth that British statesmen wished Germany well.

The war has achieved nothing greater or more fundamental than the reconciliation of the Anglo-Saxon nations. In the field of finance this means the end of predatory methods designed to secure control of weak or corrupt governments. As is well known, Germany, for example, financed Turkey during the course of the war by lending that country $650,000,000 in paper money to be redeemed, by Turkey, within two years after the close of the war, in gold. As the Reichsbank had, in the meantime, secured all Turkey's gold it is plain that it had become a sheer impossibility for that corrupt and poverty-stricken nation to pay the German paper money in gold. This meant, had the Central Powers won the war, just one thing: the exploitation of the Turkish Empire to glut German greed. Everyone knows that within the present confines of the Turkish Empire are wonderful resources of minerals, lands, harbors and strategic commercial bases ready to be developed. The same holds true of China and of Africa. Under the direction of Great Britain and the United States the League of Nations will open the backward countries of the world for free and fair capitalistic enterprise, that will protect fully the interests of the primitive nations concerned. This will mean, in the Near and Far East, in Africa and elsewhere, the safeguarding of weak peoples and their democratic advancement through profitable industry and commerce—profitable to them as well as to those who seek to develop their resources.

There is altogether two much pessimism abroad with respect to the wastes of war and the difficulty of supporting huge national debts created by the war. It is our opinion that, if the wastes arising from idle machinery, plant and economic equipment in general, as well as idle labor, can be eliminated and if the world has a fair chance to progress peacefully in commerce and business enterprise, these debts will not prove an unendurable burden. The Paris conference in establishing peace on a sure foundation, under the liberal guidance of the United Kingdom and the American Republic, is doing work of the highest value for the economic and social rehabilitation of the world.

CANADIAN BANKS AND THE WESTERN FARMER

THE duty of defending the Canadian banking system against the criticisms which were levelled at it at the recent convention of the United Farmers of Alberta fell upon Mr. Vere C. Brown, superintendent of central western branches of the Canadian Bank of Commerce. The principal attack on the Canadian system was contained in an address by Mr. J. W. Leedy, formerly governor of Kansas. Mr. Leedy's speech was reported in *The Monetary Times* of January 31st.

Mr. Brown, in maintaining that the present system is suited to the needs of the Canadian farmer, stated some interesting facts. He said that in the case of his own bank only nineteen out of 160 of the managers in the west were required to refer loan applicatons of more than $1,000 to the central office. The rest are given authority to go as high as $2,000, and many of them as high as $3,000. Never in his eighteen years had his bank ordered in any way the curtailment of credit to farmers in the West, and during that period there had been two great financial panics which had caused the big speculator to cut down their borrowings to the marrow. He cited a case where the bank gave credit to the extent of $30,000 to carry a man through who, at one time, had only assets of $5,000, but eventually the stockman won out and cleared up $100,000. It was preferable to lose some money by giving credit to a poor risk than to withhold credit from a man deserving it.

Mr. Brown pointed out that of 93 branches of the Bank of Commerce in the West in 1916, over 60 failed to make running expenses. The expense of the smallest branch was $5,000 a year. Yet between 800 and 900 branches have been established in the West since 1900. The reason for this was the desire of the banks to be in the field when the great development that it is felt certain will come does actually take place.

Mr. Brown further stated that the interest of depositors, as well as that of borrowers, has to be considered in the question of large or small banks. In the East, he said, the demand is that deposits shall be safe, and small banks could not command this feeling of security.

The convention, however, passed a resolution declaring that "in the interest of agricultural development, that the present banking system be supplemented by a system of banks created by the Provincial Government, which Government shall have plenary power to create, regulate and control, with minimum requirements of $10,000 paid-up capital, and with power to take deposits."

The Toronto Globe very properly calls attention to the danger of advancing credits to foreign countries which are in an uncertain political condition. Prosperity, which is based upon unwise credit advances, is not what is wanted in Canada. The British Government recently wrote off one-half of its credit to Russia considering that the repayment of the sum was improbable. A recent despatch states that Canada's representatives overseas have arranged to advance $25,000,000 each to France and Roumania to be expended for raw materials, food stuffs and manufactured materials in Canada The credit of France is still high and we hope that the advance to Roumania will also be justified by future developments.

WOMEN WORKERS IN GREAT BRITAIN

REPORTS of industrial unrest on a great scale at Belfast, Glasgow and London should not lead one to believe that the trouble concerns the men mainly, for the demobilized women have taken a large part on this movement for higher wages or—what is practically identical—the same wages for shorter hours of work. Industrial unrest is, indeed, worldwide as the present outbreak of strikes in the United States and Canada show. The problem is much more difficult of solution in the United Kingdom than on this side of the water, however, for 80 per cent. of the population of Great Britain consists of industrial workers. It will well repay one to follow events in the labor world across the water closely; for similar demands and identical movements may be expected shortly in Canada and the United States.

A week or two since 6,000 women marched up Whitehall and stopped before the Ministry of Reconstruction where their leaders were introduced to Sir Stephenson Kent, chief of that department. They demanded the immediate enactment of legislation providing for a minimum wage for all women workers, wherever employed, and the raising of the unemployment benefit, when discharged, which the Government has placed at 20 shillings, declaring it quite inadequat to cover the weekly expenses of living. They also asked that pensions and allowances granted to soldiers or their widows be advanced to prevent possible competition from underpaid but subsidized women workers. Shortly afterwards, at a great mass meeting of female munition workers, now unemployed, at Liverpool, the Government was urged to provide immediately essential supplies of raw materials to employers of labor, so that unemployment might be curtailed. Mr. G. H. Roberts, Minister of Labor, in response to pressing demands from the women workers, publicly stated that the women must be satisfied for the present to return to the positions and the kinds of work in which they were employed before the war; and that the Government had plans maturing by which new industries would be created for female labor, thus enlarging the sphere of women's work for the future. In the meantime an embargo has been placed against certain imports from abroad, except under special license, the object being to enlarge the market for labor within the United Kingdom.

As the recent elections showed, the majority of British women workers refuse to be swept into the ranks of extremists and radicals by merely emotional appeals. They are, however, in large numbers joining the labor unions. Rival associations for women workers have been recently launched by Lady Rhondda and Ladies Eve and Bell, respectively, the former being the prime mover in the Women's Industrial League and the latter organizing and directing the Women's Agricultural Executive Committees. The professed objects of both these Associations is the widening of educational opportunities for women and training in democratic citizenship. The leaders of orthodox unionism, perhaps naturally enough, cast suspicion upon these new movements, maintaining that the members are not "class conscious" and are being led by the wealthy and titled classes. Be that as it may, it is significant that an earnest effort is being made by leaders of all classes in Great Britain to reconcile differences and to achieve solidarity in national aims and progress. The women of Great Britain performed prodigies in helping to win the war. Their vote at the recent elections demonstrates that they will not follow the lead of extremists and visionaries. It is safe to say that, with the marvellous machine equipment and plant that the United Kingdom now possesses, and with the full utilization of its labor power, the Minister of Labor's prediction will be fulfilled: "The country cannot fail to be prosperous."

The cost of the war is estimated at £40,000,000 by the London Daily Telegraph. This is the direct cost only, the indirect expense resulting from diminished trade, financial disturbances, etc., being calculated at £50,000,000.

MONTREAL CITY AND DISTRICT SAVINGS BANK

An increase in assets totalling approximately $5,000,000 is recorded in the annual statement of the Montreal City and District Savings Bank for the year 1918. This increase is represented by an increase of about $3,000,000 in cash on hand and on deposit in chartered banks, and about $2,000,000 of additional investments in Dominion, Provincial and Municipal bonds. Loans now total $7,591,107, being approximately the same as last year, and the other assets are also similar with the exception of "other assets" which are now $315,069 in place of $79,949. Total assets are $41,178,119.

The bank's deposits increased slightly and a new item, namely, "special deposits without interest" appears in the statement of liabilities.

The following figures compare the profits with those for the preceding year:—

	1917.	1918.
Balance brought forward	$172,308	$214,023
Net profits for the year	222,189	234,642
Total	$394,498	$448,665
Dividends	165,474	190,723
Contributions	15,000	14,000
Balance carried forward	214,023	243,942

The increase in the amount paid in dividends is due to an increase in the paid-up capital stock from $1,200,000 to $1,481,100.

BRITISH COLUMBIA PERMANENT LOAN

Net profits of about $75,000, or 8 per cent. on the outstanding capital stock, were made during 1918 by the British Columbia Permanent Loan Company. With a view to strengthening the company's position, however, no dividend was declared at the annual meeting held on Wednesday, February 12th. The results of the year's business were briefly as follows:—

Total earnings (chiefly interest on mortgage loans)		$208,560
Less expenses	$52,003	
Interest charges	80,268	
		132,271
Net profit		$ 76,289

This profit, together with a balance of $128,721 brought forward, made a total of $205,010. The sum of $100,000 was transferred to reserve, and $102,902 carried forward. The company's reserves, etc., now total $783,002; the paid-up stock is approximately $960,000 and public liabilities, including debentures issued, total $1,332,300. Total assets are now over $3,000,000, of which first mortgage loans comprise $1,866,167 Liquid assets were increased during the year by the purchase of $115,000 of Victory Loan bonds. The assets include, however, over $200,000 if improved property acquired by foreclosure, real estate amounting to $528,156, and accrued interest of over $70,000. The latter two items have, however, been substantially reduced since last year.

The directorate of this company is composed entirely of local men who are thoroughly familiar with financial affairs in the province. Under the able management of Mr. T. D. Macdonald, a great improvement has taken place in the company's condition during the past few years.

WESTERN MUTUAL HAS UNUSUAL RECORD

The thirty-fifth annual statement of the Portage la Prairie Farmers' Mutual Fire Insurance Company, for the year 1918, shows that company's affairs to be in good shape. Against liabilities of only $4,448, there are assets comprising $50,000 war loan bonds, $74,777 cash in the bank, $12,616 office building site and equipment, in addition to which the company holds $636,755 of premium notes and $15,346 of unpaid assessments. The year's income from cash premiums and assessments was $144,995 net; the claims paid were 47 per cent. of this sum, and the expenses 30 per cent. Of the balance $28,910 was invested in Victory bonds, and the remaining $6,745 was included in the bank balance of $74,777. The members should be gratified at the company's position and on the year's results.

TRAVELLERS' LIFE OF CANADA

An increase of 34 per cent. in net premium income is an indication of the rapid growth in the business of the Travellers' Life Assurance Company of Canada. The comparative figures given elsewhere in this issue show that the net insurance in force has practically doubled since 1914, while assets and net premium income have more than doubled since that time.

The company suffered, like all other life companies, from the war losses and from the influenza epidemic. The claims from the former being $8,000, and from the latter $27,000. The total payments to policyholders, however, with the increase in policy reserves, was just 76.8 per cent. of the net premium income. The average rate of interest earned on investments, including cash in the banks, was 6.59 per cent.

GOOD YEAR FOR NATIONAL TRUST COMPANY

As a result of another successful year of business, the National Trust Company is again able to pay dividends at the rate of 10 per cent. per annum and to make substantial appropriations for reserves and contingencies. The year 1918 resulted as follows:—

Balance from 1917		$122,399
Net profits		266,784
		$389,183
Dividends at 10 per cent.	$150,000	
Transferred to reserve	100,000	
Special reserve for new branches	50,000	
To write off office premises	50,000	
Subscriptions	13,000	
For Dominion war tax	14,000	
		377,000
Balance forward		12,183
		$389,183

The reserve fund, which was $1,500,000 last year and just equalled the capital stock, now exceeds it by $1,600,000. The special reserve for new branches is a new account, and may foreshadow increased activity on the part of the company. Although net profits exceeded those of the previous year by $15,000, these appropriations have reduced the balance carried forward to a small amount.

Total assets are now $80,091,670, as compared with $76,722,635 a year ago. Of this total, $70,000,000 is on trust and agency account, and nearly $7,000,000 on guaranteed agency account, the balance of over $3,000,000 representing the shareholders' funds. The latter have been invested to an increasing extent in bonds.

The Toronto bank clearings for the current week are $68,858,781, compared with $53,601,982 for the same week last year, and $48,556,682 two years ago.

INSURANCE COMPANIES MUST PAY POLICIES

In the Superior Court, Montreal, on February 13th, Mr. Justice Maclennan delivered judgment in two test cases heard in December last, on behalf of Curtis's and Harvey (Canada) Ltd., in liquidation, and J. Leonard Apedaile, against the North British and Mercantile Insurance Co., and the Guardian Assurance Co., Ltd., of London, England, on fire insurance policies issued by these companies in favor of the company now in liquidation. The actions were the outcome of the explosions which wrecked the plant of Curtis's and Harvey (Canada), Ltd., at Dragon, near Rigaud, on August 18th, 1917.

By the judgments the North British and Mercantile Insurance Co. is condemned to pay to J. Leonard Apedaile, liquidator to the Curtis's and Harvey firm's affairs, $32,897.88, and the Guardian Assurance Co. is condemned to pay the same two policies $93,993.92, with costs, in each instance.

There are claims outstanding against some twenty-five other insurance companies. The defence in the case of the two companies was that the loss was one of explosion and not of fire, and being a loss by explosion, they claimed they were not responsible under the policies issued.

GOVERNMENT PLANS RAILWAY WORK

Assurance that the government proposes to pursue a vigorous policy of railway construction in the provinces, with the double object of benefiting sections of the country which lack transportation facilities and giving employment to returned soldiers, was obtained last week by delegates from the inter-provincial conference of mayors of Alberta and Saskatchewan.

The two delegates, Mayor Hardie, of Lethbridge, and Captain E. G. McKenzie, president of the Alberta Great War Veterans' Association, after interviewing Acting-Premier Sir Thomas White and Hon. J. D. Reid, minister of railways and canals, expressed themselves as satisfied with the programme laid before them by the two members of the government.

Captain McKenzie stated that Sir Thomas White had intimated that the government proposed, during the coming session to vote large sums for the construction of railways and highways in the West.

"The building of 2,500 cars for Canadian government railways, the manufacture of enormous quantities of steel rails for the railways, the expenditure of $65,000,000 for shipbuilding and the government housing programme, were," said Captain McKenzie, "touched upon by the prime minister in dealing with plans for the reconstruction period."

The minister of railways, said the delegates, had stated that work on over 300 miles of railroad in Alberta and Saskatchewan had been authorized in connection with the government railway system. This work was all on lines partly graded and under construction. The question of further extensions on the Canadian Pacific Railway was now being discussed with heads of that road, and plans were being laid down for as much work of this kind in Alberta and Saskatchewan as possible. The Grand Trunk Railway was also co-operating with the government along these lines.

Just as soon as weather conditions would permit the laying of track, work would be started, and it was possible that a large number of men would be employed in about two weeks. Returned soldiers would, of course, be given the preference when the work was started.

Captain McKenzie said that the minister of railways and canals expressed his belief that the work to be undertaken would furnish employment for a very large number of returned men and solve to a great extent, the unemployment problem in Alberta and Saskatchewan.

Twenty-year 5½ per cent. gold bonds of the United Kingdom of Great Britain and Ireland are being offered for sale by a United States syndicate. These are the bonds dated February 1st, 1917, and due February 1st, 1937, with interest payable February 1st and August 1st.

TRUST COMPANY SHARING PROFITS

The Guaranty Trust Co., of New York, has adopted a profit-sharing plan for the payment of compensation to employees and officers, in addition to their salaries, through action of its directors at a meeting held recently. One of the principal features of this plan is a primary fund through which the employees of the company are to receive additional compensation based on the earnings of the company during any calendar year, and in which the officers shall have no share. The plan provides for setting aside, after dividends are paid, a secondary fund in which both the officers and employees will share. The purpose of having two funds is to provide through the primary fund that the employees shall be assured of a fairly uniform payment of additional compensation every year, and through the secondary fund that in prosperous years the employees shall have an increased share, and that both employees and officers shall benefit with the stockholders in the prosperity of the company. This affect more than 2,200 employees and gives each employee a direct personal interest in the operation of the company.

CANADA LANDED AND NATIONAL INVESTMENT CO.

A slight decrease in assets is reported by the Canada Landed and National Investment Co., of Toronto, in its statement for the year 1918. Profits were also slightly less than for the previous year but a substantial margin still remained over and above the amount required for the dividends at the usual rate of 9 per cent. per annum. The profits totalled $415,795, which, together with the balance brought forward of $89,151, made a total of over $500,000. Debenture interest required nearly $200,000, and dividends over $100,000. The expenses of management, etc., were practically the same as last year and the balance carried forward is $132,987, as compared with $89,151 last year.

The company's mortgage loans declined by $300,000 while government and municipal bond holdings increased by about $250,000. The other items in the assets statement are practically the same as last year. Debentures outstanding declined slightly. The company's reserve fund remains at $1,205,000 just equalling the capital stock paid up. The annual meeting was held on Wednesday, February 12th, at the head office in Toronto.

MOUNT ROYAL ASSURANCE COMPANY

The Mount Royal Assurance Co., whose annual meeting was held in Montreal on February 17th, had a premium revenue amounting to $537,694.91 in the year ended December 31, 1918, which showed an excess of $34,409.50 over the previous year's income. The revenue from investments and other receipts amounted to $76,190.12, making the total net income for the year $613,885.03.

The losses paid were $260,455.47, indicating a ratio of 48.44 per cent. in the premium income. The net earnings of the company amounted to $175,619.24, of which $18,325.81 was transferred to the reinsurance reserve fund, and $157,293.43 carried to profit and loss account. The total assets of the company now reach the sum of $1,436,842.12.

For the protection of the company's policyholders the following amounts are available:—

Paid-up capital	$ 250,000.00
Reinsurance reserve	326,324.08
Investment reserve	63,015.92
Balance at profit and loss	575,117.52
	$1,214,457.52

The Mutual Life Assurance Company has opened an office at Nanaimo, B. C., in charge of Mr. John Ward. In the past policyholders around that district forwarded their renewal premiums to Victoria, but with the opening of the local office this has been eliminated.

IMPERIAL BANK APPOINTMENTS

The Imperial Bank announces the appointment of Mr. A. E. Phipps as general superintendent of branches. Mr. Phipps was formerly western superintendent. He is succeeded in the west by Mr. H. T. Jaffray, formerly western inspector. A superintendent of eastern branches has also been appointed in the person of Mr. R. S. Clark, formerly inspector at Toronto.

LETTERS FROM THE FRONT

What is probably the last issue of "Letters from the Front," comprising a record of the part played by members of the staff of the Canadian Bank of Commerce in the great war, has just been issued. When one reads that the total number of men who left this institution to take up military duty was 1,704, and that 226 of these men have given their lives, some adequate conception of the contribution which this institution, as well as other financial institutions, have made to the glorious victory is obtained. The pamphlet before us in addition to containing detailed information regarding the men who have died or been killed in action, also contains the list of those who have been wounded, prisoners, as well as those who have received decorations of various kinds. It contains extracts from letters written by these men which are exceedingly interesting and will well repay those who will take the time to read them. This series of eleven pamphlets, we understand, is to be reprinted in book-form, and when that is done, there is no doubt whatever but what it will prove a most valuable contribution to the literature of the war, to say nothing of the appropriateness of it as a memorial of the men who have made it possible by their bravery to have such a book produced.

Mr. J. Amos Johnston has been appointed Industrial Commissioner for Brockville, Ont.

Forging Ahead!

The proceeds of an issue of $2,500,000 7% Mortgage Debenture Stock of

Whalen Pulp and Paper Mills

enabled the Company to complete the development of its three valuable Timber Limits on the Pacific Coast. Investors in these securities are assured of;

(a) A continuous 7% interest yield;
(b) Return of their principal in 1932, which is provided for by ample sinking fund provisions;
(c) A share in the surplus profits by reason of the 50% Common Stock bonus allowed.

In our opinion, the above provides a safe and profitable investment.

Circular fully describing gladly sent upon request.

WINNIPEG ELECTRIC CHANGES

Important changes in the officers of the Winnipeg Electric Railway Co. took place at the annual meeting held on February 12th. Sir William Mackenzie, president, retired from the board, and Sir Donald Mann, Mr. D. B. Hanna and Mr. R. J. Mackenzie, directors, also retired. Sir Augustus Nanton becomes president and Mr. George Wallen, W. R. Bawlf and W. J. Bulman were elected directors. This places the direction of the company entirely in the hands of local men.

SIR AUGUSTUS NANTON
President, Winnipeg Electric Railway Company

The financial report for the year ended December 31, 1918, submitted to the shareholders, compares thus with the 1917 figures:—

	1918.	1917.
Gross earnings	$3,588,723	$3,339,010
Operating expenses	2,412,226	2,143,512
Net operating revenue	1,146,796	1,195,497
Miscellaneous income	44,934	47,877
Gross income	1,221,428	1,243,374
Interest charges	668,342	649,051
Extinguishment of discount	16,255	11,797
Percentage tax	114,509	105,778
Taxes	114,928	103,286
Miscellaneous expenses	2,190	5,985
Other deductions	15,419	13,846
Total deductions	31,644	889,745
Net income	289,784	353,629

It will thus be seen that the gross income for the year 1918 shows an increase of $249,713.20 over 1917, but increased wages and operating expenses swelled the operating charges so that for the year 1918 the net income shows a decrease of $63,845.57, as compared with the preceding year. In previous years $201,000 has been deducted from the net income for depreciation.

Dr. W. A. Riddell, superintendent of the Ontario Trades and Labor branch, has been appointed to report as to future action in regards to mothers' pensions in Ontario. The report of Dr. Riddell will serve as the basis for any legislation which the Government may decide to bring down to the House.

Hamilton, 20th January, 1919.

Should Canadian Tariff be Revised Now?

Canadian Council of Agriculture Claims it Should—Reply to Manufacturers' Statement—Other Sources of Revenue Can Be Substituted—Relation of Customs Duties to Reconstruction

IN response to the statement of the Manufacturers' Association, given in a recent issue of *The Monetary Times*, Mr. R. McKenzie, acting secretary of the Canadian Council of Agriculture, presents the following arguments:—

In your issue of January 31st, appears a statement from the manager of the Canadian Manufacturers' Association in which he clearly sets forth their position with regard to the demands made by the farmers' organization for a radical change in the tariff of Canada. Since the farmers' platform that contained their demands for changes in the custom tariff was placed before the Canadian public, there has been considerable rumbling as to the attitude of the Manufacturers' Association towards that platform, yet this is the first time they publicly stated their position with regard to it.

In their statement the manufacturers "urge most strongly that all tariff controversy should be postponed until the country has settled the immense problem of readjustment from war to peace conditions." There is a familiar sound to the proposition of "postponing" all controversies in respect to the tariff. Beneficiaries of protection always had a reason why discussion of the question should be deferred. During the war the demand was for postponement until the end of the war. Many agreed there were reasons why that should be done. The war has ceased, still, another reason is being advanced. Most of the people are convinced that an essential readjustment from war to peace conditions involves the adjustment of custom duties. No other question to be considered has within it so much that affects the future progress and economic welfare of Canada, as that of the question of special industries being granted special privileges by the government at the expense of the people.

The Canadian Manufacturers' Association assume that they believe the country should concentrate its energy on the task of returning from war to peace conditions; that there is one and only one essential thing to do during the transition period, and that is to *leave custom duties severely alone*, "and everything alse that is needful will be added unto you."

Thoughtful Canadians think the one most essential thing to do in our dilemma is to devote our energies towards converting into liquid asset the enormous latent wealth we own in our agricultural lands and other natural resources to be used in liquidating our enormous liabilities. No other one thing has contributed so much towards retarding the development of these natural resources and preventing realization on the wealth they contain for the use of the people, as the excessive overhead charges created by custom duties.

Canada has been for the last 40 years unduly taxing the resources of the people engaged in converting our natural wealth into liquid form under the delusion that we were building up Canada by establishing industries that were not self-supporting and that Canada could not support without recourse to the expediency of borrowing from the mother country. Every year for the last 40 years we were sinking deeper into debt until immediately previous the war our borrowing had to stop. Now faced with a problem of meeting the cost of the war in addition to carrying the load incurred in pre-war times, we are solemnly warned by the Manufacturers' Association that Canada's only salvation is to continue the custom protection enjoyed by the members of that association.

During the early days of the national policy its blightening effect on the development of industry was not so apparent. Manufacturers stimulated by custom duties became numerous. On account of competition with one another they sold their products at competitive prices. Being protected, however, from outside competition, they found it to their advantage to amalgamate their interest, thus removing competition from among themselves.

Decay of Small Industry

Analysis of the 1916 postal census of manufacturers reveals the fact that protection, as we now have it in Canada, has a withering effect on manufacturing as well as on the development of our natural resources. The number of establishments employing five hands and over in 1915 was only 15,593, as compared with 19,218 in 1910. True, by including establishments employing less than four hands in 1915 (which were excluded from the census of 1910) the number was increased to 21,306. The census bulletin classifies the various interests in eight groups. The group of establishments having an average output of $25,000 or less, constitute 76.57 per cent. of the total number. Establishments having an average production of $200,000 or less, constitute 94.76 per cent. of the whole. Those having a production of over $200,000 constitute only 5.24 per cent. of the whole. A general review of the group shows those having a production of $200,000 and under the average output per establishment, decreased 22.36 per cent. in 1915 as compared to 1910. The significance of the above statement is that under protection 20,159 out of the 21,306 manufacturing establishments enumerated by the census bulletin 1916 have decreased their production in 1915 as compared to 1910 upwards of 22 per cent. That is to say, 94.76 per cent. of the manufacturers in Canada have decreased their average production over 22 per cent. in that period. As there was a material increase in values in 1915 as compared to 1910, the decrease in volume would be more marked. On the other hand the bulletin points out there was an increase of 20.68 per cent. in the total product of manufactures. The residue of 5.24 per cent. must have increased their output very largely. It looks like a case of the big fish eating up the little fish.

What further need is there of demonstrating that manufacturing interests, as well as the farming industry and the development of our natural resources demand an immediate relief from the effect of customs duties, and no attempted readjustment to peace conditions after the war will prove effective in allaying the unrest and sense of injustice that exist, without the removal of the burden of protection.

The effect of protection as we have it in Canada, on the prosperity of the people is cumulative—the longer it continues, the greater the depression. Manufacturing industries in the early days of the national policy prospered. With the added duties and cumulative effect of protection only the larger manufacturing concerns constituting only five per cent. of the whole and who receive their raw material free from custom duties, have profited. The larger portion of this raw material is subject to the war tax on imports. Take a few illustrations: Hides are free, as is also extract logwood, fustic oak bark and preparations thereof, by statute. Tanners get a drawback of 99 per cent. on stearine and cassine when used in the manufacturing of leather. Hyposulphate of soda and other tanning articles are free by order-in-council. The shoe maker, the shoe repairer, the harness maker and all others whose basic raw material is leather, have to pay 15 per cent. custom duty plus seven and one-half per cent. war tax. They get no free raw material. Raw cotton is free. Wool is free. Textile manufacturers are protected to the extent of 32 to 42½ per cent. Some 3,000 industries in the Dominion are the converters of the products of the cotton and woollen mills into finished garments. They get no free raw material, but are compelled to pay the group of financiers, who control the textile manu-

factures in Canada, the full extent of the protection they receive. They collect this tribute from their customers.

The report of the Minister of Customs for the year ending March 31, 1917, shows that we imported that year 461,733,609 dollars worth of dutiable goods, and 383,622,697 dollars worth free goods. Free goods being 46 per cent. of the imports and were largely imports of raw material and almost exclusively used by the larger manufacturers. Of the 21,306 manufacturing establishments in 1915, the following is a partial list of industries culled from the 1916 Census Bulletin, which obviously receive no benefit from protection, but are victims of its effect on the increased cost of production by creating excessive overhead costs, including increased fixed and working capital:

	Number
Aerated and mineral waters	221
Artificial limbs and trusses	9
Asbestos	9
Awnings, tents and sails	30
Cotton bags	10
Baskets	19
Bicycle repairs	13
Blacksmithing	611
Boats and canoes	83
Boot and shoe repairs	127
Boxes and bags (paper)	71
Boxes (wooden)	85
Bread, biscuits and confectionery	1375
Brick, tile and pottery	230
Butter and cheese	3307
Men's clothing, custom	1048
Women's clothing, custom	853
Cooperage	117
Dyeing and cleaning	133
Electric light and power	307
Fish, preserved	775
House building	556
Lithographing and engraving	60
Log products	1887
Lumber products	661
Monuments and tombstones	171
Painting and glazing	115
Patent medicines	106
Photography	280
Picture frames	25
Plumbing, tinsmithing	933
Printing and book binding	411
Printing and publishing	646
Roofing and roofing materials	39
Shipping and ship repairs	20
Signs	50
Total	15,402

This list could be supplemented by many industries which receive high protection but whose raw material is the finished product of the large industries and are compelled to pay to the producers of this raw material the larger portion of the protection they receive. Many of them can show that the additional cost of doing business due to protection, nearly offsets any advantages they receive through custom duties. They pay tribute to the manufacturing concerns that supply them raw material, and they collect the amount of that tribute and some more, from the consumers of their product.

Relation to Public Revenue

Manufacturers state in their memorandum that last year the tariff provided for "61 per cent. of the total revenue of Canada and over 75 per cent. of the total secured by all forms of federal taxation." The United States in the same period, similarly to Canada engaged in the war, collected around five per cent. of their total revenue from custom duties. Britain collected about 11 per cent. of their total revenue from custom duties during the period, levying the major portion of the tax on non-competitive goods, a method exactly opposed to the protective theory for which the Manufacturers' Association stands. United States last year collected 75 per cent. of their revenue from income tax and excessive profit tax and are expected to collect 85 per cent. for 1919 from the same source. Britain and the United States collected the larger portion of their revenue for war purposes and the conduct of government from men of money and wealth. Canada levies the main part of her revenue on consumption.

It is pertinent to ask who pays the revenue received by government from custom duties. Manufacturers do not. The larger manufacturers get their raw product free, excepting war tax. The smaller manufacturers buy their raw material from home industries. Members of the Manufacturers' Association and financiers will no doubt live up to their "slogan" and buy for their personal needs "Canada made goods." Only users of dutiable imported goods contribute to *the revenue* secured from *Custom Tariff*.

Manufacturers in their statement boast of their contribution to the winning of the war, and insinuate that the war might have lasted for many days longer but for the part played in winning it by Canadian factory production. No one wants to detract from the manufacturers whatever credit they are entitled to for their part in winning the war, and they have done their part. The man who gives the best that is in him for love of his country does not usually boast of his achievement or look for a quid pro quo. In view of the many scandals and charges of profiteering levelled against our large manufacturers at the beginning of their operation in supplying war material, and in view of the scores of men who undertook the manufacturing of munitions and other war equipment, that were never known to be associated with manufacturing industry, we cannot close our eyes to the fact that many of these men were actuated by other motives than helping to win the war, and they would be just as ready to enter into the enterprise of manufacturing hair pins as they were to manufacture war equipment, did it offer to be as profitable an undertaking.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended February 14th, 1919:—

Buffalo Mine, 66,000; O'Brien Mine, 64,000; Coniagas Mine, 349,045; McKinley-Darragh, 144,081. Total, 623,126

The total since January 1st is 2,471,743 pounds, or 1,235.8 tons.

AUSTRALIA MAKES WHEAT ADVANCES

Some interesting particulars of the steps taken by the government of the Australian Commonwealth to assist the wheat growers of the island continent, are contained in a report to the department of trade and commerce from Mr. D. H. Ross, Canadian trade commissioner at Melbourne. He states that independent of earlier guarantees made by several state governments, owing to the federal government not having then come to a decision in the matter, the Commonwealth government has decided to make advances of 97 cents per bushel to farmers on the 1918-1919 crop of recognized quality. This guarantee immediately relieves the state governments from any liability in making advances to farmers.

The advance will involve a payment by the government of over sixty million dollars in addition to railway freight and all expenses in handling, and will afford prompt relief to wheat growers who, through an unfavorable season, will have a much restricted production.

An estimate made by the Australian Wheat Board puts the available supply of wheat in Australia at 156,266,000 bushels. Many steamers have been released to load the purchases made by the British government, which, however, did not buy any of the 1917-1918 crop, upon which the Commonwealth government advances now total fifty-five million dollars.

Trustworthy Financial Management

The great essentials to the safe handling of money are financial experience and integrity. Our financial statement attests our ability, and our assets under administration, of $90,832,629.80, demonstrate our reliability, as proven by public confidence. We manage investments; we act as trustees of special funds, and as financial agents for individuals who wish to be relieved of financial responsibility. Write for free booklet.

PROTECTION TO DEPOSITORS

The Need for Legislation Respecting the Protection of Deposits Made by the Public

By G. W. Morley

In spite of the many warnings that we have received from time to time by the failures of private bankers and loan companies throughout Canada, nothing has yet been done by our legislatures by way of providing for due safeguards to the rights of the public and depositors. We are all familiar with the failure of the York Loan and latterly with the Dominion Permanent Loan and Savings Company, in which cases great hardships have been endured by the depositors in the loss of their money because their rights have not been safeguarded. Any person or merchant, as the case may be, at the present time may open a private bank and accept deposits without being required by law to do something in return. There is no provision for inspection by the provincial or Dominion governments, and there are no requirements respecting the keeping of a certain percentage of liquid assets.

It might be argued that there is no legislation respecting such matters as regards banks, but such is not the case. Provision is made in the Bank Act for a shareholder's audit, and the depositors are protected by the double liability clause and the fact that the banks are not permitted to take mortgages as "straight" security. Moreover, some years ago the Canadian Bankers' Association passed a resolution calling upon all members to keep a certain percentage of their assets liquid, as compared with liabilities to the public. They wisely saw the need for legislating themselves without waiting for the government of Canada to do so. If one will examine the bank returns for September he will find that 54.84 per cent. of the total assets, as compared to liabilities to the public of the banks are liquid—a remarkable showing which speaks well for our Canadian banking system. It is obviously unfair for loan companies, departmental stores and private companies to compete with chartered banks for deposits and not be required to use the necessary safeguards. Certainly the interests demand appropriate and immediate legislation upon the subject; otherwise millions of dollars will be lost in the future, and there never existed a greater need for thrift and wise legislation to encourage it on the part of the people of Canada as there does in the new era on which we have just entered.

Legislation Needed

The Dominion government has exclusive jurisdiction as regards "Banks and Banking," and the provincial government respecting the loan companies, and it would appear advisable for the minister of finance and provincial treasurers to proceed to investigate and examine into the methods employed by private bankers, and loan companies, and departmental stores in obtaining deposits and the investment of such deposits received by them. Trust company investments are, of course, covered by the trustee acts of the various provinces, but trust companies do not for the most part accept deposits. In fact, it is open to question whether they have the right to open "checking" accounts. This investigation to which I refer should include also a report, as to the nature, if any, of the securities existing for the investments of such parties of their deposits in Canada and elsewhere, their methods of carrying on business, whether solvent or insolvent, with a view to such a revision of the laws as may be necessary to remedy conditions.

While the right to engage in private banking and receive deposits are common law rights, and, in the absence of statutory legislation, that any person or firm could conduct such a business in the country, the public deposits in loan companies, private banks and departmental stores have reached such an extent that it would seem to indicate that some further legislation is desirable. Why should not private bankers apply to the minister of finance, and departmental stores to the provincial treasurer of the province (in which they do business) for licenses to take deposits from the public?

It is to be remembered the evil effects which resulted in the failure of the private banking firm of Henry Siegel and Company, New York, who also operated a departmental store. In the states of New Jersey and Massachusetts it was made a misdemeanor , punishable by fine not exceeding $5,000, or by imprisonment at hard labor for a term not exceeding seven years, or both for any association of individuals, partnership, or joint stock association to engage in the business of banking, unless they subject themselves to control, supervision, inspection and examination, to which incorporated banks are by law subject; and the right to engage in such private banking business is restricted to residents and inhabitants of the state.

In Massachusetts parties engaged in the business of selling steamship or railroad tickets for transportation to and from foreign countries, or of supplying laborers to carry on in conjunction with such the business of receiving deposits of money for safekeeping or for the purpose of transmission to foreign countries, must execute and deliver a bond in such sum as the banking commissioners deem necessary to cover the deposits. Some provision should certainly be made by provincial governments as regards deposits taken by departmental stores providing that moneys received on deposit should be segregated and not mingled by them with their other moneys. In the case of Henry Siegel and Company, their banking business was conducted so far as it appeared to the depositors, in all respects as a savings bank, and at the time of their failure they had on deposit about $2,500,000 distributed between 12,000 and 15,000 depositors. A large number of these depositors were women, mostly poor women, and a majority of the accounts were kept as savings accounts, very little money being withdrawn from them. So far as it appears from the testimony no actual capital was invested in the banking department, and the moneys received from the depositors were used by the members of the firm in any manner they saw fit and treated by them as if it were their own moneys. It is generally understood that the depositors have received 15 cents on the dollar from the company, and it is not expected they will receive anything more.

Suggested Remedies

In view, therefore, of the urgent need of legislation I would suggest as follows:—

(1) That all private bankers, loan companies and departmental stores be under the supervision of the Department of Finance, Ottawa, or the Provincial Treasurer's Department of the provinces (as the case may be), and be required to deposit with them, to an amount in value of at least 15 per cent of the total deposits held, securities of a nature approved by the minister of finance or provincial treasurer.

(2) That the claims of depositors be preferred claims.

(3) That the taking of deposits by private parties, partnerships, or corporations, and the conducting of pri banking businesses without obtaining a certificate of authority from the proper department shall constitute a misdemeanor punishable by fine or imprisonment.

(4) That annual reports be made of unclaimed deposits.

(5) That provision be made for prohibiting private bankers under the supervision of the Department of Finance to purchase real estate in the future, and where such bankers now owning real estate a period of five years be given to dispose of it.

(6) That no loans be made by private bankers on the security of second or subsequent mortgages.

(7) That moneys received on deposit by departmental stores be segregated and not mingled with their other moneys.

INSURANCE OF DISABLED MEN

Information sought by insurance companies regarding the physical condition of a soldier or ex-soldier of the Canadian Expeditionary Force, can only be furnished by the government when written consent of the man concerned is given, according to a recent decision. A fixed procedure for obtaining such information has been drawn up as follows:—

(a) Applications regarding soldiers in the service should be forwarded by the insurance company to the general officer commanding the district in which they are serving.

(b) Applications regarding ex-soldiers who have been discharged for reasons other than physical unfitness should be forwarded by the insurance company to the Director of Records, Militia Headquarters, Ottawa.

(c) Applications regarding ex-soldiers who have been discharged on account of physical unfitness, who are either under treatment by the Invalided Soldiers' Commission or who are pensioned, should be forwarded by the insurance company to the Department of Soldiers' Civil Re-establishment.

Your Money Can Earn 5½% With Absolute Safety

$100 invested at 5½% doubles
itself in less than 13 years
$100 saved at 3% takes 23½
years to do the same thing.

It would be foolish to invest your money at only 3% when you can secure 5½% with equal safety and convenience. It would also be equally foolish to endanger your savings in order to secure a slightly higher rate of interest. But your money CAN earn 5½% without risk of loss, by investing it in

LABOR DIFFICULTY WILL DISAPPEAR

Canadian Minister of Labor Says that Government Works and Other Developments Will Wipe Out Unemployment in Canada in Sixty Days

SPEAKING before a meeting of trades union delegates, held in Toronto on Saturday, February 15th, Hon. Gideon Robertson stated that the employment situation in Canada will be relieved entirely in sixty days. The minister of labor spoke after he had heard a lengthy debate which had concluded with the passing of a resolution calling for a nationwide campaign for a five-day week of forty hours, with a minimum wage of $5 a day, to be increased when crafts suffered a reduction in wages through the cutting of hours.

"There is only one reason why the situation may not be relieved," said Senator Robertson "Let me deal with the other phase of the labor problem. With the cessation of hostilities it was feared that an organized attempt might be made to reduce wages, and the executive of the Canadian Manufacturers' Association was told that this must not occur. As a body, this was agreed to, while some are not abiding by the agreement. The president and secretary of the Lumbermen's Association have agreed to maintain wages this season.

"Reports show that manufacturers in Ontario, in spite of the fact that merchants are withholding purchases, are increasing their staffs. Let me proceed with an illustration. A firm of builders anticipated the erection of fifty houses, but learned that demands would be made upon them shortly, and decided not to proceed with the dwellings, taking the view that within two years things would be normal. If contracts were let to-day to shipbuilders they would hesitate, fearing that they would be forced to meet demands from labor. I think that other means and methods should be employed than passing resolutions in open meeting, which are scattered broadcast, and tend to stagnate industry. More than you imagine, it has affected the government's reconstruction programme."

Senator Robertson recommended the principle of the Witley scheme as a means of adjusting labor troubles and to rendering industry stable. Strictly, the scheme could not be adopted, but he felt that industry could be more successfully conducted if employers of each industry formed a committee which would bargain with the representatives of the workers in that industry. He advised this in preference to the Board of Conciliation.

In closing, he asked the meeting if, with a falling market and a surplus of labor, it was time to make drastic demands upon employers.

Federal Government Plans

During his address he outlined the projects of the federal government to relieve unemployment.

There will be a new customs house for Toronto which will cost $2,000,000. The work of demolishing old buildings will commence almost immediately, he was informed by Hon. Mr. Carvell prior to his departure from Ottawa.

There will be other large buildings and works proceeded with in the vicinity of Toronto. The plans had been prepared and tenders had been asked for so that the work could be proceeded with as soon as parliament passed the estimates, instead of following the old procedure of awaiting the passage of estimates before any action was taken.

The government's policy, so far as the Public Works Department is concerned, for the coming year is to confine work as nearly as possible to centres where there is likely to be much unemployment

"It is a matter of sincere regret that the civic authorities of Toronto are not more earnestly possessed with the necessity of taking advantage of the federal government's housing proposition," said Senator Robertson, as he reached the housing plans of the government.

"Improved highways are regarded as a good investment. The Federal government has committed itself to a substantial contribution to good roads, which will equal, if not exceed, $25,000,000."

Senator Robertson pointed out in connection with the shipbuilding industry that the government was spending the people's money, and that ships could be purchased more cheaply from the Mother Country than in Canada. But, with relief for the immediate future in mind, fourteen contracts had been let since the armistice, and "if I mistake not, a few more will be let, of which the city of Toronto will get its share."

In summarizing, he said that the work of the government would take care of 134,000 workers for six months at at average wage of $4 a day, and warned "that if you make too drastic demands, with a surplus of labor and a falling market, the result will be opposite to what you anticipate."

To questions, he said that the government was inserting fair-wage clauses in all contracts, and that there had been two instances in which contractors had been forced to live up to agreements since the signing of the armistice. Dr. W. A. Riddell, for the Ontario government, who was present, made a similar announcement.

The meeting left the decision on the campaign for the shorter work day and increases in wages to a committee. It will be commenced with a meeting in the near future, restricted to trades unionists, and a demonstration on behalf of the unemployed at the provincial parliament buildings when the legislature opens.

CANADA IN STRONG FINANCIAL POSITION

Financial operations of the Dominion government for the year will show for reduction of war expenditure the largest surplus of the war period. Revenues have been extraordinarily heavy. For the ten months of the fiscal year ending January 31 current revenues were over forty million dollars higher than in the corresponding period of the previous fiscal year.

During the ten months ending January 31, 1919, revenues and expenditure, less war expenditure, but including pensions, were:—

Current expenses	$161,866,658
Capital expenditure, less war	12,889,550
Total expenditure, less war	$174,736,208
Current revenue	$249,072,657
Total expenditure, less war	174,736,208
Surplus of current revenue over total expenditure less war	$74,336,449

War expenditure during ten months not included in above details amounted to $244,814,536. Up to the present, therefore, the surplus available for reduction of this war expenditure on capital account amounts to approximately 30 per cent. of the amount spent on the war during the same period, at once the largest surplus and the largest percentage of war expenditure of any war year. Pensions and interest on loans are included in current expenditure.

The various sources from which the revenues for the ten months have been derived are:—

Customs	$124,311,759
Excise	24,973,122
Post-office	16,600,000
Public works, including railways and canals	34,066,073
Miscellaneous	49,121,703
Total current revenue	$249,072,657

For the month of January alone total current revenue was $26,587,105, as compared with $17,881,384 in January, 1918. The total net debt now stands at $1,362,574,559, an increase during January of $32,345,661.

The big plant of Flax Spinners, Ltd., of Guelph, commenced operations on February 17th, and is producing wet-spun linen yarns.

War to Peace

Article No. 15
Cut out for reference

Use the Employment Offices!

THE biggest problem that Canada has to face in the coming months is the problem of employment.

The cessation of war-work, the demobilization of the fighting forces jointly mean that almost half-a-million workers will have to be reabsorbed into our commercial and industrial life. They will have to find new forms of employment.

IT is in Canada's best interests to ensure that this resettlement and readjustment takes place as speedily, smoothly and efficiently as possible.

The Employment Offices which the Provincial Governments are establishing, with the co-operation and assistance of the Dominion Government, are, therefore, not an experiment, but a national necessity. They will prove to be just as great a national asset to Canada as they have been to other countries.

Canada's Employment Offices will be 64 in number—a complete nation-wide chain from coast to coast. They are being located in all centres of 10,000 people and over—and wherever the need for them exists. More than one-half are already in operation.

Through these Government Employment Offices, all persons in need of employment, both male and female, soldier and war-worker, will be placed in touch with such positions as are available.

EVERY effort is being made to have these offices run according to uniform, business-like methods. Modern, up-to-date offices are being secured. The supervisor and interviewers in each office take care that an employer's particular needs are promptly filled. They endeavor to supply only such help as an employer can confidently take on—the right man for the right position. By doing this they effect an important economy of time and money for employers.

For the small employer of labor the Government Employment Office will serve as an employment manager. For the large concern which has its own employment manager, they will be of appreciable assistance.

Thus, from the standpoint of the service rendered, the Government Employment Offices will warrant the heartiest co-operation and support on the part of the employers of labor.

THE Dominion and Provincial Governments recognize that the whole success of the Employment Offices depends upon the degree to which employers give this co-operation and support.

Employers are, therefore, urged to do three important things:

(1) To seek first from the local Employment Office whatever class of help they may need.

(2) To fill out as completely as possible and mail promptly the postcard which will be sent each week to every concern of 25 or more employees, showing (a) the payroll of the previous week; (b) changes in staff and the nature of the occupations.

(3) To refer complaints and dissatisfaction promptly to the Provincial Superintendent of Labor or to the local Employment Office.

The London and Canadian Loan and Agency Company, Limited

FORTY-FIFTH ANNUAL MEETING

The Forty-fifth Annual General Meeting was held in the Company's Head Offices, 51 Yonge Street, Toronto, on Wednesday, February 12th, 1919, at 11 a.m.

The President, Mr. Thomas Long, occupied the chair, and the Secretary, Mr. William Wedd, jun., acted as Secretary of the meeting. Messrs. D'Arcy D. Grierson and W. Ridout Wadsworth were appointed scrutineers.

The Annual Report was unanimously adopted, and also the statements for the year ending 31st December, 1918, as presented by the Manager, Mr. V. B. Wadsworth. The report was as follows:—

The Directors have pleasure in submitting to the Shareholders the 45th Annual Report of the Company and the Statement of Accounts for the year ending 31st December, 1918, the result being as follows:—

The gross revenue, including the balance ($21,907.15) brought forward from last year, amounted to	$363,496.81
And, after deducting the cost of management; interest on Debentures, Dominion, Provincial and Municipal Taxes (including War Tax) and other charges, amounting in all to....	188,515.78
There remains a net profit of	$174,981.03
Out of which four quarterly dividends have been paid at the rate of 8 per cent. per annum, amounting to	100,000.00
Leaving a balance of	$ 74,981.03

Of which $50,000 has been transferred to the Company's "Rest Account," and $24,981.03 is carried forward at the credit of "Revenue Account" to next year.

The Rest Account now amounts to $900,000, being 72 per cent. of the subscribed and fully paid-up Capital Stock of the Company.

During the year applications for loans on mortgages were accepted and renewed to the amount of $577,855 on real estate valued at $1,451,000.

The total assets of the Company are now $4,855,958.

The business of the past year proved satisfactory, and with few exceptions borrowers met their engagements promptly.

The Directors desire to acknowledge the continued valuable services of the Scottish Board and Agents.

The various Officers of the Company performed their duties faithfully and to the satisfaction of the Directors.

The books, accounts, vouchers and securities have been duly examined by the Auditors, and their certificate of audit is hereto appended.

THOMAS LONG,
President.

Toronto, January 22nd, 1919.

The Shareholders adopted a resolution confirming the Patriotic and Benevolent Grants for 1918, amounting to $2,500.

The Auditors, Lieut.-Col. James George, F.C.A. (Can.), and Mr. Rutherford Williamson, C.A., were reappointed.

The following gentlemen were elected Directors for the ensuing year:—Thomas Long, C. S. Gzowski, A. H. Campbell, C. C. Dalton, Goldwin Larratt Smith, Colin M. Black, W.S., and W. C. Noxon.

At a subsequent meeting of the newly-elected Board Mr. Thomas Long was elected President, and Mr. C. S. Gzowski, Vice-President.

ANNUAL MEETING OF

The Montreal City and District Savings Bank

SEVENTY-SECOND ANNUAL REPORT

To the Shareholders. MONTREAL, February 10th, 1919.

Gentlemen:

Your Directors have pleasure in presenting the Seventy-second Annual Report of the affairs of the Bank and the result of its operations for the year ending December 31st, 1918.

The net profits for the year were $234,642.18, and the balance brought forward from last year's Profit and Loss Account was $214,023.56, making a total of $448,665.74. From this amount have been paid four quarterly dividends to our Shareholders and $14,000 has been contributed to the Red Cross and other Patriotic and philanthropic Funds, leaving a balance at the credit of Profit and Loss Account of $243,942.90 to be carried forward to next year.

Your Directors have to record, with sincere regret, the death of their colleague, HONORABLE SIR EVARISTE LE BLANC, Lieutenant-Governor of the Province of Quebec, which occurred on the 18th October last. Although only recently appointed, Sir Evariste brought to the service of the Board a clear business sense, a sound judgment and the prestige of a brilliant reputation.

The vacancy on the Board has been filled by the appointment of Mr. Zéphirin Hébert.

As usual, a frequent and thorough inspection of the books and assets of the Bank has been made during the year.

The report of the Auditors and the Balance Sheet are herewith submitted.

R. DANDURAND, *President.*

Auditors' Report

Having obtained all the information and explanations we have required, and having satisfied ourselves of the correctness of the Cash Balances, and examined the Securities held against the Money at Call and Short Notice, and those representing the investments of the Bank, and having examined the foregoing Balance Sheet and compared it with the Books at the Head Office, and with the Certified Returns from the Branches, we are of opinion that the transactions of the Bank have been within its powers, and that the Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Bank's affairs as shown by the Books of the Bank.

A. CINQ-MARS, C.A.,
C. A. SHANNON, L.I.A., } *Auditors.*

Correct. J. G. STEELE, Comptroller-General.

Auditor's Report

To the Honourable, The Provincial Treasurer of Manitoba, Winnipeg, Manitoba. 29th January, [illegible]

Sir:

In accordance with Order-in-Council No. 24740, by virtue of which I am appointed Auditor of the Accounts of the Comptroller-General of the Province of Manitoba, I beg to report that I have conducted a periodical audit of the Books and Accounts of the Comptroller-General for the [illegible] ending 30th November, 1918, and hereby certify that the attached Balance Sheets, (Capital, Current, Deferred and Trust) [illegible] at that date.

The Accounting work of the Comptroller-General's Department, involving the verification by the respective auditors appointed for that purpose of all receipts and disbursements, and the correlating of the whole transactions in the Comptroller's Books, continue to be carried [illegible] as in the previous years.

There have been produced for our inspection the Securities representing the Investments, and these were found to be in order. The Cash in [illegible] was verified by Certificates obtained from the Bankers.

I further beg to certify that in my opinion the attached Combined Balance Sheet is properly drawn up so as to [illegible] financial position of the Province as at 30th November, 1918, as shown from the Books of the Comptroller-General.

I have the honour to be, Sir, your obedient Servant,

JOHN SCOTT, Chartered Accountant.

THE WESTERN EMPIRE LIFE ASSURANCE COMPANY

HEAD OFFICE ∴ WINNIPEG

WILLIAM SMITH,
President and Managing Director.

F. C. O'BRIEN,
Secretary-Treasurer.

The essential soundness of the Company is evidenced by the substantial progress made during the last five years. The figures are from the Company's statement at the beginning of the year in which the war commenced, and at the end of the last year of the war.

	January 1, 1914.	December 31, 1918
Assets	$ 256,173.70	**$ 410,415.46**
Insurance in Force	1,971,200.00	**3,801,063.00**
Policy Reserves	34,742.00	**190,091.00**
Government Deposits	5,000.00	**144,399.00**
Premiums Received, Less Reinsurance	29,712.60	**82,274.67**
Interest Income	6,856.86	**17,765.29**
Payment to Policyholders	1,035.10	**20,442.68**

The Company is open to contract with men for positions of district managers at several western points. Liberal agency contracts and good territory available to men who are ambitious to build for the future, and who can furnish good references.

THIRTY-FIFTH ANNUAL REPORT OF THE

Portage La Prairie Farmers' Mutual Fire Insurance Company

January 1st 1918, to December 31st, 1918.

OFFICERS—**President, Wm. Fulton; Vice-President, E. H. Mule; Inspector and Valuator, T. H. Lamont; Manager and Secretary, Stratton Whitaker**

DIRECTORS—**William Fulton, E. H. Mule, M. G. Tidsbury, A. T. Smith, Jas. Mackenzie, P. D. McArthur, Jos. W. Yuill.**

DIRECTORS' REPORT

The Directors have pleasure in submitting herewith their 35th Annual Report, showing statement of the Receipts and Expenditures of the Company as at the 31st December, 1918, together with the Assets, Liabilities and Summary of Business for the year ending on that date.

NEW BUSINESS—During the year applications were received and policies were issued for $17,700,449.00, being an increase over the year 1917 of $6,049,574.00. This increase exceeds that of any previous year, thus maintaining the progressive record of the Company.

BUSINESS IN FORCE—The total insurance in force now amounts to $43,933,766.00.

THE ASSETS—The Assets of the Company show an increase of $148,422.67 for the year and now amount to $789,496.98.

INVESTMENTS—The Company made a further investment in Dominion War Loans of $20,000.00, bringing the total amount invested in War Loans to $50,000.00. The investment was deemed advisable not only from a patriotic stand, but also from a business point of view, as on account of the tremendous amount of insurance in force it was essential to increase our cash assets; then again, the additional receipts from the interest helped to offset the general expense.

LOSS CLAIMS—Claims have been paid during the past year amounting to $68,477.72, being a decrease of $17,670.35. Although the loss claims are still high we consider that the decrease is partially due to careful Inspecting and Adjusting.

FINANCIAL STATEMENT FOR YEAR 1918

RECEIPTS

Balance in Bank, Dec. 31, 1917	$ 68,032.72
1918 Assessment	128,575.45
Prior Assessment	13,964.80

Expenses	42,453.51
Grant to President and War Bonus to Staff	1,141.50
Refund of Premiums	103.80
Re Insurance	470.80
Treasurer's Bond and Insurance on Building	110.50
Balance in Bank	74,777.81
	$216,446.47

ASSETS

Balance of Premium Notes, Dec. 31, 1918	$636,755.90
Cash in Bank	74,777.81
Dominion War Loan	50,000.00
1918 Assessment Unpaid	15,346.74
Office Building Site and Furniture	12,616.53
	$ 789,496.98

LIABILITIES

Reserve for Cash Premiums Paid in Advance	$4,447.95
	$4,447.95

SUMMARY OF 1918 BUSINESS

Premium Notes Assessed Oct. 1, 1918		$822,412.55
17½% of same		143,922.19
Collected as per Receipts	$128,575.45	
Outstanding Dec. 31, 1918	15,346.74	
		143,922.19

Insurance Written during 1918	$17,700,449.00
Increase for the Year 1918	6,049,575.00
Total Amount of Business in Force	43,933,761.00

The Security Life
Insurance Company of Canada

Synopsis of Annual Report for the year ending December 31st, 1918, presented at the recent Annual Meeting of the Company.

	Increase over 1917.	
New Insurance issued ...	$ 560,750	10%
Total Insurance in force	1,658,458	20%
Gross Receipts from Premiums and Interest	52,184	18%
Total Cash Receipts	82,837	42%
Amount paid for Death Claims and Surrender Values	26,804	220%
Total Expenses of Management..	32,705	½%
Balance Receipts over all Disbursements carried to Investment Account	23,327	66%
Reserves for Policyholders' protection, including full provision for special policy guarantees.	106,254	32%
Gross Assets as per Balance Sheet, less amount due on Victory Bonds	153,161	19%

Although the Net Premium and Interest Income for the year was $10,353.74 greater than the previous year, the expenses of management only increased $189.64, being $8,135.53 less than in 1916 and $15,716.54 less than in 1915.

The Investments in Government and Municipal Bonds and Debentures amounted to $118,036, being 79% of the Total Assets.

The Death Claims during 1918 were, owing to the Influenza Epidemic, very heavy, being for a total of $52,350, of which, $1,000 was a War Claim, $46,200 from Influenza and $5,150 from usual causes. In connection with these Claims, the Company had Re-Insurance of $22,000, leaving a net Death Loss for the year, of $30,350.

The five Directors whose term of office expired this year, Sir Henry M. Pellatt and Messrs. Victor Morin, B. F. Ackerman, T. J. Dillon and J. F. Brown, were all re-elected.

The complete report giving all details will be furnished to Shareholders, Policyholders and any others desiring it.

The Company decided, following the termination of the war, to push more vigorously for business during 1919. The New Business applied for in the month of January was in excess of that for the first quarter of 1918. Month by month the increasing popularity of the "All Guaranteed Policies," which this Company issues exclusively, is evident. A good contract for the insured, and an easy contract for the agent to sell. Agents wanted.

CANADA TO BE REPRESENTED AT LYONS FAIR

Preparations are now well advanced for adequate representation of Canada at the Lyons fair, which opens on March 1, and lasts for fifteen days. This is the trade fair organized early in the war to supplant the great fair formerly held at Leipzig, which latter was always largely attended, and at which sales to the extent of hundreds of millions of dollars were made.

For the coming fair, the Dominion government, through the department of Trade and Commerce, has made extensive arrangements, and exhibits of the various products of Canada will be made in a considerable scale.

Though this is not in strict conformity with the plan of the fair, which aims at grouping exhibits by class, the Canadian authorities have succeeded in having all exhibits from the Dominion massed in a group, thus securing a much more impressive showing than would otherwise be possible.

The government itself is making sample exhibits of agricultural, fishing, mining and forestry products. The three great Canadian railway systems will also be represented by attractive exhibits. In addition to these others will be some seventy booths which will be occupied by Canadian producers, or their representatives, with samples of goods and catalogues. Interpreters will be provided to facilitate the exchange of business.

Adjoining the exhibits there will be a continuous cinema display, in a large hall of Canadian views, including scenery, methods of transportation, agricultural, mining, fishing and forestry operations, and display of natural resources, particularly the water powers.

The Lyons fair is not so much an exhibition as an agency for selling goods and bringing buyers and sellers together, and is therefore being much watched by manufacturers, who will, without doubt, reap a rich harvest in consequence.

BRITISH COLUMBIA LAND SETTLEMENT PLAN

Attitude of Provincial Government Towards Private Holders is Criticized by United States Investor

An open letter of protest has been addressed to the British Columbia government by Mr. Lysle I. Abbott, of Omaha, Nebraska, with reference to the 1918 act to amend the "Land Settlement and Development Act of 1917." Mr. Abbott represents United States investors who hold considerable areas of land in British Columbia, and is himself the owner of property of this kind.

The amending act referred to was assented to on April 23rd, 1918. Among its provisions is one empowering the Land Settlement Board to purchase, either by agreement or by the exercise of compulsory powers, lands from private holders. When the board wishes to develop a section of the province the act provides that it may establish a "settlement area" in any part of the province, the boundaries of which area may be altered from time to time. The board is to appraise all the lands within a settlement area "at such value as the board considers the property would be taken in payment of a just debt from a solvent debtor." The owner is then notified of this value, and unless he irrevocably agrees that the board may sell the land at this value at any time within two years after the date of the notice, and thereafter until he has given notification that he withdraws the land from sale, he is to be required to make and execute improvements such as the board may prescribe. In case the appraised value is not satisfactory to the owner, however, he may file with the board a return, stating what sum he considers to be the true value of the land, and the board may purchase it from him at any time within the two years at this price. If this "owner's value" is higher than the appraised value, it shall be used for purpose of assessment. In case the owner refuses to execute improvements, the land is to be taxed each year, in addition to all other taxes, an extra 5 per cent. of its appraised value or of the owner's value, whichever is the greater.

In criticizing this act, Mr. Abbott describes the case of the investors whom he represents. "In 1907," he says, "I purchased quite a tract of land in what was then known as the Nechako valley in central British Columbia. I was one of a number of people from this community who purchased at that time. We paid $4.50 an acre for this land, four hundred miles from transportation, because we had faith in the future of the country, and at that time also in the integrity of the government. You, yourselves, had so little faith in this locality at that time that you were selling the land to anybody without any settlement conditions whatever for $1 per acre, and evidently thought you were putting something across on the purchasers when you let them have it at that price.

No Transportation

"When we bought our land there was a written contract between the Grand Trunk Pacific Railway and your government under which the railway was to be completed through the Nechako valley by a certain fixed time, which, as I now recall, was about three years later than the date of our purchase. I intended to put this land into cultivation at the earliest possible time, which could under no circumstances be before it was served by rail, and had a right to suppose that your contract would be observed. It was not, however, and the railroad was not actually carrying passengers through this valley until in the fall of 1914, after the war broke out. I suppose we ought to be penalized for not at once putting settlers upon land in which you had no faith, and from which you withheld all transportation for at least four years after the time you had contracted to furnish it. During all the time up to the breaking out of the war about the only thing you did to assist us in making our land productive was to levy taxes at 4 per cent. of the valuation and to have expert agriculturalists write long essays on the prevalence of 'summer frosts.' I never pick up any literature issued by your government without seeing in retrospect the large army of croakers that used to infest the prairie country and deliver monologues on the subject of 'summer frosts.'"

Mr. Abbott then describes the method in which the act was passed through the legislature, and maintains that a sufficient opportunity was not given to receive the opinion of the landowners. After stating that he received advice, however, that his own holdings were not affected, he says:—

Lands Appraised

"The next communication received from this extremely fair and impartial board come under registered mail, and consisted of a notice that our lands, for which we had paid $4.50 an acre eleven years ago last March, upon which we had paid taxes for several years at 4 per cent. and for several more years at 5 per cent., had been assessed at the extremely fair and impartial value of about $5 an acre on an average. This statesmanlike notice advised us that unless we should 'irrevocably' agree that the board might buy our land from us at the appraised value at any time within two years from the date of the notice, that we should be required to make improvements amounting to $12.50 per acre, and to maintain such improvements 'to the satisfaction of this board.' At this very date a large land company operating at Vanderhoof was selling its lands at $15 to $25 per acre, and the government was asking $10, all cash, for its public lands.

"Get this clearly in your mind. Our land is appraised at about $5 an acre. It costs us about $11. If we do not want to sell it for $5, we must put improvements amounting to $12.50 per acre upon it. To save $5 from confiscation by an Imperial government we have got to throw away $12.50 more.

"Of course, if we do not want to do this under the terms of this extremely fair and impartial notice, we can tell the government that our land is worth $11, because it cost us that, in which event we can have the 'irrevocable' pleasure of paying taxes at the rate of 10 per cent. a year upon what we think it is worth, or, to be a little more concrete, $1.10 per acre per year."

He also refers to a speech delivered by the Hon. T. D. Pattullo in September, 1918, in which he said:—

"We have already outlined two development areas in central British Columbia, one at Telkwa and one at Vanderhoof, so it cannot be said politics are entering our plan, for this riding has an Opposition member and a development area, while my own constituency of Prince Rupert has a cabinet minister and no settlement area. Under this measure we practically confiscate unused land that is held for solely speculative purposes. An additional penalty tax of 5 per cent. is placed on land withheld from sale, besides which the land will be assessed at the valuation put upon it by the holder who refuses to sell at the price it is valued at by the board."

HAMILTON PROVIDENT LOAN SOCIETY

The earnings of this company for the year 1918 were $312,272, as compared with $313,843 in 1917. The principal expenditures compared with last year were as follows:—

	1917.	1918.
General expenses of management, commissions, etc.	$ 43,115	$ 48,420
Interest on deposits, debentures and debenture stock	93,460	94,787
Dividends (at 8 per cent.), taxes, etc.	104,786	104,217
Transferred to reserve	70,000	64,846

The company's reserve fund is now $1,200,000, in addition to which there is a small contingent fund. Savings deposits fell off considerably during the year, as did also the amount of currency debentures outstanding. On the other hand the sterling debentures outstanding increased. The assets statement shows an increased net value of mortgages, but the amount of cash on hand and in banks has declined from $400,462 to $220,764.

CENSUS OF PRODUCTION

Remarkable Development of Manufactures of Canada—Capital Investments by Industries

THE Dominion Bureau of Statistics has completed its census of the manufactures of Canada for the year 1917, and the preliminary totals are now available. The returns cover 34,380 establishments and show a remarkable development in this branch of Canadian industry when compared with the census of 1915 as summarized in the following table:—

	1917.	1915.	Increase.
Capital invested	$2,772,517,680	$1,994,103,272	$ 778,414,408
Employees on salaries (No.) ..	73,598	52,683	20,915
Salaries paid ..	$ 95,983,506	$ 60,308,293	$ 35,675,213
Employees on wages (including piece-workers) (No.) ..	619,473	462,200	157,273
Wages paid ...	$ 457,245,456	$ 229,456,210	$ 227,789,246
Cost of materials	1,602,820,631	802,133,862	800,686,769
Value of products	3,015,506,869	1,407,137,140	1,608,369,729

Materials and Products

The gross value of goods made in Canada in 1917 amounted to $3,015,506,869, and the cost of materials was $1,602,820,631, leaving a net value added by the process of manufacture of $1,412,686,238, or $5,449,098 more than the gross value of production in 1915. The twenty leading industries with the gross and net values of their production are given below in order of precedence:—

	Gross value.	Net value.
Flour and grist mill products	$224,191,735	$40,604,799
Steel furnaces and rolling mills	170,679,000	62,040,044
Slaughtering and meat packing ...	153,279,252	36,082,497
Log products	115,884,905	75,159,877
Munitions	112,866,838	70,240,235
Pulp and paper	96,340,324	61,627,462
Butter and cheese	85,731,339	13,719,662
Cars and car works	78,564,527	39,884,077
Bread, biscuits and confectionery ..	77,223,581	33,022,111
Sugar, refined	73,329,260	20,149,349
Smelting	69,262,673	33,591,253
Foundry and machine shop products	66,945,483	43,322,382
Iron and steel products	58,797,766	26,777,534
Building and contracting	54,668,255	32,927,335
Automobiles	54,466,273	18,880,453
Slaughtering, not including meat-packing	53,441,466	14,771,901
Boots and shoes	49,170,062	22,389,519
Electric light and power	44,536,848	44,536,848
Leather, tanned, curried and finished	41,117,128	14,492,651
Electric apparatus and supplies ...	40,204,245	20,046,238

The totals of the twenty leading industries in gross and net value of production were $1,720,700,960 and $724,266,227 and they represent respectively 57 per cent. and 51 per cent. of the grand totals for the Dominion.

The total capital invested in Canadian industrial plants in 1917 was $2,772,517,680, of which (a) land, buildings and fixtures amounted to $998,351,070, (b) machinery and tools to $567,262,538, (c) materials on hand, stocks in process, finished products, fuel and miscellaneous supplies to $745,546,310 and (d) cash, accounts and bills receivable to $461,357,762.

The amount of capital invested in the leading industries was (1) electric light ad power $356,004,168, (2) pulp and paper $186,787,405, (3) log products $149,266,019, (4) cars and car works $98,274,585, (5) steel furnaces and rolling mills $91,894,777, (6) flour and grist mill products $72,573,982, (7) agricultural implements $70,493,801 (8) foundry and machine shop products $69,915,032, (9) car repair shops $68,763,298, (10) slaughtering and meat packing $68,145,347.

MANITOBA'S WORKMEN'S COMPENSATION IN 1918

Total compensation awarded in 1918 under the Workmen's Compensation Act in Manitoba amounted to $408,817.10, according to the report of the board laid upon the table of the House at a recent sitting of the legislature. Of this, $138,438.94 was paid for temporary disability and medical benefits; $118,764.94 was awarded to provide pensions in cases of permanent disability, and $151,613.22 was awarded to provide pensions in cases of fatal accidents. Of the total of 2,695 accident cases reported to the board, 1,756 have been compensatable. In 44 cases there have been lump settlements; 31 awards for pensions in cases of permanent disability, partial and total, and 24 awards of pensions in fatal cases.

The report points out that the figures include compensation awarded against employers who have not complied with the regulations of the act, the Canadian Northern Railway and allied companies, including the Winnipeg Joint Terminals.

In 1917 the premiums paid by employers and the premiums chargeable to self-insurers amounted to $449,430.60, 7½ per cent. of this going towards the board's administration fund. The administration expenses for that year were $31,129.60, or 6.9 per cent. of the total premiums, being, the board points out, decimal six under the incomes provided by the act.

The advanced premiums collected for 1918, based on the estimated pay rolls for 1918, amounted to the following: Premiums paid to insurance companies, $195,960.09; premiums chargeable to self-insurers, $263,885; total, $459,845.09. The contributions to the board's administration expenses for 1918 were $39,318.35.

QUEBEC PROVINCE WILL REVISE TAXATION

Important amendments to the taxation law of Quebec province were indicated by the provincial treasurer, Hon. Walter G. Mitchell, before the private bills committee of the Quebec legislature recently. This was in connection with the request of the city of Lachine for exemption from paying to the government of the province any tax or license for the motor vehicles belonging to it and used for municipal purposes. They also asked for authorization to levy on owners of motor vehicles plying the trade of carter or contractor for transportation in the municipality the business taxes and license which are imposed on all persons carrying on that kind of business.

In reply to these requests the provincial treasurer announced that the government had decided to amend the general law so as to provide for these amendments. This means that in future the municipalities will not only be able to collect for themselves all the taxes on owners of motor vehicles plying the trade of carter or contractor, for transportation within the municipality, but they will be exempted from paying to the provincial government any tax or license on motor vehicles used by the municipality for municipal purposes. A government bill providing for these amendments is now being prepared, and will be submitted to the legislature.

The government has also decided to amend the general law so as to allow each municipality to fix and collect what is known as the charity or amusement taxes. Hitherto the province has collected the tax, and it has been divided among the province's patriotic contributions and among the charitable organizations of the municipalities. In future, each municipality will be empowered to fix and collect this amusement tax for its own purposes.

Mayors, reeves and councillors of all the municipalities through which passes the Toronto-Hamilton highway met at Oakville, Ont., last week and passed a resolution asking the provincial government to take over and maintain the Toronto-Hamilton highway on the same basis as all other provincial highways

BRITISH COLUMBIA TO HAVE SURPLUS

Estimates for Financial Year and Nine Months' Figures Indicate Good Financial Position

THE financial year of the province of British Columbia does not end until March 31st, but a statement for the nine months ended December 31st, 1918, has been prepared by the comptroller-general of the province and was presented to the legislature recently. This is the first time that such a report has been made.

On the nine months' operations, the report shows, revenue was $9,242,295.44, and expenditures $8,223,001.35, or a surplus for the period of $1,019,294.09. The last time a statement showing a surplus was made, was for the fiscal year of 1910-11.

In presenting the report to the House, Hon. Mr. Hart, minister of finance, expressed his pleasure at being able to bring down figures showing the satisfactory condition of public finances. The figures, he said, spoke for themselves and proved eloquent testimony to the success with which the government is handling the financial affairs of the province. He believed he might be excused if he felt considerable personal pride in the record, and he pointed to the fact that by the careful economy and management of its finances the government had in mind the need for greater outlays for public works to provide returned men with occupation.

The statement of revenue for the nine months is as follows, the estimates approved last year for the whole fiscal year ending March 31, 1919, being also given:—

Revenue.

	Nine months.	Year's estimate.
Department of agriculture	$ 42,971.14	$ 29,340
Department, attorney-general	456,397.91	514,360

INSURANCE COMPANIES PROTEST TO MANITOBA

Treasurer, However, Upholds Proposal That Taxation of Insurance Companies be Increased

A DEPUTATION of insurance men of Manitoba waited on the Law Amendments Committee of the Provincial House on Tuesday, February 11th, and asked that the province refrain from passing any further legislation to tax insurance companies. Speaking on behalf of the insurance firms, M. D. Grant, actuary for the Sovereign Life Assurance Co., declared that although the business written by the insurance companies of Canada during the past four years had been unparalleled, they have made little or no profits and have paid their shareholders no dividends since the beginning of the war. Mr. Grant declared that insurance companies should be exempt from taxation, in the course of his address.

The clause which the insurance companies take objection to is: "That every insurance company which transacts business in the province shall annually pay a tax of 2 per cent., calculated on gross premiums received by the company in respect of the business transacted in the province during the preceding year."

This act would provide for the taxation of all companies whose head office is not in Winnipeg. At present, the taxation of such companies is not as heavy as those who have their head office there. Mr. Grant declared that the matter of the taxation of insurance companies should be laid over for investigation by the taxation committee.

Treasurer's Reply

Hon. Edward Brown upheld the action of the government in taxing the insurance companies. He said: "I think the whole idea of the insurance company is to be of service to the public as well as to make money. It is not up to us to stop taxing the insurance companies, but we would be glad to enter into a conference with any other province in an effort to thrash out the matter. A flat rate is the only equitable method. The small companies should pay an equal sum on basis of business as the larger firms."

The present taxes on premium income of life insurance companies in this province are as follows:—

Gross premium income less than $50,000, 1 per cent.; gross premium income $50,000, but less than $100,000, 1¼ per cent.; gross premium income $100,000, but less than $150,000, 1½ per cent.; gross premium income $150,000, but less than $200,000, 1¾ per cent.; gross premium income $200,000, 2 per cent.

MERCANTILE TRUST COMPANY

The Mercantile Trust Co. of Canada held its annual meeting in Hamilton on February 10th. A report was submitted to the shareholders, indicating that the earnings were larger than in any previous year.

The net profits for the year, after providing for all general expenses of management, war taxes, provincial and municipal taxes, and all other charges, amounted to $49,481.40; the balance at the credit of profit and loss at the beginning of the year was $32,786.81; the premium received from the sale of the company's stock during the year amounted to $205, making available for distribution $82,473.21.

The amount transferred to the reserve fund was $28,935, and this item now stands at $100,000.

The special reserve for possible depreciation of assets has been increased to, and now stands at, $10,000, which, in the opinion of the directors, makes ample provision for that purpose.

The balance sheet shows that the total assets in the hands of the company amounted, at the end of the twelve months, to $5,625,722.06, being an increase over the preceding year of $237,492.83.

MANITOBA IN SOUND FINANCIAL POSITION

Statement Shows Revenue Surplus of $322,867—Tax Administration Proved Unsatisfactory

IN presenting his annual budget before the Manitoba legislature last week, the Hon. Edward Brown, provincial treasurer, said that the province had been able to close the year with a balance on the right side of $322,867. The actual expenditure of $7,308,680 had been $262,525 less than estimated. The actual receipts, amounting to $7,631,548.35, fell short of the estimated revenue by $23,799, the estimate being $7,655,347: the succession duties yielded $102,500 less, the public amusements tax $90,000 less, and the provincial levy $125,000 less than had been estimated, while automobile licenses include $36,000 and telephone rentals $118,000.

"The sum of $80,000 for sinking fund of the net debt provided in last year's estimates has not been paid out," said the treasurer. "The money should have been remitted to New York, and would have been but for the high price of exchange between the two countries. Also, the item of $50,000 for the telephone department, being the first instalment of a refund covering the amount of approximately $200,000 which the late government took from the telephones by way of cash surpluses, was not paid. It has been decided to defer this refund until a more convenient season.

"The total cash in hand at the end of the fiscal year for all purposes amounted to $3,382,571, and the capital investments to $4,341,621, making a total of $7,724,192 for cash and capital. While the cash balances for the year had decreased by $480,000, the capital investment had increased by almost two millions, showing a net gain for the year of $1,357,340.

Tax Administration Unsatisfactory

"At the last session of the House we provided for three new forms of revenue. First, by means of a tax on amusements; the act did not come into force until April 1st, and two months' revenue was lost owing to the 'flu' epidemic. For these various reasons the results have been somewhat disappointing, the revenue received from this source being only $135,000.

"Secondly, we imposed a tax on unoccupied lands. The main principle of this act was to increase production, and we are of the opinion that it accomplished something in this direction. The administration of the act has not been of a very satisfactory character, owing to differences of opinion as to what was meant by 'bona-fide farmer,' and as to what land was unfit for cultivation. It is proposed to hold an enquiry in the spring in certain municipalities, and, wherever it is made clear that there has been a contravention of the act, a refund will be made. A number of amendments tending to clarify the meaning of the act will be proposed to the House at this session. The revenue produced from this source was $150,000.

"Thirdly, there was a tax imposed by way of a direct levy on all the rateable property of the province. This was estimated to produce new revenue of $750,000, but owing to the reduction in the equalized assessment of the province this tax produced only $680,000."

Mr. Brown reported the sale of one half million dollars' worth of Farm Lands Association's bonds to the Dominion government at par. Manitoba's gross debt is $33,900,000, of which $19,300,000 is revenue bearing. Since the Norris government has been in power $6,560,000 has been added to the provincial debt. Total assets of the province aggregate $74,000,000.

According to a later announcement by the treasurer, the Manitoba Government will spend $98,000,000 this year, exclusive of capital account. Of this amount $2,000,000 will go for improved highways. The Federal government will supply half the amount.

Winnipeg's civil income tax will go into effect next autumn. It is estimated to yield two million dollars. Bachelors and widowers will pay on everything over $500 and married men on over $1,000.

SASKATCHEWAN LOOKING FORWARD TO PROSPEROUS YEAR

With the Spring Will Come Industrial Activity on the Prairies

SASKATCHEWAN is looking forward to a big year in industry. Builders and those engaged in construction work generally are only waiting until the frost gets out of the ground in order that they may get at it. The announcements made by the railways alone assure a great deal of activity, and, on top of this, comes large appropriations from the provincial government for new construction work. All this is in addition to what municipalities and private business enterprises will do.

A great deal of that portion of the $60,000,000 which the Canadian National Railways proposes to spend on extension and betterments this year will be spent in this province. The Goose Lake line, which runs from Saskatoon to Calgary, will receive much attention; indeed, the first steps in the double-tracking of it will be taken. Steel will probably be laid on a couple of hundred miles of extensions, for which the roadbed was prepared some time ago.

$6,000,000 for Public Works

Some idea of what the provincial government proposes to do may be seen in the fact that at the recent session of the legislature fully $6,000,000 were voted for new public works. Indeed, the government felt justified in increasing the provincial debt by this amount, or nearly 25 per cent. over what it now is, in order to provide the necessary funds for these undertakings. In a sense the government had to do this, public works having remained practically at a standstill for fully five years.

In the new appropriations are $1,400,000 for highways, $1,200,000 for telephones, $2,000,000 as a loan to the Farm Loan Board, $250,000 for a new normal school, $155,000 on a new mental hospital, $100,000 as the first vote on a provincial war museum, $150,000 for new university buildings, and a like amount for new court houses.

These projected buildings would alone be sufficient to stimulate building operations, but they are only a few of the many things to be undertaken. The province will receive $2,000,000 from the Dominion housing scheme, which should also help considerably. Then the Canadian Pacific Railway has much new building work in prospect. Indeed, it will probably do as much, if not more, than any other corporation. Add to this what the municipalities and the farmers will do and it is easy to say that carpenters, bricklayers and masons will have all the work they can handle.

Crop Was Good

The official crop figures for 1918 show that, in spite of the disappointing wheat yield, Saskatchewan, in money values, was almost, if not wholly, up to that of 1917. The value of the wheat crop is placed finally at $193,309,534 and oats at $80,439,546. The total value of agricultural production, other than live stock, is given as $337,468,049, a decrease of nearly $29,000,000, as compared with 1917. To offset this, however, the value of live stock was $21,000,000 more than that of 1917, while dairy products showed an advance of $2,500,000. The total acreage under cultivation was 15,901,000, or an increase of 1,682,000 acres over that of 1917. It was this 16 per cent. increase that saved the situation.

The increase in the value of live stock is one of the most satisfactory of indications. In this department Saskatchewan is making excellent progress. The decision of the provincial government to assist this industry by locating stock yards at various points should also help considerably. Already it has been decided to build one at Moose Jaw and the other at Prince Albert. The P. Burns Co. of Calgary, is also expected to build at Regina. In this way the province is being delivered from the dangers that attend dependence on one crop. The more industries Saskatchewan develops, the better off and more contented will it be.

NEW INCORPORATIONS

Canadian Fishing and Transport Company—Commercial Credit Company of Canada

THE following is a list of companies incorporated during last week, with the authorized capital and the names of the provisional directors:—

Peterboro, Ont.—Peterboro Bread Co., Ltd., $40,000; W. Vale, E. C. Sydney, W. G. Campbell.

Trenton, Ont.—Trenton Dairy Co., Ltd., $45,000; F. L. Valleau, W. H. Finkle, M. Valleau.

Ottawa, Ont.—The Chats Falls Navigation Co., Ltd.; W. J. Graham, O. Martin, L. G. Roy.

Galt, Ont.—Preston and Schwartz, Ltd., $40,000; W. M. Preston, I. Schwartz, G. W. Webster.

Coaticook, Que.—E. P. Dupuis and Fils, Ltd., $48,000; E. P. Dupuis, S. E. Dupuis, D. D. Bachand.

Quebec, Que.—The Ungava Products Co., Ltd., $150,000; E. L. Jannie, A. L. Campbell, W. Hallick.

Toronto, Ont.—Canadian Fishing and Transport Co., Ltd., $1,500,000; A. L. Reid, W. W. Perry, C. H. C. Leggott. P. J. Dwyer Molybdenite, Ltd., $150,000; L. Adams, H. C. Secord, K. A. McRae. Richardson Cartage Co., Ltd., $40,000; F. Denton, E. M. Miller, M. Sedge. Toronto Specialty Manufacturing Co., Ltd., $40,000; W. B. H. Standing, J. E. Knox, M.B., F. J. Livingston. Canadian Optical Co., Ltd., $150,000; S. B. Michael, E. Deuber, T. E. Willan. J. B. Millar Coal and Cartage Co., Ltd., $40,000; J. B. Millar, R. O. Petman, E. W. Wright. Commercial Credit Co. of Canada, Ltd., $1,000,000; E. C. Dawe, T. E. Smith, A. Pickles. National Burners, Ltd., $100,000; W. G. Edwards, M. Summers, E. J. Swift.

Montreal, Que.—Thornton Davidson and Co., Ltd., $100,000; A. H. Elder, F. W. Hackett, B. Hodgson. Canadian Kraft, Ltd., $100,000; F. B. Common, F. G. Bush, G. R. Drenman. Fireless Cooker Co., of Canada, Ltd., $100,000; F. E. Ault, A. Ellis, R. Macdonald. International Button Co., Ltd., $100,000; W. C. Thompson, N. C. Bellew, M. Lawlor. R. Percy Sims, Ltd., $20,000; J. A. Hutcheson, A. M. E. Massey, R. P. Sims. Shannon Fisheries, Ltd., $45,000; R. Shennan, G. V. Cousins, E. W. Westover. Henri Peladeau, Ltd., $99,000; H. Peladeau, A. Gingras, L. de Gouzague. La Compagnie de Publication de la Minerve, $50,000; G. A. Fauteux, J. A. Nadeau, L. M. Cornellier. Montreal Ice Cream Cone Co., Ltd., $40,000; C. Holdstock, E. Duckett, Y. Ducharme. Morrow Motor Service, Ltd., $10,000; J. Morrow, J. T. Parker, J. M. Parker. Standard Broom and Brush, Ltd., $45,000; P. Guilmette, J. A. Guilmette, C. Guilmette. Sterling Printing Service, Ltd., $50,000; L. Macfarlane, W. B. Scott, J. A. Mathewson. Films de Luxe, Incor., $95,000; J. Renaud, A. Prefontaine, C. Prefontaine. Liberty Shoe Co., Ltd., $25,000; F. X. Chatelle, P. Morel, C. A. Lefebvre.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first two weeks in February, 1919:—

Canadian Pacific Railway.

	1918.	1919.	Inc. or dec
February 7	$2,096,000	$2,579,000	+ $483,000
February 14	2,306,000	2,883,000	+ 577,000

Grand Trunk Railway.

February 7	$ 480,714	$ 905,449	+ $424,735
February 14	531,316	947,889	+ 416,573

Canadian National Railway.

February 7	$1,003,473	$1,436,757	+ $433,284
February 14	1,147,484	1,545,442	+ 397,958

STANDARD BANK ASSETS INCREASE

The annual statement of the Standard Bank of Canada, for the year ended January 31st, 1919, shows growth and expansion during the year 1918. Profits for the year at $697,443 represented an increase of $47,897. Probably the most important feature of the statement is the increase in assets, and the generally improved position of the bank. The total assets of the Standard are now $83,656,865, being an increase of nearly $10,000,000 as compared with the preceding year. The increase in the savings deposits of the bank is nearly double the gain made in 1917, thus showing the largest advance in this particular in the history of the bank. Deposits at the end of 1918 totalled $65,969,558, the increase representing almost $8,000,000 in the twelve months. An evidence of the part the bank is playing in the development of Canadian industry and in its relations with the business community generally is shown by an advance in current loans of nearly $6,000,000 to $45,593,854 The notes of the bank in circulation also show a very healthy increase of over $1,200,000. The quick assets stand at over $36,000,000, of which $16,000,000 is cash, as compared with quick assets a year ago of $32,348,775.

The principal items of the profit and loss account, with comparisons, are as follows:—

Profit and Loss,

	1919.	1918.	1917.
Balance from previous year	$175,215	$153,593	$ 61,646
Profits	697,443	649,546	580,230
Premium on new stock	46,710	120,047	332,242
Totals	$919,369	$923,187	$975,119
Dividends	453,892	442,782	398,899
Officers' fund	20,000	20,000	20,000
Patriotic funds	36,600	31,250	38,900
War tax	34,839	33,891	30,483
To reserve fund, premium on new stock	46,710	120,047	332,242
Written off bank premises	100,000	100,000	....
Carried forward	227,326	175,215	153,593

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended February 13, 1919, compared with the same week last year:—

	Week ended Feb. 13, '19.	Week ended Feb. 16, '18.		Change
Montreal	$ 90,309,209	$ 61,066,430	+	$29,242,779
Toronto	77,954,464	43,124,838	+	34,829,626
Winnipeg	31,018,941	36,382,301	—	5,363,360

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Township of Chatham, Ont.—Messrs. Brent, Noxon and Co., of Toronto, have purchased $19,000 6 per cent. 20-instalment bonds.

South Colchester Township, Ont.—Messrs. Brent, Noxon and Co., of Toronto, have purchased $4,000 6 per cent. 10-instalment bonds.

Cobden, Ont.—Messrs. W. L. McKinnon and Co., of Toronto, have been awarded a block of $5,500 6 per cent. 30-instalment debentures.

Montreal, Que.—The city council has adopted a by-law providing for a loan of $8,000,000 in anticipation of the collection of revenue for the civic year 1919.

Saskatchewan.—The following is a list of debentures reported sold from February 3rd to February 8th, 1919:—

Rural Telephone Companies.—Iron Springs, $400; Nay and James. East Yorkton, $15,000; Harris, Read and Co. South Gravelburg, $850, Kincora, $700, Banbury, $500; W. L. McKinnon and Co. Zangwill, $1,100; Goldman and Co. Naseby, $600; Wood, Gundy and Co.

School Districts.—*Borderland, $2,800; C. M. Gripton, St. Catharines. Dixmude, $2,900, Acadia, $2,900, South Porcupine, $1,600; Waterman-Waterbury Manufacturing Co. Freeland, $2,600; Harris, Read and Co.

---

*Sold by the Local Government Board.

The following is a list of authorizations granted by the Local Government Board from February 3rd to February 8th, 1919:—

School District.—Foxdale, $200 10-years not ex. 8 per cent. annuity.

Rural Telephone Companies.—Spion Kopp, $2,200 10-years not ex. 8 per cent. annuity. Lewiswyn, $700 15-years not ex. 7½ per cent. annuity. Richlea, $31,600 15-years not ex. 7 per cent. annuity.

New Brunswick.—At the time of the sale of bonds of the province only the names of a few leading bidders were available. Now the comptroller-general has given out the following list of tenders, which is complete:—

A. E. Ames and J. M. Robinson and Sons	100.35
Hew R. Wood Co.	100.279
Geo. A. Stimson and Co	100.273
Sterling Bank of Canada, Toronto	99.80
Brent, Noxon and Co.	99.762
Eastern Securities Co.	99.612
Canada Bond Corporation, Ltd.	99.415
Dominion Securities Corporation	99.385
R. A. Daly and Co.	99.376
Wood, Gundy and Co.	99.37
Osler and Hammond, Toronto	99.251
F. B. McCurdy and Co., St. John	99.25
National City Co., Ltd.	99.13

Harris, Forbes and Co.	99.127
Housser, Wood and Co.	99.07
Foster, Barrett, Riepert and Low, Ltd., Montreal	99.03
C. Meredith and Co., Ltd.	99.03
McDonagh, Somers and Co., Toronto	99.03
W. L. McKinnon and Co.	98.953
Campbell, Thompson and Co., Toronto	98.91
Municipal Debenture Corporation, Quebec	98.74
McNeill and Young	98.53
Alfred Hawes, Washington	98.03
Hanson Brothers	97.03

Messrs. W. A. Dyment and Co., is the name of a new investment house opening in Toronto. The offices of the company will be in the Royal Bank Building.

HIGHER TAX RATE FOR BRANTFORD

The estimates committee of the Brantford City Council held a meeting this week for a preliminary discussion on the tax-rate for 1919. No announcement was made as to the progress made, but from figures presented, some large increases from various boards will have to be provided for. The board of education requires $142,000, an increase of $22,000 over last year, police $6,000 increase, board of works and fire committee also heavy increases. That the present rate of 30½ mills will be raised was the only prediction which any of the aldermen cared to make.

MONTREAL TRAMWAYS AND POWER BONDS

An issue of $7,300,000 five-year 6½ per cent. secured gold bonds of the Montreal Tramways and Power Co. is being offered by a syndicate of Toronto and Montreal bond dealers. The bonds are in denominations of $100, $500 and $1,000 and the price is par and accrued interest. This company controls by stock ownership the Montreal Tramways Co. The Canadian Light and Power Co., the Montreal Hydro-Electric Co., the Saraguay Electric and Power Co., and the St. Paul Electric Co. This issue of bonds is secured by pledge with the Montreal Trust Co. by $7,000,000 fully paid 5 per cent. debenture stock of the Montreal Tramways Co., and of $2,500,000 five-year 6 per cent. bonds of the Montreal Tramways and Power Co., Ltd.

PENTICTON FINANCES

During the year 1918 the district of Penticton, B.C., reduced its tax arrears on account of years up to and including 1917, from $55,757 to $18,670. Sixty per cent. of the 1918 taxes were paid, leaving arrears of $41,397, so that the total arrears are approximately the same as last year. A liability of $16,632, which was due to the bank at the end of 1907 has been paid off as well as all current loans.

Nearly $8,000 was added to the sinking fund, or slightly less than the amount required. The sinking fund is $31,500 in arrears, as against $28,000 a year ago. As stated in the report of the auditors, this is the most serious feature in the municipality's finances. As a consequence of this deficit, the sinking fund is not earning the interest it should, which increases the deficit from year to year.

Bond issues authorized in January, 1918, have not yet been issued, but this may be done in the near future.

ASBESTOS CORPORATION BUYING ITS OWN BONDS

The continued policy of the Asbestos Corporation in buying its own bonds, with purchases further backed by a liquid security like the war loans, has now attained large results.

When the company's last war loan subscription is paid up investment account will show total investments in excess of 50 per cent. of the outstanding issue of the company's own bonds. Beginning with 1915 the company bought at market prices $75,000 of its own bonds that year, $263,000 in 1916, $190,500 in 1917 and $174,100 in 1918, or a total of $702,600 to which is to be added $25,000 previously in the treasury. Approximately a quarter of the issue would appear to be back in the hands of the company, with the price paid representing something like a discount of 25 to 30 per cent. from par. The sinking fund of 1 per cent. went into operation last year and will be an added factor in the reduction of the amount of bonds in the hands of the public.

Two alternative policies suggest themselves. Either the company can extinguish its funded debt long before maturity, on favorable terms, leaving full equity in the property in the hands of the shareholders, or the bonds could be utilized as a means of financing desirable extensions to plant if an opportunity presented itself.

MURRAY'S INTEREST TABLES

It may interest readers of *The Monetary Times* to know that Mr. B. W. Murray, consulting accountant of the Supreme Court of Ontario, in his work of compiling what is known as "Murray's Interest Tables," so well and favorably known in the leading financial institutions throughout Canada, was called upon to make over two million distinct computations, all of which had to be done correctly; there was no room for error. The book contains 368 pages, and there are no less than 7,000 figures on each of them.

The story of how this interesting and useful book was steadily built up is interestingly told in a pamphlet which will be sent to all who may apply to Mr. B. W. Murray, consulting accountant, Supreme Court of Ontario, Osgoode Hall, Toronto.

WINDSOR BONDS

The National City Bond Co., of New York, secured the city of Windsor issue of debentures by the award made by the council on February 17th. The issue was for $115,270, divided into three classes. For a block amounting to $44,270, bearing 5½ per cent., and payable in ten instalments, the National City Co. offered $43,836 and accrued interest; for $25,000 6 per cent.'s, payable in 30 annual instalments, their offer was $25,937; for $46,000 6 per cent.'s, 20-instalments, the offer was $47,246. It is computed that the offer averages 101.51, and that the average rate of interest to be paid by Windsor will be about 5.66. In all 14 different tenders were received as follows:—

Tenderer.	$44,270.84. Local improvements.	$25,000. School.
National City Co.	$43,836.98	$25,937.50

BRITISH COLUMBIA BOND ISSUE

The province of British Columbia is calling for tenders up till March 3rd, 1919, for the purchase of an issue of $3,000,000 20-year 5½ per cent. gold bonds. Further particulars can be obtained from the advertisement on another page of this issue.

SELL ONTARIO BONDS IN UNITED STATES

The National City Co., Ltd., has announced that it has purchased $1,000,000 province of Ontario 4 per cent. bonds, due March 1st, 1926, and in association with Harris, Forbes and Co., the National City Co. will make a public offering of the bonds in the United States.

The bonds are not a new issue, but a block of an outstanding loan purchased privately by the National City Co. The presumption is that they have been acquired from a large institution, which is possibly shifting some of its investment funds from shorter term to longer term securities.

No offering of bonds will be made in Canada as the price would necessarily be considerably higher than the offering price at New York, due to the prevailing rate of exchange.

Continued buying of Canadian securities by American investors, buying that has assumed very considerable proportions in recent weeks, cannot fail to exert important influence on the exchange situation.

ROYAL SECURITIES RE-ENTERS TORONTO

Royal Securities Corporation, Limited, Montreal, announces the re-opening of its Toronto office at 58 King Street West, Toronto. This branch was closed some time ago owing to depletion of staff on account of the war.

The management of the new office will be in charge of Mr. W. P. Nellis, who has for a number of years been associated with the corporation's sales department, and who now assumes the position of branch manager. Mr. Allan G. Gill, who for the last four years has been in France as Major of the 45th Battery, Canadian Field Artillery, and who prior to going overseas was associated in Toronto with Murray, Mather and Co., assumes the branch secretaryship of the new Toronto office.

BANK BRANCH CHANGES

Branches of Canadian banks have been opened recently as follows:—

Rosemont, Ont.	Home Bank (sub-branch).
Walkers, Ont.	Home Bank (sub-branch).
Niagara Falls, Ont.	Dominion Bank.
Eldon, P.E.I.	Royal Bank of Canada.
Fort de France, Martinique, W.I.	Royal Bank of Canada.
Bloomfield Road, Halifax	Royal Bank of Canada.
Spy Hill, Sask.	Royal Bank of Canada.
Toronto, Ont. (Danforth and Carlaw Avenue)	Imperial Bank of Canada.
Toronto, Ont. (1246 St. Clair Avenue)	Imperial Bank of Canada.
Francis Colony (district of St. Lawrence)	Bank of Commerce.
Bury, Que.	Bank of Commerce.
Sedgewick, Alta.	Bank of Commerce.
Niagara-on-the-Lake, Ont.	Bank of Commerce.
Toronto, Ont. (Vaughan and Oakwood)	Bank of Commerce.
Toronto, Ont. (Greenwood and Woodbine Avenues)	Bank of Commerce.

The National Trust Company, Toronto, is asking for offerings of Harris Abattair Company first mortgage six per cent. fifteen year bonds for the sinking fund.

QUEBEC MUNICIPALITIES WILL PAY MORE

"The municipalities are going to pay more money into the Quebec Treasury than they have in the past." This was the conclusion that Arthur Sauve, the leader of the Conservative opposition, came to after he had heard the resolution proposed by the Hon. J. A. Tessier regarding the appointment of a provincial supervisor of roads. This provides that any work of construction, improvement, repair or maintenance on municipal roads or bridges may be performed under the direction of a supervisor appointed by the Minister of Roads, and that such officer shall not be subject to the control or superintendence of the municipal inspector nor to the control or superintendence of the road inspector for the district where the work is being done; and that he shall receive from the corporation the remuneration fixed by the Minister of Roads.

The British Columbia Permanent Loan Company

TWENTY-FIRST ANNUAL MEETING OF SHAREHOLDERS

The Twenty-first Annual Meeting of the Shareholders of The British Columbia Permanent Loan Company was held at the Head Office, 330 Pender Street West, Vancouver, B.C., on Wednesday, February 12th, at 3 p.m.

The President, Dr. D. H. Wilson, occupied the Chair, and the Secretary-Treasurer, Mr. James Low, acted as Secretary of the Meeting.

The Secretary read the Minutes of the last annual meeting and presented the Report of the Directors and the Financial Statements for the year.

The Profit and Loss Account showed that the total earnings, including a balance of $128,721.38 brought forward from 1917, amounted to $337,221.38. Accrued Interest Receivable, but not yet in hand, amounting to $71,067.25 was not appropriated into the Profit and Loss Statement. The Shareholders commended this practice.

After deducting all expenses of management, interest charges on borrowed funds, provincial and war taxes, taxes on properties held by the Company, and a contribution of $1,000.00 to the Canadian Patriotic Fund, amounting in all to $134,379.35, $202,902.63 remained. Out of this sum, $100,000.00 was credited to Reserve Fund, leaving a balance of $102,902.63. The Reserve Fund was charged with $158,853.79 to make provision for property and share loan depreciations. No dividend was declared on the business of the year—the Directors considering it advisable to continue their war policy of conserving the cash assets. The Permanent Capital is $923,290.95; Surplus $783,022.19, of which $600,000.00 is specifically apportioned to the Reserve Fund. Public Liabilities are $1,332,300.08, and Assets $3,069,205.03.

In addressing the Shareholders and moving the adoption of the Report, the President said in part, as follows:—

"At no period in the history of this Company have I addressed the Stockholders with a greater degree of confidence. The reason for this is the fact that after four and one-half years of most unstable financial conditions, I am able to assure you that your company never stood in a sounder position than at the present moment. We have not declared dividends for the latter three and one-half years of the war. Nevertheless, in no year of this trying period has your Company failed to earn sufficient to pay at least a moderate dividend, had your Directors not deemed it prudent to husband the resources of the Company during the trying conditions through which we have been, and are, passing.

"During the year we subscribed for $115,000.00 of Victory Bonds. While I am convinced this was wise finance at the present juncture, it was also the discharge of a patriotic duty.

"With the return of normal conditions, it may be the duty of your Directors, at a very early date, to consider the question of again loaning, at least, in a moderate degree.

"I do not wish to appear too optimistic or inspire unjustifiable hopes, but recollecting the result of the policy pursued by your Directors during the war, and realizing the war menace is passing, I feel justified in the hope that the business of 1919 and the improved conditions generally, may warrant your Directors in declaring a reasonable dividend on the business of the year."

Mr. W. H. Malkin, Vice-President of the Company, seconded the Motion to adopt the Report, and gave a review of the Company's history since its incorporation in the year 1898:

"Commencing in a very small way, the Company made wonderful progress, and I would like to remind the Shareholders of what it has really accomplished. I find that it has disbursed in dividends no less a sum than $560,000.00, which is equivalent to a dividend of 8½ per cent. per annum from 1898 to 1914,—sixteen years. Since dividends were discontinued after June, 1915, it has been the policy of the Directors to strengthen the Company by leaving the profits undistributed, and we have added to the surplus the sum of $178,000.00, which is equivalent to a gain of 5½% per annum. Never in its history has the Company been in such a strong position as it is to-day.

"The average amount of mortgages outstanding during the year was $2,003,000.00. The principal repaid was $286,628.00, or 14 per cent. of the average monthly amount on loan. The interest paid was $181,409.00, which represents 8.90 per cent. on the average amount outstanding. Our total income for the year 1918 is $3,603.00 over that of 1917."

After the General Manager, Mr. T. D. Macdonald, dealt with the Financial Statement in greater detail, and the Shareholders present had endorsed the policy of Directors, the motion to adopt the Report as passed unanimously.

The election of Directors resulted as follows: Messrs. Dr. D. H. Wilson, W. H. Malkin, C. Spencer, Geo. Martin, A. H. Douglas, R. J. Robertson, R. Gelletly.

Messrs. Buttar & Chiene, C.A. (Edin.), and Messrs. Price, Waterhouse & Co., C.A. (London, Eng.), were re-elected auditors for the ensuing year.

At a subsequent meeting held by the Board, Dr. D. H. Wilson was elected President, and Mr. W. H. Malkin, Vice-President.

The following appointments were made:—T. D. Macdonald, General Manager; James Low, Secretary-Treasurer; Albert Whittaker, Inspector; Messrs. Harris, Bull & Mason, Solicitors; Bank of Montreal, Bankers.

EQUITABLE LIFE PROGRESS

The statement of the Equitable Life Assurance Society of the United States gives evidence of the company's continued progress. Increases are shown in outstanding insurance, new insurance, payments to policyholders and assets. Group insurance for employees increased to the extent of $80,000,000 during the year. Of $27,799,000 distributed in death claims, $5,200,000 was directly due to the influenza epidemic. Monthly life income insurance and insurance to cover inheritance taxes showed marked increases. The society recently entered the accident and health field.

DEBENTURES FOR SALE

$3,000,000

PROVINCE OF BRITISH COLUMBIA

20-YEAR 5½% GOLD BONDS

Sealed tenders endorsed "Tenders for the Province of British Columbia Bonds," addressed to the undersigned at the Parliament Buildings, Victoria, B.C., for the purchase of three million dollars ($3,000,000) 20-year sinking fund gold bonds of the above province to be dated March 5th, 1919, bearing interest at the rate of 5½% per annum, payable half-yearly on the 5th day of September and 5th day of March. Principal and interest payable in gold at the Canadian Bank of Commerce, Victoria, B.C., Toronto, Ont., Montreal, Que., and at the agency of the Canadian Bank of Commerce, New York, U.S.A., at the option of the holder. Bonds to be in denominations of $1,000, $500 and $100, in amounts to suit the purchaser, with coupons attached, and may be registered as to principal only. Payment of bonds with accrued interest to date of payment to be made at the Canadian Bank of Commerce, Victoria, B.C. Full payment at Victoria, B.C., on delivery of interim securities. Interim securities will be supplied to be exchanged for definitive bonds on completion. Tenders to be addressed to Hon. John Hart, Minister of Finance, Parliament Buildings, Victoria, B.C., and delivered not later than noon on Monday the 3rd day of March 1919. Each tender must be accompanied by a marked cheque for $50,000.00. The cheque of the successful bidder to be retained and applied as part payment for the bonds, other cheques to be returned immediately. Alternative bids will be considered for bonds running for five years. The highest or any bid not necessarily accepted.

JOHN HART,

Minister of Finance for the Province of British Columbia

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Truro Steel Co.—Shareholders of the company, called together to consider a proposal to make a new issue of 8 per cent. five-year bonds for $60,000 and to retire $70,000 bonds on which 1 per cent. of the principal has been paid off, agreed unanimously against the proposal.

Adanac Mining Co.—At the annual meeting of the company this week a very satisfactory report was presented as to the operations at the mine. The company is now producing ore, as a result of the recent rich find at the 310-foot level. The future of Adanac is thought by many mining men to be very promising, now that it is on a producing basis. The treasury stock has all been subscribed, and all obligations have been met. Two new directors were elected, namely, Messrs. Alex. Fasken and C. L. Shirrell, of Buffalo. The other directors are Messrs. M. R. Cartright, Haileybury; R. A. Cartright and G. M. Campbell, of Ridgeway, Pa.

Dominion Power and Transmission Co.—At the annual meeting of the company it was announced that the 7 per cent. dividend on the preferred and 4 per cent. on the common stock will be continued. The earnings compare as follows:—

	1917.	1918.	Inc.
Gross earnings	$2,967,673	$3,204,644	$236,971
Operating expenses	1,733,759	2,044,467	310,708
Transferred to maintenance and renewal account	111,709	58,992	*52,717
Bond interest, etc.	395,585	436,912	41,327
Net earnings	$ 726,219	$ 664,271	$ 61,948

*Decrease.

Mackay Companies.—The company's net earnings of the land-line system alone for the year ending June 30th last were $4,230,824, or almost enough without the great revenues from the cable services to pay the dividends on Mackay shares, which amounted to $4,388,677, compared with $4,425,198 the previous year. The profit and loss account shows income from investment from other companies of $4,695,496, compared with $4,519,364 in the previous year. The balance sheet shows assets of $93,304,515, or almost the same as a year ago. The stock issued stands unchanged at $50,000,000 preferred and $41,380,400 common.

Mr. C. H. Mackay, president, stated that the company's revenues are quite adequate to care for such extensions as may be necessary. No increases in cable rates are expected to be necessary.

Consolidated Mining and Smelting Co. of Canada.—The company has completed its work on the main tunnel at the Sullivan mine. This tunnel is over two miles long and will accommodate two standard tracks. The cost of this undertaking alone approximates four million dollars.

The Sullivan group of mines is stated to be the richest silver-lead proposition in the world to-day. It is stated that there are practically inexhaustible stores of ore sufficient to last several hundreds of years at maximum production. Contracts will be let at once, it is said, for 100 modern cottages, which will be erected in the vicinity. Preparations are also under way for the erection of new buildings to treat the increased output of ore, immediately the 800-foot raise is completed. An output of about twenty cars a day is anticipated. By next spring the company expects to employ in the neighborhood of 1,000 men.

Provincial Paper Mills.—The report of the company for 1918, submitted at the annual meeting this week, showed a slight decrease in net profits, which were given as $404,142, as compared with $463,898 in 1917. After writing off $75,000 for depreciation, paying $119,000 as a 7 per cent. dividend on the preferred shares and $80,000 as a 4 per cent. dividend on the common, and making one or two other small appropriations, a surplus of $113,117 was left to carry forward, making the total surplus at the end of the year $852,406.

The balance sheet shows an increase of some $300,000 in assets, which total $5,882,874, as compared with $552,278 at the end of 1917.

Current assets total $1,162,184, compared with $911,744 a year ago, and consist of $96,099 cash, $101,368 bills receivable, $397,716 accounts receivable, $65,000 in government war bonds and $502,000 in investments

London Street Railway Co.—The gross earnings of the company for 1918 amounted to $456,355.91, as compared with $417,862.36 last year, an increase of $38,493.55, or 9.21 per cent. Operating expenses for 1918 amounted to $373,123.78, as compared with $331,094.35 last year, an increase of $42,029.43, or 12.70 per cent.

Net earnings from operation for 1918, before deducting interest on bonds and floating debt, taxes, etc., amounted to $83,232.13, as compared with $86,768.01 last year, a decrease of $3,535.88. The deductions from net earnings for 1918, consisting of interest on bonds and floating debt, taxes, etc., amounted to $38,733.19, as compared with $39,290.81, showing a decrease of $557.62.

Net income, before providing for depreciation for the year, amounted to $44,498.94, as compared with $47,477.20 last year, showing a decrease of $2,978.26. The net income for 1918, after provision for depreciation, amounts to $15,290.39, this amount being transferred to surplus account. The sum of $29,208.55 was charged against net income for depreciation of properties.

Underwood Typewriter Co.—The company reports net earnings of $2,130,846 for the year ended December 31st. This is equal to $23.67 a share on the $9,000,000 common stock, and compares to $22.38 a share earned in the previous year on $8,600,000 stock. The income account compares as follows:—

	1918.	1917.
Net earnings	$4,020,436	$3,162,225
Other income	210,317	109,745
Total income	$4,230,753	$3,271,970
Depreciation	200,071	244,405
Bonus	376,836	327,663
Federal taxes	1,250,000	500,000
Balance	$2,403,846	$2,199,902
Preferred dividends	273,000	274,750
Common dividends	973,500	944,500
Surplus	$1,157,346	$ 980,652

Trinidad Electric Co.—The earnings of the company for December, 1918, were as follows:—

	Gross.	Net.
Railroad	$13,601.96	$4,631.12
Light and power	11,342.67	3.364.69
Ice and refrigeration	3,490.98	734.06
Total net		$8,729.87

The earnings of the Demerara Electric Co., Ltd., for the same period were:—

	Gross.	Net.
Railroad	$7,719.54	$ 227.35
Light and power	9,703.86	5,063.99
Miscellaneous	......	184.04
Total net		$5,475.38

THE KEYSTONE OF THE ARCH

Nothing known in building is stronger than the arch—The symbol of the Mutual Principle in Life Insurance. The centre of the arch is the keystone—and "The Keystone of a Life Insurance Organization," says W. O. Chapman, "is management." The three leading constituents in good management are INTEGRITY, ECONOMY and EFFICIENCY. It is well known that the secret of the extraordinary success of the Mutual Life of Canada has been the rigid adherence of managers and directors through fifty years of history to these essential things. It is due to these that in spite of more than four years of devastating war, followed by a blighting pestilence, with the immense losses entailed, yet the strength of the Mutual Life of Canada is unshaken. The keystone ensures the solidity of the organization, and there is no other better qualified to defy the tooth of time than—

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

THE SECURITY OF THE HOME

is the bed-rock on which all true prosperity should be built.

There can be no real sense of well being without the certain assurance that the comfort of dependent ones is provided for, should the supporter of the home be removed.

A Life Insurance Policy gives this safe assurance. Under the Great-West Life Policies low premium rates apply, and all the advantages of liberal conditions and remarkably high profit returns to the Policyholders.

Let us explain the best plan for the protection of your home.

SECURITY LIFE INSURANCE COMPANY

The financial condition of this company has improved recently. When the present management became interested in the company in 1915 the expenses were $11,977 more than the income from premiums and interest. Since that time the business in force has been more than doubled and the expenses reduced until in 1918 the premium and interest income exceeded the expenses by $14,395. Detailed figures for the year 1918 appear elsewhere in this issue.

The steady progress of the business of the company is shown by the following figures:—

Insurance in Force.

GUARANTY TRUST ENTERS CANADA

The Guaranty Trust Co. of New York has joined with C. Meredith and Co., Limited, Montreal, bond dealers, in the forming of a new company to be jointly opened and managed with head office at Montreal. Application is being made for a charter.

It is understood that the new company will be called the United Bond and Securities Company, or something very similar, and will be capitalized at $1,000,000. The directors of the new company will include the directors of C. Meredith and Co. together with the president and three vice-presidents of the Guaranty Trust of New York. The Montreal, Toronto, Winnipeg and London offices of C. Meredith and Co. will be absorbed by the new company.

The new company will be a Canadian concern, and will really take the place of the existing C. Meredith and Co., with the difference that it will be jointly controlled by the Guaranty Trust of New York, and will benefit by having the financial backing of the American company behind it. The Guaranty Trust is capitalized at $20,000,000 and had surplus and undivided profits on December 31st, 1916, of $25,775,618.

STANDARD TRUSTS COMPANY

The sixteenth annual report of this company for the year 1918 states that the expenses of management, etc., were $93,785, which together with a balance brought forward from the previous year, made a total available for distribution of $120,943. During the year the company increased its capital stock from $750,000 to $1,000,000, and a 25 per cent. premium was charged on the stock sold which brought in an additional $62,500. This, together with part of the profits earned, was set aside for reserve, the reserve fund being increased from $500,000 to $600,000. Dividends at 9 per cent. per annum were paid and a small balance of $5,640 was carried forward. The company's position is, therefore, much stronger as a result of the year's business, for while the profit and loss account has been reduced by over $20,000, the reserve has been increased by $100,000, partly out of profits and partly from the premium on stock sold.

The company's guarantee investments have increased from $658,897 to $735,848; estates in trust administration, however, have dropped off from $10,200,000 to about $9,000,000, and clients' funds handled on ordinary agency terms, have decreased by $400,000. Consequently the total assets show a decrease of $1,320,000. The amount of mortgages and foreclosed properties increased from $296,391 to $431,657.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Belleville, Ont.—February 17—The Belleville Bottling Works were damaged. Estimated loss, $1,000, covered by insurance.

Halifax, N.S.—February 3—The premises of D. W. Kennedy, dry goods, 84 Granville Street, were damaged. The following companies are interested. On stock, Aetna, $3,000; Home, $3,000; North America, $1,000; Law Union, $5,000; Fidelity-Phenix, $1,000; Hudson Bay, $6,000; Imperial Underwriters, $2,000; Caledonian, $2,500; New York Underwriters, $2,000; Canada National, $2,000; Providence Washington, $4,000; Continental, $5,000; Liverpool and London and Globe, $1,500; Phœnix of London, $2,000; total, $40,000. On building, Hartford, $2,000; Acadia, $6,000; Liverpool and London and Globe, $2,000; Royal Exchange, $5,000; total, $15,000. Total loss about $50,000.

February 17—Tenement on Brunswick Street was destroyed. Loss unknown.

Hanover, Ont.—February 14—House of J. Hyitt was destroyed.

North Bay, Ont.—February 19—Building owned by the Rutherglen Milling and Mining Co. Estimated loss $15,000, with no insurance.

Ottawa, Ont.—February 12—Carriage establishment of Con. F. H. Plant, 109 Murray Street, was damaged. Estimated loss, $8,000, partially covered by insurance.

February 17—Manufacturing plant of Jos. Lecroix, 367 Clarence St., was damaged. Estimated loss, $5,000. Insurance carried, $3,000.

Paris, Ont.—February 19—Bank barn of T. Cassidy was destroyed. A large quantity of hay and straw was destroyed. Estimated loss, $2,500.

Port Stanley, Ont.—February 18—A. Short and Company's fish house was damaged. Caused by overheating of oil used for fishing corks. Estimated loss, $6,000.

Port Hope, Ont.—February 15—Barn and outbuildings on the farm of Wm. Nelson were destroyed. Fifteen cows, ten young cattle and four horses were burned. Loss unknown.

St. John, N.B.—February 12—The Court House on King Square was damaged. The municipality carried $10,000 insurance divided as follows: Norwich Union, $6,000; Queen, $2,000; Atlas, $1,000; Home, $1,000. In addition to this the city had $3,000 insurance on its interest in the building and $1,000 on the contents. These are schedule policies divided among practically all the companies.

Stratford, Ont.—February 15—Barn of T. Wilson, 605 Erin Street, was damaged. Estimated loss $400, with no insurance.

St. Catharines, Ont.—February 13—Home of Mrs. Carl was damaged. Estimated loss, $6,000, covered by insurance.

Toronto, Ont.—February 19—Premises of P. Kliman, in the old Y.M.C.A building, corner, Yonge and McGill Streets, were damaged. Estimated loss, $3,500.

Warsaw, Ont.—February 13—Barn and outbuildings on the farm of Henry Patterson, were destroyed. Estimated loss, $9,000. Insurance carried, $2,500.

Windsor, Ont.—February 14—Home of N. Zebesky was destroyed. Estimated loss, $2,000. One life lost.

February 19—The Windsor Steam Laundry was damaged. Caused by explosion of boiler. Estimated loss, $5,000.

West Vancouver, B.C.—February 10—House of Wm. Sully was destroyed. Caused by explosion of lamp. Loss fully covered by insurance.

Banking Results in 1918

Profits of Eleven Banks Reported so Far Show an Increase of $1,300,000 Compared With 1917—Business as Represented by Assets Shows Increase of $472,000,000 or 20 —Dividend Rates Have All Been Maintained and in Some Cases Increased

THE year 1918 witnessed an amazing expansion in most branches of the banking business but the increased expenses of management and the services which the banks provided for the government at less than cost prevented a corresponding increase in profits. All of the nineteen Canadian banks have not as yet reported their profits, as in some cases the financial year does not end until March or April. There are eleven, however, whose financial years have ended since October last and the profits of these are given in the statement below together with the profits for 1917.

Net Profits.

	1917	1918
Bank of Montreal	$ 2,477,969	$ 2,562,720
Bank of Nova Scotia	1,295,315	1,411,925
Bank of Toronto	802,920	844,402
Molsons Bank	615,514	712,485
Union Bank of Canada	763,463	824,174
Canadian Bank of Commerce	2,637,555	2,850,318
Royal Bank of Canada	2,327,979	2,809,846
Dominion Bank	1,005,062	1,086,498
Standard Bank of Canada	649,546	697,443
Banque d'Hochelaga	565,433	595,187
Bank of Ottawa	616,238	645,437
Totals	$13,756,994	$15,040,435

Every bank, it will be observed, shows an increase. The profits of the Bank of Montreal were about four per cent. higher; those of the Bank of Nova Scotia increased about nine per cent. and in the case of the other banks the increases were approximately as follows:—

Bank of Toronto, five per cent.; Molsons, 16 per cent.; Union, eight per cent.; Commerce, eight per cent.; Royal, 20 per cent.; Dominion, eight per cent.; Standard, eight per cent.; Hochelaga, six per cent.; Ottawa, six per cent.

The business, however, as indicated by the total assets as at December 31st, compared with December 31st, 1917, increased by $472,000,000 or over 20 per cent. The year 1917 saw an increase of $381,000,000 or somewhat less than 20 per cent.

Total Assets (as at December 31).

	1916	1917	1918
Montreal	$ 358,868,861	$ 396,475,789	$ 536,900,339
Nova Scotia	116,621,727	138,297,245	161,329,703
Toronto	71,968,283	83,604,059	94,357,645
Molsons	60,128,553	69,658,877	81,551,579
Nationale	32,782,802	40,738,027	46,576,480
Merchants	108,010,610	137,696,778	170,424,815
Provinciale	18,414,464	21,670,995	24,358,340
Union	107,775,773	142,497,372	141,694,937
Commerce	282,519,702	342,051,565	422,229,276
Royal	251,548,374	335,270,501	422,809,182
Dominion	$ 92,866,692	$ 109,436,145	$ 133,506,274
Hamilton	55,446,326	68,229,207	79,936,755
Standard	59,207,499	72,824,402	85,040,217
Hochelaga	42,389,049	51,932,373	57,893,560
Ottawa	56,249,223	63,855,289	67,696,341
Imperial	85,174,041	99,099,442	111,644,341
Home	21,030,353	23,369,194	28,270,766
Sterling	12,235,821	15,536,690	19,084,723
Weyburn	2,961,161	4,008,805	4,529,908
	$1,836,198,344	$2,217,252,755	$2,689,835,181

There was a constant demand for money throughout the year and interest rates were high, whereas the amount paid to depositors was the usual three per cent. The banks were called upon to assist many municipalities temporarily over the period during which the Victory Loan was floated, and also on account of extensive tax arrears in many cases.

The increase in bank profits has been followed by some raises in dividend rates. The Bank of Toronto some weeks ago increased its rate from 11 per cent. to 12 per cent. and now the Molsons Bank, which made a particularly good profit during the year, makes a similar increase in rate. The Bank of Nova Scotia whose profits were exceptionally good has also announced a 16 per cent. dividend basis in place of 14 per cent.

The Royal Bank, whose increase in profits was the greatest proportionally of all the Canadian banks, still remains upon a 12 per cent basis.

The following are the present dividend rates of all the Canadian banks:—

Dividends.

Bank of Montreal	10 + 2
Bank of Nova Scotia	16
Bank of Toronto	12
Molsons Bank	12
Banque Nationale	9
Merchants Bank of Canada	10
Banque Provinciale du Canada	7
Union Bank of Canada	8 + 1
Canadian Bank of Commerce	12
Royal Bank of Canada	12
Dominion Bank	12
Bank of Hamilton	12
Standard Bank of Canada	13
Banque d'Hochelaga	9
Bank of Ottawa	12
Imperial Bank of Canada	12
Home Bank of Canada	5
Sterling Bank of Canada	6
Weyburn Security Bank	5

BRITISH COLUMBIA'S NEW MUNICIPAL ACT

Bill Prepared for Submission to Legislature Provides for More Rigid Supervision of Municipalities

FOLLOWING upon the convention of British Columbia municipalities, which was held some weeks ago, and at which important resolutions were drawn up with reference to municipal government in the provinces, an act has been prepared under the direction of Mr. R. Baird, inspector of municipalities for British Columbia, regarding municipal government. The act provides that all of the municipalities of the province shall come under its jurisdiction and be supervised by a local government board which shall be appointed by the lieutenant-governor in council, and shall consist of three persons who shall hold office during the pleasure of the Crown. The position of inspector of municipalities will be maintained, and he shall also act as secretary of the board. The present methods of certification of money by-laws shall be maintained as at present.

The act goes on to describe the constitution and government of municipalities, extension and limits of same, disincorporation and governmental procedure of municipal councils whose duties and powers are variously abridged or extended according to best modern practice. The duties of municipal councils are minutely set out with powers and procedure definitely stated.

A new feature of the act calls for the creation of a board of control in municipalities having a population of 15,000 or more, consisting of the reeve or mayor and two controllers, elected by the municipality at large. The powers and duties of the board of control are specified and from a cursory examination of this part of the act the municipal council seems to have some control over this board of control, where it is acting in the opinion of the council against public interest. The powers of the municipal council, or in case the citizens choose to operate under the board of control, are specifically stated in close detail, commencing with the collection, appropriation, expenditure, management and accounting of municipal revenue and proceeding to section 120, being the power to regulate the position of roads and sidewalks to be constructed within the municipal area by and with the consent of local government board. With its powers, the municipal council may, by by-law, grant various aids, and deal with parks, ferries, highways, execution of judgment, epidemics, administration of justice, with coroners, fair wages, collections under distress act, poor, compensation to owners of properties, etc.

Municipal Finance

No municipal council shall have power to incur any liability beyond the amount of tne municipal revenue for the current year which at the time remains unexpended, nor may municipal moneys be expended without conforming to the formalities prescribed in the act. The council may borrow money without submitting the by-law to the electorate to meet and pay interest falling due and payable during the current year, to meet and invest any payment of sinking funds authorized to be raised or invested during the current year, to meet and pay any requisition for ordinary expenditure made by the board of school trustees, to meet and pay any other lawful expenditure during the current year provided that the by-law shall specify amount, rate of interest, debt within current year for payment of principal and interest, and that the total of liability so incurred shall not exceed the amount of taxes due at the end of the previous year and provided that the ascertained amount shall not be more than 75 per cent. of the whole levy in the next preceding year. All current municipal borrowings must be submitted to the local government board and receive its approval and authority. By-laws submitted to electors shall set out the amount of the debt intended to create, the terms and objects for which it is to be created, and the number of years it is to be in existence. The proposed obligation may be consolidated with other indebtedness and the authorization of the local government board must be obtained. The act calls for the treasurer keeping books of account which shall definitely set out in particulars the condition and state of every debt with account of sinking funds or instalments payable on principal.

Sinking Funds

In regard to sinking funds the act says:—

"The sinking funds of every municipality and all securities held on behalf of such sinking funds shall be by each municipality paid over to the local government board, who shall be trustees of such funds and securities, and shall have the right to maintain an action against any municipality to recover the amount due from the municipality in respect of such sinking funds.

"Pending investment, the local government board may deposit any moneys so coming into their possession in a chartered bank, and such deposit shall be made in the name of his Majesty in the right of his province of British Columbia, and such moneys deposited may be withdrawn on the order of the local government board by cheque signed by such persons as the lieutenant-governor in council may by order-in-council designate.

"The local government board may from time to time realize upon any securities held on behalf of such sinking funds, and may invest any moneys in its hands and the proceeds of the sale of any securities in such manner as the board, with the consent of the lieutenant-governor in council, may deem wise.

"All moneys and securities coming into the hands of the local government board as aforesaid, shall be deemed to be a debt due by his Majesty in the right of his province of British Columbia to the municipality, repayable on the tenth day before the maturity of the security for which said sinking fund is held or raised by the municipality.

"Interest shall be allowed on such sinking funds and securities compounded from time to time at such rate, not less than 4 per cent. per annum, as the lieutenant-governor in council shall from time to time fix."

The act continues to state that on January 31st in every year the treasurer of every municipality shall transmit to the local government board, a complete statement of the condition of the sinking funds. The financial powers of the municipalities are set out under trade licenses, general licenses, statute labor and commutations, and the manner of ascent of electors. The municipal council shall have power to assess for purpose of taxation railways and public utilities within the jurisdiction of the municipality and shall exempt from taxation churches, burying grounds, hospitals, orphan asylums, property of agricultural societies not exceeding five acres, municipal properties, crown properties and land and improvements by act of the legislature. The act provides for the method of valuation and assessment which is precisely drawn up and defined, appeals to courts of revision, operations of courts of revision and estimates of expenditures on or before November 20th in each year.

Taxation

In regard to taxation the act provides that municipal tax shall take precedence over every other claim against the property taxed. That it provides for method of collection and revision of taxes, and states that taxes shall be considered as in arrears when not paid for by December 31st of the following year. It also provides for percentage additions and specifies that on July 1st in each year the collector shall add to the current taxes 10 per cent. of the amount thereof and shall make a further addition on October 1st in each year of 5 per cent. The council is given the power to vary the dates but not the total amount of the addition which shall be 15 per cent. of the taxes imposed. The taxes on land and improvements, with percentages added, shall bear 8 per cent. interest per annum. The act further provides for pro rating of taxes on sub-divisions which have been cancelled, and on taxes of crown lands, the title of which inheres in the crown subject to agreements of sale which have defaulted.

The act provides the remedy for the non-payment of taxes and contains the right of action by the municipality in any court of competent jurisdiction against the owner. This is apart from recovery of arrears of taxes through tax sale. The act provides that, on September 30th in each year, the council shall offer for sale all parcels of land in arrears of taxes as provided in the act, and shall continue the sale until all properties so affected are disposed of. The upset price of the land so put up to tax sale shall include delinquent taxes on land and improvements, taxes in arrears, amount of interest due to date of sale, current year's taxes, and a 5 per cent. overriding charge with $5 charge to the land registry office. In case no bid is received equalling this price the municipality shall be declared the purchaser.

The act then goes on to describe the rights of the purchaser at tax sales in as precise a manner as will not admit of any clouds on titles so purchased. The owner of property sold under tax sales has one year from date of sale in which to redeem his property with payments of 8 per cent. interest thereon and further provides for actions against municipalities regarding illegalities or irregularities in tax sales.

The concluding feature of the act calls for the manner and method of special assessments and also provides for competent audit of the books of each municipality which must be completed not later than March 1st in each year and that such statement shall be sent to the inspector of municipalities under the act.

WANTS BONDS SOLD LOCALLY

For some time past an effort has been made to secure funds for the erection of an addition to the Regina public library, to cost between $10,000 and $15,000.

Chief Librarian Honeyman is recommending to the board that they confer with the city authorities with regard to the flotation of debentures to the extent of $10,000 or $15,000 for the purpose of providing the necessary accommodation. Mr. Honeyman suggests that he would like to see such an issue of debentures when authorized sold only in Regina and in denominations that would bring it within the reach of every wage earner. If this were done he expressed the opinion that the move would be a great success.

LACHINE REFUSED POWER TO BORROW

Much criticism was aimed at the application of the city of Lachine, Que., for power to borrow money when it came before the private bills committee of the provincial legislature recently. The sums asked were as follows:—

Eight thousand dollars to be exclusively employed in paving the public road known as St. Joseph Street in the western part of the city.

Fifteen thousand dollars to be exclusively employed in extending the waterworks and sewers in that portion of the territory of the city east of the track of Atlantic and North West Railway Co., operated by the Canadian Pacific Railway.

Forty thousand dollars to be exclusively employed in extinguishing the floating debt incurred through the acquisition of land for municipal purposes and for carrying out the works on the waterworks, sewerage and light system chargeable to the city's capital fund.

Hon. Walter G. Mitchell, provincial treasurer, led the fight against these borrowings, claiming that these matters should be submitted to the people. "No reason has been given us why they should not be submitted to the people," he declared. He pointed out that the city of Lachine could proceed according to the general law, but they could not come to the legislature and tell them that, as they could not get the people to vote, they must get the authorization of the legislature. In such a case, he advised that the legislature should not accept such a responsibility.

Mr. Francoeur, Liberal M.P.P. for Lotbiniere, suggested that the people of Lachine knew more about their local needs than the majority of the members of the legislature, who came from different parts of the province.

By an overwhelming vote the committee struck out the clause asking for borrowing powers.

WESTERN ASSURANCE COMPANY

The Western Assurance Company of Canada, in its report for the year 1918, shows a substantial profit on its fire business, but a loss of over $100,000 on its marine business. The net result, however, is a profit of over $250,000 directly from the business, in addition to which interest and rents brought in $181,963 and an increase in the market value of securities netted $121,660. The following are the principal results compared with last year:—

	1917.	1918.
Fire premiums . . .	$2,907,772	$3,213,537
Marine premiums . .	4,232,714	3,298,193
Interest and rents	133,989	181,963
Total income (including balance brought forward) . .	8,706,439	6,693,695
Fire losses, expenses, etc.	2,671,007	2,843,231
Marine losses, expenses, etc...	3,960,040	3,409,196
Total expenditure	6,631,047	6,252,427

The marine business has, it will be observed, fallen off considerably. Dividends totalling $70,000 were paid; $50,000 was set aside as against possible future depreciation in securities and $50,000 as an additional provision for taxes and for possible debts through the war. The assets have increased from $6,393,588 to $7,157,538, the amount invested in government bonds alone being $1,596,909. The balance carried forward into the 1919 account is $2,312,911, as compared with $1,920,911 brought forward from last year.

LONDON MUTUAL FIRE INSURANCE COMPANY

Although most of its business is in Ontario, and Ontario had more than its share of the heavy fire losses in Canada during 1918, the London Mutual Fire Insurance Co. is, nevertheless, able to report satisfactory results. The gross premiums amounted to $729,378, as compared with $702,359 for 1917. After deducting reinsurances, etc., the net premium income for the two years was respectively $398,247 and $371,353. Other income brought the totals to $415,597 and $383,076 respectively. The losses for 1918 were $254,213, compared with $181,781 the previous year. The expenses, as was pointed out by the president, Mr. A. H. C. Carson, have been maintained about stationary, in spite of increasing costs; in 1918 they were $157,363, and, after deducting certain amounts for depreciation, etc., the profit for the year was $1,476.

The balance sheet shows a total surplus to policyholders amounting to $320,145 and a reserve for reinsurance, in accordance with the government standard, amounting to $275,491. The current liabilities, including unadjusted fire losses, are quite small, totalling $44,055. The investments in bonds and debentures are given in detail in the company's report and the values are quite conservative. For instance, Dominion of Canada Victory Loan bonds, due 1937, which have a market value of about 103, are valued at par. Certain common stocks owned by the company have been eliminated from the statement of assets entirely in spite of the fact that they may have considerable value in the future. This is one of the oldest companies doing business in Canada and was originally incorporated in 1859 as a mutual company. Some time afterwards, however, it became a stock and mutual company. Its policy during recent years has been marked by prompt adjustments and loss payments, and by conservatism in placing its balance sheet in good condition by a lower valuation of assets; in fact, its securities have been written down to the total of $85,000 during the past five years, and a considerable portion of this may reasonably be expected to be recovered as the present movement in the direction of higher security prices continues.

Riot and civil commotion insurance is now being written by several companies in the United States and also to some extent in Canada. In some cases explosion clauses are also inserted.

PERSONAL NOTES

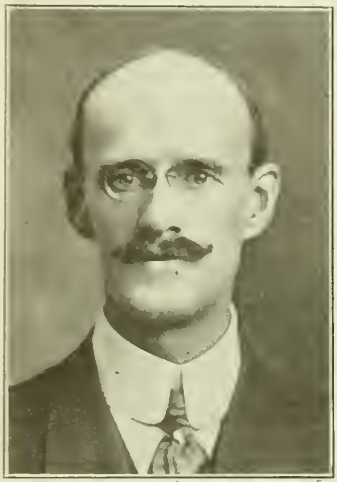
Mr. J. M. McIntyre has been elected a director of the Molsons Bank, to fill the vacancy caused by the death of Mr. George E. Drummond.

Dr. David Warnock, M.P., V.S., has been appointed Deputy Minister of Agriculture for British Columbia, recently rendered vacant by the retirement of W. E. Scott.

Mr. Herbert Lewis, general manager of the Union Assurance Society, and also the Palatine Insurance Company, both of London, England, spent a few days in Montreal last week.

Mr. J. J. Hughes, of Souris, formerly Federal Liberal member for King's, has been appointed provincial manager of the Provincial Bank of Canada, in Prince Edward Island, soon to be opened in Charlottetown.

Mr. John W. Ross, the new director of the Molsons Bank, is already connected with other Montreal institutions. He is a director of the Sun Life Assurance Company and of the Crown Trust Company.



Mr. Malcolm Stobie has been elected a member of the Toronto Stock Exchange. Mr. Stobie has for some time been connected with the firm of the late Cawthra Mulock and Co., and is well known in Canadian financial circles.

Mr. H. O. Leach, British Columbia manager of the Sun Life Assurance Company, has returned to his office, Rogers Building, Vancouver, after a visit to the head office of the Sun Life in Montreal, where there was a convention of agency managers.

Mr. Titus J. Carter, K.C., of Andover, N.B., has been appointed solicitor for the Department of Public Works, and has already arrived in Ottawa to take up his new duties. Mr. Carter has been for many years a well-known member of the New Brunswick Bar.

Mr. John Large, general manager and secretary of the Norwich Union Fire Insurance Society of Norwich, England, has retired. He has been appointed to a seat on the board. In succession to Mr. Large, the directors have appointed Mr. Ralph Yeo Sketch, the present assistant general manager.

Dr. G. C. Creelman, commissioner of Agriculture for Ontario, has resigned. The office of Assistant Commissioner is being discontinued, and Justus Miller, who has up to the present held the post, will under a new arrangement carry on the work to which he has been giving such a large share of his time during the past year or two.

Mr. Fred Colson, chief clerk and accountant of the Department of the Secretary of State of Canada, was some time ago anxious, on account of uncertain health and advancing years, to be relieved of the duties of office. His desire has now been granted, and an order-in-council placing him on the superannuation list has been passed.

Mr. Jos. H. Copeman, financial editor of The Montreal Gazette, has joined the firm of Greenshields and Company, members of the Montreal Stock Exchange. Mr. Copeman is a graduate of McGill University and was fourteen years on the staff of The Gazette, serving in various capacities in the news and editorial departments. For the past seven years he filled the position of financial editor.

Mr. D. E. Brown, head of the Brown Travel Bureau, Limited, Vancouver, is retiring from business on March 1st. He was for many years engaged in transportation work, going to Vancouver as freight agent for the Canadian Pacific at the opening of its through line to the coast. In 1895 he went to Hong Kong for the company and in 1909 returned to Vancouver to form the present business. The business will be continued by Mr. J. A. M. Faulds under the name of "Faulds Financial and Travel Bureau, Limited."

OBITUARIES

Mr. George Booth, one of Canada's oldest manufacturers, a founder of the Canadian National Exhibition, and the last member of the first Canadian National Exhibition Board, died on February 20th, in his eighty-second year.

Mr. Frederick Campbell Melfort Boulton, for many years a member of the Toronto Stock Exchange, died on February 16th, in his 69th year. Mr. Boulton was born and educated in Toronto.

Dr. J. J. Harty, president of the Canadian Locomotive Company, died in London of pneumonia. Dr. Harty left on January 29th, for England, his object being to secure orders, if possible, for his company.

Mr. James H. Alexander, for many years a vice-president of the Standard Oil Company, and a pioneer in the nation's oil industry, died on February 18th, at his home, Elizabeth, N.J. He was 84 years old, death being due to the infirmities of his advanced years. A native of Toronto, Canada, where he was born in 1834, he went to Pittsburgh in 1854, after he graduated at Knox College, Toronto. In Pittsburgh he began his business career with a firm of contracting engineers leaving them later to enter the oil business.

WOODS MANUFACTURING COMPANY, LIMITED

A profit of $842,200 for the year 1918 was obtained by the Woods Manufacturing Company, Limited, of Montreal, after providing for depreciation of plant and equipment The results as compared with the previous year are briefly as follows:—

	1917.	1918.
Profits ....$	770,816	$ 842,201
Interest, taxes and donations.	228,494	239,825
Dividends on preferred stock.	108,185	108,255
Dividends on common stock..	120,246	206,221
Transferred to reserve	....	200,000
Balance carried forward	1,003,539	1,091,439

The company was, it will be seen, able to make a substantial addition to the reserve fund and also to increase the surplus account. The total assets are now $9,358,113, an increase of over $4,300,000 compared with last year. This increase is represented by both current and capital assets as the company's property, equipment, etc., have been increased in amount. The capitalization remains the same as last year, but the current assets have increased from $1,156,786 to $3,344,970. The reserve fund is now $500,000, and the surplus over $1,000,000.

RECONSTRUCTION FACTORS

The housing schemes of the Dominion and of the Provincial governments can scarcely be called parts of a reconstruction program because they do not make a positive contribution to industrial activity. True it is, the Dominion government offers to loan $25,000,000 at five per cent. for the erection of houses in Canada, and the provinces are at liberty to supplement this total by such amounts as they see fit. Ontario has already announced a plan, and measures are to be introduced in the legislature within a few weeks. The other provinces will at least pass legislation to enable them to secure and administer their share of the Dominion funds.

This money is to come in the first instance from the proceeds of the 1918 Victory Loan and as it is already apparent that those proceeds will not meet with the 1919 requirements of the Dominion government the money for the housing scheme will in effect have to be raised by further borrowing on the part of the Dominion government. It amounts, therefore, to a transfer of funds from the pocket of the investor to the Dominion government, through a complicated organization in which the Dominion, provincial and municipal governments play a part, until the money is finally invested in a first claim upon farm, town and city dwellings throughout Canada. There is nothing constructive in this; the most that can be said of it is that it is a factor of reconstruction, and that it will probably attract more money into this industry than would otherwise be the case. Other industries, however, will be deprived of this capital so that the net result is not appreciable unless it can be demonstrated that there is some peculiar benefit to be derived from construction work of this kind. It also must be kept in mind that the organization of such an enterprise entails an expense to all the governments concerned quite apart from the financial risk which is involved to the municipalities, and in a more remote degree to the provinces. There is no provision either for the risk or for the expense and unless the funds can be borrowed by the Dominion or by the provinces at considerably less than five per cent., loss is sure to result. As an illustration of the fact that material risk is involved to municipalities, mention may be made of the fact that in the case of the widow or other dependents of a soldier, the advance can be made to the full cost of the house. Where such loans are made and are succeeded by a decline in the value of property, the surrender of the title by the owner would in many cases result. Where a proportional investment is made by a purchaser, however, there is less chance of loss on the part of municipalities but in any case the risk and the expense to which they are subject deprives the scheme of any advantage which might be obtained from a supply of money at five per cent. Money rates are moreover declining rapidly and the Dominion government may soon be able to borrow at less than five per cent. with proportionally lower rates for the province and municipalities. When this takes place the Dominion government will be under no expense, but on the other hand such a movement would be accompanied by a decrease in interest rates on first class mortgages so that the advantage of the five per cent money would be less.

Loaning companies have found a margin of one and a half per cent. necessary for the carrying on of the success of the business. It has been proposed that the money should be reloaned by a province to a loan company or a similar organization which would have the privilege of advancing it at six per cent. to builders. Mr. W. Gillespie, manager of the Toronto Mortgage Company, in speaking about this suggestion said that the margin of one per cent. was not sufficient. A similar opinion was expressed by another Toronto man familiar with loaning operations. "It looks to me," he said, "as if the government were using the taxes paid by the speculative builder to compete against him There is no person who will go into an investment of real estate of any kind where they are tied down to six per cent. During industrial activity houses may all be rented but when depression comes and the houses become empty where is the company going to be?" The fact seems to be that the principal difficulty in the way of building operations is the high cost of material and labor rather than scarcity of money. There must be a wider margin between the market value of improved property and the cost of the raw material which enter into building before which construction work will take place. Such reductions are already taking place and considerable building would take place quite apart from the assistance of such a government scheme. The difference between government money at five or six per cent. and private money at six and a half or seven per cent. is not sufficient to afford any real solution of the problem.

Toronto's housing commission, composed of some of the most reputable men in the city, reported some weeks ago against action of this kind. In spite of this fact, however, the city government has appointed a commission to proceed with operations. Municipalities throughout Canada should think seriously before taking such risks as are involved in the scheme, for extensive contingent liabilities, even if they do not result in loss, cannot fail to detract from municipal credit.

MORATORIA LEGISLATION

Some difficulty has been caused by the fact that most moratorium acts were to remain in force until a fixed period after the duration of the war because of the uncertainty as to whether this means the termination of hostilities or the conclusion of peace terms. With a view to removing this difficulty the British Columbia Government will, according to the address in reply to the speech from the throne, introduce new legislation. Mr. F. W. Anderson, the member for Kamloops, in moving the address said:—

"In connection with the present War Relief Act, the Moratorium Act and other acts extending relief to debtors generally, the date on which such laws will cease to become operative is very indefinite. The usual phrase which designates the time is 'during the continuance of the present war and for a period of six months thereafter.' In order not to cause confusion and financial obligations and burdens maturing suddenly without any notice, as would be the case were the Powers in conference to define, for instance, the date of signing of the armistice as the termination of the war, I wish to inform the House that it is the intention of this government to advance at the present session legislation through which to make a definite pronouncement that general moratorium relief, as at present existing, will be extended to a definite date which will permit the next session of the legislature to deal with this subject should such action be imperative."

In commenting upon this speech the British Columbia Financial Times points to the fact that undoubted hardships will be worked in certain cases no matter how soon or how long this class of legislation may be permitted to remain in force. It is extremely desirable that the relief statutes be repealed as speedily as possible now that the actual conditions of war are practically over as far as Canada is concerned.

FRANCE'S FINANCIAL POSITION

The enormous financial strain under which the French nation has been placed is shown in recent figures summarizing the present position. France's war expenses are expected to reach a total of 182,000,000,000 francs, with resources to meet it of 158,000,000,000 francs, showing a deficit of 24,000,000,000 francs. These resources comprises 18,000,000,000 francs from taxation, 54,000,000,000 from four war loans 20,000,000,000 francs advanced by the Bank of France, the product of short time treasury bonds together with advances made by the Allies and credits opened in foreign countries.

In addition to the 24,000,000,000 deficit there are exceptional expenses, compensation to civilians for war damage, which is placed in moderate estimates at 10,000,000,000 francs; the cost of exchanging the German mark currency of Alsace-Lorraine, 2,500,000,000 francs, the repayment of bonds issued in liberated regions, 1,500,000,000 francs; demobilization bonuses estimated at between 2,000,000,000 and 6,000,000,000 francs, together with other exceptional expenses which will bring the estimated total to 26,000,000,000 francs and make the total deficit 50,000,000,000 francs.

It is reckoned that the expenses for 1920 will be 18,500,000,000 francs, of which the existing budget can supply only 8,000,000,000.

CANADIAN SECURITIES IN THE UNITED KINGDOM

The recent cable to the effect that the British treasury has announced that the additional tax on interest and dividends from securities outside the United Kingdom, would lapse on April 5th has an important bearing upon the investment relations between Canada and the United Kingdom. This will mean that Canadian securities will again be placed upon a competitive basis with those of Great Britain and will not be subject to the special levy of two shillings in the pound as has been the case for some time past.

FOREIGN TRADE AND THE NATIONAL DEBT

That England's external indebtedness could be reduced only by profitable sales in foreign markets was the statement of Mr. F. C. Goodenough, chairman of Barclay's Bank, London, England, at the annual meeting of that institution recently. If this is true of England, which has long standing external investments to offset the credits which she has been forced to raise through war conditions, it is much more the case with Canada which has always been a debtor nation and the external obligations of which have increased substantially through borrowings for war purposes. What was more significant, however, was his reference to the fact that the foreign business itself will not redeem foreign obligations unless that business is profitable.

"We must as a nation," he said "have such profits that, besides buying what we require, we may have a margin for ourselves; and profits will provide, through taxation, the interest and sinking fund on our national debt.

"The wage-earner should realize the fundamental fact that as a nation we can only consume to the value of what we produce, and if production falls away, then there will be less to go round, with the consequence that each individual will not only live on a lower scale, but he will have to pay more for the things that he does obtain.

"Profits are, therefore, essential for they afford the basis of direct taxation, and it is only by maintaining profits at a reasonable level that the wage-earner can be largely exempt."

PROGRESS WITH LABOR EXCHANGES

The Dominion Government's system of labor exchanges throughout Canada has now extended to practically all provinces. In the case of the Maritime provinces the expense is borne by the Dominion Government because of the inability of the Maritime provinces to maintain the expense. Some of the provinces appear to be so confident of the success of the new organization that legislation is being considered to abolish private labor agencies. It has already been announced that the Ontario government will legislate to this effect at the present session. Nevertheless in spite of the fact that the government service is free of charge and has been extensively advertised, both in the news and in the advertising columns of the press, the private agencies are still effectively competing. It may be that this competition is only temporary until such time as the new organization becomes more thoroughly known. It would seem desirable, however, that the system should justify itself by competition without resorting to legislation of this kind. Considering the fact that it is financed entirely by the government and renders its service free of charge it should have no difficulty in superseding the older agencies.

Municipal shops are to be operated in Paris, France, for the sale of food stuffs by the city. The prices are to be fixed by the food minister. France has made many attempts at public operation of industry the vast majority of which have been unsuccessful.

LIFE UNDERWRITERS BOOST MEMBERSHIP

President of Canadian Association Tours Eastern Canada—Thirty-Eight Local Associations Will Have Membership Campaign

THE Executive Committee of the Life Underwriters' Association of Canada announces a membership campaign to be carried on simultaneously in the thirty-eight local life underwriters' associations in Canada and Newfoundland on Thursday, Friday and Saturday, March 27, 28, and 29, 1919. The purpose is to increase the scope and influence of the Association so that all life insurance men will be enrolled, receive the Life Underwriters News and become imbued with the Association spirit to the betterment of themselves and of the business. The campaign will be one of friendly rivalry with the country divided into sections.

The president of the Association, Mr. P. A. Wintemute, is just completing his tour of Eastern Canada. Mr. Wintemute is manager for Southern Alberta for the Manufacturers Life Insurance Company. He has addressed gatherings of life insurance men in practically all the cities of Eastern Canada giving a message of congratulation as to the results attained in the past and of encouragement as the future.

"It is interesting to note," he says, "that at the end of the year 1917 the business in force among the forty-five companies doing business in Canada amounted to $1,585,000,000. The combined assets of these companies totalled no less than $451,000,000, and there had been paid to policyholders and beneficiaries the immense sum of over $40,000,000. Think what this amount of money expended in Canada means to the social and economic life of the country! There is, moreover, no evidence of any abatement in this tremendous growth. On the contrary, the new business written last year (1918) exceeded $320,000,000."

Mr. Wintemute attributes this large increase in business to several things, first, the increasingly high calibre of the agent.

"It is a matter of general knowledge," he says, "that life insurance agents are, as a rule, among the most intelligent, competent and industrious men in any community, and they are working incessantly to make the public more fully acquainted with its various forms of protection.

"The public, too, are taking a greater interest than ever before in this important matter, and are anxious to learn all about the methods of protecting their families or their business from the result of an unexpected death.

"Life insurance itself is also broadening out, and we have now not only family protection, but business protection and guaranteed income policies. It is also likely that in the near future group insurance, covering large bodies of employees, will be introduced into this country."

In addressing a record attendance of the Toronto Association on February 26th, the president also paid a tribute to the excellent work of Mr. J. H. C. Graham, general secretary of the association, to whom much of the success of the movement is due.

STRATHCONA FIRE INSURANCE COMPANY

The annual statement of the Strathcona Fire Insurance Company, shows that the total premiums written (representing some nine years' growth) amount to $263,040.10, an increase of $23,816.05 over the sum reported for the preceding twelve months, and after deduction of cancellations and re-insurances, the net premiums amount to $167,220.14. Claims requirement of $69,822.41 was 41 per cent. of the premium receipts. The ratio for commission and expenses which came to $75,834.50, receded from 47.05 per cent. in 1917 to 45.05 per cent. The year's operations left a profit of $26,338.38, out of which $6,200.18 was transferred to the reserve for unexpired risks.

General trade with Turkey and Bulgaria is being resumed, according to a cablegram received by the Canadian Trade Commission in Ottawa.

FIRE PREVENTION NOW NATIONAL SCHEME

New Branch of Department of Insurance—Large Meeting in Ottawa in May

FOR the purpose of assisting in the work of fire prevention, the government will retain the services of Mr. J. Grove Smith, late of the Conservation Commission. Mr. Smith has been appointed to the staff of the Department of Insurance and will act in the capacity of Dominion fire prevention commissioner in co-operation with the provincial fire commissioners and fire marshals, and with the municipal authorities. During his period of service with the Conservation Commission, as fire prevention engineer, Mr. Smith investigated the fire waste of Canada and produced a report on the subject.

This appointment is in line with a recommendation of the Dominion Fire Prevention Committee, convened by the superintendent of insurance in December last, that the Dominion government should undertake a campaign of education and publicity in the interests of fire prevention. This committee, under the chairmanship of W. H. Shapley, of the Canadian Manufacturers' Association, Toronto, adopted many other important resolutions with a view to reducing fire waste, among which were resolutions favoring the greater use of sprinkler equipment in factories and other buildings; the better inspection of buildings and the reporting of dangerous risks; the use of signed applications for fire insurance and the amendment of the Criminal Code to penalize persons on whose premises fires occur through negligence or through violation of the law.

Convention to be Held in Ottawa

The committee, recently, through Mr. J. B. Laidlaw, of Toronto, extended an invitation to the National Fire Protection Association of the United States and Canada to hold its forthcoming annual meeting in Ottawa. This invitation has been accepted and delegates from all over the continent will meet in Ottawa on May 6th, 7th and 8th. The annual meetings of this important body have heretofore been held either in New York or Chicago, and the meeting this year in Ottawa, will, it is felt, give a decided impetus to the movement for fire prevention in Canada, in which so much interest is being taken at the present time.

The organizations represented on the Dominion Fire Prevention Committee are the following: The Canadian Manufacturers' Association, the Canadian Credit Men's Trust Association, the Canadian Fire Underwriters' Association, the Non-Tariff Insurance Companies, the Retail Merchants' Association of Canada, the Trades and Labor Congress of Canada, the United Farmers of Ontario, the United Farmers of Alberta, the Wholesale Grocers' Association, the Architectural Institute of Canada, the Canadian Bankers' Association, the Dominion Mortgage and Investments Association, the Fire Chiefs' Association and the Commission of Conservation.

DOMINION PERMANENT SHAREHOLDERS LIABLE

The official referee of the Dominion Permanent Loan liquidation has decided that the 117 shareholders who had partially paid-up stock subscriptions are liable for the portion of the stock that was to be paid for out of their profits. The amount involved in this decision is close to $60,000. Some time ago the referee held that shareholders in the company and those who had obtained stock by transfers from the Provincial and Dominion Loan Association were liable. The shareholders are, however, appealing.

The Molsons Bank of Canada has increased its dividend rate from eleven to twelve per cent., commencing with the quarterly payment on April 1st. It will be remembered that a few weeks ago the Bank of Toronto, which was also an eleven per cent. basis, increased its rate to twelve per cent. The Bank of Nova Scotia has increased its rate to sixteen per cent. recently.

CAUSING FIRES TO BE CRIMINAL

Over $33,000,000 Loss From 17,000 Fires in 1918—Drastic Legislation Should be Applied

At a luncheon given by the Fire Insurance Brokers' Association at the Windsor Hotel, Montreal, last week, representatives of all the leading fire insurance companies doing business in Montreal, were present. Methods of fire insurance and fire prevention, was the subject of addresses presented. Mr. Franklin H. Wentworth, secretary of the Boston Fire Prevention Association, gave a great deal of information as to the annual fire losses on this continent. He was followed by Mr. Grove Smith, Ottawa, representing the Dominion Conservation Commission, who gave an address on the amount of fire losses in Canada, and the necessity of using fire brigades not only to put out fires, but to prevent them, by a system of fire inspection, such as had been adopted in Montreal by the ex-Fire Chief Tremblay, with the result of a marked diminution in serious fires. The meeting was presided over by Mr. Peter W. A. Burket, president of the Fire Insurance Brokers' Association.

Public Has to Pay

Mr. Wentworth said that Boston must be given credit for starting the fight against the disgraceful fire waste, which last year cost $317,000,000 in the United States and Canada, a higher figure than any year since 1906, when the San Francisco conflagration occurred. He argued that the main loss was from conflagrations, sometimes, as in Minnesota, due to forest fires, but generally due to neglect in cities. These were treated with the usual American carelessness of great resources, but Mr. Wentworth urged that people should remember that although losses might be insured they ultimately came out of the pockets of the public, and especially the insuring public.

Life insurance was on an actuarial basis, and was reasonably secure, but fire insurance was a gamble, always facing the conflagration risk. He pointed out that while many buildings were well erected, the windows and window frames were left in so dangerous a state that a bad fire was invited to spread before the firemen could get to work. He strongly advised the use of metal fames, wired glass windows, and iron shutters, which would greatly reduce the liability of fire-spread. He argued that the municipalities should take this up and insist upon such installations, as they would much more than pay for their initial cost.

Another thing Mr. Wentworth emphasized was the danger to congested districts from the encircling ring of residences, with wooden shingles, which aided in spreading fires, and which he characterized as a city's "funeral pyre." He considered that some action should be taken to see that these shingles were either replaced or so treated that they would not be a menace in case of fire.

European System

As one method of preventing the annual fire loss he advocated the adoption of the European system, where a citizen who had a fire was regarded as a danger, had to account for the manner in which the fire started, and if it could be shown that it was due to carelessness he would have to pay damages for any injury to adjoining buildings, and also the cost of the fire brigade, with the possibility of further penalty for his carelessness.

Another feature he advocated was fire inspection, with the idea of fire prevention as well as extinction. This had been adopted in Montreal under Fire Chief Tremblay, with marked effect, and was being adopted in many American cities.

As to the increase in fire losses, Mr. Wentworth said it was probably due to the growth of urban centres, and especially the increasing use of gasoline and the manufacture of explosives and other war supplies, so that there was no reason to take a pessimistic view of the situation.

Mr. Grove Smith said that the total losses in Canada from fires last year were $33,850,000, with 17,000 fires. This was a tremendous and preventable drain, especially in view of the war debts and taxes that must be met within the coming years.

A notable feature was that 65 per cent. of the total fire loss in Canada had been caused by less than five per cent. of the fires, while records since 1912 showed that 14 per cent. of the fires had been "exposure" fires, communicated from other buildings.

Preaching and publicity had been tried, but it did no good, because people were not interested. Legislation had been tried, but the results were trifling, because the people did not care about the laws, and they were not enforced. The provinces, for political reasons, "passed the buck" to the municipalities, and they had not the requisite legal machinery, so the laws dropped. Therefore, he argued that more drastic legislation was needed regarding fires, with a sterner application.

To this end legislation was now pending at the coming session of parliament with an amendment of the Criminal Code providing that any person who, by carelessness or other neglect, caused a fire, should be guilty of an indictable offence, and subject to a fine up to $1,000, and imprisonment up to two years.

Another important matter was that of insurance agents. Statistics showed that there were 690 insurance agents in Montreal, including 150 professional insurance men who knew their work, and the rest street car conductors, notaries, and all sorts of people who knew nothing about fire insurance, but were willing to take a risk with as little work as possible. This, he argued, should be altered, with provision that every licensed fire insurance agent should know his business and be in position to see that it was properly carried out.

LONDON CITIZENS WANT LARGER EXPENDITURE

The announced purpose of the London City Council to apply to the legislature at the approaching session for the right to issue $200,000 debentures for the erection of a four-story municipal office building at the corner of Dundas and Wellington Streets, was strongly protested this week. The people have voted three times, twice during the war, in favor of a more pretentious scheme, that would perhaps run to a million dollars.

The $200,000 hall, it is claimed, will not be in keeping with London's ambitions or dignity. The councillors, however, are anxious to go ahead with a building order to provide more work for Londoners who may need employment on public works during the coming summer.

DOMINION SAVINGS AND INVESTMENT SOCIETY

In its annual report for 1918, the Dominion Savings and Investment Society, London, Ont., shows earnings for the year of $116,805, or approximately the same as last year. Interest paid on savings bank deposits has increased from $27,876 to $29,215. Dividends to shareholders were the same (5 per cent.), and the other expenses were practically the same as last year; $10,000 was carried to the reserve fund.

The savings banks deposits have fallen off slightly, as have also the debentures outstanding, the total reduction in liabilities of this kind being about $20,000. The reserve fund is now $27,000. Assets total $2,346,415, practically all of which is represented by mortgages and other securities at their cash value. Considering the difficult conditions in which loan companies were working during 1918, the company has reason to be satisfied with the results, inasmuch as it has been able to maintain its usual payments and to strengthen its financial position as shown by the balance sheet.

The directorate of this company is composed almost entirely of local men, namely, T. H. Purdom, K.C., president, London; John Ferguson, vice-president, London; W. J. McMurtry, Toronto; John Milne, London; Samuel Wright, London; John Purdom, London; Nathaniel Mills, managing director, London.

OTTAWA ELECTRIC APPLICATION REFUSED

Board Decides that Company's Financial Position Does Not Call for Increased Fares

THE judgment of the Dominion Board of Railway Commissioners regarding the application of the Ottawa Electric Railway Company for increased fares was issued on Thursday, February 20th. It disallows the proposed new tariff filed by the company. The proposed rates provided for large increases in the suburban rates but did not change the rates greatly within the city limits. The application for disallowance was made by the village of Westboro and the township of Nepean; they were, however, supported in their opposition by the city of Ottawa. In reaching the conclusion use was made of the financial statement of the company for the year 1918 and a comparison was made with the statement for 1913 to see if the financial position of the company was such that more revenue was necessary.

The judgment says:—

"The board finds that, after maintaining a fifteen per cent. dividend and paying interest on its funded debt, the company's returns show it to be almost half a million dollars better off than it was before the war. Under the circumstances, it does not think the company justified in increasing its rates to suburban points. The recent substantial wage increases were given consideration, but against this extra expense there is the additional revenue accruing from the abolition of the 6-for-a-quarter tickets.

"The increases sought under the proposed tariff, while not affecting journeys from point to point within the city limits, represented advances of from 100 to 200 per cent. in journeys between the city and outside points on the line. For instance from the city to McKellar or Rockcliffe range it would be 10 cents, increase 100 per cent.; city to Britannia, 15 cents, increase 200 per cent.; Britannia zone to Rockcliffe range zone the fare would be 20 cents, increase 300 per cent. The Britannia line, standing alone, the board found not remunerative, but it must be considered as a part of the general system."

Five Years' Operations

In examining the results of the past five years, it says:—

"The year ending June 30th, 1913, (the date as of which the company has to make its statutory return), may, as I think, be looked upon as normal. The last return made to the department is for the year ending June 30th, 1918. A perusal of the reports filed with the department shows that during this period the company has maintained its position, having regard to both its balances and dividend payments. While there has been no new issue of stock, the mileage operated has increased from 47.7 miles to 52.82 miles.

"The funded debt in 1913 amounted to $500,000; in 1918 it had been reduced to $410,000. In 1913 the company's reserves amounted to $210,000; in 1918 they were $558,076. As against this the company's current liabilities in 1913 of $520 grew to $400,056 in 1918. This increase in current liabilities, in the absence of any increase in funded debt or capital, may well be accounted for by the fact that the company's return of cash spent in construction and equipment, less deductions, which it made in 1913, amounted to $2,725,778, while the total returned in 1918 had increased to $3,370,368, an increase of $644,500. In the year 1913 the company commenced its operations with a surplus of $203,500, and after paying the usual dividends and interest, as well as the sum of $69,000 transferred to contingent account, increased its surplus by the sum of $13,259.

"In 1918 the year's operations commenced with a surplus of $47,589. The company pays the usual dividends and its interest charges, and transfers $110,000 to depreciation reserve, but decreases the surplus it commenced the year with by the sum of $29,929.

"The results of the respective years' business differ but slightly. In so far as surpluses are concerned, 1913 has the advantage to the extent of $43,188, while in 1918 transfers to other accounts exceeded 1913 by $41,000.

"In so far as the company's balance sheet is concerned, admittedly an increased floating debt has the drawbacks inherent to such liabilities. Nevertheless, the railway property operated has increased over 10 per cent. The funded debt has decreased $90,000; the reserve, apart from any consideration of specific depreciation reserves or the contingent account, has increased $348,076.

"On the other hand, the increase in current liabilities is $399,536, and the surplus remaining on hand at the end of the year has decreased $186,831."

OTTAWA LIGHT, HEAT AND POWER COMPANY

The annual statement of the Ottawa Light, Heat and Power Company, appearing elsewhere in this issue, shows that the operations were financially successful during 1918, and this had an important effect on the application of the Ottawa Electric Railway Company to the Board of Railway Commissioners for higher rates. The Ottawa Light, Heat and Power Company operates both the Ottawa Electric Railway Company and the Ottawa Gas Company. Compared with last year the results of the Ottawa Light, Heat and Power Company were as follows:—

	1917.	1918.
Gross revenue from all sources	$957,300	$1,114,915
Cost of management, operation and maintenance	611,909	701,387
Interest on bonds	63,862	63,750
Interest on current liabilities	35,387	39,627
Surplus	246,141	310,149

This surplus is carried into the profit and loss account and added to the previous balance made a total for 1918 of $395,649. Dividends at the rate of 6 per cent. per annum were paid requiring $209,934; $50,000 was transferred to reserve account, and $21,190 set aside for bad debts, leaving a substantially increased balance carried forward. The assets have increased from $6,358,508 to $6,912,968.

STERLING TRUSTS CORPORATION

In its annual report for the year 1918 the Sterling Trusts Corporation, Toronto, reports net earnings, after deducting management expenses, taxes, etc., amounting to $24,004, as compared with $20,198 for 1917. The sum of $25,000 was transferred to reserve fund as compared with $15,000 last year, so that the balance carried forward into 1919 is reduced by about $1,000, the figure now being $8,003.

A remarkable increase in the company's estate, trust and agency business is reported; at the end of 1917 the funds administered in this way totalled $3,491,822, whereas at the end of 1918 they amounted to $10,896,204. This, however, is accounted for by net assets of $4,400,000 acquired in connection with the taking over of the Dovercourt Land Building and Savings Society of Toronto. The remainder, however, of $3,000,000 is a remarkable increase of about 90 per cent., and practically all of this increase took place during the last six months after the company's office was moved to better accommodations, and Mr. C. Bauckham joined it as managing director.

Other changes made during the year included the elimination of certain items from the balance sheet which were regarded as of uncertain value; this, of course, resulted in the profits being less than would otherwise be the case, but on the other hand, it greatly strengthens the company's financial position. The addition to the reserve moreover brings that account to $100,000.

During the year the company lost by death its president, Mr. E. F. B. Johnston, K.C. At the annual meeting on Monday, however, Mr. W. H. Wardrope, K.C., of Hamilton, was elected president, and Mr. A. W. Briggs, K.C., vice-president, in succession to Mr. Wardrope.

CANADA'S RESOURCES OVERESTIMATED

Senator Edwards Tells Commission of Conservation at Tenth Annual Meeting

THE tenth annual meeting of the Commission of Conservation was held in Ottawa last week, and covered three days. At the opening the chair was occupied by Senator W. C. Edwards, in the absence of Sir Clifford Sifton, chairman of the commission, who resigned some weeks ago, but whose resignation has not yet been formally accepted.

Referring to the work of the commission, the acting chairman said that, for his part, he felt much had been accomplished in ten years. The legislation with regard to railways and the consequent saving of our forests, due to the efforts of the commission, was in itself sufficient justification for its existence. Senator Edwards made a strong protest against the distribution of the idea, so prevalent, that Canada's resources are inexhaustible. This idea is, he felt, productive of waste. He declared that the lumber east of the Rocky Mountains is almost exhausted, and that every province in the Dominion over-estimated its lumber resources. Canada is rich in pulp wood, but unless the supply is conserved, she will not long continue so. Fisheries and minerals must also be saved.

The reconstruction work being carried on was criticized by the speaker. "A lot of commissions which had been established for dealing with after the war problems," he said, "will do little good. A careful study of the national resources of the country and a systematic development of them would do more to solve these problems than anything else."

Canada Wasteful Nation

"The United States," he said, "had been called the most wasteful of nations, but a survey of conditions in Canada, showed that she is pre-eminent in this respect, a pre-eminence, he added, of which she had no reason to be proud. Canada was now trying to adjust herself to post-war conditions, but it must be borne in mind that wasteful methods of developing or utilizing her natural resources will prove a fatal handicap.

The importance of forests in the war was also the subject of some remarks by the assistant chairman. In this connection, he said, only since the armistice had it been known that cutting in France had reached such a stage that continuance of the struggle would have necessitated commencing operations in mountainous regions heretofore considered inaccessible. In Great Britain, the end of the reserves of firs and pines, the trees in greatest demand for military requirements, was in sight.

UNITED GRAIN GROWERS, LIMITED

The profit and loss account of the United Grain Growers, Ltd., for the year ended August 31st, 1918, shows a total earned of $3,047,395. Expenses of operation, rents and depreciation required $2,585,692, leaving a balance of $416,703 carried down. Out of this was met the expenses of organization and financing of the company which amounted to $45,593, but there was also a premium on stock sold to the amount of $25,650, so that a net reduction of only $19,943 was necessary in the balance carried forward.

This company was formed on September 1st, 1917, by an amalgamation of the Grain Growers Grain Co., Ltd., and the Alberta Farmers Co-operative Elevator, Ltd., so that the present statement is the first annual report of the organization. The authorized capital is $5,000,000, of which $2,819,050 is subscribed and $2,159,763 is paid up. There is also a reserve of $1,500,000, most of which existed upon the formation of the company. Debentures and mortgages to the amount of $1,221,763 are outstanding and there are also current liabilities totalling $3,079,167, making a total liability of $8,359,176. The elevator, buildings, machinery, warehouses, etc., are valued at $3,247,038, the balance being made up of current assets consisting of stocks of grain, etc., amounting to almost $2,500,000, shares in grain exchanges, advances, etc.

ENGINEERING WORK AT JOINT EXPENSE

An act has been passed by the British Columbia legislature under the title of the "River Bank Protection Act," providing for the protection against the encroachment of any river upon its banks. Where such works are considered necessary in the opinion of the government, as advised by its engineering experts, the cost is to be divided among the owners of the lands, the municipalities and the province in proportion as they are respectively benefited by the improvements. Moreover, if the benefit to the lands is not uniform the engineer may divide them into various classes for assessment purposes. The act also empowers the minister of finance to pay such expenses as are incurred by the province under this act, and to levy taxes on the owners and municipalities for their operation of the expenses.

MUST NOT BORROW UNLESS VOTERS APPROVE

The Quebec Provincial Government is discouraging deviations by municipalities from the general laws of the province. At the meeting of the Private Bills Committee last week, Hon. Walter Mitchell made this policy clear when Three Rivers asked that it be allowed to borrow money without complying with the provisions of the general law. The provincial treasurer pointed out that the general law had been changed last year for the purpose of seeing that the electors of a municipality voted on every loan and it is the desire of the Government that no money by-law should be carried without a vote.

TORONTO APPOINTS HOUSING COMMISSION

The city of Toronto has appointed a permanent housing commission, consisting of Sir John C. Eaton; F. A. Rolph, of Rolph, Clark, Stone, Ltd., lithographers; J. Allan Ross, of the Wm. Wrigley, Ltd.; H. H. Williams, realty agent, and Sir James Woods, of the Gordon, McKay Co.

The names will go before the city council at the meeting on Monday.

In an interview, Mr. H. H. Williams, one of the members, gave his own opinion of the procedure of the commission as follows:—

1. Houses will be built to sell, not to rent.
2. The commission itself will not build the houses, but an incorporated company will be formed.
3. Stock in the new company will not be confined to a few holders. The amount of $150,000, which is required if the government accepts bonds for the remaining $850,000, is easily in sight, and the commission will go right ahead.
4. The commission will likely start up with 100 houses and end up with 300.
5. The houses will not be all built in one place, but in different parts of the city, so that people of every section will have a chance to buy.
6. The semi-detached type will probably find favor, and Mr. Williams has in mind a 25-foot lot for each.
7. The cost to the buyer will be $3,000.
8. The city has offered its own vacent lands to the commission for consideration as sites for houses.
9. The exteriors of the houses will differ in appearance.

"The man who buys a home is more valuable to the city than the man who rents," said Mr. Williams, when asked why homes would be built for sale only. "We are going to encourage home-owning by offering real bargains in moderate-sized homes."

The municipal authorities of the city of Barcelona, Spain, have taken over all the electric works of the Canadian companies owing to a strike which has been in existence for several days.

SECURITY AND SERVICE
HEAD OFFICE - WINNIPEG

BRITISH COLUMBIA MAY FIX WORKING HOURS

An act has just been passed by the legislature of British Columbia empowering the lieutenant-governor-in-council, upon the recommendation of the minister of labor, to:—

(a) Fix and define the weekly and daily hours of labor in any class of industry;

(b) Fix maximum and minimum penalty for any breaches or infractions;

(c) Make provisions dealing with accidents, the saving and protecting of life, and the preventing the destruction of property;

(d) Limit the hours of labor to forty-four hours in any one week, notwithstanding any act to the contrary.

MANITOBA'S PLANS FOR EXPENDITURE

1919 Estimates Include Capital Expenditure of Almost $2,400,000—Total Estimates Increased $800,000

THE Hon. Edward Brown, provincial treasurer of Manitoba, informed the provincial legislature on Tuesday, February 18th, that the government expenditures for the coming financial year were estimated at $8,377,000, an increase of $806,000 over last year's expenditures. The total revenue is estimated at approximately the same figure. Included in this total expenditure are capital expenditures to the amount of almost $2,400,000 as follows:—

New Parliament Buildings	$1,000,000
Furnishings and fittings	200,000
Grounds	150,000
Manitoba school for the deaf, preliminary estimate	100,000
Brandon asylum	150,000
Selkirk asylum	50,000
Home for incurables	25,000
Pyscopathic building	20,000
Morden Land Titles Office	10,000
Provincial buildings and grounds	31,000
Rural Credits Association capital	10,000
Manitoba Farm Loans Association	100,000
Lignite utilization board	100,000
Ninette sanitorium	100,000
Reimbursement of revenue for capital	323,000
Total	$2,370,000

The above mentioned amount of $2,400,000 will be added to the net debt of the province, with the exception of $100,000.

Current Account Expenditures

In the course of his budget speech, the treasurer said:—

"Last year our estimates provided $7,571,000. This year we ask for $8,377,000 or an increase of $806,000, or over 10 per cent. I am making no apology for this increase. It will be the same story in every province in Canada. If we asked for less we would not be doing our duty to the country. In justice to the administration, however, I would like to point out that, of this increase, the telephone expenditures which is merely a cross entry, involving a corresponding revenue, accounts for $256,000, that the great cause of education accounts for $134,000 and that these two items account for almost half the increase. In the treasury department, for interest on new capital, it is estimated we will require $83,000 additional, which is a very conservative estimate, and for the administration of the Mothers' Allowance act $100,000. In the department of justice, there is an additional $30,000, owing to privy council cases. In the department of public works, we have an extra item, representing the premiums for three years' insurance on the Provincial Buildings, $72,000, and the work of of the drainage commission will require $50,000. These items which I have mentioned account for almost the entire increase without any allowance whatever for the increased cost of the maintenance of public institutions.

Prospective Revenue

"Coming to the revenue side of the question is how we are to raise the revenue for the new expenditures. We calculate that the Public Amusements act will give us $90,000 more than last year, that we shall get an additional $100,000 from corporations. The subsidy from the Dominion on account of the increased population will mean another $50,000, when the succession duties, it is estimated, will drop $50,000. Receipts from provincial lands on account of the act passed last session earmarking all principal monies as capital, and which came into effect on the first of December last, will mean loss from this source by $75,000.

"With respect to the levy on all the rateable values of the province last year the total levy for the Patriotic fund and the province was two and one-half mills. This year we propose to reduce same to two mills, appropriating one and one-half mills for the province and one-half mill for the Patriotic fund. The amount required to take care of the soldiers' dependents is still uncertain. From the proceeds of last year's levy we can carry on to May 1st. The half mill will carry on for three months beyond that period and it is possible that all our men may have returned by that time. In any case it is not deemed wise to levy for patriotic purposes for a greater sum than might be required as the government would not feel at liberty to use the balance for other purposes. By the end of the year we will know exactly how much we are short and the levy next year may be made accordingly.

"The total revenue is estimated at $6,450,400, and the total expenditures at $8,377,100."

Review of War Years

In opening his address before the House, Mr. Brown made reference to the financial conditions in the province. He declared that the year 1918 had been the most trying in the history of the country, from a standpoint of agriculture and the following reasons. First, shortage of labor, owing to recruiting. Second, shortage of seed with reference to coarse grains. Third, high cost of equipment. Fourth, only 75 per cent. of the normal rainfall. However, urged by patriotic appeals our farmers rose cheerfully to the situation, and as a result we have had the greatest crop from the point of value in the history of the province. In 1915, the banner year, the total value of production, including the value of livestock, was $261,000,000. In 1916, owing to rust, this fell to $220,500,000. In 1917, owing to increased prices, it rose to $305,470,000. In 1918 we find the total value was $316,972,830, notwithstanding a more conservative method of assembling statistics, an increase in the value of wheat of $12,000,000, an increase in the dairy production of approximately $6,000,000.

Development of Manufactures

Speaking of the reconstruction period which the province is about to enter, he said:—

"Manitoba is not known to the outside world as a manufacturing province. The day is coming when all this will be changed. We have all the elements here which enter into successful manufacturing, namely: Cheap electric power, a satisfactory labor market, much raw material. Our manufacturers have initiative and enterprise and given a chance can produce anything made in other parts of Canada, and, perhaps, just a little better. The House may be surprised to know we have already made a creditable start, having now 834 manufacturing establishments, with employees numbering 19,260, with a pay roll of $19,000,000, and with a total value of products amounting to $62,000,000."

Banking and Finance

Mr. Brown remarked that a great deal of credit was due business men of the city in the way they carried on during the war. He also commended the banking system of the Dominion. Mr. Brown said that it was a tower of strength to the nation.

Coming to the point of financial conditions, the speaker said, "I feel warranted in saying that Manitoba is in a prosperous condition. There is only one cloud in the sky, that is the real estate in the city and urban districts. Rental values have gone down, taxation is increasing. This, I wish to point out, is a condition which will pass. Prosperity in the rural parts is bound to have a reflex influence in the cities and towns."

Mr. Brown pointed out the undertaking which other provinces were about to enter into. He said that although Manitoba was not undertaking reconstruction on such a large scale as other provinces the progress here is fairly comprehensive. Among the undertakings will be completing the parliament building, additions of homes for the insane at Brandon and Selkirk, and the Ninette sanitorium. Also the erection of a home for deaf and dumb.

Speaking of land settlement for returned soldiers, Mr. Brown said: "It is further proposed to make an earnest effort to bring under cultivation at the earliest moment the

GUARANTEED INVESTMENTS
BEARING ATTRACTIVE INTEREST

Do you know that you can invest your funds in first-class mortgages on improved real estate, and in addition have the sum invested absolutely guaranteed by the Toronto General Trusts Corporation? You can secure this investment for sums from $500 to $100,000, and we would point out that the interest is paid by cheque semi-annually, and the rate is attractive. Further information upon request

A Will Maker's Difficulties

A wise man makes a will; and a will implies an executor. Yet anyone choosing a personal executor must choose either an able man with interests of his own, who can give only his spare time to the estate: or a man who has less than the ability required to administer the property of another.

Many prudent people unwilling to make either choice have appointed this Company executor. Write for our booklet. Or may we explain to you personally the advantages of such a course?

unoccupied lands of the province. To this end a bill will be introduced at a later stage during this session giving the government authority to purchase and sell lands to settlers which lands are now held by private owners. Manitoba will probably be the first province to undertake this great enterprise. In this undertaking the province will have the co-operation and monetary support of the Dominion." The minister said that every care must be taken in returning the returned soldier back to his pre-war standing and give him every chance to progress. He commended very highly the work of the returned soldiers' commission.

Road Construction

With reference to the government's plans for the year a delegation recently waited on the law amendments committee of the legislature to urge an extensive program of road building. The Hon. George A. Grierson, minister of public works, acted as chairman of the committee. The petition asked "that in the opinion of your petitioners the best interests of the province would be served by the provincial government controlling the construction and maintenance of the main trunk highways of the province." It was signed by over 9,000 business men of the province.

Mr. A. C. Emmett, secretary of the Manitoba Motor League, who headed the delegation, referred to the fact that while there were good roads in many parts of the province, there was a lack of connecting roads such as would make the province more attractive to tourists. To handle these larger works provincial action was necessary. The Hon. Mr. Grierson in reply explained that the smaller roads were more useful from the farmers' point of view for the purpose of bringing grain to market. He said, however, that the province was planning to spend considerable sums and that they hope to have at least $1,000,000 of the $25,000,000 expenditure planned by the Dominion government, and would endeavor to get $2,000,000. The proposal, he said, that the Dominion pay 50 per cent. of construction; the province, 30 per cent. and the municipalities in which the road is constructed 20 per cent. He said the provincial government intended spending $3,000,000 and is about to appoint a roads commission which will be responsible for works of this kind.

BRITISH-AMERICA ASSURANCE COMPANY

For the financial year ended December 31st, 1918, the British-America Assurance has made a substantial profit upon its fire, hail and automobile business, but incurred a loss upon its marine business. The total premiums, however, exceeded the expenditure by about $140,000, and interest and rents amounting to over $100,000, together with an increase of $57,000 in the market value of securities added substantially to the company's income. The following figures compare the results with those of the previous year:—

	1917.	1918.
Fire, hail and automobile premiums	$2,442,577	$2,798,291
Marine premiums	1,390,785	1,211,503
Total premiums	3,833,362	4,009,795
Interest and rents	80,613	102,265
Total income (including balance brought forward) ..	4,717,645	4,112,061
Fire, hail and automobile losses, expenses, etc.	2,175,620	2,513,595
Marine losses, expenses, etc...	1,011,564	1,347,120
Total expenditure	3,187,185	3,860,716

Twenty-five thousand dollars was set aside as a reserve against possible depreciation in securities, and dividends amounting to $38,500 were paid on preference stock. The balance carried forward exceeds that of last year by $240,000. The total assets of the company are now $4,041,699, and the investments are well distributed. In addition to the balance carried forward the company's reserves total over $100,000.

AMERICAN BANKERS' ASSOCIATION OFFICES

The proposed removal of the offices of the American Bankers' Association from New York to Washington is meeting with objection from many of the members. The Chicago convention, held last year, went on record to the effect that the removal to Washington was neither advisable nor practicable.

Some of the members maintain that permanent representation at Washington would be sufficient, and that action should be deferred until the next convention, or at least until the next meeting of the executive council. A protest to this effect has been signed by Mr. Frank W. Blair, president of the Union Trust Co., of Detroit; Joseph Chapman, vice-president of the Northwestern National Bank, of Minneapolis; William J. Gray, vice-president of the First and Old Detroit National Bank, and others.

ALBERTA'S REVENUE WILL SHOW INCREASE

The financial year of the province of Alberta just ended on December 31st, and, while it is as yet too early to have exact figures as to the results, it is understood that increased revenue at least will be shown. The financial resources of the government from the extra taxation imposed last year would appear to put Alberta in a favorable position in regard to accumulated reserves for many years past. It will be recalled that at the last session, the so-called Patriotic Tax Act was passed whereby it was planned to raise $800,000, Alberta's quota for the patriotic fund. While figures are not yet available, it is reported that up to date approximately $600,000 already has been collected, while municipalities throughout the province are still obligated to the provincial government in the estimated sum of some $900,000. As this must be collected and paid, it means, if the report is correct, that a total of $1,500,000 approximately will be raised under the act, leaving a balance of some $700,000 in the hands of the province for other purposes, the government having frankly stated at the last session that any balance over and above the $800,000 raised would be employed for such other purposes.

VANCOUVER PROTESTS AGAINST FREIGHT RATES

At a meeting of the Vancouver board of trade, held on February 11th, a resolution was passed, calling upon the provincial government to stop discriminations against the western section of Canada with regard to transportation and freight rates on the railways. It stated that the transportation rates aid eastern manufacturers and wholesalers to discriminate against the west, to the advantage of manufacturers and wholesale institutions east of Winnipeg.

It was decided by the board that immediate action should be taken by the province of British Columbia to combat this discrimination. "We state very emphatically," the resolution said, "that this discrimination should cease; that the freight rates west of Winnipeg should be the same as those east of Winnipeg; that we urge the premier of British Columbia and his government to take some strenuous action against this discrimination of freight and passenger rates, which is detrimental to our prosperity."

The resolution also pointed to the fact that the Canadian National Railway is a government road, and that it should be operated in the best interests of the citizens of Canada as a whole. In view of this, the Dominion government should be asked to see that justice was done to the western people. It was also decided that Premier Oliver should be asked to work out some scheme which will include the co-operation of the provinces of Alberta, Saskatchewan and Manitoba, which are vitally interested in cheaper freight rates for the marketing their grain to the nearest seaport.

FOOD COMMODITIES IN CANADA

Beef and Lamb Stocks Lower—Pork Products Increasing

THE Cost of Living Commissioner has submitted the monthly report to the Minister of Labor, concerning the stocks of food in storage on February 1st. The report says:—

"The situation as regards dairy products and eggs is quite satisfactory. The situation regarding meats is not so satisfactory. Beef and lamb quantities are decreasing, but pork products are increasing with unchanging retail prices, while the price of live hogs is declining.

"The eggs put into storage last summer are nearly all gone, only 414,637 dozen remaining at the first of the month. In addition we had 276,439 dozen eggs on hand other than cold storage and 1,354,204 pounds of bulk frozen eggs. These frozen eggs are used by confectioners and are not a product directly entering household consumption. Since our monthly domestic consumption of eggs is about 3½ million dozens, it is evident that the market is not over-supplied. Fortunately, supplies are now coming on the market.

"The butter situation is also satisfactory, especially in view of the abnormal demands for overseas shipment last fall. We have 8,400,060 pounds creamery butter, which is 29 per cent. less than last month, and 698,703 pounds dairy butter, which is only about one-half of the stock of last month. Comparing these quantities with the most reliable figures for domestic consumption we see no cause for alarm in either direction.

The oleomargarine stocks have fallen off by 21 per cent. to 597,607 pounds, which is only about half a month's supply Cheese stocks have decreased by 25 per cent. to 3,485,316 pounds which is less than one-half of last year's stock.

Pork stocks in general are greater than last month and 38.7 per cent. greater than last year. Comparing with last month frozen pork has increased 27.77 per cent., unfrozen fresh pork has decreased .78 per cent., dry salted has increased 129.16 per cent., sweet pickled decreased 13.46 per cent., and pork in process of cure has increased 18.46 per cent. The quantities are, frozen, 5,787,619 pounds; not frozen, 2,560,810 pounds; dry salted, 7,599,641 pounds; sweet pickled, 9,739,619 pounds; in process of cure, 18,482,655 pounds. The best consumption figures available show consumption through wholesale channels to be 6,152,000 pounds of cured pork, and 3,875,973 pounds of fresh pork a month.

Beef Stocks Declined

"Beef stocks have declined somewhat, but are still 44 per cent. more than a year ago. We have 48,120,834 pounds of frozen beef, 3,220,746 pounds not frozen, 338,551 pounds of cured and 597,992 pounds in process of cure, making a total of 52,378,123 pounds. Wholesale consumption figures at hand show a monthly domestic demand of over 15 million pounds of fresh beef and a million and a quarter of cured beef.

"Mutton and lamb stocks have declined by about 10 per cent. from last month, but are still 105 per cent. above last year. We find 8,137,668 pounds of frozen stock and 165,681 pounds of unfrozen, making a total of 8,303,349.

"We have 2,534,691 pounds of chickens and 2,644,125 pounds of other poultry. This is 109 per cent. more than last year, but a decrease of 21 and 8¼ per cent. respectively from last month.

"Fish stocks are nearly 50 per cent. greater than last year, but the commercial stocks have declined 13 per cent. from last month. All kinds this month are 20,978,767 pounds with 3,172,863 pounds for bait.

"As it will be seen, the stocks of meat are large, and in the case of pork are increasing. Overseas shipment has ceased for a time, and the law limiting holdings and profits has just been removed.

Held for Market Revival

"The truth is that these stocks are being held largely in the hope of the revival of the export market. It seems certain that eventually Europe will need all our surplus; at what price no one knows. The hungry consumers fail to gain much comfort from the export market; yet it is to the advantage of all of us to have the export market kept up that we may pay our debts. It is not to our advantage, however, to have domestic prices maintained above the necessities of the export market. Unnecessarily high prices at the present time can be nothing but disastrous.

"Whether or not prices are unnecessarily high to-day on staple foods is a disputed question, with Mr. Hoover leading the champions of present prices. A few facts should be more expressive than any dictatorial assertions from this office.

"The American millers assembled in convention state that wheat and flour prices are considerably above the world's market prices, having been guaranteed by the various governments. Hog prices are being artificially maintained in the United States, while they are dropping rapidly in Canada; yet the retail price of bacon is being held firm in Canada. Beef prices went up early last summer because the whole supply of the Southern Hemisphere was cut off. Now the large supplies of South America and Australia are available, yet the prices we pay have not declined to the former level.

"In view of these facts and the news that the orders of the Canada Food Board limiting holdings and limiting profits have been abolished, and also in view of the evident feeling in certain quarters that now the war is over the public needs no further protection in spite of many laborers being out of work, we would respectfully urge that measures be taken at once to protect the interests of the consumers. We feel that at least, the order limiting profits should be immediately restored by order-in-council and should be rigidly enforced, and that additional measures should be passed having in mind the protection of the best interests of all Canadians for the period of reconstruction. We also believe that a very special effort should be made at this time to diminish the prices of essential food products."

RED DEER WILL NOT BORROW

According to the general revenue account of the city of Red Deer, Alta., for the year 1918, a profit on operations amounting to $10,575 resulted. Since 1914 the city has reduced its debenture debt by over $40,000, and now has a revenue surplus of over $44,000. In common with many other municipalities, however, it is having difficulty with tax collections, the arrears now amounting to $68,000. Of this total, $34,000 is owed by the Townsite Co., and over $25,000 by soldiers on active service.

In a statement to *The Monetary Times*, the city commissioner, Mr. A. T. Stephenson, states that they are at present applying for legislation to enable the city to collect arrears of taxes more easily, and to rebond some of the outstanding treasury bills and spread the payments over a longer period. This would relieve to some extent the burden of the arrears and might enable a better collection to be made on current account. Mr. Stephenson says:—

"Prospects in Red Deer are very good. Property is beginning to turn and considerable building is arranged for already. There is a big demand for modern houses and more must be built. The Canadian Northern Railway has promised to build into Red Deer this year and a gang is working on repairs to the bridge over the river now and we hope this summer to have this additional railway operating into here.

"Business is good, as the farmers had a good crop last year. This district escaped frost and drought entirely, but, of course, the farmers here rely on mixed farming and dairying and crop failures do not bother them much, as plenty of feed is always available. The farmers around Red Deer are prosperous and many of them have modern houses with all conveniences, electric lights, water and sewage systems and good heating, and nearly all of them have automobiles, and many of them tractors.

"We do not contemplate issuing any debentures this year, as our efforts will be continued towards reducing our debenture debt for the next few years. We may, perhaps, make an issue of treasury bills later in the year."

Principal and semi annual interest payable at Montreal, Toronto, Boston, Mass., U.S.A., or at London, England. Coupon Bonds with privilege of registration as to principal. The Royal Trust Company, Montreal, Trustee.

DENOMINATIONS: $1000 and $500

The Company agrees to pay normal Canadian or United States Income Tax, up to and including 4[illegible].

CAPITALIZATION

	Authorized	Outstanding
Common Shares (paying 10 per cent.)	$4,500,000	$1,500,000
7 per cent. Preferred Shares	1,500,000	1,000,000
6 per cent. First (Closed) Mortgage Debentures	2,500,000	2,028,500
6 per cent. General Mortgage Bonds	Closed Mortgage	4,000,000

SECURITY FOR BONDS

Bonds will be secured, subject only to lien of the First Mortgage 6 per cent. Debentures, by direct mortgage upon freehold and leasehold lands and water powers—with minor exceptions—and upon all plants and properties now owned or hereafter acquired by Riordon Pulp & Paper Company, Limited. They are further to be secured by direct lien upon 60 per cent. of the Capital Stock of the Ticonderoga Pulp and Paper Company, and not less than $5,000,000 par value of Preferred Shares and a majority of the Common Shares of the Kipawa Company, Limited, and by a floating charge on all other assets and properties of the Riordon Company.

KIPAWA COMPANY

The Riordon Pulp & Paper Company, Limited, will acquire from proceeds of this financing, together with other funds provided by the Company, not less than $5,000,000 par value of 7 per cent. Cumulative Preferred Shares, and a majority of Common Shares of the Kipawa Company, Limited.

The Kipawa Company, Limited, now has under construction at Temiskaming, Quebec, a Bleached Sulphite Pulp Mill, with a capacity of 30,000 tons of Bleached Sulphite Pulp a year, together with electrolytic plant, bleachery, acid plant, etc. The Company is also installing the initial unit, with a capacity of 3,600 h.p., of a hydro-electric development with an ultimate capacity of over 25,000 h.p. The Kipawa plant, it is expected, will be in operation December, 1919.

RIORDON COMPANY

Complete prospectus, copies of which will be furnished on request, contains a letter from Mr. Carl Riordon, Managing Director of the Company, from which we summarize as follows:

RIORDON COMPANY is one of the oldest and largest producers in America of Unbleached Sulphite Pulp for sale. The business has been in successful operation for over 60 years.

PULP WOOD AVAILABLE, 3,000,000 cords, together with wood purchased from neighboring districts, estimated to be sufficient for many years' operation at present capacity. Arrangements have been made to largely increase Company's wood supply.

COMPANY'S (and Subsidiaries) ANNUAL OUTPUT, adding output Kipawa plant available December of this year, 119,000 tons Bleached and Easy Bleaching Sulphite Pulp, Soda Pulp, Book Papers; and 20,000,000 feet b.m. lumber.

NET CURRENT ASSETS, as at 30th November, 1918, after deducting all Current Liabilities, amounted to $2,250,191 exclusive of proceeds of this issue—equivalent to over 37 per cent. of Bonds outstanding.

PROPERTY VALUES by which these Bonds will be secured show net value of the properties of the Riordon Company, and its net equity in the companies which it controls, to be in excess of $15,000,000, or two and one-half times the total bonded debt of the Company, including this issue.

EARNINGS. Average net earnings of the Company for the three years, 1916-1918 inclusive, before deducting depreciation and interest, amounted to over $1,600,000, or over four times interest on all Bonds now outstanding. For the past six years, 1913-1918, inclusive, before deducting depreciation and interest average net earnings amounted to more than $1,000,000, or about three times the interest on all Bonds now outstanding.

Based on normal prices and costs for pulp and normal value of power, it is estimated that the **NET EARNINGS OF KIPAWA COMPANY, LIMITED**, for the year 1920, should be not less than $750,000, which would permit the payment of substantial dividend on the Common Shares of the Company.

Two-thirds of this issue has been sold in the United States. We offer for sale in Canada the unsold portion of the balance at a price of—

97 and Accrued Interest, Yielding 6.40%

Carrying a Bonus of 15% of Kipawa Company Common Shares

(1½ shares Stock with each $1,000 of Bonds)

Payable as follows: 20% of the par value on application.
40% of the par value on April 1, 1919.
37% of the par value on May 1, 1919.

Common Stock Bonus will be adjusted to even amount by purchase or sale of fractional share at the rate of $25 per share.

The right is reserved to allot a portion only of the amount applied for. If only a portion of the amount applied for be allotted, the balance of the deposit will be applied towards payment of subsequent instalments. Payments may be anticipated in whole or in part at any time. Interest will be allowed on payments at the rate of 6 per cent. per annum. Accrued interest will be adjusted upon final payment.

The Toronto bank clearings for the current week are $59,817,589, compared with $56,959,240 last year, and $49,899,798 two years ago.

DOMINION FIRE INSURANCE COMPANY'S REPORT

Assets of $511,413, an increase of $84,556 as compared with 1917, are shown in the annual statement of the Dominion Fire Insurance Company for the year ending December 31st, 1918.

The substantial progress that has been made by this growing Canadian company is shown by the fact that its assets in 1915 were $329,000, in 1916 $382,000, in 1917 $426,000, and during the past year crossed the half-million mark.

A trading profit of $74,840 is shown in the statement of receipts and disbursements, and this is after having written off $5,500 from Goad's plans.

Among the assets there are $195,000 war loan bonds as compared with $38,000 in 1917; the other assets are practically all very liquid consisting chiefly of municipal bonds and bank stocks.

Allowing for rebates on premiums, the premium income was $504,768, and the losses were $232,327, or almost exactly 46 per cent. On the net business, less reinsurance, the loss ratio was slightly over 46 per cent., which demonstrates that the company's profits for the year were not obtained at the expense of the reinsurance companies.

Major Robt. F. Massie, D.S.O., the president of the company, is its active manager, and Neil W. Renwick is secretary. Both of these gentlemen are to be congratulated upon the good showing made during the year. The Dominion is rapidly acquiring an enviable position among the purely Canadian companies.

At the annual meeting held February 19th, the following directors were elected:—

Major R. F. Massie, D.S.O., Toronto, president; Philip Pocock, London, Ont., vice-president; Neil W. Renwick, Toronto, secretary; R. S. Cassels, K.C., Toronto; G. J. Cuthbertson, Montreal; R. J. Hutchings, Calgary; Robert Kelly, Vancouver; Emile Ostiguy, Montreal; Dr. Thaddeus Walker, Walkerville, Ont.

To the President, Directors and Shareholders of The Waterloo County Loan and Savings Company.

Gentlemen.—We beg to report that we have made a regular monthly audit of the books of account and vouchers of your Company for the year ending 31st December, 1918, and that we have found the same correct and according to the statements herewith submitted.

In our opinion the balance sheet referred to in this report is properly drawn up, so as to exhibit a true and correct view of the state of the Corporation's affairs as shown by its books.

Respectfully sumbitted,
J. M. SCULLY, F.C.A., } Auditors.
J. SCULLY,

Waterloo, Ont., 24th Janoary, 1919.

Twenty Years of Progress Reviewed By National Trust Shareholders

President Sir Joseph Flavelle Pays Tribute to Canada's War Service and Urges Careful Attention to Problems of Peace—General Manager W. E. Rundle Sketches Company's Growth—Assets Under Administration Now Exceed 80 Millions—Reserve Increased Beyond Capital—Origin and Development of "The Trust Company Idea"

EARLY OPENING OF VANCOUVER OFFICE ANNOUNCED

F. W. Harcourt, K.C., and James Ryrie Join the Board of Directors

The Annual Meeting of the Shareholders of National Trust Company, was held yesterday at noon in the Company's Board Room, with the President, Sir Joseph Flavelle, Bart., in the chair. In moving the adoption of the Report and Statement which appear below, the President said:

President Recounts Canada's War Effort.

Canada has secured added importance during the War. We have attracted world attention not given to us before. We can refer therefore with grateful pride to the honorable part which we have borne.

400,000 men voluntarily offered for Overseas service and a further 100,000 were selected under the Military Service Act. Of these the great majority went to form our own Canadian Army Corps. You will agree with me that it is fitting to place on the records of this first annual meeting following the War, the common testimony of all Ranks and Services of friends and enemies alike, that our brave Canadian Divisions were second to none as effective fighting units. We have just and deep pride in them.

Nor must we forget the large number of Canadians who served outside the Canadian Corps. The Canadian aviator proved resourceful, and was given high rank for his work in the Imperial Forces. He was in evidence where hard fighting and dangerous service had to be performed. Moreover, he represented a remarkable percentage of the air fighting forces with the British Armies in France and Flanders.

The Canadian Forestry Battalions and Railway Construction Engineers brought experience to their operations in Great Britain and France which the Imperial Authorities report as invaluable to the British operations.

The Canadian Medical Services from Casualty Clearing Station to General Hospital were held in high regard for the courage, devotion and skill of doctors and nurses alike.

The Canadian Cavalry Brigade, forming part of an Imperial Cavalry division, fully upheld its country's honor in emulation with tried and famous British Cavalry regiments.

War Service at Home.

Turning to the Senior Service we find large numbers of Canadians serving in the Royal Naval Volunteer Reserve, particularly in motor-boat patrol work, and it is well to remember that Canadians were present at the famous exploits at Zeebrugge and Ostend.

While our citizen soldiers thus played their part abroad we were not remiss at home. Our women suffered sorrow and anxiety with rare patience and fortitude while keeping up an increasing volume of good works. Others of them served with efficiency in office, factory, workshop and farm.

We supported liberally, patriotic, Red Cross and other funds needed to meet conditions incident to the War.

We developed a production of munitions which was of vital importance to the fighting forces on every front, and for which we earned the grateful appreciation of the Imperial Government, on whose behalf Mr. Winston Churchill, the Minister of Munitions, recently stated: "Canada's remarkable output of munitions has played a large part in the munitioning of the British Armies, and will remain a testimony to the high value in that great struggle of all those, whether manufacturers or work-people, who shared in the work."

We earned distinction in the production of aeroplanes and in the training of Canadian pilots in the Royal Air Force Aviation Schools and Camps in Canada. At the time hostilities ceased the Canadian output of aeroplane spruce, so difficult to secure, had reached a point representing fifty to sixty per cent. of the entire requirements for British planes.

We accumulated great stores of wealth through extreme world prices paid for agricultural and other supplies which nature and our industry gave to us, as well as from returns received from industrial developments in munitions and general war material. From this wealth we, who had hitherto been a borrowing country abroad, loaned to our own Government no less a sum than $1,350,000,000.00 to carry on the War, and yet had left over sufficient to extend loans of hundreds of millions of dollars to the hard-pressed British Treasury.

In all these world activities so new and so unexpected to us, we can say to all enquirers that the heart of our people was in them. We gave instant and spontaneous expression of this in those early months following August, 1914—there was the rally of men at Valcartier and the gifts of grain and flour by the Federal and Provincial Governments to the Imperial Government. When the struggle hardened into a test of endurance with the call for men, and still more men and money, we gave ungrudgingly.

We, therefore, do well to reflect upon the work which we have done.

Grave Problems Ahead.

We have, however, finished with the War. Our problems are in the future. There is much clearing up to be done, but our constructive work will be in peaceful pursuits. We will do well, therefore, to remove the spirit of War from among us. Financial institutions, industrial corporations, labor organizations, returned soldiers and educational activities should not be separated forces with latent or outspoken antagonisms, but co-operative bodies, each endeavoring to understand the other and all recognizing obligations to the community as a first claim.

These are not mere platitudes. The world has a rough time ahead in the readjustments which are inevitable. Men engaged in finance, in commerce, in agriculture, in labor, in educational work, should therefore bring wisdom and restraint into the struggle.

Co-operation the Solution.

We will not secure a sound solution of these problems by retaining chiefly a fighting spirit, however deeply we may feel the need for reform. The solution will come through patient personal effort and through wise regulations by Governments. It will come through conviction concerning needed reforms, accompanied by good fellowship, mutual confidence and personal industry. The way of progress will not be found in distrust and angry agitation, but in hard knocks given and taken in good part, in productive work commonly undertaken and in co-operative effort which accepts responsibility to the community as a binding obligation.

Outlook Warrants Confidence.

We need not be disturbed because of vigorous differences of opinion among us. They are a sign of health in a virile people. If men and women in Canada will play their part—we need not fear the decisions which will be reached. We will observe law and maintain orderly government and will not mistake mere agitation for power. We will remember that for economic and social security we have great areas of unoccupied agricultural lands, which will be the homes of contented and prosperous peoples. We have large potential wealth in timber reserves, in mines and in fisheries. We will continue our industrial development in products for home and export trade. Our outlook, therefore, warrants full confidence at home and abroad in our future and in the institutions which perform the necessary service to meet the need of ever enlarging developments.

F. W. HARCOURT, K.C.,
Elected to the Board of Directors, National Trust Company

Turning now to the report of your Board of Directors for the year 1918, which has just been presented, I believe you will consider it most satisfactory. Both the Profits and the Assets under Administration show substantial increases over those of a year ago. The continued growth of the Company is marked evidence of the public confidence it enjoys. I am going to ask the General Manager in a few moments to address you, and he will deal at length with the balance sheet.

Year's Business Most Satisfactory.

On the 19th day of May last, Mr. Z. A. Lash, K.C., LL.D., one of the Vice-Presidents of the company, celebrated the 50th anniversary of his call to the Bar of the Province of Ontario. I think it fitting, therefore, on this occasion for me to acknowledge on behalf of the Shareholders, the Board of Directors, the General Manager and the other Executive officers, the signal service which Mr. Lash has rendered to the Company. He has been a Director and one of the Vice-Presidents of the Company since its organization, and in those capacities has given largely of his time and ability to further its interests. Moreover, his great influence has been instrumental in directing to the Company business of the very highest importance.

It is with deep regret your Directors have to record the death during the year of Mr. George H. Watson, K.C., who was a member of the first Board of Directors and was reelected at each annual meeting of Shareholders since that time. Mr. Watson always evinced an active interest in the affairs of the Company. Your Directors also deeply regret having to record the death during the present month of the Hon. Mr. George W. Brown of Regina, a member of our Western Advisory Board. Mr. Brown was a good friend of the Company and took a keen interest in its affairs.

Subscriptions to War Funds.

During the year your Directors authorized the following subscriptions: $1,000 to the Toronto Military Service Fund of the Young Men's Christian Association; $1,000 to the Navy League of Canada; $500 to the Catholic Army Huts; $250 to the Italian Red Cross Society.

These, with the subscriptions of $10,000 to the Toronto and York County Patriotic Fund Association, and $250 to the Maple Leaf Club, previously authorized, make a total of $13,000 paid during the year 1918. In addition, your Directors have since December 31st, 1918, authorized a further subscription of $1,000 to the Salvation Army Huts, payable this year. Before moving the adoption of the Report I will ask the General Manager to address the meeting.

General Manager's Remarks.

The General Manager, Mr. W. E. Rundle, spoke as follows: The President has referred to the gratitude we all feel at the victorious ending of the war and to the splendid achievements of Canada.

My first desire, therefore, upon rising to address you this afternoon is to express our heartfelt sympathy with the relatives and friends of those of our staff who, during the war, gave their lives in the service of their country. Fifty-three of our men enlisted, of whom nine were killed in action, one died in service, while many others were wounded. We feel a pride in the part played by our staff, and to keep its recollection ever before us, a fitting memorial is in contemplation. Of those who have survived 12 have already returned to the service of the Company and the others will be welcomed back as soon as they have received their discharge from the Army.

I also desire to call the attention of the shareholders today to the loyal and cheerful manner in which the staff at home discharged the added duties and responsibilities imposed upon them by the absence of those at the front.

Net Earnings Increase.

A year ago I pointed out that before we again met, the Company would have attained its twentieth birthday, and I promised to review its progress during the twenty-year period. Before doing so, however, you will doubtless expect me to make some comment upon the Report of your Directors just presented. I believe you will consider it an eminently satisfactory one. The net earnings again increased substantially and were equal to slightly over 17¾ per cent. upon the Capital, or 8 9/10 per cent. upon the combined Capital and Reserve. This result has been obtained through the increased volume of our business, and notwithstanding the marked reduction again in 1918 in our mortgage loans, which bore a higher rate of interest than do the Government securities in which the funds were reinvested.

JAMES RYRIE
Elected to the Board of Directors, National Trust Company

If the Shareholders will refer to the Company's reports for the years prior to the war, they will note the steady increase from year to year in mortgage loans. On the other hand they will observe from the reports of subsequent years the striking decrease in these loans all through the period of the war. High prices for farm products have not only enabled the farmers of Canada to meet their interest payments promptly, but to reduce the principal indebtedness as well.

As mortgage loans were paid off instead of reinvesting in mortgages the Company adopted the deliberate policy of investing the monies in Government securities. This ange represents in the part the Company's effort to meet the obligation resting upon it to assist our governments in financing Canada's part in the War by taking up as large a share as possible of the War Loans.. Of the various War Loans put out by the Dominion Government alone, we subscribed $7,686,600 for ourselves and our trusts. In addition we bought Provincial Government securities as well as some of these issued by Allied Governments.

The war being at an end, we shall resume our effort to increase our mortgage loans, a class of investment which, both as to rate of interest and security, we have found most excellent.

How Profits Were Distributed.

You will observe that in distributing the balance at the credit of the Profits Account your Directors,—after making certain contributions to Patriotic, Red Cross and other like funds, and provision for the Dominion Government War Tax, and after providing for a dividend of 10 per cent. to the Shareholders,—have added $100,000 to the Reserve Fund; written $50,000 off Office Premises; and set aside $50,000 to a Special Reserve for new branches. The Reserve Fund is now greater than the Capital and stands at $1,600,000, while the Capital is $1,500,000. The amount written off Office Premises is simply the continuation of a policy adopted some years ago.

Company to Open Vancouver Office.

With regard to the amount set aside for new Branches your Directors have recently had under consideration certain recommendations of the General Manager for the extension of the Company's business in Western Canada. It is not so long ago that our Branch Offices in that part of the Dominion were almost solely mediums for the lending of money on mortgage. Trusteeships were few. The great increase in wealth, however, which has come to Western Canada in recent years has enlarged the demands for the services of the Corporate Trustee. We think it is the part of wisdom—and will be to the advantage of the Shareholders—to keep abreast of the development of the Western Provinces even if for a few years and until new branches become self-supporting they need some assistance from the Head Office. Where a Company confines itself, as we do, to a purely Trusteeship and Agency business, and refuses to engage in the promotion financing or underwriting of new enterprises, or in the development or exploitation of real estate, it takes time to establish a Branch Office upon a paying basis. Executorships, Trusteeships and Agencies obviously come slowly and are of gradual development while the remuneration allowed us in connection therewith is small compared with the work and responsibility involved. Hence the decision of your Directors to avail themselves of the opportunity afforded by the excellent profits of the past year and to set aside the sum of $50,000 for the purpose to which I have referred. At an early date the first step in pursuance of the policy of extension will be taken by opening an office in Vancouver, B.C.

Assets Increase $3,000,000.

An outstanding feature of the Report for 1918 is another large increase—namely $3,000,000—in the Assets under Administration, which now aggregate $80,091,670.74. These yearly increases evidence a general feeling throughout the country that a Trust Company is the best and safest administrator and custodian of estates and trust funds. The public is rapidly coming to realize that the personal trustee is not the best agent for executing trusts. Even the impression—formerly so strong—that personal administration is more economical than trust company administration is dying out. The impression probably arose from the fact that personal executors were often unwilling to accept fees for a service which they performed through motives of friendship and so gave their services gratis. In reality such a course was seldom economical for the estate, and it had few other advantages. It made unfair exactions from the executor in time and responsibility, and in personal loyalty and generosity and it often left out of consideration the executor's ability to manage the property entrusted to him

It would be fairer to say that free service by personal executors is more frequently an extravagance than an economy and growing experience with trust companies and with personal executors is establishing a general conviction that a corporation is the rational choice for fiduciary positions.

Our investments are of the highest character, and it will be of special interest to the Shareholders to know that, although since the outbreak of the war in 1914, the tendency of prices of first-class securities has been downward, the bonds, debentures and stocks held on Capital and Guaranteed Trust Accounts are carried in the balance sheet presented to-day at figures substantially below their present market prices.

Record of Twenty Years' Progress.

And now I come to a sketch of the Company's progress during its short life of twenty years. Put into a paragraph it is this. In August, 1898, the Company opened its doors in King Street, Toronto, for business. It had a capital of $1,000,000, with a reserve of $250,000. These two items constituted the whole of the Assets under its administration. It had no Trusteeships; in fact, no other business than to invest the sums mentioned. It had but the one office and a staff of five. To-day we have six offices in Canada and a special representative with office in London, England. Our staff numbers 218. Our capital has grown to $1,500,000, and the Reserve to $1,600,000, while the Total Assets under Administration amount to over $80,000,000. Nor is the full story. In addition to the Assets under our Administration we have been appointed Trustee for bond issues aggregating hundreds of millions of dollars, and Transfer Agent and Registrar for the shares of Companies whose combined capitalization amounts to hundreds of millions more, while we are also trustee in scores of escrow transactions where the value of the properties held on behalf of others also runs into large figures. The duties performed under these trusteeships are varied and bring the Company into touch with a very large clientele. Since the war broke out our services have been sought to no inconsiderable extent by British, French and Belgian capital to look after their interests abroad.

I submit that the record of achievement I have so hastily outlined is one of which the Shareholders may feel proud. I am sure it far surpasses even the greatest expectations and hopes of its founders.

It might be interesting to illustrate the Company's rapid growth by giving the Assets under Administration at different periods, five years apart, beginning with 1898, the year of incorporation:—

1898 Assets under Administration ...	$ 1,250,000.00
1903 Assets under Administration ...	6,773,342.60
1908 Assets under Administration ...	17,021,994.72
1913 Assets under Administration ...	44,515,502.17
1918 Assets under Administration ...	80,091,670.74

Before closing I should like to say a word or two about the growth generally of Trust Companies. It is well known that as the wealth of the citizens of a country accumulates, the necessity for a Trustee increases. This is not only true in the more personal and private sphere of administering estates under wills, but in scores of other ways too numerous to mention, which modern relations, both personal and corporate, have imposed upon business and society.

Growth of Trust Companies.

While the greatest development of the modern trust company has been in the United States, it is of unusual interest to us to know that the Trust Company idea had its origin within the British Empire. In 1830 a Select Committee of the British House of Lords appointed to inquire into the affairs of the East India Company, presented its report, in which attention was directed to financial concerns in India, known as Agency Houses, which for some time had been carrying on a sort of agency or trust business. It may further surprise many of you to learn that the idea of a Public Trustee also originated in India, and dates back to the days of the East India Company.

In Europe the personal trustee held full sway until recent years. But even in conservative Britain there is now a marked tendency to demand the services of a corporate or official Trustee. As estates became larger, more valuable and varied in character, experience—at times bitter experience—taught the necessity for a trustee with undoubted financial responsibility and trained capacity.

In the United States the demand for a corporate trustee has become universal. Thus the growth and success of Trust Companies there has been phenomenal, especially during the last twenty-five years. In 1891 it was authoritatively reported that there were 171 companies in that country. By 1918 there were 2,141 companies.

For the total assets administered by United States Trust Companies there are no complete figures available, but conservative and expert estimates place the present aggregate at approximately nineteen billions of dollars. How faithful these companies have been as trustees is shown by an equally remarkable record. The Trust Company has won its way in the United States, and fully merits the high and influential place it occupies.

Trust Company Development in Canada.

In Canada, although charters were issued earlier, we really date our history of Trust Companies from 1882, when the first company actually began business.

At the time our own Company was incorporated in 1898 (20 years ago) the assets under the administration of Canadian Trust Companies amounted to $15,000,000. Now, according to the latest and fullest figures available, they amount to $489,000,000. Product as it is, of practically the last twenty years, this volume of property under the administration of Canadian Trust Companies is impressive. The twenty-year period referred to coincides with the period of Canada's greatest material progress. But when we remember that Canada is only at the starting point of her economic development we get some glimpse of the future possibilities and prospects for Trust Companies in Canada.

The confidence which I expressed a year ago in the continued prosperity of the Company has been borne out, and I look forward to another year of progress.

In closing I desire to acknowledge the valuable services of Messrs. Thomson, Dickson & Shaw, and of Messrs. Finlayson, Auld & Mackechnie, agents of the Company at Edinburgh and Glasgow, respectively.

Mr. H. B. Walker seconded the adoption of the report, which was carried unanimously.

National Trust Company, Limited

DIRECTORS' REPORT FOR 1918

The Directors have pleasure in submitting herewith their Twenty-first Annual Report, showing Statement of the Assets and Liabilities of the Company as at 31st December, 1918, together with the Profit and Loss Account for the year ending on that date.

The net Profits, after providing for all cost of Management, Directors' and Auditors' Fees, Contingencies, etc., amount to $266,784.35. To this must be added the sum of $122,398.62 brought forward from 1917, making the total at credit of Profit and Loss Account $389,182.97, which has been appropriated as follows:—

(a) To pay four quarterly dividends at the rate of 10 per cent. per annum, amounting to $150,000.
(b) To transfer to Reserve Fund, $100,000.
(c) To transfer to Special Reserve for New Branches, $50,000.
(d) To write off Company's Office Premises, $50,000.
(e) To pay subscriptions to Patriotic, Red Cross and other funds, $13,000.
(f) To provide for Dominion Income Tax, $14,000.
(g) To carry forward in Profit and Loss Account, $12,182.97.

Respectfully submitted,

J. W. FLAVELLE, President.

The meeting then adjourned.

At a subsequent meeting of the Board of Directors, SIR JOSEPH FLAVELLE, Bart., was elected President and MESSRS. Z. A. LASH, K.C., LL.D., E. R. WOOD and W. E. RUNDLE, Vice-President, and the following were appointed members of the Advisory Board at Winnipeg: A. McT. CAMPBELL, Manager Canada Life Assurance Company, Winnipeg; SIR DOUGLAS CAMERON, K.C.M.G., Ex-Lieutenant-Governor Province of Manitoba; KENNETH MACKENZIE, Director Canada Life Assurance Company, Winnipeg; GEORGE W. ALLAN, M.P., of Messrs. Munson, Allan, Laird & Davis, Barristers, Winnipeg.

MONTREAL BOND HOUSE TO OPEN IN TORONTO

Douglas MacLeod, of Toronto, who has returned from overseas, has joined the organization of Nesbitt, Thomson and Company, Limited, Montreal and Hamilton, and will represent them in Toronto, where the company intend opening an office in the near future. Before going overseas Mr. MacLeod was secretary to H. A. Richardson, general manager of the Bank of Nova Scotia, Toronto.

BANKS AUTHORIZED TO EXPAND NOTE ISSUE

A proclamation has been issued by Ottawa authorizing the banks of Canada to issue excess circulation from and including the 1st of March next until August 31st. Prior to the war this authorization was for the purpose of permitting the banks to finance the moving of the grain crops and the extension was made in September. Since the war began, however, circulation has been so high that the banks have requested this authorization each year at an earlier date, it now being, as mentioned, from March to August, inclusive.

Messrs. A. J. Pattison, Jr., and Company, members of the Toronto Stock Exchange, have moved their office from 156 King Street West to 106 Bay Street, second floor.

At a general meeting of the Southern Okanagan Land Company, Limited, of British Columbia, special resolutions were passed calling for the voluntary winding up of the company and the appointment of John Power, Penticton, as liquidator.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt Station for the week ended February 21st, 1919:—

Hudson Bay, 61,538; Coniagas Mine, 88,000; Buffalo Mine, 88,000; Penn Canadian Mine, 104,399; O'Brien Mine, 63,998; La Rose Mine, 81,425; Kerr Lake Mine, 88,255; total, 575,615.

The total since January 1st is 2,947,358 pounds, or 1,478.6 tons.

A chamber of commerce has been formed in Niagara Falls, which has absorbed the board of trade. The board has handed over its charter to the new organization.

The Standard Bank of Canada

The Forty-Fourth Annual Meeting of the Shareholders of The Standard Bank was held at the Head Office, 15 King Street West, on Wednesday, the 26th inst. A large number of Shareholders was present.

The chair was occupied by the President, Mr. Wellington Francis, K.C., and Mr. E. A. Bog, Chief Inspector, acted as Secretary to the Meeting and read the following report:—

In presenting the Forty-fourth Annual Report and Statement of the affairs of the Bank for the year ending 31st January, 1919, your Directors have pleasure in stating that the results for that period have been satisfactory.

The Net Earnings amount to $697,443.71, after provision has been made for bad and doubtful debts, interest on deposits, rebate on current bills under discount, Provincial taxes, and cost of management. This amount, added to the balance of Profit and Loss Account, $175,215.82, brought forward from last year together with $46,710 for premium on new stock issued, makes the sum of $919,369.53

This has been appropriated as follows:

Four quarterly dividends at the rate of 13% per annum	$453,892.99
Contributed to Officers' Pension Fund	20,000.00
Contributed to Patriotic and Kindred Funds ..	36,600.00
War Tax on Bank Note Circulation to 31st Dec., 1918	34,839.64
Premium on new stock	46,710.00
Reduction of Bank Premises Account	100,000.00
Balance of Profit and Loss Account carried forward	227,326.90
	$919,369.53

Your Directors record with deep regret the death, in October last, of our late President, Mr. William F. Cowan, who had been closely associated with this Bank for the past forty-three years, occupying the position of Vice-President from 1875 to 1883, and President from 1883 to 1918. The valuable services rendered by Mr. Cowan during that time have materially contributed to the growth and development of the Bank. The vacancy caused by Mr. Cowan's death has been filled by the election of Mr. Wellington Francis, K.C., who has been a Director of the Bank since 1902, holding the office of Vice-President since 1913.

Mr. Herbert Langlois has been elected Vice-President.

During the year Branches and Sub-Branches have been opened at Bindloss, Alta.; Bon Accord, Alta.; Coaldale, Alta.; Parkland, Alta.; Raymond, Alta.; Stirling, Alta. (sub. to New Dayton); Wayne, Alta.; Paynton, Sask. (sub. to Maidstone); Gray, Sask. (sub. to Regina); Ashern, Man. (sub. to Eriksdale); Eriksdale, Man.; and Goodwood, Ont. (sub. to Stouffville).

The Branch at Paisley, Ont., was closed.

The usual inspection of the Head Office and Branches has been made and the duties of the staff have been faithfully and efficiently performed.

The regular audit of the Bank's affairs has been made by Mr. G. T. Clarkson, C.A., and his report is appended herewith. Mr. Clarkson's name will be again submitted at the Annual Meeting for re-appointment as Auditor for the ensuing year.

WELLINGTON FRANCIS,
President.

Toronto, 31st January, 1919.

President.

C. H. EASSON,
General Manager.

AUDITOR'S REPORT TO THE SHAREHOLDERS.

I have compared the above Balance Sheet with the books and accounts at the chief office of The Standard Bank of Canada, and the certified returns received from its branches, and after checking the cash and verifying the securities at the chief office and certain of the principal branches on January 31st, 1919, I certify that, in my opinion, the Balance Sheet exhibits a true and correct view of the state of the Bank's affairs according to the best of my information, the explanations given to me and as shown by the books of the Bank.

In addition to the examination mentioned, the cash and securities at the chief office and certain of the principal branches were checked and verified by me at another time during the year, and found to be in accord with the books of the Bank.

All information and explanations required have been given to me, and all transactions of the Bank which have come under my notice have, in my opinion, been within the powers of the Bank.

G. T. CLARKSON, F.C.A.,
of Clarkson, Gordon & Dilworth, Toronto, Canada.

Toronto, February 15th, 1919.

The President addressed the meeting and the General Manager reviewed the Statement, after which the usual motions were passed and the scrutineers appointed, reported the following Directors elected for the ensuing year: Wellington Francis, K.C., W. F. Allen, H. Langlois, [illegible] W. Cowan, T. H. Wood, James Hardy, T. B. Greening.

At a subsequent meeting of the Directors Mr. Wellington Francis, K.C., was elected President, and Mr. H. Langlois Vice-President.

C. H. EASSON,
General Manager.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first two weeks in February, 1919:—

Canadian Pacific Railway.

	1918.	1919.	Inc. or dec.
February 7	$2,096,000	$2,579,000	+ $483,000
February 14	2,306,000	2,883,000	+ 577,000
February 21	2,435,000	2,729,000	+ 294,000

Grand Trunk Railway.

February 7	$ 480,714	$ 905,449	+ $424,735
February 14	531,316	947,889	+ 416,573
February 21	683,121	974,220	+ 291,099

Canadian National Railway.

February 7	$1,003,473	$1,436,757	+ $433,284
February 14	1,147,484	1,545,442	+ 397,958
February 21	1,061,581	1,505,872	+ 444,291

CANADIAN GUARANTY TRUST COMPANY

Net profits of $15,396 were earned during 1918 by the Canadian Guaranty Trust Company of Brandon, Manitoba, and after transferring $5,000 to reserve fund and paying a dividend of $9,867 they were able to carry forward $5,129 as compared with $5,099 last year. The company does business not only in Brandon but also throughout Manitoba and Saskatchewan. Its shareholders number about 350 people, scattered from Montreal to Victoria. Most of the directors are local men, and the board also includes Mr. W. M. Martin, of Saskatchewan; Hon. G. W. Brown, ex-lieutenant-governor of Saskatchewan, and others well known in the west. The company has been appointed by the Manitoba government as official administrator of the Dauphin judicial district, and of the Northern judicial district; it also administrates estates in all the judicial districts in Manitoba and Saskatchewan.

In 1910, shortly after the organization, the assets were $233,000; in 1914 these had grown to $1,113,000, and for the year 1918 they totalled $1,920,000.

NATIONAL TRUST COMPANY MEETING

The addresses given at the annual meeting of the National Trust Company held in Toronto on February 27th indicated a regard for the weighty problems which Canada faces in the near future. The president, Sir Joseph Flavelle, reviewed the part which the nation has played during the war period and outlined what would be required during the period of recovery. Regarding the company itself he said everything was thoroughly satisfactory. He also referred to the patriotic subscriptions of the company, totalling over $15,000.

The general manager, Mr. W. E. Rundle, took up in more detail the actual financial position of the company. This has already been reviewed in the columns of *The Monetary Times*, and appears in full elsewhere in this issue. The net earnings were almost 18 per cent. upon the capital, a dividend of 10 per cent. being paid. Mr. Rundle gave a sketch of the growth of the company since its commencement in August, 1898. In 1903 its assets totalled $6,773,000 as compared with over $80,000,000 at present. He also referred to the growing appreciation of trust companies and of the services which they render.

The National Trust Company now has offices, in addition to the head office in Toronto, in Montreal, Winnipeg, Regina, Saskatoon and Edmonton. It was announced at the meeting that a branch in Vancouver would be opened soon. The company is second in Canada as regards size and volume of business; its directorate includes many of the leading financiers in Canada, and there is also an advisory board in Winnipeg composed of western men. Two new directors have been elected, namely, Mr. James Ryrie, and Mr. F. W. Harcourt, K.C.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	1 29-32 pm	1 15-16 pm	....
Mont. funds	Par	Par	⅛ to ¼
Sterling:—			
Demand	4.8480	4.85	4.87
Cable transfers ...	4.8555	4.8575	4.88

Rate in New York:—Sterling demand, 4.75¾.

Bank of England rate, 5 per cent.

SEED GRAIN LOANS MAY CEASE

The Alberta government intends to give up the system of making seed grain loans to farmers at the earliest opportunity. This was the intimation conveyed by several members of the provincial cabinet to members of the executive council of the United Farmers of Alberta last week. There was a meeting of the cabinet to discuss the presentation of resolutions adopted at the recent United Farmers' Association convention.

The seed grain resolution adopted by the convention was the first one discussed, and while there was some division of opinion, the majority of the government cabinet seemed inclined to the idea that the sooner the government got away from the system of giving aid to farmers who could not succeed, the better. The idea was that except in cases of real emergency, if a farmer could not stand on his own feet, it would be best for him to get out of the business. It was stated, however, that some provision will be made for a measure of relief this year, and the amendments presented by the convention will be given further consideration.

JANUARY BANK RETURNS

The total deposits of Canadian banks as shown in the January bank statement to the Dominion government show an increase. Preliminary figures are now available and the complete statement will be given in *The Monetary Times* next week. In September, 1918, before the last war loan was placed on the market, savings deposits reached the high-water level of $1,039,500,000. Payment of war loan subscription brought the total down, but it is now again climbing towards the billion dollar-mark. During January there was an increase in savings deposits of 31½ million dollars, bringing the total at the end of the month to $990,000,000. During the whole war period, from August, 1914, to January, 1919, in spite of heavy investments in domestic war issues, savings deposits increased about fifty per cent. Bank returns for January also show a decrease in demand deposits, a decrease in deposits outside Canada, and a decrease in call loans both in and outside Canada.

The principal figures for the month are:—

	January, 1919.	December, 1918.
Reserve fund ....$	116,129,125	$ 116,015,825
Note circulation	203,424,472	224,501,117
Demand deposits	622,919,410	711,034,060
Notice deposits	990,000,085	958,473,557
Deposits outside Canada	203,015,797	206,845,143
Current coin	80,563,677	79,315,616
Dominion notes	196,323,477	175,744,885
Deposits, central gold reserve	105,650,000	130,900,000
Call loans in Canada.	87,598,427	89,120,423
Call loans outside ...	140,819,656	150,248,322
Current loans in Canada	1,080,340,861	1,075,640,003
Current loans outside	126,153,338	119,153,924
Total liabilities	2,356,774,539	2,488,251,632
Total assets	2,603,275	2,689,835,121

DIRECTORS' REPORT TO THE SHAREHOLDERS AND MEMBERS OF

THE LONDON MUTUAL FIRE INSURANCE CO. OF CANADA

Your Directors herewith submit the 59th Annual Statement and Balance Sheet, duly certified by the Auditors, showing the Assets and Liabilities of the Company as at December 31st, 1918.

The Gross Premium Income of the Company amounted to $621,597.16, an increase of $10,335.93 over the year 1917.

The Gross Losses amounted to $387,035.96, an increase of $41,488.84 over 1917.

The Cash Surplus of the Company has been increased by the sum of $7,258.30 over that shown in the Dominion Blue Book for 1917, and now stands at $164,317.87.

The Reinsurance Reserve, full Government Standard, now stands at $275,491.43.

The total Cash Security for policyholders is $164,317.87, in addition to which there are premium notes, of which the assessed and unassessed portions amount to $259,764.04. These, added to the Cash Surplus, give a total Surplus to Policyholders of $424,081.91, increasing the total Surplus to Policyholders as shown at the end of 1917, by $12,273.25.

The retiring Directors are F. D. Williams, H. N. Cowan and S. G. M. Nesbitt, all of whom are eligible for re-election.

Your Directors desire to thank the agents of the Company for their support, and they also wish to express their appreciation of the work of the field and office staffs during the past year.

All of which is respectfully submitted.

A. H. C. CARSON,
President.

Toronto, 20th February, 1919.

		$639,691.53

*In addition to the above there is on hand $103,937.19, being portion of Premium Notes subject to assessment during the next two years.

CERTIFICATE.

We have audited the books of the London Mutual Fire Insurance Company of Canada for the year ending December 31, 1918. We find the books to be in order and all the information asked for has been cheerfully given.

Our examination has included the Cash and Bank Books, Premium Registers, Agents' and Branch Balances, and the securities held by the Company.

We certify that the annexed Balance Sheet is in accord with the books, and in our opinion is a full and fair statement of the position of the Company on that date.

HEAD OFFICE, WINNIPEG, MAN.

Eighth Annual Report of the Directors

To the Shareholders:

Your Directors beg to present for your consideration their Eighth Annual Report, accompanied by the Statement of Assets and Liabilities and Revenue and Expenditure for the year ended December 31st, 1918, as certified by the Company's Auditors.

At the beginning of 1918, while it was confidently hoped that the war would terminate before the end of the year, it was unreasonable to expect any degree of improvement in general business conditions. The year will always be remembered as one of the most momentous in the world's history, including, as it did, periods of great anxiety and uncertainty, but with the ever present feeling that victory would eventually come to our allied forces.

Under the circumstances, having due regard for the continuance of war conditions, your Directors are pleased indeed to be able to report that the Company experienced a successful year.

While no large increases in our business were hoped for, yet, from the standpoint of volume of business, low loss-ratio and other departments of our business, the results for the year were very satisfactory.

The amount of business written by the Company in 1918 was $22,520,425.00, or $2,518,079.00 in excess of 1917. Only in one previous year did the Company write more insurance and that was in 1915, when the amount was $23,223,662.00. With the return to normal times and a resumption of building operations which may be expected after the necessary readjustment of labor conditions has been effected and the prices of building material have reduced considerably, the volume of fire insurance will be materially increased, which should result in a substantial addition to our premium income.

Premiums on our gross insurance written in 1918 were $287,208.72 as compared with $240,824.04 in the previous year, showing a gain of $46,384.68. Re-insurance premiums in 1918 amounted to $97,091.82, an increase of $14,207.55. Gross insurance in force at December 31st, 1918, totalled $31,775,452.00, being an increase of $698,722.00 over last year, the premiums thereon being $457,705.38 compared with $4[illegible]1,604.36 for 1917.

Re-insurance in force at the close of the year totalled $8,700,103.00, on which the premiums amounted to $115,912.57. Net insurance in force at December 31st, 1918, was $23,075,349.00, the premiums thereon amounting to $341,792.81.

The fire waste in Canada in 1918 is estimated at $35,000,000.00, exclusive of forest fires. This amount, however, includes quite a large amount of uninsured property. The net losses in Canada in 1916 and 1917, incurred by all fire companies operating in the Dominion, were $17,220,231.00 and $18,685,024.00 respectively. The net losses in 1918 will no doubt be considerably in excess of these figures.

It will be seen, therefore, that the year 1918 was not a very profitable one in Canada for the fire companies generally. As regards this Company, your Directors are pleased to state that our fire loss-ratio was only 43.79% compared with the satisfactory record of 46.65% in 1917. The average loss-ratio for all fire companies in Canada in 1917 was 52.42%, this being 7.46% less than the average for a period of forty-nine years, from 1869 to 1917. The Company's net fire losses for the year amounted to $83,209.94, which includes $6,095.14 Halifax fire losses in the conflagration of December, 1917.

During the period of the war, or, in other words, a time of depression and disturbed business conditions, the fire hazard was greater than in normal times, and it is a matter for congratulation that this Company was able to maintain such a reasonably low loss-ratio. Every possible precaution was taken with this end in view, and the results have proved the wisdom of declining doubtful and undesirable risks, and that the volume of business is second only in importance to that of obtaining high-grade risks. This policy will be strictly adhered to.

In the matter of the Company's securities, it will be seen that they consist chiefly of mortgages. These mortgages are upon improved city and farm properties, and amount to $1,532,208.01. It will be gratifying to learn that payment of interest and principal showed considerable improvement over the preceding year. With the funds which had accumulated during the year, the Company was enabled to subscribe for another $250,000.00 of Dominion War Bonds; the total subscription by the Company in these Bonds to date amounts to $555,000.00, the amount paid thereon at December 31st, 1918, being $329,983.03. While these bonds yield a lower rate of interest than our first mortgages, thereby reducing to a certain extent the earning power of the Company, your Directors realized the great importance of making a success of the Victory Loan Campaign, and accordingly subscribed for another $250,000.00 in 1918, which action on their part will no doubt be heartily approved by the Shareholders.

As mentioned in the last Annual Report, a Contingent Fund of $75,000.00 was created for the purpose of meeting any contingencies which might arise from depreciation in any of the Company's securities and, continuing this conservative policy, an additional sum of $25,000.00 has been set aside, bringing the Contingent Fund up to $100,000.00.

The item, Stocks, Bonds and Debentures, in the Financial Statement, now amounts to $447,040.12, including $329,983.03 paid on account of Dominion War Bonds. With a substantial amount invested in readily convertible securities, the Company's financial position, as regards liquid assets, has been materially strengthened and has the additional advantage of eliminating in a large measure the necessity of maintaining large cash reserves. The amount in banks and on hand at the close of the year amounted to $72,321.62.

The reserve set aside for unearned premiums, or, in other words, the Dominion Government Reserve, amounted to $142,393.66, an increase over the previous year of $17,867.74 accounted for by the increase in business written during the past year.

Re-insurance premiums (held on deposit) which relate to our foreign treaty companies were $61,012.44, being an increase of $4,234.83.

Revenue for the year may be divided into two classes—profits from mortgages, stocks, bonds and miscellaneous sources, $151,092.06, and net fire premiums, after deducting cancellations, rebates and re-insurance, $190,116.90. The total revenue for the year amounted to $341,208.96, a gain over the previous year of $35,063.26.

The expenses for the year showed a slight increase over the previous year due to commissions paid on a larger volume of fire insurance written in 1918.

The usual dividend of six per cent. was declared on the Capital Stock, the amount being $107,375.37, an increase of $2,181.78, due to the amount paid last year on Capital Stock, that is, $33,029.05. In amount of dividends, this Company ranks second among our Canadian fire companies, and the same remarks apply in respect to paid-up capital which, at December 31st, 1918, was $1,795,077.70.

The important item from the standpoint of the assured, i.e., surplus to policyholders, now amounts to $2,040,916.03, the largest surplus of all our Canadian fire companies, and of all the British and Foreign fire companies operating in Canada, only three British companies have a larger surplus to policyholders.

Too much importance cannot be attached to the strong financial position which this Company has attained, and this has been accomplished in the short space of about eight years.

Now that the World War is practically a thing of the past, we in Canada may look forward hopefully to the future. This will be a very eventful year, in which practically the whole world is affected, and until the Peace Conference, now in session, shall have concluded, and the definite peace terms agreed upon, made known to the world, it is difficult to accurately predict at this time what developments will follow.

However, so far as our Dominion is concerned, there is already abundance of evidence at hand that a period of readjustment has arrived and many complex problems will have to be faced. Compared, however, with many other countries, Canada will be less affected, and as she arose to the occasion during the war so she undoubtedly will face the new situation with a strong feeling of assurance and confidence. Greater production in all lines, extended markets for her products, combined with national, as well as individual, effort and determination will combine for the general good and prosperity of our Dominion.

With the splendid organization possessed by this Company it will be in a position to take full advantage of the returning prosperity, and while thanking the Shareholders for their continued support and patronage, your Directors would again impress upon the Shareholders the importance of active co-operation, and trust that even a larger measure of patronage will be extended to the Company this year than has been the case in former years.

It is with a feeling of warm appreciation that your Directors refer to the untiring efforts of the Officers and Staff, and they also wish to thank the numerous Agents of the Company for their splendid co-operation during the past year.

J. H. G. RUSSELL,
President.

Winnipeg, February 19th, 1919.

The election of Directors for the current year resulted as follows:— J. H. G. Russell, Dr. A. D. Carscallen, Lt.-Col. D. E. Sprague, W. T. Alexander, W. J. Boyd, E. L. Taylor, K.C., F. H. Alexander, S. D. Lazier, Toronto, Ont ; Col. the Hon. A. C. Rutherford, Edmonton, Alta.; F. N. Darke, Regina, Sask.; Thos. S. McPherson, Victoria, B.C ; Andrew Gray, Victoria, B.C.

At a subsequent meeting of the new Board, Mr. J. H. G. Russell was elected President; Lt.-Col. D. E. Sprague and F. H. Alexander, Vice-Presidents; and W. T. Alexander, Managing Director.

AUDITORS' REPORT.

To the Shareholders:—

We beg to report that we have audited the Books and Accounts of The Canada National Fire Insurance Company for the year ending 31st December, 1918, and have found them properly stated and sufficiently vouched. We have verified the Cash on Hand and in Banks and the Mortgages and other Securities. In our opinion the Balance Sheet presents a correct view of the state of the Company's affairs as at 31st December, 1918, according to the best of our information and the explanations given us, and as shown by the Books of the Company.

(Signed) D. A. PENDER, SLASOR & CO.,
Chartered Accountants.

BANK BRANCH CHANGES

Branches of Canadian banks have been opened recently as follows:—

Church Point, N.S.	Royal Bank of Canada.
Cedarvale, Ont.	Royal Bank of Canada.
Naramata, B.C. (sub-branch)	Bank of Montreal.
Marquis, Sask.	Dominion Bank.

The Bank of Hamilton has closed their branches at Marquis, Sask., and Whitechurch, Ontario.

BILL AGAINST TRAMWAY CONTRACT DEFEATED

The bill to cancel the contract accorded to the Montreal Tramways Company last year was defeated on February 19th, by the Private Bills Committee of the Quebec Legislative Assembly. Every clause in the bill which also asked a return to the aldermanic system of civic government, was voted against. Only two members of the committee were for the repeal of the tramways contract, Mr. Mayrand, who fathered the bill, and Ald. Turcot, member for Laurier. Mr. Sauve, leader of the Opposition, refused to vote on the clause, saying that not enough information had been given.

Ottawa Light, Heat & Power Company, Ltd.

The annual report of the Ottawa Light, Heat and Power Company, Limited, for the year ending December 31st, 1918, presented to the shareholders shows substantial increases in both gross and net revenue.

The gross revenue from all sources was $1,114,915.33, being an increase of $157,614.94, equal to 16¼ per cent. over 1917, while the net revenue was $310,149.69, being an increase of $64,008.91, or almost 26 per cent. over 1917.

Four quarterly dividends at the rate of six per cent. per annum amounting to $209,934.00 were paid.

After providing for bad and doubtful debts the sum of $21,189.90 was carried to the credit of Profit and Loss which now stands at $114,525.27.

The sum of $50,000.00 was carried to Reserve Account which now stands at $770,000.00.

A break in the retaining wall of one of the company's water plants caused an unforeseen expense of about $20,000.00.

The company's new gas plant is showing substantial results in increased business. During the year, 1,400 new gas customers were taken on, and over 1,500 gas stoves were sold.

The main features of the balance sheet for the past two years compare as follows:—

ASSETS.

	1918.	1917.
Property, plant and equipment	$5,944,071.15	$5,761,485.87
Merchandise and stores	173,605.98	148,187.35
Coal and other supplies	155,699.96	60,723.45
Accounts receivable	339,591.05	388,112.15
	$6,612,968.14	$6,358,508.82

LIABILITIES.

Stock	$3,499,120.00	$3,483,520.00
Bonds	1,275,000.00	1,275,000.00

War to Peace

Employers—Give the Returned Soldier a Square Deal

THE intelligent and untiring co-operation of employers throughout the whole of the country is the very keystone around which Canada's repatriation plans must be built.

Many employers are keeping positions open for soldiers who formerly held them. That is as it should be. But it is not enough. There are thousands of men being released from the army who have no definite positions to go to.

Every employer, in taking on new help, should as far as possible give preference to a returned soldier. Firstly, because he owes it to the returned soldier. Secondly, because it is good business to do so,—and here's the reason:—The soldier is a better worker, more efficient and dependable, because of his military training. He is a better citizen with a broader outlook, a clearer vision of the things that matter.

Do not suppose for one minute that the soldier has lost initiative. The man who has been "over the top" is a man who has learned to do a job thoroughly—when it has to be done. He does not work by the clock.

But giving the returned man a job—and the best job you have—is not the only duty employers must discharge.

The returned man must also be given a reasonable chance to "pick up the threads" again.

He does not look for sympathy or for better consideration than those who did not actually serve in the fighting lines. He does not appeal for charity.

But he does demand A SQUARE DEAL.

Ask the Subscription Department
about our Special Book Offer

The feeling in Calgary is that a school of technology should be established immediately and a delegation has been appointed to press the matter on the provincial government. It is also a part of the delegation's mission to ask for the public utility commission's sanction for the selling of $180,000 debentures needed for new schools in the southern city.

The Dominion Linens, Ltd., of Guelph, has addressed a letter to the Department of Trade and Commerce, at Ottawa, suggesting that new Canadian industries be more adequately treated in the weekly bulletin of the department. The letter refers to the extensive space which is frequently given to Japanese products and to the amount of sale with which these products are meeting in Canada.

FIXED WHEAT PRICE ASKED

Saskatchewan Grain Growers Pass Resolution—Endorse Scheme of Half Million Debenture Issue

SASKATCHEWAN farmers gathered at Regina last week, for the annual four-day convention of the Saskatchewan Grain Growers' Association.

Two principal questions that were before the convention were the proposals to fix the price of the Canadian wheat crop for 1919, and the suggestion that the association should throw aside its policy of steering clear of party politics, and should form a people's party with the co-operation of the soldiers and the labor men.

The association decided that as an association they would not enter the political field, but that they would provide facilities which would enable the farmers of any federal constituency in the province to get together and organize themselves for the purpose of electing to the House of Commons a suitable representative prepared to support the farmers' national political platform.

It was the opinion of the convention that the original resolution providing for political action practically committed the association to identification as a political body, and this was considered objectionable, and for this reason the measure was redrafted and carried.

Ask Fixed Wheat Price

A resolution demanding that the government guarantee the price of the 1919 Canadian wheat crop on the same basis as the 1918 price was passed with an overwhelming majority, although some opposition developed, voiced by Capt. Flatt, of Tantallon. Capt. Flatt declared that the returning men would have to share the burden if the price of wheat was fixed, and referred to the resolution as a proposal to place dollars before principle.

In outlining conditions as he found them in Europe, President J. A. Maharg, M.P., expressed the opinion that if railway facilities and capital were available there would be markets in the European countries for the entire world surplus. The tendency in Great Britain, he said, was de-control of industries, and there was a similar tendency in the United States, though there was nothing definite as to the probabilities of an open market in either country at the present stage.

Several delegates expressed the opinion that ruin stared the farmers of Western Canada in the face unless the price of wheat was fixed, and Hon. Chas. Dunning expressed the opinion that the "native industry" should be made secure from the prevailing uncertain condition before hot-house productions. Mr. Dunning also declared that Hoover was very busy in Europe in selling the United States wheat crop, and urged the plea that the Canadian government should have a good, strong organization on the job selling the wheat crop of Canada to the European nations.

The view was expressed that conditions must be made such as to ensure a reasonable opportunity for success to those of the returned men who choose agriculture as their occupation, and the full assurance was given of the desire of the association to co-operate with any organization seeking to help the soldiers. The reference to crop conditions during the year expressed the view that the combination of unfavorable climatic influences, with the enormous increase of costs entering into production, had resulted in conditions in which many of the farmers had been placed in a financial position which was deplorable, and in some cases almost hopeless. "The cost of production has become so great," the board declared, "that the average grain crop of Saskatchewan during the year 1918, left no net margin of profit for the farmer."

More Control Over Trading

The convention supported a scheme to enlarge the trading activities of the organization, as proposed in a recommendation brought down by the executive. The scheme involves the issue of debenture stock to the extent of $500,000, subscriptions to be limited to the members of the association. A warehouse is to be erected in Regina for the purpose of supplying commodities at wholesale rates to co-operative stores and local organizations. The debentures will carry a guaranteed interest rate of 6 per cent., with provision for payment of an additional 2 per cent. before profits are distributed. Future policies affecting the operation of the trading activities are to be dealt with at an annual trading convention, to be held prior to the convention of the general association. Provision is made for representation of stockholders on the association's central board.

The proposal was adopted and before the close of the afternoon session more than $60,000 stock had been subscribed by delegates at the convention. The scheme was inspired for the purpose of giving the central organization greater control over the trading operations, the operations during the past year having shown a loss of more than $7,000. One of the great difficulties in the way of successful operation under the plan previously in existence was the tendency of local organizations to secure their supplies from central on a credit basis, and as a result the financial statement showed an item of $120,000 for outstanding accounts.

It was also suggested as an adjunct to the scheme that the association establish a chain of stores throughout the province as soon as sufficient capital has been raised to warrant this step.

Explains Credits Act

Geo. W. Prout, of the Manitoba legislature, addressed the convention on "The Manitoba Short-Term Credits Act." When Mr. Prout concluded his address there was a demand from the convention for a statement from the Hon. C. H. Dunning, of his view of the Manitoba scheme and a statement indicating whether such a plan could not be applied in Saskatchewan.

Mr. Dunning said that he was convinced that excellent work had been done in Manitoba by the system Mr. Prout described. Some years ago he had been a member of a commission which investigated rural credits and out of the report of that commission grew the Saskatchewan farm loan board, which deals with one branch of the problem, or could do so if adverse influences peculiar to this time had not limited the loans to the board. The system was sound, however, and he hoped they would stand behind it. Under this plan the government borrows money at 5 per cent. on a ten-year bond, the lender being able to get his money back at three months' notice, and loans at 6½ per cent. to the farmer. This, however, did not touch short-term credits. The association had gone on record on this subject; it had taken the ground many times that the solution of the banking question in so far as agriculture was concerned lies in a change in the Bank Act of Canada, which would permit of the establishment of local units as it is in the United States, with a supporting federal reserve system.

"The real root of the trouble," declared Mr. Dunning, "is not touched, because you have to go to the chartered bank to get the money you loan."

Up to the present time in Manitoba the credit societies had experienced no difficulty in securing all the money needed, at the rate of 6 per cent., to lend at 7 per cent.

The Saskatchewan government, he said, had been watching the Manitoba experiment with very great interest. He believed it was doing good work and he had no doubt that, if the convention after considered study of this subject and not by a trapshot judgment, asked for the application of a similar scheme to this province, the legislature would give the grain growers what they wanted.

Grain Growers' Bank

A Grain Growers' Bank of Saskatchewan, organized under the present laws governing chartered banks, was suggested by W. T. Badger, M.P.P. for Roselawn. He contended that millions of dollars' worth of Victory Bonds are owned by farmers, and that part of these could be exchanged for stock in the bank, which could be financed without the putting up of a dollar in cash.

A year ago freight traffic from southern Ontario to the United States was badly congested, but this year business is so slack that some of the lines carrying on this traffic have been forced to cut down their service.

WHAT THE TARIFF HAS DONE

"If the tariff has done nothing else to justify its existence," said Mr. J. S. McKinnon, vice-president of the Canadian Manufacturers' Association, "it has at least made possible a huge increase in domestic manufactures, enabled thousands of Canadians to find employment and thus help to back up our armies in the field." The speaker was addressing the meeting of the People's Forum, Toronto, on February 23rd. Referring to the future, he said:—

"If the exportation of the manufacturing industry of this country should during reconstruction drop from $700,000,000 as in 1918 to $43,000,000 as in 1913, we would have serious depression. There is no manufacturer in Canada who is not thinking of this and endeavoring to prevent it, and it behoves every citizen to give heed and to give help to the manufacturer.

"Manufacturers are interested in the unrest which is evidenced all over the world. The unrest in Canada is only a part of the unrest that other countries are experiencing. We have probably less in Canada than in any other country. The chief cause, undoubtedly, is the uncertainty of the future. Men are fearful when the welfare of their families is not guaranteed for any considerable time in the future. The surprising feature to me of the whole situation is not that there should be so much unemployment at this time, but that there should be so little when the tremendous problem is considered.

"I believe the future is promising. If we can get through the next few months a definite improvement will be evident throughout all Canada. The winter will soon be over, and I think that in the spring and summer we can begin to look for improvement in the labor situation."

NAKUSP AND SLOCAN RAILWAY

The first mortgage four per cent. bonds of the Nakusp and Slocan Railway Co., which fell due on July 1st, 1918, were redeemed in accordance with an agreement made with the government of British Columbia, which had guaranteed the issue. The Nakusp and Slocan Railway was built in 1894 and was leased to the Canadian Pacific Railway Co. for 25 years. It is also controlled by the Canadian Pacific. An issue of first mortgage 20-year bonds to the amount of £132,960 was made with the guarantee of the provincial government. Early in 1918 an agreement was made between the provincial government and the Canadian Pacific, that the railways should purchase bonds from the province in return for which the latter should surrender the mortgage which it possesses and all other claims against the road, and this agreement is to be ratified by a bill just brought before the legislature. This will place the Nakusp and Slocan Railway entirely in the hands of the Canadian Pacific.

WHEN INSURANCE COMPANIES ERR

In a case regarding insurance which has been brought into a New Jersey court recently the attorney for the plaintiff, who is bringing action against an insurance company under a policy contract, maintains that insurance companies frequently resort to doubtful means to defeat loss claims. The attorney for the plaintiff is Mr. William B. Ellison, New York, who is a well-known specialist in legal questions regarding insurance. In a recent letter addressed to the judge who is handling the case, he pointed out that fraud and false swearing are crimes, and that action should be taken to prosecute those who give evidence of this kind. "It is no secret," he said, "and I have become convinced that it is not infrequently the case that an insurer resorts to peculiar means to defeat loss claims. This is so of disreputable ones only, but those honestly and ably managed suffer from the odium that is thus brought upon them by the others. And this condition may account for the attitude that our courts and juries so frequently display towards an insurer."

TORONTO SAVINGS AND LOAN COMPANY

The year 1918 resulted in a slight decrease in the profits of the Toronto Savings and Loan Co., of Peterborough, Ont., as compared with the year 1917. The principal results were as follows:—

	1917.	1918.
Balance in profit and loss	$ 36,147	$ 36,701
Net profit for the year	150,554	147,903
Total	$186,701	$184,604
Dividends at 10 per cent.	100,000	100,000
Transferred to reserve fund	50,000	50,000
Balance carried forward	36,701	34,604

The profits were, it will be observed, scarcely sufficient to make the usual appropriations and the balance carried forward was, therefore, slightly reduced. Assets now total $4,047,188, as compared with $4,044,438 last year, the reduction being made in the investments. The quantity of deposits outstanding decreased by $19,000. The reserve fund is now $1,100,000, exceeding the amount of paid-up capital stock, which is $1,000,000.

FARM LOAN POLICY CRITICIZED

On Tuesday, February 18th, district representatives in Ontario of the federal department of agriculture, met for the purpose of discussing the farm loan scheme of the Dominion government for the benefit of returned soldiers. The meeting was called at the initiative of Mr. H. C. Schofield, ex M.P.P., chairman of the provincial loan advisory committee of the Soldiers' Settlement Board, and the Hon. G. S. Henry, minister of agriculture in the province.

The farming experts, with a few exceptions, were decidedly of the opinion that while the scale of loans was a generous one, the terms of repayment would impose too heavy a load upon the soldier launching out as a farmer. Under the federal scheme a returned soldier may secure a loan up to $4,500, provided he has $500 of his own, for the purchase of a farm, an additional $2,000 for the purchase of stock, and another $1,000 if he makes certain improvements.

Under the repayment scheme the soldier-farmer, if he took the maximum loan on the land of $4,500, and the $2,000 loan for the purchase of stock, was, according to the district representatives, up against a tough proposition. On the main loan he had to start with a payment of about $350—5 per cent. for interest and 2 per cent. off the principal. This was not so bad, though there were some who urged the deferring of all payments until the farmer got on his feet—but the terms of the $2,000 loan for stock purchases called for repayment in four annual instalments of $500, and interest after the first two years, in which no payments were required. Thus, in the third year, the soldier-farmer would have a payment of $850 to meet, plus interest on the $2,000. The district representatives maintained that a farmer could not carry this burden on any farm that could be bought for $5,000.

After a good deal of discussion the gathering, upon the suggestion of Mr. Schofield, put their objections into two resolutions, one urging the government to permit the repayment of the $2,000 in eight annual payments (after the first two years), and the other to permit such a loan to be made to a farmer on leased land. It was held that in many cases soldiers could lease splendid farms that could not be purchased for the amounts provided, and that the government should assist a man to get on his feet on a leased farm by helping him to buy stock. Mr. Schofield promised to take the matter up with the authorities at Ottawa.

With the idea of banding together to protect the interests of rural municipalities, the Rural Municipalities Association of Ontario, which was organized last fall through the efforts of Reeve John Forgie and deputy Reeve F. H. Richardson, both of Pickering, held its first annual convention in Toronto last week.

EXCHANGE RATES IN 1918

The Course of Exchange Rates on European Countries in New York During 1918

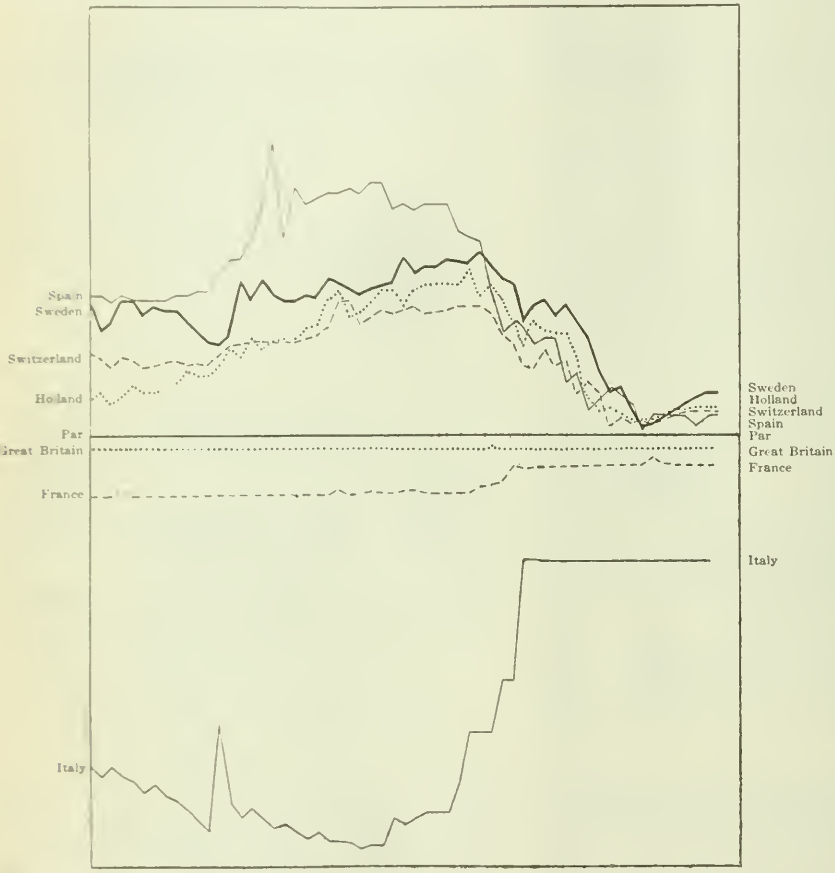
By W. J. Little, B.A.

The accompanying chart shows the fluctuations of exchange rates on European countries in New York during the year 1918. The outstanding features of the course of the exchanges during that time as revealed by the chart may be summarized as follows:—

1. Strength of English and French Exchange.

The values of the English pound sterling and the French franc in New York have been consistently maintained during 1918. Since the end of 1915 sterling exchange in New York has been subject to very few fluctuations and those were within narrow limits; and the rate has been maintained at a discount of approximately a little over two per cent. During the past year the rate for cable transfer on London has been stationary at $4.76 7/16 per £1, with the exception of early in August when it went up to $4.77⅛, the highest since January, 1916.

The rate of exchange on Paris has also been maintained by governmental control since early in 1916, but during the latter half of the year 1918 there was a marked strengthening of the rate for francs, the discount being reduced from between ten and twelve per cent. to between four and six per cent., the highest rate quoted since 1915 being 5.38 francs per $1 in November.



2. The Course of Exchange on Italy.

Once more the fluctuations in Italian exchange have been marked, and a new low record was reached at the end of May, when exchange on Rome was quoted at over 76 per cent. discount. In June governmental action was taken with a view to stabilizing Italian exchange, with the result that at the end of August the rate had been fixed at a discount of approximately 23 per cent., and during the latter four months of 1918 the rate for live exchange in New York has remained stationary and at a higher point than had been reached since the fall of 1915, with the exception of once in the month of May, 1916.

3. The Movement of the Neutral Exchanges.

The upward movement of exchange rates on neutral countries, especially noticeable during 1916 and 1917, was even more marked during 1918. Exchange on Spain was quoted at a new high point in April, the Swiss rate made a new high record in May, while August exchange rates on Holland were at the highest point quoted during the war. When in August the tide of victory began to flow in favor of the allies there was at once a decided movement of rates on neutral countries in favor of New York. Just to what extent that tremendous movement, which continued until early in November, when the armistice was signed, has resulted from the measures of support taken by the United States treasury to stabilize the exchange rates on neutral countries and how much it has been influenced by the victory of the allies over Germany, it is impossible to say.

4. A Return to Normal Rates.

Viewing the general trend of the rates, both on allied and neutral countries, since last August, it is apparent that there has been a decided movement towards a near approach to the limits within which fluctuations took place prior to July, 1914. It seems almost safe to say that with the close of the year 1918 we have come to the end of the period during which exchange rates soared and dropped in skyrocket fashion as economic theories of exchange, generaly accepted, were universally discarded as the practical necessities of war-time finance regulated the course of the exchanges.

The extent to which the exchange rates on allied countries were maintained by governmental action despite the adverse conditions tending to send those rates to an enormous discount; and the real response of exchange rates to the great events of the last six months—especially marked in the course of the rates on neutral countries—a response which clearly demonstrates that the foreign exchanges may still be regarded as an international barometer,—these were the two great outstanding features of the foreign exchange market in New York during 1918.

CO-INSURANCE

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

GOODYEAR RUBBER ISSUE

The Goodyear Rubber Co. of Canada has disposed of the balance of preferred stock in treasury, and the whole authorized issue of $1,500,000 is now outstanding. The company's employees have subscribed for $200,000 treasury shares at $95, and the Toronto Stock Exchange house of Bongard, Ryerson and Co., have disposed of $500,000 in New York, to yield a slightly better figure.

CANADA NATIONAL FIRE INSURANCE COMPANY

This company, whose head office is in Winnipeg, experienced a loss ratio of 43.79 per cent. in 1918, as compared with 46.65 per cent. in 1917. This is in contrast with the average loss ratio of 52.42 per cent. for all the companies operating in Canada during the year 1917, as compared with an average of 59.88 per cent., covering the period from 1869 to 1917. This result, in view of the extensive fires, is quite good. The company wrote business to the amount of $22,520,425, as compared with approximately $20,000,000 in 1917. The gross premiums amounted to $287,208, an increase of $46,385, and net premiums amounted to $190,117, an increase of $32,177.

The revenue of the company for 1918, which showed a gain of $35,063 over the previous year, amounted to $341,208. After providing for all management expenses, war taxes and sundry other charges, there remained a balance of $159,113, which was apportioned as follows: Transferred to the Dominion government reserve, $17,867; a dividend of 6 per cent. per annum, amounting to $107,375; $25,000 carried to the contingent fund, which now stands at $100,000; and the balance, amounting to $7,869, added to the net surplus.

The company purchased in 1918 another $250,000 of Dominion government war bonds, making a total subscription to date of $555,000. The amount of actual cash paid thereon at December 31st, 1918, was $329,983. A marked improvement was noticed during the year in the matter of interest payments on mortgages, a large increase being shown over the previous year.

WATERLOO COUNTY LOAN AND SAVINGS

The Waterloo County Loan and Savings Co. earned $102,846 during the financial year 1918, and a small balance brought forward, together with premium on stock issued, increased the total income to $108,439. Interest on deposits and debentures required $41,500 and expenses, including taxes, amounted to over $16,000. Besides paying a dividend amounting to $26,000, the company was able to carry $15,000 to the reserve account and $3,500 to contingent account.

The assets now total $1,846,046. Dominion and provincial government bonds comprise $423,000, mortgages $590,000 and municipal bonds $592,000. The balance consists of cash on hand, real estate, etc. Deposits, debentures, etc., total $1,256,335, capital stock $482,000 and reserve and contingent fund $93,000.

At the end of 1914 the company's assets totalled $566,000, and an interesting feature of the development during the intervening years is seen in the fact that mortgages at that time comprised about 80 per cent. of the assets, whereas now they comprise 32 per cent., the difference being made up by holdings of government and municipal bonds. During the same period deposits and debentures have increased from $208,000 to $1,256,000. Advantage has been taken of the low prices prevailing to secure large amounts of good bonds which have already appreciated considerably in value. The mortgage loans are fairly equally distributed in the provinces of Ontario, Manitoba and Saskatchewan, and very few of them are giving any trouble as is indicated by the fact that the amount of real estate owned is less than $40,000. The Manitoba mortgages are mainly situated in the city of Winnipeg, and are mostly for small amounts.

CROWN TRUST COMPANY

As a result of the business of the Crown Trust Co. during the year 1918, it was able to pay a dividend at the rate of 6 per cent. per annum, and add $5,000 to the balance carried forward. The income totalled $80,361, and the expenditure $45,606, leaving $34,754 to be carried to surplus account. There was a balance in this account from last year of $50,348, which made a total of $85,102. After deducting the dividends at 6 per cent. on the capital stock of $500,000, there is a balance left of $55,102.

The assets on capital account total $692,143, and on trust account $2,362,424, as compared with $679,885 and $2,157,943, respectively, last year. The business is, therefore, making quite satisfactory progress.

At the annual meeting held at the head office in Montreal on the 18th inst., the following directors were elected: Col. W. I. Gear, Major-Lieut.-Col. G. W. Birks, H. B. Benwood, W. W. Hutchison, A. Lyman, Alex. MacLaurin, Col. J. McKergow, E. C. Pratt, Brig.-Gen. F. S. Meighen, C.M.G., R. W. Reford, Brig.-Gen. Jas. G. Ross, C.M.G., J. W. Ross, F. N. Southam, L. C. Webster and Major-Gen. E. W. Wilson, C.M.G. The manager is Mr. Irving P. Rexford.

AETNA LIFE INSURANCE COMPANY

The 69th annual statement of the Aetna Life Insurance Co., of Hartford, Conn., shows an increase of over $5,000,000 in premium income, as compared with the premium income of $17,377,000 last year. The assets increased by $9,000,000, and the insurance in force by over $100,000,000, bringing the total up to almost $675,000,000. Detailed figures regarding the year's results appear elsewhere in this issue. This company does a vast business extending both throughout the United States and in the foreign countries, its chief agent in Canada being Mr. F. H. Christmas, of Montreal. It was incorporated in 1820, and commenced business in Canada in 1850. The assets in Canada, held solely for the protection of Canadian policyholders, total over $5,000,000, and other assets in Canada, such as loans to policyholders, etc., bring the total to over $6,000,000. The Canadian investments include substantial amounts in war loans and provincial bonds, and in municipal and school debentures. The company's subscribed and paid-up capital is $5,000,000, but this security for policyholders is far outweighed by the surplus on capital account which totals $12,164,000, making a total of over $17,000,000.

In addition to the chief agent for Canada and Montreal, a business here is also handled by Johnson and Orr, Toronto, T. B. Parkinson, London, Ont., and Douglas J. Johnston, Winnipeg.

CANADIAN FIRE INSURANCE COMPANY

The Canadian Fire Insurance Co., of Winnipeg, has, on the whole, reason to be satisfied with the results of 1918 business. The results, as compared with last year, were briefly as follows:—

	1917.	1918.
Premium income	$432,283	$474,394
Reinsurance premiums paid	130,313	152,263
Losses (less reinsurance)	118,537	133,156
Expenses, etc.	92,776	103,888

A notable feature of the losses item is the fact that there was a balance of $6,500 remaining from the 1917 reserve for incurred but unadjusted losses, which resulted in less provision being necessary for the same purpose this year.

A balance of $60,000 was carried forward in the general revenue account and the total available, including the balance brought forward from 1917, and the interest on investments, totalled $318,092. Dividends at the rate of 6½ per cent. were paid and after meeting all other items a balance of $224,000 is carried forward, exceeding that of the previous year by $34,000. The assets total $1,556,836, an increase of $43,000, the addition being mainly represented by investments on mortgages, bonds and debentures.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Mount Royal, Que.—Messrs. Credit-Canada, Limitee, Montreal, have purchased $200,000 town of Mount Royal 5 per cent. bonds, due 1944, and will offer the bonds to the public on a 6 per cent. basis.

Port Arthur, Ont.—At a meeting last week the finance committee recommended that a by-law for the issuing and selling of debentures for $80,000 for the construction and improvements to the electric railway be passed, and that another by-law covering the issue of debentures for $20,000 for telephone work be also passed. The treasurer was also authorized to consolidate the debentures of the waterworks department.

British Columbia.—The following certificate has been issued by the municipal department of the province of British Columbia under date of February 15, 1919: The corporation of the city of Victoria, by-law No. 2024, "Local Improvement Assessment Consolidation By-law No. 18, 1918," payable $4,000 in each of the years 1919, 1920, 1921, 1922, 1923, 1924, 1925, 1926, 1927 and $3,775.86 in 1928, interest at 6 per cent. payable half-yearly.

Edmonton, Alta.—Separate sealed tenders will be received by the debenture branch of the Department of Education until March 10th, 1919, on nine blocks of school district debentures, amounting to $33,700, as follows: Block No. 1, Village School District, 10-years 7 per cent.—Minburn S.D., $6,000. Block No. 2, Consolidated School District, 10-years 7 per cent.—Skiff Con. S.D., $3,500. Block No. 3, Rural, 8-years 7 per cent.—South Valley S.D., $2,500. Block No. 4, Rurals, 15-years 7 per cent.—Plaxtol S.D., $1,500; Greenlawn S.D., $2,000; Giffen S.D., $2,500; Craig Murray S.D., $1,800; total, $7,800. Block No. 5, Rurals, 10-years 7 per cent.—Carlshill S.D., $1,000. Block No. 6, Rurals, 10-years 7 per cent.—Lovedale S.D., $2,000; Beehive S.D., $1,600; Mount Vernon S.D., $2,500; total, $6,100. Block No. 7, Rurals, 10-years 7 per cent.—St. Mary's S.D., $2,000; Garrett S.D., $2,000; total, $4,000. Block No. 8, Rurals, 10-years 7 per cent.—Cheviot Hills S.D., $800. Block No. 9, City School District, 10-years 7 per cent.—Sacred Heart Roman Catholic Separate School District No. 15, $2,000.

Sault Ste. Marie, Ont.—Messrs. C. H. Burgess and Co., of Toronto, were the successful tenderers for a block of $51,997 Sault Ste. Marie bonds by bidding 101.72. The bonds were in three lots: $9,226 were 6 per cent. 20-years; $24,771 were 6 per cent. 30-years; and $18,000 were 5½ per cent. 30-year bonds. At the price paid the bonds will yield 5.70 per cent. The following is a list of tenders:—

C. H. Burgess and Co., Toronto	$52,892.08
A. E. Ames and Co., Toronto	52,611.29
Brent, Noxon and Co., Toronto	52,539.00
Wood, Gundy and Co., Toronto	52,357.00
Dominion Securities Corporation, Toronto	52,145.39
National City Co., New York	52,016.29
G. A. Stimson and Co., Toronto	52,001.29
A. Jarvis and Co., Toronto	51,909.32
Mulholland, Bird and Graham, Toronto	51,748.13
Canada Bond Corporation, Toronto	51,515.00
R. C. Matthews and Co., Toronto	51,391.00
Imperial Bank, Toronto	51,026.00
Spitzer, Rorick and Co., Toledo, Ohio	50,829.62

Town.—Rosthern, $4,000; Wood, Gundy and Co.

---

*To be sold in the next Local Government Board sale.

HAMILTON TAX RATE INCREASED

The Hamilton board of control has decided to increase the tax rate. The new levy will be 32 mills, a straight increase of 5 mills over the 1918 rate. In making this recommendation the controllers make an explanation to the public that, of the total estimated revenue of $3,769,640, the council has absolutely no control of $2,425,460, or 64 1-3 per cent. Of the $1,344,180 available for controllable expenditures, provision must be made for overdrafts of other years. Half of the total overdraft of $283,000 is provided for by this rate, the balance being left for next year's council to handle.

HARBOR COMMISSION BONDS SOLD

Messrs. Wood, Gundy and Co., of Toronto, have purchased $3,000,000 worth of Toronto Harbor Commission bonds. These are 35-year 4½ per cent. bonds and the price is 84.71, the same as that at which the last issue of $1,000,000 was sold last December. This means that the city is borrowing at the rate of 5.48 per cent., which is lower than the Victory Loan. This will make up the $4,000,000 required for harbor improvements. The sale of these bonds is taken as an indication that the city intends to proceed vigorously with the further work of harbor improvements along with the Dominion government.

"This four million will finance the harbor improvements through the reconstruction period," asserted the mayor, "and they can now go on with the active development. Within a year the harbor board should be able to carry its own fixed charges for sinking fund, etc., out of revenue. We are now within $150,000 of our fixed charges at present, but with the acquisition of many new industries, this deficiency will be obtained from the new leases, and the harbor board, like the hydro, will carry its own fixed charges."

The money by-law in connection with the York Township Hydro proposition, calls for $200,000, to cover cost of purchasing existing lines in the township and of building extensions.

The Protestant school rate in Montreal has been raised from 60 cents per $100 to 70 cents per $100, and the tax on the neutral panel from 60 to 80. The bill of the Protestant School Commission asked for an increase of 20 cents on the Protestant rate and 10 cents on the neutral panel.

Intimation is given that the Brantford tax rate this year will be 34 mills, as compared with 30½ the past year. The difference is due to the cost of the Emergency Hospital and to increased salaries and wages to the school teachers, firemen, police and works employees.

Mr. Bert Hall, of the Vancouver branch of the Royal Trust Co., has joined the staff of the Royal Financial Corporation, Rogers Building, Vancouver, as salesman in the bond department, which is under the direct supervision of Mr. E. B. McDermid, managing director. Mr. Hall is well known in financial circles in that city.

NEW RIORDON FINANCING

Big Pulp and Paper Company Expanding—Old-Established Company to be one of Largest Manufacturers of Sulphite Pulp in America

As mentioned in *The Monetary Times* of February 7th, a Canadian-American syndicate headed by Royal Securities Corporation, Limited, who have associated with them in the transaction Wm. A. Read and Company, of New York, and E. H. Rollins and Sons, Parkinson and Burr, and Coffin and Burr, of Boston, have purchased from the Riordon Pulp and Paper Company, Limited, $4,000,000 of six per cent. 10 year general (closed) mortgage bonds. The Riordon company is well known to Canadians as being one of the oldest established manufacturers of pulp and paper in the Dominion.

The purpose of the new financing is the construction for Kipawa Company, Limited, one of the Riordon subsidiaries, of a new 30,000-ton bleached sulphite mill on Lake Temiskaming in Northern Ontario, which mill is expected to be in operation by December, 1919. When this new mill is completed, the Riordon company will have a total capacity of 119,000 tons of bleached sulphite pulp, easy bleaching sulphite pulp, soda pulp and book paper, an output which will establish the Riordon position as one of the largest manufacturers of sulphite pulp on the continent.

The location of the new Kipawa plant is of the utmost importance to the Riordon company. The location of the new mill on Lake Temiskaming enables the company to draw on the wood and power reserves of the water-sheds of the Quinze and Kipawa Rivers, which have a combined area of 12,800 square miles and contain approximately 29,000,000 cords of pulpwood. With regard to freight facilities to markets, the new Kipawa mill will be on the same basis as Ottawa points.

The new bond issue is secured by a general mortgage on all the Riordon plants and by collateral deposit of the controlling interest in the Ticonderoga Pulp and Paper Company, of Ticonderoga, N.Y., a flourishing Riordon subsidiary, and the controlling interest of the Kipawa Company, Limited. With this new issue of $4,000,000 of bonds the Riordon company will have a total of $6,285,000 of bonds outstanding against fixed assets of $15,000,000 and net liquid assets of $2,250,000. Fixed assets are, therefore, two and one-half times, and net liquid assets over 37 per cent. of, the total bonded debt including the new issue. Net earnings of the Riordon company for the past three years have been more than four times the interest on all outstanding bonds including the new issue. The bonds are, therefore, very thoroughly secured.

The American syndicate associated with Royal Securities Corporation offered their allotment of the underwriting in the American market privately a week or so ago and it is understood that their entire participation was sold within two days. During the past two weeks a large portion of the part of the issue taken by Royal Securities Corporation has been underwritten by Canadian investors, and, elsewhere in our columns, the unsold portion of the balance is being offered for public subscription. The Riordon issue is the largest piece of Canadian industrial financing carried out for some time and should prove popular with the Canadian public. Not inappropriately, it is an issue representative of the Canadian pulp and paper industry, which during the war has made great strides as an exporting industry with good promise that the ground gained will be added to under peace conditions.

Part of the security for the new issue of $4,000,000 six per cent. 10 year bonds of the Riordon company consists of a direct lien upon the Riordon holdings of over 60 per cent. of the capital stock of the Ticonderoga Pulp and Paper Company.

The Ticonderoga Pulp and Paper Company operates at Ticonderoga, N.Y., a soda pulp mill with a capacity of 18,000 tons a year and mills for the manufacture of high-grade book papers with a capacity of 16,000 tons a year.

Ticonderoga's year of operations ended December 31st, last, and showed the Riordon subsidiary to be in a flourishing condition.

Capitalization stood at $685,000 of closed mortgage bonds and $388,000 of common stock. Plant and fixed assets were carried at the very conservative valuation of $1,498,000; net liquid assets, after deducting current liabilities, stood at $436,000, making total assets of $1,934,000. Deducting the $685,000 of bonds outstanding, assets available for $388,000 common stock, were over $1,200,000, giving a book value of over $300 per share for Ticonderoga common—a very valuable asset for the Riordon company.

During the year, Ticonderoga paid a total of $649,200 in dividends on the $388,000 common stock, of which disbursement the Riordon company's share was sufficient to pay nearly one and one-half times the interest on all outstanding Riordon bonds, including the new issue.

PETROLIA BONDS

Messrs. Wood, Gundy and Co., of Toronto, have purchased an issue of $10,000 7 per cent. 10-instalment bonds. These bonds were issued for the equalization of the debenture debt. The price paid was 105.11. Tenders were as follows:—

Wood, Gundy and Co., Toronto	105.11
Brent, Noxon and Co., Toronto	105.11
C. H. Burgess and Co., Toronto	104.71
Turner, Spragge and Co., Toronto	104.53
G. A. Stimson and Co., Toronto	104.51
Sterling Bank of Canada, Toronto	104.18
A. Jarvis and Co., Toronto	104.17
W. A. Dyment and Co., Toronto	103.91
A. E. Ames and Co., Toronto	103.44
W. L. McKinnon and Co., Toronto	103.00

NEW MUNICIPAL FINANCE LEGISLATION

An amendment to the Arrears of Taxes Act has been passed by the Saskatchewan legislature enabling cities to issue bonds to the extent of the amount due by way of taxes on property acquired at tax sales. These issues, however, will be subject to the approval of the local government board. It will not be necessary that debentures should be issued for the full amount of the tax for which the lands have been taken over. In addition to the ordinary municipal taxes these forfeited lands are liable for school taxes and the municipality is bound to pay to the school boards the taxes owing on these lands; consequently should debentures be issued in sufficient amount to defray the school taxes the purpose of the amendment will be accomplished.

RIORDON PULP AND PAPER COMPANY

Riordon figures for the year ending December 31st, 1918, are not yet ready for publication. It is understood, however, that plant and property assets, carried at the 1912 valuation, less a very large amount for depreciation written off in the last five years, are carried at about $7,300,000. Net liquid assets, after deducting all current liabilities, will stand at approximately $2,700,000, making total assets of $10,000,000, compared with a total of $6,028,500 Bonds outstanding, including the new issue of General Mortgage Bonds now being made to finance construction of the Kipawa mill.

Riordon earnings for 1918, after depreciation and bank interest, will show first mortgage bond interest earned more than eight times, and, after payment of first mortgage bond interest, a balance equivalent to over three and one-half times the interest on the new issue of general mortgage bonds. These earnings make no allowance whatever for the profit which will accrue to the Riordon Company, from the investment in the Kipawa property of the proceeds of the new issue.

Statistics relating to Dominion Savings Banks, Post Office Savings Banks, National Debt, Building Permits Compared, Index Numbers of Commodities, Trade of Canada by Countries, and Preliminary Monthly Statement of Canada's Trade appear once a month as issued by the various Government departments.

The Dominion Savings and Investment Society

Forty-sixth Annual Meeting of the Society was held on February 11th, 1919, at 11 o'clock a.m., pursuant to notice

There were present: Messrs. T. H. Purdom, K.C., President; W. J. McMurtry, Toronto; George Angus, Alexander Purdom, John Purdom, James T. Moses, J. Wilson Purdom, E. D. Parke, W. W. Purdom and Nathaniel Mills.

The chair having been taken by the President, Mr Purdom, the Manager, Mr. N. Mills, was called upon to act as Secretary and to read the Annual Report, as follows:—

Forty-Sixth Annual Report to the Shareholders of The Dominion Savings and Investment Society

The Directors beg leave to submit their report for the year ending December 31st, 1918, together with the Financial Statement of the affairs of the Society.

Great Britain and the Allied nations have won a victorious peace. The world war is ended. Canada, which took its full share in the war, will enter on a new period of growth and prosperity. There is room in Canada for many millions of happy homes in addition to those now in existence. Mortgage Corporations have contributed towards the building of homes and settling of lands. They are essentially an institution of the people, and in a new country very necessary and desirable. The laws of Canada and of each Province should freely encourage them.

The net profits for the year amounted to the sum of $54,374.09, and the balance at the credit of the Contingent Account was $3,925.48, making together the sum of $58,299.57. Out of this amount the usual half-yearly dividends, amounting to the sum of $46,742.75 were paid, the sum of $10,000 added to the Reserve Fund, which now amounts to the sum of $270,000, leaving the balance of $1,556.82 at the credit of the Contingent Account.

The difficulties resulting from the war were overcome, and now that peace has been happily restored the outlook is bright.

The books of the Society have been regularly audited by Messrs. John Lochead and W. J. Harvey, whose certificate is attached to the Financial Statement.

All the Directors retire annually, and are eligible for re-election.

Respectfully submitted, T. H. PURDOM, President.

NATHANIEL MILLS, Managing Director.

We hereby certify that we have made a regular audit of the books of the Dominion Savings and Investment Society for the year 1918. The cash, bank accounts and vouchers have been kept under careful examination. All postings have been checked, all entries in the Society's ledgers have been verified, and the accompanying statements of "Profit and Loss" and "Assets and Liabilities" are, in our opinion, a correct showing of the affairs of the Society.

JOHN LOCHEAD, } Auditors
W. J. HARVEY, }

London, January 25th, 1919.

The report was unanimously adopted, and the following gentlemen were then elected Directors for the ensuing year:—

T. H. Purdom, K.C., W. J. McMurtry, Alexander Purdom, John Milne, John Purdom and Nathaniel Mills.

At a subsequent meeting of the Directors Mr. T. H. Purdom, K.C., was elected President, and Alexander Purdom Vice-President

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three per cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter, payable on and after Saturday, the first day of March next, to Shareholders of record of 31st January, 1919.

By order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 21st January, 1919.

UNION BANK OF CANADA

DIVIDEND No. 128

Notice is hereby given that a dividend at the rate of 10% per annum upon the paid-up Capital Stock of the Union Bank of Canada has been declared for the current quarter, and that the same will be payable at its Banking House in the City of Winnipeg, and also at its branches, on and after Saturday, the 1st day of March, 1919, to shareholders of record at the close of business on the 14th day of February next.

The transfer books will be closed from the 14th to the 28th day of February, both days inclusive.

By order of the Board.
H. B. SHAW,
General Manager.

Winnipeg, January 16th, 1919.

PATON MANUFACTURING CO. OF SHERBROOKE

Notice is hereby given that a Dividend of (4%) Four per cent. and a bonus of (2%) Two per cent. for the half-year ending January 31st, have been declared payable on the 15th day of March next, to Shareholders of record of the 28th instant.

By order of the Board.
A. D. BRODIE,
Secretary.

Sherbrooke, February 19th, 1919.

MARCUS LOEW'S THEATRES, LIMITED

Notice is hereby given that the Directors have declared a Special Dividend of ten per cent. on the Company's common stock payable on the 1st day of April, 1919, to shareholders of record on the books of the Company on the 20th day of March, 1919.

By order.
SAMUEL D. FOWLER,
Secretary

Toronto, 24th February, 1919.

THE CANADA LANDED AND NATIONAL INVESTMENT COMPANY, LIMITED

DIVIDEND No. 128.

Notice is hereby given that a Dividend of Two and One Quarter per Cent. (being at the rate of nine per cent. per annum), on the amount paid up on the Capital Stock of this Company, has been declared for the quarter-year to the thirty-first day of March, 1919, and that the same will be payable at the office of the Company, 23 Toronto St., Toronto, on and after the first day of April, 1919, to Shareholders of record at the close of business on the fifteenth day of March, 1919.

By order of the Board.
EDWARD SAUNDERS,
Managing Director.

Toronto, 26th February, 1919.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of two per cent. (2%) on the Common Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 31st March, 1919, payable April 1st to shareholders of record March 15th, 1919.

By order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.

Montreal, February 19th, 1919.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

GENERAL SECRETARY WANTED for the new Association of Canadian Building and Construction Industries. Preference will be given to young men who have had engineering education and construction experience. Good salary to the right man. Headquarters will be Ottawa. Must be good organizer. Send applications to President of the Association, 65 Victoria Street, Montreal.

The city of Welland and Welland County have come to an agreement regarding some road money which has been disputed for some time. The origin lay in the separation of the city from the county when it was incorporated as a city.

BANK OF HAMILTON ISSUE

The complete terms of the new issue of Bank of Hamilton stock have now been announced. The bank's present capital is $3,000,000, but an additional $1,000,000 is being issued at a price of $150, present shareholders having the privilege of subscribing in the ratio of one share of new stock to three shares of old. This action was decided upon at the annual general meeting held on January 19th, and has been approved by the Treasury Board of the Dominion government. The stock is to be in ten payments of $15 per share each as follows:—

26th March, 28th April, 31st May, 2nd July, 2nd August 2nd September, 3rd October, 3rd November, 4th December and 5th January.

On and after March 1st, 1919, shareholders may pay in advance any or all instalments and be entitled to participate in subsequent dividends accordingly. The right to accept allotments expires on May 23rd, 1919.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Hollinger Consolidated Gold Mines.—The annual meeting of the company was held at Montreal, the president, N. A. Timmins, presiding.

After the meeting it was announced that the board of directors had been reduced from seven members to six, P. A. Robbins, who is now in California, being no longer a member of the board, which is now made up only of members of the old board.

At the meeting the shareholders voted the sum of $30,000 to be paid to the directors for services rendered to the company, and the president reviewed the work of the company for the past year, and satisfaction was expressed at the good progress made, despite the great difficulties under which the company had been working.

Trethewey Silver-Cobalt Mines, Ltd.—During the year ended December 31st, 1918, the company did no development work, for the reason that there is now no territory on the property in which this could be carried on with promise. But Mr. I. S. McReavy, the mine manager, says that several promising veins have been encountered in the Castle property. None of these have been followed up, the policy being to drive to the contact first. "From what information it has been possible to gather," said Mr. McReavy, "best results will be obtained near the contact. Therefore, the work during the early part of 1919 is looked forward to with considerable expectation. The general geological conditions to date have been of a nature most favorable to the deposition of ore."

The mill on the Trethewey treated a total of 34,546 tons of ore, containing 10.2 ounces of silver to the ton at a cost of $65,432.22, or $1.894 per ton. The average assay of the tailings was 2.4 ounces, showing an extraction of 76.4 per cent. Of the above tonnage, 13,604 tons came from cleaning up No. 1 dump, and the remaining 20,942 tons came from the underground workings. The mill was in operation 97 per cent. of the possible time.

The net value of the production for the year was $250,534.94, with operating costs of $147,166.55, leaving an operating profit of $103,368.39.

Shawinigan Water and Power Co.—Gross earnings of the company in the year ended December 31st, 1918, amounted to $3,621,074, as compared with $2,902,210 for the previous year, an increase in the period of $718,864. The net revenue amounted to $1,410,094, as against $1,350,864 in 1917, an increase of $59,227. Mr. H. J. Fuller, president of the Canadian Fairbanks-Morse Co., was appointed to the directorate to fill the vacancy created by the death of Sir M. Mitchell Thomson, Bart. The balance of the board was reelected.

In his address to shareholders, J. E. Aldred, the president, said:—

"During the year the operating costs have been affected seriously through increased cost of labor and material, insulators, copper coils for generators and many similar items having trebled or quadrupled in price. In spite of these handicaps, it has been the policy of your directors to carry out all necessary maintenance work. On October 1st, 1918, the issue of $2,500,000 of 5 per cent. two-year notes of the company matured and was paid."

Mr. Aldred also pointed out that $917,100 of the 6 per cent. two-year notes was converted into common stock during the year. He further stated that since the end of the fiscal year well over $300,000 of these notes had been converted, so that at the present time the amount converted was close to $1,220,000. The capitalization was increased $1,134,000 during the year to $16,342,500. Another interesting point is the large increase of close to a quarter of a million in reserves and sinking funds, which are given at $2,968,247, as compared with $2,662,205. Total assets are up from $34,[illegible]21,195 to $35,118,143.

Porto Rico Railways Company.—The twelfth annual report of the company for the period ending December 31st, 1918, shows substantial growth in gross earnings and net income as compared with the previous year. Gross earnings totalled $1,035,955, an increase of $133,562, and net incomes was $446,628, an increase of $45,417.

In commenting on the operations for the year the president said:—

"On account of the continuance of war conditions, operating expenses have been higher during the year than ever before, besides which a severe and long continued drouth compelled the company to resort to steam plant operation for several weeks during the summer. This increased our operating expense by over $60,000.

"First mortgage bonds of the company to the amount of $46,000 were purchased and delivered for cancellation in accordance with the sinking fund terms of the trust deed. The total amount so far redeemed is $404,000.

"There has been expended during the year on capital account the sum of $66,839, which has been paid out of earnings.

"After providing for interest charges and dividends on the preferred stock, the surplus earnings amounted to $180,428. This sum, with the undistributed profits as of 31st December, 1918—$123,084—make a total at credit of profit and loss account of $303,513, which has been appropriated as follows:—

Transferred to reserve for depreciation..	$100,000.00
Balance carried forward	203,513.13

"Since the end of the financial year a vacancy on the board has occurred through the death of Col. W. K. McNaught, C.M.G., who has been a most valuable member of the board since the company was first incorporated. The vacancy has been filled by the appointment of Mr. Herbert Langlois."

Canada Steamship Lines, Limited.—Gross revenue of the Canada Steamship Lines for the year ended December 31st, 1918, aggregated $14,094,393, against $13,533,816 for the previous year, an increase of $560,577. Operating expenses amounting to $9,756,313, compared with $9,509,951 the previous year, leaving net earnings last year at $4,338,079 against $4,028,864. The ratio of operating expenses to operating revenue last year was 70.3 per cent., against 71.1 the previous year, 66.8 in 1916 and 78.7 in 1915.

Net profits for the year, after fixed charges, depreciation, war tax and other miscellaneous charges, amounted to $2,324,098, as compared with $2,178,401 the previous year. This balance available for dividends is equal to 18.6 per cent. on the common stock of the company, and after the payment of the preferred dividends amounting to $875,000, the balance was equal to 10.8 on the common, against 17.4 per cent. the previous year before paying the preferred.

Profit on sales last year amounted to $1,276,136 against $941,880 in 1917, and surplus after payment of the preferred dividends amounted to $2,634,876, which added to the surplus carried forward from the previous year brings the total surplus up to $5,009,630, equal to about $40 for each share of the company's common stock.

The principal changes in the balance sheet were an increase of cash on hand of about $775,000 over the previous year, an increase of $200,000 in investments; an increase of $300,000 in inventories, and an increase of $420,000 in insurance and other claims estimated as recoverable on the assets side of the account, and on the liability side, a decrease of $1,250,000 in accounts payable, and one of $1,212,160 in bonds outstanding.

Current and working assets of the company amounted to $5,438,976, against $4,056,008, and current liabilities amounted to $2,602,724 against $3,804,190; the working capital at $2,836,152 against only $260,818 in 1917.

THE KEYSTONE OF THE ARCH

Nothing known in building is stronger than the arch The symbol of the Mutual Principle in Life Insurance. The centre of the arch is the keystone—and "The Keystone of a Life Insurance Organization," says W. O. Chapman, "is management" The three leading constituents in good management are INTEGRITY, ECONOMY and EFFICIENCY. It is well known that the secret of the extraordinary success of the Mutual Life of Canada has been the rigid adherence of managers and directors through fifty years of history to these essential things. It is due to these that in spite of more than four years of devastating war, followed by a blighting pestilence, with the immense losses entailed, yet the strength of the Mutual Life of Canada is unshaken. The keystone ensures the solidity of the organization, and there is no other better qualified to defy the tooth of time than—

Much desirable territory is ready for Agents who can deliver policies in satisfactory volume. Inquiries about localities will have careful attention.

Union Mutual Life Insurance Co.
Portland, Maine
Address: ALBERT E. AWDE, Supt. of Agencies

Public Service Corporation.—The Public Service Corporation of Quebec, the subsidiary of the Shawinigan Water and Power Company, which took over the old Dorchester Electric, showed net profits of $66,621 for 1918, the company's first year. This is fractionally more than 4 per cent. on its capital of $1,600,000 before deductions for reserves.

Loew's Toronto Theatre.—An extra dividend of 10 per cent. has been declared on the common stock of Loew's Toronto Theatre, payable April 1st. The regular dividend for the quarter at the rate of 7 per cent. per annum has also been declared. Bongard, Ryerson and Company, who recently underwrote $200,000 of the stock for Loew's Theatre in London, Ont., disposed of the entire block within forty-eight hours.

Canada Foundries and Forgings Company.—The annual report covering the year's operations of the company to December 31st, 1918, was presented at the annual meeting in Brockville this week. The document is an encouraging one, in spite of the fact that profits from operations show a small decrease from those of 1917. But the fact that this decrease has been held well under the $90,000 mark shows that the company's position as it faced the current readjustment period was altogether satisfactory.

Net profits from operations amounted to $600,956, as compared with $689,769 in 1917, while income from investments amounted to $11,162, as against $5,818. The total income from all sources amounted to $612,118, as compared with $695,587 a year ago, a decrease of $83,469. After providing for increased bond interest of $17,207, comparing with $10,479, and war taxes, administration expenses and donations to patriotic funds of $143,086, as compared with $99,237, a net surplus of $451,825 remained. This compares with $585,873 last year, a decrease of $134,048. Including the balance carried forward from the previous year, the balance available for dividends and write-off amounted to $1,580,107, as against $1,339,482 in 1917, an increase of $240,625. The lowest distribution, eliminating a bonus, took only $182,400, as compared with $211,200 in 1917.

The directors decided to write off $100,000 to contingent reserve account, this being a new item in the statement for this year. After these deductions a balance at the credit of the profit and loss account to be carried forward to the current year of $1,297,706 was left, this comparing with $1,128,282 in the previous statement. The total assets as indicated in the balance sheet continue to show steady growth, being up some $300,000 this year to $4,438,206, and comparing with $4,033,994 at the end of the 1917 fiscal year.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Beaverdale, Que.—February 10—The premises of the Beaver Co., Ltd., manufacturers of beaver board, were damaged. Insurance as follows: Northern, $10,000; Hartford, $10,000; Aetna, $10,000; Nova Scotia, $10,000; Scottish Union, $5,000; Montreal Underwriters, $5,000; Springfield, $5,000; Rochester Underwriters, $5,000; Providence Washington, $5,000; Globe and Rutgers, $3,750; Union of Paris, $3,750; Atlas, $2,500; Niagara, $2,500; British and Canadian Underwriters, $2,500; Royal, $10,000; London Assurance, $10,000; Liverpool and London and Globe, $7,500; Commercial Union, $7,500; Western, $10,000; Providence Washington, $10,000; North America, $7,500; Glens Falls, $7,500; National Union, $7,500; Great American, $2,500; British Traders, $2,500; Union of Canton, $2,500; total $170,000. Loss about $15,000.

The bank account of the Pacific Great Eastern Railway has been transferred from the Union Bank to the Bank of Commerce because the latter is the one with which the British Columbia government, which recently took over the railway, [illegible] its business.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Dartmouth, N.S.—February 20—Large house on Pleasant Street, formerly occupied by the late H. Austen, was damaged. Loss not yet known. Only 70 per cent. insurance was carried.

Montreal, Que.—February 22—The Bonsecours Market was damaged. Caused by overheated heater. Estimated loss, $5,000.

North Bay, Ont.—February 19—Building owned by Rutherglen Milling and Mining Co., was destroyed. Estimated loss, $15,000.

Peterborough, Ont.—February 18—Grocery store of H. M. Dobbin, King and Bethune Streets, was damaged. Caused by overheated stove pipes.

Quebec, Que.—February 24—The large wholesale and retail stores of Mechanics' Supply Co., St. Paul St., were almost entirely wiped out. Estimated loss, $150,000.

Sherbrooke, Que.—February 25—J. M. Nault's dry goods store on King Street was destroyed. Estimated loss, $80,000.

Sillery, Que.—February 18—Dwelling of Mr. A. Laurent, St. Louis Road, was damaged. Insurance as follows: Commercial Union, $15,000; Phœnix of Hartford, $7,000; Liverpool and London and Globe, $5,000; Guardian, $5,000; Royal, $5,000; Quebec, $2,000; total, $39,000. Loss, total.

St. John, N.B.—February 21—Warehouse of the Nashwaak Pulp and Paper Co., Ltd., Fairville, was destroyed with contents. Estimated loss, $30,000, covered by insurance.

Sydney, N.S.—February 21—The McKenna Garage on George Street was destroyed. Estimated loss, $40,000, with little insurance.

Thorold, Ont.—February 23—Plant of the Thorold Basket Co. was damaged. Estimated loss, $20,000.

Toronto, Ont.—February 21—Vulcanizing plant of J. Perrie, 13 McMaster Avenue, was damaged. Estimated loss, $5,000.

February 25—House at 387 Brock Avenue, was damaged. Caused by hot ashes. Estimated loss, $700.

Winnipeg, Man.—February 26—The Broadway Drill Hall was damaged. Estimated loss, $15,000.

Windsor, Ont.—February 23—The Osterhout block was damaged. Estimated loss, $7,000.

STANDARD BANK OF CANADA

Details of the report and statement of the Standard Bank of Canada, which was submitted to the shareholders at the forty-fourth annual meeting held in Toronto on the the 26th February, appear elsewhere in this issue. The results of the year's business ending January 31st, 1919, show that the earnings exceeded those of last year, and enabled the directors to pay the usual quarterly dividends to the stockholders, and after providing for liberal subscriptions to patriotic funds, the officers' pension fund, provincial taxes, etc., and the reduction of bank premises by $100,000, to carry forward the substantial amount of $227,326.90 to the credit of profit and loss account.

A diagnosis of the balance sheet shows that the cash on hand amounted to $16,084,680, and the total quick assets to $36,066,337. During the year commercial loans and discounts increased by $5,693,809, and now amount to $45,658,553. Deposits increased by $7,888,855, now amount to $65,969,558. Notes in circulation increased by $1,213,475 now total $6,697,858. Total resources of the bank now appear as $83,656,865, an increase of $9,665,958 in the year.

The steady and consistent growth of the Standard Bank from year to year shows the confidence of the public in this institution, and the marked increase of its business, especially during the last two or three years, affords unmistakable evidence of the marvellous growth and prosperity of the Dominion.

Winnipeg Prepares Income Tax

Principal Features Have Already Been Decided Upon by City Council—Minimums $1,000 and $1,500—First Collection This Year—Opposition Develops in Provincial Legislature—Provincial Income Tax May Be Framed Which Would Supersede That of City.

THE city of Winnipeg is planning to have an income tax, and it is the intention of the city council to collect it for the year 1919, provided the necessary amendment to the city charter is secured from the provincial legislature. The draft of the measure as prepared by the city council was submitted to the legislature on February 25th. The principal features are:—

That it will not be onerous on the man with small income, council considering that it needs public co-operation and that an onerous tax would prevent co-operation.

That every person paying any income tax will have a vote in civic affairs.

That pensions of Canadian and Imperial soldiers and sailors will be exempt, in keeping with the practice in all allied countries where income tax is enforced.

Taxes paid on property, etc., will be credited on income tax statements and proper allowances made.

That it will abolish the business tax, though that tax is being maintained this year through legislative necessity.

That if a man's business tax this year is higher than his income tax would be, he will pay business tax and not income tax, and vice versa.

That on his first $1,000 of income, a single man will pay no tax.

That a married man's first $1,500 will be exempt, with an added exemption of $200 for every child under 16 years of age.

That first income tax returns will be due in June of this year and 1919 incomes taxable; and in future years the returns will be due by February 28.

That appeals as to income assessment and as to proper allowances on account of other taxes or, in the case of corporations, as to allowances for depreciation and renewals, will be made to the board of valuation and revision.

That corporation rates shall be determined by a commission of three, to be named by council.

That the definition of income is only tentative and has yet to be exclusively arranged on the advice of an expert who has been engaged to come from Wisconsin.

That the machinery of the Dominion income tax will not be utilized.

Scale of Taxes

The scale proposed on individual incomes is as follows:—

Single.	Tax.	Married.
$ 1,000	Nil	$ 1,500
2,000	$ 10	2,500
3,000	25	3,500
4,000	45	4,500
5,000	75	5,500
6,000	105	6,500
7,000	155	7,500
8,000	205	8,500
9,000	255	9,500
10,000	305	10,500
11,000	355	11,500

In addition to these points there were several other matters relative to the tax taken up by the council. In reply to an inquiry sent to Toronto's assessment department, a telegram was received stating that the right of a municipality to levy an income tax on war loan bonds had been up held by the courts. The federal income tax machinery will not be used for civic purposes, as the council was informed by Sir Thomas White that it was impossible for the city of Winnipeg to be separated from the federal district in which it is incorporated under the Dominion income tax.

Allowances will be made for depreciation; dividends received by shareholders will not be taxed after the corporation has already paid its income tax; a board of revision may be appointed to remove injustices or inequalities as in the case of insurance companies where the aim is to tax them only on their local business. In regard to insurance companies a point was brought up by Mr. A. Bond, of the Great-West Life Assurance Co., which company receives money from Australia to invest in Manitoba. He was advised that the company would be taxed on the profit it obtains from handling this money, but he maintained this would ultimately fall upon the Australians with the effect that outside capital would be driven away.

Another point was a suggestion made by Mr. E. J. Tarr, that equity should be established between home-owner and home-renter, either by making the home-owner add to his statement of income a rental value on his home, or by exempting a proportion of the rent paid by the home-renter. This matter was deferred.

The first returns, according to the plan, are to be made next June; in future years they are to be made by February 28th. Judges are to be exempt, as are also churches, trades and labor councils, fraternal societies, sporting clubs and others who do not operate for a profit.

While the income tax is proving fairly popular in the city, considerable opposition has developed in the provincial house. When the bill came up for its second reading on February 28th, several members of the government declared themselves as opposed to it. Even the member who introduced the bill, Mr. W. L. Parrish, declared that he was not yet certain which way he would vote. Premier Norris declared that the government was in no way committed to the principal of the bill.

The main ground of opposition appears to be that the province may shortly inaugurate a provincial income tax. This was hinted at by Mr. G. W. Prout, member of Kildonan and St. Andrews. He outlined a scheme whereby the province could collect a tax and divide the profits among the municipalities where it is collected.

In the discussion of the Winnipeg bill in the legislature, Mr. P. A. Talbot, a member of the opposition, declared himself in favor of the civic income tax on the ground that it shifted part of the burden of taxation from real estate to a class of people in the city who had formerly escaped paying taxes.

SPREAD OF TAX ARREARS

Over Ten-Year Period—Alberta Municipalities Can Look for This, Says Minister

"GREAT care will be necessary for the next two or three years, and very little can be expected in that time in the way of tax reduction, but after that, with proper management, things will be running safely. I would rather be a property owner in Edmonton ten years hence than in any other city in Alberta." This was the statement made by Hon. A. G. MacKay, minister of municipal affairs, in an address to the Edmonton Board of Trade last week, in which he spoke of important phases of legislation now pending in the House on matters of a municipal nature. Features of the act introduced a few days ago, providing for spread of tax arrears over a ten-year period were explained by the minister, whose conclusion from the facts in the case of Edmonton particularly, was that the present difficulties could be overcome and the interests of all parties protected.

Things could not go on as at present, declared Mr. MacKay in his talk on taxes. The legislation now pending was to apply to all municipalities in the province, and the general law would be provided for the relief and future guidance of all cities and towns, nearly all of which had similar financial difficulties. In the case of Edmonton, the fact of $6,600,000 in tax arrears must be recognized, and ways and means found for taking care of it. There were two classes of ratepayer, Mr. MacKay pointed out: the honest man who was making a real effort to pay but couldn't, and the other man, who could pay but wouldn't. Means must be found for fairly relieving the first, so giving him a chance to save his property, and of compelling the latter class to discharge their obligations.

What was now proposed, explained the minister of municipal affairs, was to blend principal and interest, taking the arrears of taxes to December 31, 1918, as principal, and charging interest thereupon at 8 per cent. The whole would then be divided into ten equal annual instalments, and the ratepayer would be given the opportunity to pay these annual instalments on condition that he had paid his 1919 taxes and interest, thus beginning his ten payments at the first of 1920. A further concession might be made, said Mr. MacKay, by requiring only interest payments in 1919 and 1920, so giving the ratepayer still two years' leeway, and requiring him to pay his indebtedness on principal in eight years. He had satisfied himself that the city's finances would not suffer in this way.

Bond Holders Willing

The bond houses that were doing business with Edmonton and other Alberta cities had been notified of this proposed plan, said Mr. MacKay, and they were favorably disposed to it, having expressed their satisfaction with the evident purpose of the government to solve the difficulty fairly and frankly. The plan, of course, involved a suspension of the sinking fund payments for a ten-year period, and this could be safely done, for the Edmonton fund was in a good condition, with $4,500,000 now paid up. The bondholders were ready to co-operate, and had even suggested that a lower rate of interest might be arranged.

For the man who would not pay there would still be recourse to the tax sale, the minister made quite clear. If 1919 taxes were not paid by July 1, 1920, there would be an enforced sale of the property, with clear title to the purchaser twelve months later. The tax sales would be made sharp and quick after default on this easy payment plan.

A better law for all Alberta must be enacted, declared Mr. MacKay, in respect to taxation. People must be made to understand that taxes had to be paid, and it must no longer be possible for 40 per cent. of the tax levy to remain uncollected, as was the case in Edmonton.

The minister also dropped a hint that better financing would be required from municipalities. Unsound business methods on the part of towns and cities did not pay, and a suggestion that the province should guarantee the debts of municipalities was absolutely out of the question. Municipalities that were run well would not be asked to carry debts for those that were badly managed.

It was further part of the plan outlined by Mr. MacKay that a commission should be appointed by the government, before which both the municipality and the bondholders might appear for a hearing of any particular case, and he believed that in this way some compromise on the debt could always be effected. It was not proposed to cut away the rights of any creditor. In cases where bad management left no other recourse, public administrators would be appointed. The income tax also came in for Mr. MacKay's attention, and he thought that better results, fairer treatment to all, and more money for the city would result if, instead of a comparatively high tax rate on certain excess amounts, a lower rate on the whole income were imposed. A rate of from two to five per cent. was suggested.

BRITISH COLUMBIA MUNICIPAL FINANCE

The report for 1917 of Mr. R. Baird, inspector of municipalities, for British Columbia, has just been made public. This gives in detail the assessments for 1918 of the cities and districts of the province, together with the area and population; the tax rate for 1918; debts and sinking fund as at December 31st, 1917; arrears of taxes; receipts and expenditures for the year 1917, and results of the operation of public utilities.

DOMINION SAVINGS AND INVESTMENT SOCIETY

Two changes have recently taken place in the directorate of the Dominion Savings and Investment Society, of London, Ont. Mr. Alexander Purdom has taken the place of Mr. John Ferguson as vice-president. The latter resigned owing to his inability to attend the meetings on account of his advanced age. Mr. Samuel Wright has also resigned as a result of leaving London.

The reserve fund of the Dominion Savings and Investment Society, of London, Ont., is now $270,000. The figure ($27,000), given on page 14 of last week's issue of *The Monetary Times*, was, of course, a misprint, as would be evident from a reference to the complete statement on page 55 of that issue.

SASKATCHEWAN LIFE INSURANCE COMPANY

The statement for 1918 of the Saskatchewan Life Insurance Co., of Regina, shows a premium income, less reinsurance, of $94,610 as compared with $71,166 last year. Other income, including $12,777 interest, premium on capital stock ($16,141), etc., brought the total to $130,611. The death claims paid were $12,973, and the total payments to policyholders $13,395. Total expenses of management amounted to $52,233, in addition to which there were commissions to stock salesmen amounting to $3,397. A balance of $61,386 was left to be carried to investment account as compared with a balance of approximately $38,000 last year.

The company's assets now total $266,745, including $145,538 of bonds and debentures at their market value and $71,785 of first mortgages on real estate. Cash on hand and in the bank totals $23,791. The insurance reserve is $116,473, and there is a surplus to policyholders of approximately $125,000.

The directors include Mr. William T. Mollard, president of the Saskatchewan General Trusts Corporation; Mr. H. O. Powell, general manager of the Weyburn Security Bank; Hon. W. M. Martin, premier of Saskatchewan, and other well-known local men. Mr. T. F. Conrod is managing director and secretary.

The amount of new insurance issued during the year under 427 policies was $1,167,145, the total in force being now $2,845,834.

VANCOUVER WARNED AGAINST FIRES

Speaking before a meeting of the Central Ratepayers' Association, of Vancouver, B.C., on February 25th, Mr. J. A. Thomas said that the next great conflagration on the Pacific Coast would be in Vancouver. Mr. Thomas is in charge of the fire investigation branch of the provincial government. His work, he said, was principally to discover and prosecute in cases where arson had been committed, but that people did not have to commit arson in Vancouver, where all they had to do is to get an insurance policy and wait for a fire. He is to take the subject up shortly with the city. Mr. B. C. Grant, an insurance man, said that he agreed with Mr. Thomas, and felt that most of the insurance men in the city held the same view.

NORTHWESTERN LIFE ASSURANCE CO.

For the year 1918 the Northwestern Life Assurance Co., of Winnipeg, Man., had a total revenue of $82,546 and a total expenditure of $38,528, leaving an excess of $44,018. Business in force increased by 126 per cent. The remarkable growth of the company is indicated by the fact that business in force at the end of 1916 amounted to $104,000; at the end of 1917 it was $535,350; and at the end of 1918, $1,212,300. Premium income increased proportionally, as have also total assets, cash assets and investments. The company's death claims were $6,500,000, so that over 80 per cent. of the expenditure was incurred in connection with the management of the business, commissions, etc.

The amount of paid-up capital at the end of 1916 was $33,773; at the end of 1917 it was $44,303, and at the end of 1918, $54,934.

This is a young company which started in the west just prior to the outbreak of the war, and its early years, therefore, have been attended with considerable difficulty. Its rapid growth under the circumstances is evidence of aggressive management. Only two claims resulted from the influenza epidemic in 1918, and this result is partly attributed to the fact that in the early stages of the epidemic the company advised its principal agents to see that medical attention was supplied immediately to any policyholder suffering from this illness, and to have the physicians render accounts to the company for their services.

DISPUTES RE SHIPMENTS FROM UNITED KINGDOM

The senior British trade commissioner in Canada and Newfoundland (Mr. G. T. Milne, 367 Beaver Hall Square, Montreal), has been notified by the Imperial Department of Overseas Trade in London that he is empowered to appoint an expert to examine and report upon consignments of goods from the United Kingdom, in respect of which a dispute has arisen, and to certify the signature of such experts as authentic. The commissioner will, however, only intervene when requested to do so by both parties to the dispute.

The kind of disputes in which the commissioner may intervene are those regarding goods which are alleged to be not up to sample, or which have arrived in a damaged condition owing to faulty packing. The commissioner is not authorized to deal with claims under insurance policies for goods damaged during the voyage.

As the official trade representative in Canada and Newfoundland of the Indian government, the commissioner is also authorized to act in regard to disputes relative to shipments from India.

The remuneration of experts appointed by the commissioner is a matter for the parties to the dispute. No fee will be charged for his services.

The British trade commissioner at Toronto (Mr. F. W. Field, 257 Confederation Life Building, Toronto), is empowered to act in disputes arising out of shipments to Toronto and to other centres in Ontario.

NO TEMPORARY LOANS FLOATED

A return tabled in parliament this week shows that no temporary loans have been floated by the government since the previous session. Unforeseen expenditures, however, made it necessary for the raising of $6,510,000 by governor-general's warrant, of which six millions was required for the purchase of seed grain.

VALUATE OTTAWA ELECTRIC RAILWAY

The Ottawa board of control has decided to proceed with the valuation of the plant of the Ottawa Electric Railway Company, with a view to a proper consideration of the offer by the company to sell to the city now instead of waiting for expropriation after the expiry of the franchise. There have been several meetings of the board, and there was considerable difficulty in securing competent valuators at what was considered a fair price.

SOUTH VANCOUVER IMPROVEMENT TAX

Since the municipality of South Vancouver, B.C., came under the direct control of the provincial government, through its commissioner, Mr. Gillespie, an improvement tax has been imposed in addition to the tax on land. Assessments have now been completed and a Court of Revision is being held, commencing on March 7th. Owing to the fact that a new assessment is being made, the number of appeals is large, exceeding 500.

A new Ratepayers' Association is being formed in the municipality which will have branches in all the wards. It will aim to promote the general welfare of the city, including ratepayers, the improvement of streets, etc.

SIMPSON COMPANY WILL SHARE PROFITS

A system of profit-sharing has been announced by the Robert Simpson Co., of Toronto. The intention of the plan is to furnish to those who remain in the employ of the company until they reach the age when they retire from active service a sum sufficient to secure them against want, and that those who serve for an extended period but do not remain with the company all their business life may accumulate a substantial sum; and also to assist all members of the staff to provide an income for their families at the close of their active business careers or in case of death.

Participation will be voluntary and open to all members of the staff, regardless of position, after one year's service, and thereafter so long as they remain in the employ of the company. In order to participate in the fund 5 per cent. of wages earned must be deposited, with a limit of $100 per annum, this limit being set so that the higher salaried workers may not unduly share in the profits of the fund. To these savings of the staff the company will add annually a sum equal to 5 per cent. of its net earnings.

Participators completing ten years of service will be entitled to withdraw their deposits with all interest and profits, those leaving before completing this term of years to only be entitled to the amount of their deposits, plus 5 per cent. interest, unless in the case of a woman who leaves to be married after five years of service, when she should be entitled to the same privileges as those completing the ten-year term of service, or in the case of death, when beneficiaries would benefit to the same extent as if the deceased had completed the full ten years of service.

During the month of January, Canadian banks opened 107 branches in Canada and closed seven, a net gain of 100 branches. While this is not a record it is nevertheless unusually high.

PERSONAL NOTES

Mr. Douglas S. McMaster, of C. Meredith and Co., has been elected a member of the Montreal Stock Exchange.

Mr. P. R. Peele, collector of customs at Abbotsford, B. C., has been appointed collector at New Westminster, succeeding the late N. M. Matheson.

Mr. Allan C. Fraser, who has been manager of the Merchants Bank at Victoria for five and a half years, will take charge of the Granville street, Vancouver, branch of the bank.

Mr. Lorne C. Webster has been elected president of the Quebec Railway, Light, Heat and Power Co., to replace the late Sir Rodolphe Forget. Senator D. O. Lesperance has been elected vice-president.

Mr. J. Adair, formerly manager of the Sudbury branch of the Sterling Bank of Canada, has been appointed assistant manager at head office, and Mr. T. E. Fletcher, formerly manager of the Regina branch, has been appointed manager of the Toronto branch.

Mr. H. W. Nesbitt, former assistant manager of the Merchants Bank at Winnipeg, has been made chief western inspector. Mr. Nesbitt was manager at Medicine Hat before coming to Winnipeg. He is succeeded as assistant manager by G. N. Stacey, who comes from Vancouver.

NEW HEADS FOR CANADIAN LOCOMOTIVE

At a special meeting of the board of directors of the Canadian Locomotive Company in Toronto last week, new heads were elected. Mr. Frank G. Wallace, of Pittsburg, was elected president in succession to the late Dr. J. J. Harty, who died just recently in England, and Mr. J. L. Whiting, K.C., of Kingston, succeeds Mr. Wallace as vice-president. Both men have been members of the board for some time.

STATE HEALTH INSURANCE PROPOSED

A strong appeal for the inauguration of a state health insurance in British Columbia was made in the provincial legislature when Major J. W. McIntosh, of Vancouver, presented a resolution asking the house to resolve itself into a committee to consider the question.

The workmen's compensation measure, he understood, had proved a success, but he saw no logical reason why the legislature should stop at that.

POWERS OF CANADA SECURITY COMPANY

The private bills committee of the Alberta legislature last week dealt with the amendment of the act incorporating the Canada Security Assurance Company. By the amendment, the company's powers are enlarged to include besides hail insurance, insurance against loss by accident of windstorm, tornado, automobile, livestock, guarantee, liability, inland marine, inland transportation, burglary, theft and steam boiler. The committee endorsed the proposed enlargement of powers.

At the meeting of the South Vancouver board of trade, the following officers were elected: Hon. president, Lieut.-Col. R. C. Cooper, M.P.; hon. vice-president, William Kent; president, H. O. Holloway; vice-president, A. E. Chamberlain, and secretary-treasurer, Charles Harrison.

C. MEREDITH AND CO. NOT AFFECTED

The firm of C. Meredith and Co., members of the Montreal Stock Exchange, is not affected by the arrangement which has been made between the Guaranty Trust Co. and C. Meredith and Co., Ltd. The business of the last mentioned is to be purchased by a Canadian corporation, which is now being formed, part of the capital of which is being furnished by the Guaranty Trust Co. and part by the shareholders of C. Meredith and Co., Ltd.

In the first paragraph of an article in *The Monetary Times* of February 21st, entitled "Guaranty Trust Enters Canada," reference was made to the fact that the firm which is being purchased is C. Meredith and Co., Ltd. In subsequent references the word "Limited" was omitted. It was, of course, C. Meredith and Co., Ltd., that was referred to throughout. The firm of C. Meredith and Co. is an entirely separate company from C. Meredith and Co., Ltd.

PRINCE ALBERT FINANCIAL ARRANGEMENTS

A meeting in Regina between the representatives of the bondholders of the city of Prince Albert, Sask., and the municipal authorities of that city has been arranged for the near future. A delegation of the citizens was appointed at a meeting held in Prince Albert on February 27th. This delegation was given authority to negotiate a final settlement. A meeting of the bondholders will be held next week in Toronto to arrange for the sending of their representatives to Regina. The solicitor for the bondholders is Mr. E. G. Long, of Malone, Malone and Long, Toronto.

The city has applied to the provincial government for the validation of an agreement with the Imperial Bank consolidating the city's indebtedness to the bank and providing for an extension of the time for the payment of arrears on lands sold by tax sale and in the possession of the city over a period of ten years. This application is objected to by the bondholders, and upon receipt of a telegram from their solicitor, the city council decided, while it would not withdraw its application, that it would delay action for a reasonable time, providing the bondholders meet them in Regina to reach a permanent arrangement.

EASTERN TRUST CO.

Profits of $126,080 were earned during 1918 by the Eastern Trust Co., of Halifax. This is $5,000 in excess of the profits for last year, and, added to the balance brought forward, made a total of $179,557. Fifty thousand dollars was transferred to reserve fund, for which purpose no appropriation was made last year. The same dividend was paid at the rate of 8 per cent., and, after meeting all other expenses, contributions, etc., a balance of $25,155 is carried forward.

The volume of business shows a substantial increase. Assets handled on account of estates, trusts and agencies are now $20,670,982 in comparison with $18,084,480 last year. Holdings of mortgages on capital account have decreased, the released funds being invested to a large extent in Victory Loan and municipal bonds.

The company has, in addition to its office in Halifax, branch offices in St. John, Montreal, Charlottetown and St. Johns, Newfoundland. It is conservatively managed, and includes on its directorate prominent men of the maritime provinces. Additions to the board during the year were Mr. Mark Workman, Mr. James Carruthers and Mr. E. J. Hague, K.C., all of Montreal. At the annual meeting, held on the 25th February, the president, Mr. H. McInnes, expressed the view that the company would soon be able to pay a dividend of 9 per cent.

WHY LOAN COMPANIES FAIL

THE case of the Dominion Permanent Loan Company has been an unfortunate one for investors; judgments recently made have all been adverse to the shareholder. As a consequence loan company legislation has been subjected to much criticism. The Toronto Globe on February 10th, contained an editorial which calls for still fuller publicity and for a stricter limitation of the proportion of the assets of a loan and mortgage corporation which may be put at the disposal of any single borrower. Section 135 of the Loan and Trust Corporation Act provides that "the registrar or any person authorized under his hand and seal shall, with the approval of the minister, have, at any time within reasonable business hours of every day except holidays, access to the books, vouchers, securities and documents of a corporation, and any officer or person in charge, possession, custody or control of such books, vouchers, securities or documents refusing or neglecting to afford such access, shall be guilty of an offence, and the corporation, if registered, shall be liable to have its registry suspended."

Again in section 135 it is provided that "the attorney-general, of his own motion or upon an application being made to him in writing, may appoint some competent person to make a special examination and audit of the corporation's books, accounts and securities, and to enquire into the conduct of the business of the corporation generally."

These clauses place the responsibility entirely upon the executive branch of the provincial government because it fully empowers it to obtain the information necessary to ascertain the company's financial condition. A government, of course, finds itself in a difficult position in regulating the business operations of financial institutions. On the one hand there is the tendency to reduce the government's work to the mere collection and publication of such information as it is empowered to obtain. The other extreme is restrictive legislation so severe that legitimate business operations are hampered. In the former case the onus of detection would fall to a large extent upon other companies in the same line of business and these are always averse to openly criticizing the standing of a competitor. An effective result may be obtained, however, by the development of a sense of unity of interest among corporations in the same business, such as loan companies. Such a unity of feeling and of action is found among the Canadian banks and is partly the result of legislative powers conferred upon the Canadian Bankers Association.

The other companies, however, have not power over an institution which may set the established principles of sound management at defiance for this reason. The government's administrative branch should have sufficient power to enforce compliance with the law and should take into its confidence representatives of loan companies of unquestioned business standing. The Ontario Act provides for comprehensive reports and a new form has been submitted for still further detailed information. The mere publication of such information, however, as pointed out above is not sufficient and before any measures injurious to loan companies and to the public which they serve are adopted some further measure of co-operation between the government and companies as a whole should be attempted.

This refers, of course, just to the province of Ontario, but there are few loan companies whose head offices are located outside of this province and in legislation of this kind Ontario may very fittingly take the lead.

In an article in *The Monetary Times* last week reference was made to possible protection to depositors by means of Dominion or Provincial legislation. This is applied to private bankers, departmental stores and other institutions which accept deposits, as well as loan companies. As a matter of fact the protection in the case of the vast majority of loan companies is quite adequate. In Ontario for instance, they are required to report unclaimed deposits. The cash on hand of Ontario companies as at December 31st, 1917, was almost 40 per cent. of the deposits and the cash together with government securities; municipal debentures and debenture stock more than equalled deposits; and the claims of depositors are preferred claims.

The remedies which are proposed by Mr. William Proudfoot, K.C., leader of the Ontario Opposition, are too drastic to permit of the successful carrying on of business in Ontario. He suggests that an official should be appointed to pass upon their investments and to make a thorough investigation into the affairs of each company at least twice a year. Mr. Proudfoot was a member of the special committee considering the amendment of the Loan and Trust Corporations Act, and he is issuing a minority report.

FOOLING THE INSURANCE COMPANIES

BEFORE the new year an order was passed by the Canadian Railway War Board to the effect that all freight charges must be paid in advance, in cash. This order would mean great inconvenience to shippers, and guarantee Companies, perceiving an opportunity to extend their business by performing this service for shippers, secured the right to guarantee such payments and to have such guarantees accepted by the railways.

This order was originally to go into force on January 1st, but was postponed until the first of March. Meanwhile guarantee companies advertised the special contracts which they had prepared for this business, had special forms prepared and had actually completed arrangements with many shippers. These preparations represented a considerable expenditure of money. Among the companies who had prepared for this business were the National Surety Co., Canadian Surety Co., London Guarantee and Accident Co., Imperial Guarantee and Accident Co., General Accident, Guarantee Co. of North America, Maryland Casualty Co., and the U. S. Fidelity and Guaranty Co.

On February 28th, however, just one day before the order was to go into force, an announcement was made by the Canadian Railway War Board to the effect that the execution of the order was postponed until June 1st. Meanwhile the preparations of the insurance companies were entirely at their own risk. There is nevertheless an obvious inconvenience caused both to the companies and to the shippers by handling orders in this way.

CANADA'S SHARE IN THE INDEMNITY

THE position taken by the United States to the effect that it does not desire any share in an idemnity from Germany is one which thoroughly forestalls any allegation of mercenary motives. The same attitude should be taken by Canada which, like the United States, entered the struggle thoroughly prepared to pay its own expenses for the sake of establishing principles in which it believed. There is no parallel between expenses incurred in the prosecution of a war and losses resulting directly from military activities such as have been suffered by France and Belgium. Resolutions such as that recently introduced by Mr. P. R. Du Trombley in the House of Commons, claiming for Canada a share in an indemnity from Germany may result in popularity but they do not constitute high statesmanship.

REACHING THE BAY

NORTHERN interests are anxious that the Timiskaming and Northern Ontario Railway should be extended to Hudson's Bay. In view of the fact, however, that Canada has already constructed one railway to Hudson's Bay, with the exception of less than one hundred uncompleted miles, it would seem to be a more economical expenditure from the point of view of natural interest, that the Hudson's Bay Railway to Port Nelson first be completed. Whether or not this line will be profitable, it at least has better possibilities than would a line from Northern Ontario. The main object in building the Hudson's Bay Road was to secure a more direct and cheaper transportation service from the Canadian west to Europe. Engineering opinion was not by any means agreed as to the practicability of the route, but if the work was worth commencing it is surely worth completion. If the physical difficulties can be surmounted plenty of business is assured. This is not the case with any line which would serve Northern Ontario.

Western men especially are urging the completion of the work, which has been suspended for some time past. A sub-committee of western members in the Dominion House has been appointed, comprising W. J. Blair, of Battle River, representing Alberta; J. F. Reid, of Mackenzie, representing Saskatchewan, and F. L. Davis, of Neepawa, representing Manitoba, with J. A. Campbell, of Nelson, secretary of caucus, to prepare a resolution for submission in connection with the matter.

It is understood that all the westerners, with the exception of some of the southern Alberta and British Columbia members, strongly favor the completion of the road. There are only 98 miles of steel to be laid and the grading is completed. To finish the work it is estimated that something like a million dollars will be required. From thirteen to fifteen millions have already been expended on the work and the western men rightly contend that it is but poor economy to refrain from making a complete job.

The Repatriation and Employment Committee at Ottawa intimates that in four months labor will be scarce in Canada. If this is the case still further discrimination should be exercised in the plans for government expenditure.

* * * * * *

A proposal has been made that the war debts of the allies should be consolidated. This is a suggestion which will be looked upon with favor by the weaker financial powers but it does not meet with the approval of the larger nations. A proposal for the repayment of the war debts by a gigantic lottery now comes from an Italian financier. This method is a relic of the dark ages of finance and will not meet with favor at the present time.

* * * * * *

The Amherstburg plant of the Brunner-Mond Company was recently halted because of uncertainty as to the future of the Canadian tariff. This company is a subsidiary of the Solvay Process Company and the Amherstburg plant was nearing completion at a cost of approximately $15,000,000. The evil of a reduction in the tariff or of an increase in the tariff might not be greater than the uncertainty which at present exists and which not only hinders the introduction of new capital but also hampers the operation of industries already in existence.

* * * * * *

An interesting side light upon the relations of governments with railway enterprise is found in a recent transaction in New Brunswick. The Beersville Railway, Kent County, N.B., has been sold for $12,000. This road was built by means of provincial and federal subsidies for purposes of serving the coal fields of Beersville, where the mines are still in operation. New Brunswick put at least $16,000 in the road and has been carrying that amount together with accrued interest for many years. The purchaser has been able to dispose of the property for $30,000. It is evidently the intention that the road will be sold for scrap provided the price of steel remains high.

* * * * * *

A member of the Alberta Legislature, Mr. J. S. McCallum of Vegreville, Alberta, recently introduced a motion that the federal government should be urged to extend a cash grant to every soldier in lieu of land or other benefits. The motion, however, was withdrawn before debate. It was intended that this grant should be irrespective of the gratuities scale at present in force. The principle of a cash grant apart from a sum sufficient to cover the expenses of the returned soldier until such times as he is employed, is entirely wrong. The service of the state can best be rendered in the form of education for employment and assistance in the obtaining of that employment. The great majority of war veterans wish merely to return to civil life upon a footing equal with that of civilians. This is to be obtained in the case of disabled men by pensions granted on principles already adopted by the Pension Board and in the case of those without disability by such training as will enable them to recover skill in such occupations as they formerly pursued.

IMPERIAL OIL CO-PARTNERSHIP PLAN

At the annual meeting of the Imperial Oil Co., held recently in Toronto, an industrial plan was described whereby the employees have become stockholders in the company. Reference was made to this plan some weeks ago in these columns.

Mr. W. J. Hanna, the president, expressed gratification at the large number of employees who had become stockholders, and called attention to the fact that in the working out of the policy it was being proven that no mistake had been made when employees were invited to acquire stock on easy terms, and thus become partners in the industry. The industrial relationship plan adopted by the company has been well received by the employees. Provision had been made for old age pensions, for compensation for injuries, sick benefits, arbitration of grievances by joint committees and company representatives, and other measures had been established which had brought a more complete understanding between the company and its employees.

In presenting the annual report, Mr. Hanna said that, largely to provide for war requirements, the company expended twenty million dollars on extensions of plant and equipment during the war period. It was obvious that these extensions would have been more economically provided if deferred to the period following the war, but, inasmuch as almost every demand was in the nature of a war demand, the company felt that it was a matter of duty to provide plant and equipment amply sufficient for the requirements of a critical time, irrespective of consideration of cost. The service which the company had been able to render was not small, and it had received the cordial recognition of the authorities. From the plants at Halifax and Montreal there were delivered to the Imperial navy during the war 110,000,000 imperial gallons of fuel oil and motor fuel.

"In the face of many discouragements the Imperial Oil Co. has carried forward an unremitting and widespread effort to demonstrate the existence of new oil fields of commercial value in Canada," said Mr. Hanna. Its expenditures in exploring and prospecting in the last five years have been in excess of a quarter of a million dollars annually. The company's expenditure for this work during the coming season will be upwards of half a million dollars, and the scene of its greatest activities in this direction will again be in the west. In this connection Mr. Hanna referred to the general uneasiness experienced throughout the country, and particularly in the west, arising out of an attempt by a foreign corporation to secure from the Dominion government a concession covering all the prospective oil territory in Alberta and the North-west Territories. Mr. Hanna said he felt sure the government realized that it would not be in the public interest under any conceivable condition to hand over to one interest an entire country for exploration and exploitation. It has been the history of great oil fields, as well as of other mineral regions, that the discoveries of deposits of value have usually been the result of individual initiative rather than of corporate effort, thus contributing to a more general participation in the benefits of the new wealth created.

The directors elected for the ensuing year were: Hon. W. J. Hanna, president; J. S. Englehardt, G. W. Mayer, G. H. Smith and C. O. Stillman, Toronto, vice-presidents; W. W. Asswald, Montreal; A. S. Rogers, J. P. Rogers, Sir Edmund Osler, Toronto, and W. C. Teagle, New York; W. T. McKee, secretary-treasurer.

Support for Premier Norris, of Manitoba, in his effort to bring about a better understanding between labor and capital in Manitoba is pledged in a resolution passed by the Prairie Provinces Branch of the Manufacturers' Association.

The total assets of the Toronto Savings and Loan Co., of Peterboro', Ont., as at December 31st, 1918, were $4,074,188. The figure given in *The Monetary Times* of February 28th, $4,047,188, was a misprint.

MANITOBA LAND SETTLEMENT BOARD

The bill establishing a land settlement board in Manitoba, was given a second reading in the provincial legislature last week, on the motion of Premier Norris, who explained that its purpose was to co-operate with the Federal government in its proposed land settlement policy. The board would prepare a list of available lands and place a value upon them, and when its work was completed there would be complete co-ordination, he said, between the provincial department and the Dominion authorities.

PENMAN'S, LTD., PROFITS HIGHER

A generally improved financial position results from the 1918 operations of Penman's, Ltd. The net profits exceeded those of the previous year by over $200,000. Higher dividends were paid and $500,000 transferred to reserve fund. Sales for the year amounted to $8,648,382, an increase of $1,751,886 as compared with 1917. The net profits, after providing for all cost of administration, payment of bond interest and allowance for depreciation on plant, amount to $1,137,171, appropriated as follows:—

Preferred stock dividends	$ 64,500
Common stock dividends and bonuses	161,295
Patriotic contributions	13,907
War tax	355,169
Transferred to reserve account	500,000
Amount carried forward	42,299
	$1,137,171

The surplus of liquid assets over liabilities has been increased during the year by $504,673, the active surplus now amounting to $3,154,235.

The reserve account and surplus, as will be seen from the balance sheet, now amount to $3,350,167.

During the year the common stock dividend was placed upon a 6 per cent. per annum basis, beginning with the quarter ended 30th April.

CITY DAIRY PROFITS INCREASE

A net profit of $112,023 was earned by the City Dairy Co., of Toronto, for 1918 as compared with $70,275 last year. The results were briefly as follows:—

	1917.	1918.
Balance from previous year	$ 48,960	$ 84,235
Net profits after providing for depreciation, etc.	70,275	112,022
	$119,235	$196,257
Dividend on preferred shares	......	36,750
Carried to general reserve account	35,000	......
Balance carried forward	$ 84,235	$159,507

The business of S. Price and Sons was purchased by the City Dairy Co. and the assets transferred on January 1st, 1918. These were last year carried in the investment account, but in the 1918 balance sheet only the premises not actually used by the company remain in that account. Not only has the combined volume of business been retained, but an actual increase has been made. The company's milk receiving stations have been increased in number, as have also its city distributing facilities, both by the acquisition of the Price property and by new construction.

In addition to the resumption of dividend payments, the statement also shows a stronger financial position. For instance, advances from the banks, which were last year $120,000, have now been reduced to $24,738. Accounts payable, however, have increased by about $90,000.

NEW MANUFACTURERS LIFE OFFICIAL

Mr. J. B. McKechnie, general manager of the Manufacturers Life Insurance Co., announces the appointment of Mr. J. H. Lithgow, A.I.A., A.A.S., as assistant actuary of the company. Mr. Lithgow returned from overseas in January after an absence of two years.

LARGE PAPER PLANT FOR THREE RIVERS

The International Paper Co., of New York, has decided upon the erection of a huge plant at Three Rivers, Quebec. Six million dollars, it is said, will be spent on this paper plant, that will be in the very heart of the wood and pulp industry of the valley of the St. Maurice River, for years noted for its extensive log-driving operations. More than 3,000 workers will be employed there, and the entire plant will cover an area of 100 acres.

BELL TELEPHONE COMPANY OF CANADA

The annual statement of the Bell Telephone Co. of Canada, Ltd., submitted at the annual meeting in Montreal on February 27th, showed an increase in gross revenue, but a decrease in net revenue, due to the much higher expense of operation. After paying interest on bonds, etc., a balance of $1,542,634 remained. Dividends at the rate of 8 per cent. were paid, and $102,634 remained as a surplus in comparison with $533,070 last year. It is evident that any further reduction in net earnings will require a cut in the dividend rate unless the surplus is to be impaired.

The comparative results as given in the annual report are as follows:—

	1917.	1918.	Increase.
Telephone revenue.	$11,179,162.07	$12,227,545.33	$1,048,383.26
Operation expense.	4,545,328.05	5,463,818.24	918,490.19
Current maintenance	1,595,366.19	1,903,624.51	308,258.32
Depreciation .	2,470,000.00	2,648,760.00	178,760.00
Taxes	422,427.22	534,256.93	111,829.71
Total telephone expenses	$ 9,033,121.46	$10,550,459.68	$1,517,338.22
Net telephone earnings	2,146,040.61	1,677,085.65	*468,954.96
Sundry net earnings	388,030.73	427,602.36	39,571.63
Total net earnings	$ 2,534,071.34	$ 2,104,688.01	$ *429,383.33
Deduct interest ..	561,001.30	562,053.82	1,052.52
Balance	$ 1,973,070.04	$ 1,542,634.19	$ *430,435.85
Deduct dividends 8 per cent. ...	1,440,000.00	$ 1,440,000.00	....
Surplus earnings.	$ 533,070.04	$ 102,634.19	$ *430,435.85

*Decrease.

The balance sheet shows assets totalling $50,701,470, compared with $47,589,561 last year. The principal increase is in the telephone plant. In the liabilities statement the accounts payable have increased, as have also the replacement and other reserves.

The president, Mr. L. B. McFarlane, in addressing the shareholders, referred to the activity of the year in the telephone business, and to the difficulty of labor conditions which have been experienced, and which had made such a large cut in the financial results. Considerable extensions were made, however, 2,888 miles of wire being added to the long distance system. The number of company stations also increased by 18,944 during the year.

EXTRA PROVINCIAL POWER IN WORKMEN'S COMPENSATION

As a result of the loss of life on board the steamer "Princess Sophia," claims have been entered against the Canadian Pacific Railway Co. under the Workmen's Compensation Act of British Columbia. The company, however, through its solicitor, Mr. J. E. McMullan, has called attention to some legal points which have not as yet been settled.

"The British Columbia Act," he says, "expressly deals with accidents which happen upon ships outside British Columbia. Does the British North America Act give them that power?

"Further, the English Merchant Shipping Act, which is in force in Canada, and the Canada Shipping Act, as a matter of public policy to induce investments in shipping, limit the liability of a shipowner in respect of an accident, to a fixed amount per ton of the ship's tonnage. Is not this provision in the shipping laws to be applied in harmony with the Workmen's Compensation Act?

"These are questions of considerable importance. The recent Workmen's Compensation Acts in a number of the provinces are a new departure in provincial legislation in Canada, and, as might be expected, questions as to the powers of the provincial legislature arise in consequence."

SUN LIFE ASSURANCE COMPANY

For the year 1918 the Sun Life Assurance Co. of Canada obtained an excess of income over disbursements of $7,671,681 as compared with $6,951,798 last year. The principal results in comparison with 1917 were as follows:—

	1917.	1918.
Life premiums	$13,373,429	$15,079,657
Annuities	1,172,273	1,347,015
Total	14,595,453	16,471,487
Net income from interest, rent, etc.	4,663,814	5,138,914
Total income	19,288,998	21,651,100
Death claims, including pensions	3,087,996	3,268,694
Total payments to policyholders.	8,840,245	9,768,564
Expenses	1,415,148	1,639,838
Commissions	1,667,539	1,949,013
Total disbursements	12,337,200	13,979,418

The statement of assets and liabilities shows bonds having a market value, as fixed by the Dominion Government Insurance Department, of $57,170,311, an increase of approximately $5,000,000 as compared with last year. These bonds have a par value of over $70,000,000 and a ledger value of over $58,000,000. Holdings of preferred and guaranteed stocks valued in the same way amount to $9,052,534 as compared with $7,890,897 last year. These have a par value of $11,800,000 and a ledger value of over $10,000,000. Other stocks, valued at $2,138,753, are held. Mortgage loans, on the other hand, have decreased from $8,150,049 to $7,754,701. Loans on policies have increased by about $500,000. The total net assets are now $97,620,379.

The reserves required on life policies and on annuities are $84,567,115. Other liabilities of a miscellaneous nature bring the total to $89,118,000, leaving a cash surplus to policyholders of 8,502,379, including the paid-up stock of $475,000. The company's reserve on life policies is calculated with 3½ per cent. interest on policies issued prior to December 31st, 1902, and with 3 per cent. on policies issued since that date. In the case of the Federal Life policies, which company was taken over some years ago by the Sun Life, the rate is 3½ per cent.

In his speech at the meeting held on Tuesday, March 4th, the president, Mr. T. B. Macaulay, referred to the fact that the new business issued exceeded $50,000,000, and that assurances in force were now $340,809,656, a net gain of nearly $29,000,000.

REVISE QUEBEC COMPANY LAW

New Bill Will Facilitate Incorporation. Amalgamation by Purchase, Liquidation and Transfer of Shares

ON February 27th, a bill was introduced in the Quebec Legislature by the Premier, Sir Lomer Gouin, amending the provincial laws relating to the incorporation of companies. The bill was referred to the Public Bills Committee so that those interested in it could express their views. This committee took it up on Wednesday, March 5th. As one of the reasons for this legislation, the premier referred to recent decisions of the Privy Council to the effect that provincial companies had the right to do business outside of their province just the same as companies incorporated by federal charter. This necessitated some revision in provincial law. The bill aims among other things at greater simplicity in securing a charter and also at the protection of the public, of the shareholders and of creditors against fraudulent methods.

Sir Lomer said that the new law dealing with companies incorporated by letters patent would apply to all companies formed in the future, as well as those that had been formed since 1868, exception being made for railway companies, and for mutual-benefit insurance companies as well as all those which existed by special legislation, as for example, mining companies, telephone, telegraph, aqueduct and other similar companies. The government had hesitated to put all companies under the same legislation because it was feared that much inconvenience would result. However, the bill would provide for uniformity to the extent that the lieutenant-governor in council would be able to modify by supplementary letters patent, if such modification were necessary for the proper working of the companies under the legislation now proposed.

Among the innovations made in the measure the premier mentioned that in future it would be possible, in creating a company by supplementary letters patent, to put the shares without mentioning the nominal or par value, and restrictions were provided for such companies which the shareholders and those dealing with these companies would find would protect them. They were permitting the fusion of two companies in such a way that identity of one or the other would cease to exist; but at the same time had taken all possible precautions to see that this fusion would not lessen the responsibility to the creditors.

The measure permitted a company to give up its charter when it had neither debts nor obligations or had provided for any obligations and which had divided up its assets among its shareholders. This, said the premier, would permit a solvent company who wished to stop business to do so in a regular manner without going to the expense of procedure required for liquidation. To protect the public against the floating of fraudulent shares and obligations, the bill copied Imperial and federal legislation, regarding the obligation to issue a prospectus or to give the secretary of the province a declaration, except in cases of private companies which had not more than fifty shareholders or companies which prohibited all appeals for subscriptions to their shares or obligations. These new provisions would not apply to the allotment of shares and obligations previous to July 1st, 1919.

Transfer Upon Delivery

Another article would permit the granting of share warrants by simple delivery without inscription in the books of the company, Sir Lomer remarking that those warrants are very much used in the United States.

The provisions of the act relative to the increase and reduction of capital gave a new method of reducing the capital of a company. It permitted the extinction or diminution of the responsibility arising from the non-payment of the shares of a company; the annulment of a part of the capital spent which was really lost or which exceeded the assets of a company, and to reimburse the shareholders any portion of capital stock which exceeded the needs of the company. An objection might be raised that reductions of this kind were of a nature to deprive creditors of their recourse even against shareholders, who have not paid the full amount of their shares or against the companies themselves, whose assets had thus partly disappeared, but there were provisions which were calculated to prevent such difficulties.

The directors of all companies will be obliged under the act to make a complete audit of the books. The provincial treasurer himself, or the shareholders by carrying out certain formulas, might secure the appointment of inspectors. The nomination of auditors was made obligatory and their duties carefully outlined. A company had also to make a statement of its affairs annually to the provincial secretary.

Provincial Joint Stock Companies

The second part of the bill concerns joint stock companies, formed under the provincial law. Wherever it was possible to do so all the provisions of the first portion of the act would be applied to them, but having been created by the legislature and not by letters patent, in order to change their constitution these companies would have to secure special legislation. They could, however, seek new incorporation under the first section of this act.

In amending the letters patent of companies created in the future it was proposed, said Sir Lomer, as far as possible, to amend, in the same manner, the charter of companies created by the legislature, so that there would not be duality of legal provisions on the same things.

In regard to those who wished to form themselves into corporations without the intention of making money, but for national, patriotic, religious, philanthropic, scientific, social, athletic, sporting or similar purposes they may be incorporated by letters patent by simply petitioning the lieutenant-governor. This privilege is also extended to organizations of this kind now existing.

Sir Lomer, in conclusion, said the government had been asked to adopt the system of registration carried out in England or that of letters patent from the provincial secretary which was in vogue at Ottawa, instead of letters patent from the lieutenant-governor. The government had not seen fit to grant those requests for the reason that in the Privy Council case of Bonanza and the case relative to companies, it was decided that companies formed by letters patent from the lieutenant-governor had all the rights and powers of companies formerly created by Royal charter. It was for this reason that the Privy Council recognized that provincial companies had the power to carry on operations outside of the province in which they originated, and the government did not want to run the risk of losing the benefit of the Privy Council judgment, which established that the claims of the federal government on this subject were not well founded. It was true that this legislation might have been prepared in such a manner as to remain under the protection of these judgments, even though they renounced the system of creating companies by letters patent from the lieutenant-governor. However, after consideration, it was thought that the government would not be justified in risking the position which those judgments had given, especially as the new system did not offer any advantages as regarded economy or expedition over the system adopted in this act.

Savings Deposits Recover Quickly

Are Again Near Billion Dollar Mark—Loans to Municipalities Twenty Per Cent. Less Than Last Year — Circulation Takes Substantial Drop

	January, 1918.	December, 1918.	January, 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$559,777,237	$ 711,034,060	$ 623,919,410	+ 11.4	— 12.4
Deposits after notice	900,314,256	958,473,557	990,000,085	+ 10.0	+ 3.3
Current loans in Canada	855,506,506	1,075,640,003	1,080,340,861	+ 27.5	+ .5
Current loans elsewhere	116,220,343	119,153,924	126,513,338	+ 8.6	+ 5.9
Loans to municipalities	40,015,466	30,684,052	32,640,198	— 20.0	+ 6.6
Call loans in Canada	76,239,201	89,120,423	87,598,427	+ 14.5	— 2.2
Call loans elsewhere	132,687,066	150,248,322	140,819,656	+ 6.06	— 6.6
Circulation	193,567,911	240,705,540	226,385,506	+ 17.1	— 5.1

The more important figures from the bank statement for Canada as at January 31st, are given above, in comparison with the preceding month and the preceding year. Loans to municipalities increased during the month, owing to heavy payments at the new year. The falling off in circulation indicates decreased pay-rolls. Other features are the decline in demand deposits, and the increase in current loans.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1918—January	$559,777,237	$ 900,314,256
February	565,266,642	908,822,988
March	561,042,236	921,080,803
April	558,509,221	933,644,668
May	535,655,731	947,757,337
June	549,327,078	965,934,556
July	549,068,651	992,015,137
August	554,906,517	1,014,711,865
September	588,940,119	1,037,498,920
October	644,220,998	1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085

The following table shows a record of deposits for the past six years:—

January.	On demand.	After notice.	Total.
1914	$339,811,339	$635,135,955	$ 974,947,294
1915	329,916,730	666,960,482	996,877,212
1916	387,002,926	714,264,486	1,001,267,412
1917	427,308,526	864,163,344	1,291,471,870
1918	559,777,237	900,314,256	1,460,091,493
1919	623,919,410	990,000,085	1,613,919,495

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1918—January	$855,506,506	$76,239,201
February	859,363,147	76,722,163
March	886,995,222	74,257,877
April	884,089,402	77,497,360
May	894,817,113	78,466,582
June	897,226,012	76,970,920
July	905,677,233	74,382,762
August	920,775,269	73,509,571
September	942,802,018	74,137,860
October	1,003,593,603	73,685,136
November	1,082,709,655	85,675,063
December	1,075,640,003	89,120,423
1919—January	1,080,340,861	87,598,427

The following table gives the record of loan accounts during the past six years:—

January.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$ 811,582,130	$ 56,051,465	$71,248,242	$108,776,770
1915	770,118,911	43,987,270	66,154,891	85,796,641
1916	758,500,492	61,986,845	82,584,659	134,248,552
1917	806,479,147	85,989,511	79,737,064	155,747,476
1918	855,506,506	116,220,343	76,239,201	132,687,066
1919	1,080,340,861	126,513,338	87,598,427	140,819,656

The following table shows the call loans abroad in January as compared with previous returns:—

	1916.	1917.	1918.	1919.
	$	$	$	$
January	134,248,552	155,747,476	132,687,066	140,819,656

November	183,250,389	139,832,552	171,035,732	....
December	173,878,134	134,483,482	150,248,322	....

EXPORT RESTRICTIONS REIMPOSED

It has been officially announced by the Canada War Trade Board and the Canada Food Board, that export restrictions which had been lifted, have had to be reimposed. All regulations which were in force when the armistice was signed on November 11, except those affecting shipments to the United Kingdom, the United States, France (including Alsace-Lorraine), Belgium, Italy and Japan, with the possessions and protectorates of those countries, are consequently again in force.

This step has been taken so as to co-ordinate the allied policy on exports. When on January 20 last restrictions were removed on exports except a few foodstuffs, unscrupulous exporters in other countries took advantage of the relief intended for Canadian exporters to ship commodities via Canada to consignees to whom they would not have been allowed to ship direct from their own countries. This "back door" entry would have been damaging to Canada's prestige. The firm course was taken to prevent trade with enemy concerns in neutral countries. Concerted action will continue to be imperative until the Peace Conference determines the conditions under which shipments may be made to enemy firms in neutral lands.

Exporters to other than to countries mentioned must, therefore, apply for permits to the War Trade Board or to the Canada Food Board, where applications will be handled as promptly as possible. No permit is required where the value of any commodity does not exceed $100.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, from Cobalt for the week ended February 28th, 1919:—

Dominion Reduction Co., 64,500; Pittsburg Lorraine, 93,640; Buffalo Mine, 110,000; Buffalo Mine, 88,000; McKinley-Darragh. 85,053; McKinley-Darragh, 77,443.

The total since January 1st is 3,465,994 pounds, or 1,733 tons.

There was a shipment from Porquis Junction of 280,000 pounds of nickel ore by Alexo Mine.

The Ontario Trades and Labor branch, established under the Trades and Labor Branch Act, is to be a separate department, known as the Department of Labor under the direction and control of a member of the executive council to be designated by the lieutenant-governor in council.

A new portfolio of public welfare is recommended in the report of the public welfare commission tabled in the Manitoba legislature by Hon. J. W. Armstrong. It is recommended that the proposed new minister have charge of child welfare, public health, mothers' allowances, relief and correction, and suggested that labor and employment may eventually be included under this department.

LET US INVEST YOUR FUNDS

An investment offering definite security and assured income is what the careful investor wants. Our Guaranteed Investment Receipts, secured by first mortgage on improved real estate, bear an attractive rate of interest, paid by cheque twice yearly. This investment appeals strongly to those who want exceptional security with good interest for Trust Funds Send for Free Booklet on Investments

Of the deposit in Central Gold Reserves $10.500,000 is in gold coin: the balance is in Dominion Notes.

T. C. BOVILLE, *Deputy Minister of Finance.*

COAL MINERS' MINIMUM WAGE BOARD

A bill has been introduced into the British Columbia legislature, providing for a Coal Miners' Minimum Wage Board, to consist of the Chief Inspector of Mines as chairman and two other members to be appointed by the minister, one of whom shall represent the mine owners and the other the coal miners. Among the powers given this board are the following:—

1. Define and redefine any portion of the province as a minimum-wage district for the purposes of this section.
2. Fix the minimum wage for coal miners employed in any district.
3. Impose conditions and exceptions to which the application of the minimum wage in any district shall be subject.

Why You Should Invest Your Funds in Mortgage Corporation 5½ per cent. Debentures

The Standard Reliance Mortgage Corporation is registered under the Loan Companies Act of Ontario, and makes a yearly return of their affairs to the Government, by whom their accounts are published for the information of the public each year.

Mortgage Corporations are one of the classes of financial institutions, selected by the Government of Ontario, in which the uninvested funds of Provincial Insurance Companies may he deposited. The others are the Post Office Savings Bank and the Savings Department of Chartered Banks of Canada.

Stocks and Bonds fluctuate in value with the state of the money market and other causes Thousands of people have invested their savings in these debentures without the loss of one dollar invested. The debentures are issued in amounts of $100 and upwards Interest at 5½% is paid in cash on the day it is due.

Write for our booklet about "PROFITS FROM SAVINGS."

It explains what these Debentures are and why they are so good a security.

Paid-up Capital and Surplus Funds.

FIRE PREVENTION IN RURAL MUNICIPALITIES

Duty of Everyone in Community to Lessen Waste—Powers of Marshal

THE annual convention of the Mutual Fire Underwriters' Association was held in Toronto last week. Hon. T. Alfred Fleming, state fire marshal, Columbus, Ohio, gave an address, using as his subject "Fire Prevention in Rural Municipalities."

He impressed upon the delegates the urgent need of the entire country co-operating and doing their utmost to avoid fire waste.

"It is everyone's duty to lessen the fire waste," said Mr. Fleming, "and it is everyone's duty to exercise proper care and precaution. Gasoline should not be stored in a barn, but at least three feet under ground, and with proper ventilation into the tank. The habit of keeping gasoline tractors in barns is not proper and should not be done. A barn is not a proper place to store any kind of a motor, oils, gasoline or such inflammable substances."

He referred to the power which was his, as the fire marshal for the state of Ohio. He stated that he had the power to have any building which he deemed to be unsafe removed or rebuilt, as the occasion demanded. If the owner did not carry out the instructions issued by the fire marshal, then representatives of his department tore the building down, whether it was occupied or vacant.

The marshal inspects all chimneys and lightning rods, etc., and if they are not installed in a proper manner he instructs that they be removed and properly built. "Not only does the marshal give these orders," said the speaker, "but he sees that they are carried out as instructed."

$350,000,000 In Fifty Years

Russell T. Kelly, president of the Hamilton Board of Trade, in his address, said: "The fire loss in the Dominion of Canada since Confederation is over $350,000,000. These figures are exclusive of the enormous forest fire loss. Over $197,000,000 has been paid by insurance companies in the past half-century, and the ravages of fire have taxed the people of the Dominion over $700,000,000 during that time, exclusive of the many millions lost in forest fires."

George F. Lewis, deputy fire marshal for Ontario, stated that the fire marshal had to encounter many difficulties, and thanked the delegates for the criticism that had been given his department. Mr. Lewis also stated that his department was instrumental in breaking up a gang of Italians who had been operating between Niagara Falls and Hamilton, with a price of $250 to burn any building down. He also laid stress on the necessity of farmers discontinuing the practice of storing motor cars in their barns. He said that of the 110,000 machines in Ontario, farmers owned more than half and stored them in their barns.

E. P. Heaton, fire marshal for Ontario, addressed the convention at some length. W. J. Vale, deputy superintendent of insurance, also addressed them, and Thomas Hoskins used as his subject, "Compensation of Directors and Officials of the Farmers' Mutual Insurance Companies," while Russell T. Kelly spoke on "Fire Prevention a National Duty."

James Ross, of Waterford, Ont., president of the association, in a brief address, referred to the aims and objects of the association, remarking that it was a man's-size job, and up to the association to give a proper service. J. J. Schumacher, Walkerton, gave a brief address, for which he used the subject, "Uniformity in Farmers' Mutual Insurance Companies."

James Ross retired as president of the association, and the nominating committee appointed the following officers for the year: President, W. A. Galbraith; first vice-president, George B. Webster; second vice-president, George L. Miller; executive committee, James Ross, James E. Carroll, Thomas Hoskins, J. C. Daice and Mr. McKerrechin. The auditors for the year are C. P. McDougall and R. W. Brink.

MERCHANTS BANK CHANGES

The Merchants Bank of Canada has announced several changes. H. W. Nesbitt, who has been for some time past the successful assistant manager at the chief office in Winnipeg, now becomes the chief western inspector, with his headquarters in Winnipeg. He will be under the direction of G. Munro, the superintendent of Manitoba and Saskatchewan branches. Mr. Nesbitt, before coming to Winnipeg, was the manager for the Merchants Bank in the city of Medicine Hat. He was active in the Victory Loan campaign and rendered excellent service in connection with that effort.

He is to be succeeded as assistant manager in the Winnipeg office by G. N. Stacey, who, up to the present, has been the manager for the Merchants Bank in the chief office in Vancouver. Mr. Stacey arrived in the city recently, and assumed his new post. He was active in the financial life of Vancouver and also took a deep interest in amateur sport. He was the president of the Rowing Club and was famous in Rugby football circles in earlier times on the coast. A. C. Fraser, of Victoria, will move to Vancouver, to take the post left vacant by Mr. Stacey.

PORTAGE GRAIN GROWERS MEET

At the annual meeting of the Portage la Prairie district Grain Growers' Association, held in Portage la Prairie, Man., last week, many important resolutions were debated and passed.

Resolutions were carried, as follows: Favoring the fixing of the price of the 1919 wheat crop; endorsing the farmers' platform and asking that the representative of the Portage la Prairie division in the house of commons, be required to pledge himself to support and work for the adoption of the measures sought by the platform, unless some great national issue supersedes all domestic issues. This resolution further provided that should the Portage member refuse to give such a pledge the organization call an open convention with the object of nominating, financing and electing a candidate.

The following resolution was also adopted: "Be it resolved that the Portage la Prairie Grain Growers most emphatically endorse and support the bill presented by W. R. Woods, M.L.A., in the provincial legislature, to eliminate all gambling in wheat and other food products, which not only robs the producer as well as the consumer, but also has a detrimental effect upon the morals of those engaged in this most demoralizing practice; and further, that we request the central executive to urge the necessity of such legislation upon both the provincial and federal governments immediately."

The following officers were elected: President, B. Richardson, Beaver; vice-president, Josiah Bennett, Pine Creek; directors, J. Barrett, Bagot; Ed. Muir, High Bluff, and Mrs. R. J. Caskey, Longburn.

INSTITUTE OF ACTUARIES
STAPLE INN HALL, LONDON
COLONIAL EXAMINATIONS

NOTICE IS HEREBY GIVEN:

1. That the Examinations of the Institute of Actuaries will be held in the Colonial centres, Melbourne, Sydney, Adelaide, Brisbane, Wellington, Montreal, Toronto, Ottawa, Winnipeg and Cape Town, and also in Bombay and Calcutta, from Monday, 23 June, to Wednesday, 25 June, 1919 inclusive.

HURON AND ERIE ANNOUNCES STAFF CHANGES

At a recent meeting of the board of directors of the Huron and Erie Mortgage Corporation, and the Canada Trust Company, several changes in the staffs were announced.

Morley Aylsworth, who has been secretary of the institutions for the past seven years, has been named assistant general-manager.

Charles J. Clarke, manager of the main branches, London, has been appointed treasurer, but will continue his duties as manager. He will be ably assisted by Austin A. McLeish, who has been appointed assistant manager of the main branches.

D. McEachern, assistant secretary during the past two years, now becomes secretary of both companies.

H. W. Givins, manager of the Regina branch since 1911, has been appointed superintendent of western branches, and will have under his charge the Western Canada investments.

R. P. Baker, head office accountant, is to be investment manager at the new Toronto branch, to be opened on or about July 1st.

George S. Jewell, Huron and Erie main branch accountant, succeeds Mr. Baker as head office accountant. E. H. Nugent takes the position of accountant of both Huron and Erie and Canada Trust Company main branches.

It is interesting to note that all the above officers entered the employ of the Huron and Erie as junior clerks; the policy of the directors being, as far as possible, to advance their own men when vacancies occur.

Other prominent officers of the companies are: D. McArthur, estates manager; G. L. Spry, advertising manager; P. B. Fetterly and D. McAlpine, inspectors.

The market branch, London, is managed by Walter T. Westby; the Windsor branch by E. Victor Smith, and the St. Thomas branch by G. C. McConechy.

HAMILTON PROVIDENT AND LOAN SOCIETY

Details of the annual statement for 1918 of the Hamilton Provident and Loan Society are given elsewhere in this issue. The assets now amount to $4,578,473, of which $3,978,850 are invested in first mortgages on real estate in Ontario, Manitoba and Saskatchewan, valued at $10,192,764. The balance of the assets consists of government bonds, call loans, cash and office premises. In spite of large withdrawals of deposits on account of Victory Loan subscriptions, the society still has on deposit over $850,000.

This is one of the oldest and most conservative loaning institutions in Canada. During the forty-eight years of its existence since 1871, it has paid in dividends to its shareholders the sum of $3,378,556, and the lowest dividend it has paid during these years was at the rate of 6 per cent.; the rate at present is 8 per cent.

During this period of almost half a century the company has had only three managers. The first was Mr. H. D. Cameron, who had charge of its affairs from 1871 to 1895. He was succeeded by Mr. Campbell Ferrie, from 1895 to 1915. The present manager is Mr. D. M. Cameron. Continuity has been similarly preserved in the staff. Mr. John McCoy, the inspector and valuator, is known as one of the best at this work in Ontario. He commenced with the company in 1874, three years after it was organized. The accountant, Mr. W. A. Stewart, began as a clerk with the society in 1889, and Mr. Robert H. Hooper commenced with it in 1900.

Cabled advices to the Canadian Trade Commission in Ottawa state that there are now no restrictions at all on imports into South Africa which would interfere with trade from the Dominion. This information has been secured for the guidance of Canadian exporters who have been canvassing South African markets in the past few weeks.

WRITE FOR BOOKLET "PROFITS FROM SAVINGS"

OTTAWA SHAREHOLDERS RATIFY AGREEMENT

At a special meeting of the shareholders of the Bank of Ottawa held on March 5th the agreement made for the sale of the bank to the Bank of Nova Scotia was ratified. About 85 per cent. of the shareholders were represented at the meeting and endorsement of the plan was practically unanimous. The shareholders of the Bank of Nova Scotia have not as yet voted upon the amalgamation.

NORTHERN LIFE ASSURANCE COMPANY

The total premium income less reinsurances of the Northern Life Assurance Company for 1918 was $493,240 as compared with $451,889 last year. Income from interest dividends, etc., was $178,376, and the total income, $674,780. Payments to policyholders amounted to $238,481, and expenses of management, etc., total $230,762; the corresponding figures for last year were $125,157 and $220,192. The excess of income over expenditure, after paying a dividend of $29,399, was $175,286.

The net reserve under insurance contracts is now $2,447,536, and the total assets are $3,090,373, after providing for unpaid death claims, etc. There is a contingent reserve fund of $46,918, and a surplus for the additional protection of policyholders of $502,800. This, of course, includes the paid up capital stock of $490,378. The principal assets consist of $1,190,310 of mortgage loans, a reduction as compared with last year; $1,113,807 of bonds and stocks at their market value an increase as compared with last year, and policy loans of $330,620, approximately the same as last year. This is a London, Ontario, company but its directorate includes members from throughout Western Ontario. In his address to the shareholders the president, Mr. T. H. Purdom, stated that the insurance in force now amounts to $13,717,395. The company's losses on account of the war, amount to $80,424, and from the influenza epidemic, $85,409.

Applications will be received up to March 20th, 1919, for the position of

MANAGER

of the new Toronto Branch of the Huron & Erie Mortgage Corporation and the Canada Trust Company.

REQUIREMENTS :—

Energy, a general knowledge of finance, an attractive personality, and a wide Toronto connection.

Need not have accounting and investment experience, but must be able to build a savings and debenture business.

APPLY giving references by mail only to

Secretary,

The Huron and Erie Mortgage Corporation

The Canada Trust Company

LONDON - CANADA

NEW PARTNERSHIP FORMED

Mr. J. G. Beaty has taken over the business formerly conducted by him in Toronto for Messrs. Erickson Perkins and Company, members of the New York Stock Exchange, and will do business under the title of Messrs. J. G. Beaty and Company. In this new enterprise, which will, of course, be largely the continuance of an old and well-established business, Mr. Beaty will have associated with him Mr. Edwin M. Friedlander, who will look after the interests of the firm in Wall Street. Messrs J. G. Beaty and Company will have direct wire connection with the New York Stock Exchange, as formerly, now using the wire of Messrs A. A. Housman and Company.

BRITISH COLONIAL FIRE INSURANCE COMPANY

Total receipts for 1918 of the British Colonial Fire Insurance Company, Montreal, amount to $411,565, and the total payments $397,959. The premium income in 1917 was $253,526, and after deducting reinsurances, etc., the net premium income was $121,062; in 1918 the premium income was $308,002. Assets now total $1,178,102 and the liabilities to policyholders are $155,294.

The company's annual meeting was held in Montreal on February 12th. This company was incorporated in 1909 and secured a Dominion license in 1912. Practically all its business, however, is done in Canada. At the end of 1917 it had net insurance in force to the amount of $13,541,449. In his address to the shareholders the president, Mr. I. L. Lafleur referred to the probability that building operations would soon be resumed, and would increase the volume of business.

STANDARD RELIANCE MORTGAGE CORPORATION

Results for the year 1918, as shown by the annual statement of the Standard Reliance Mortgage Corporation, of Toronto, include net earnings, after deducting all expenses of management, etc., of $423,559. In comparison with last year the statement shows:—

Balance from previous year..........	$ 4,744	$ 32,694
Net earnings	434,316	423,559
Interest on debentures and deposits..	213,935	245,301
Government and war taxes	9,291	10,597
Contributions	3,250	3,355
Dividends	179,890	184,010
Balance carried forward	32,694	12,991

The balance sheet shows an increase in the amount of debentures outstanding, but a decrease in deposits. Among the surplus funds the contingent fund has been reduced from $75,000 to $60,000. Holdings of mortgage loans have increased considerably in spite of the loaning conditions during the year. The excellent quality of the company's mortgage investments is indicated by the fact that the amount of real estate acquired under foreclosure shows a reduction in 1918. Total assets are now over $8,500,000.

At the annual meeting of the company, held on Monday, March 3rd, the president, Mr. N. H. Stevens, referred especially to the increase in the amount of debentures issued, and complimented the management upon its excellent work during the past four or five important years.

The Toronto bank clearings for the current week are $74,339,654, compared with $61,917,233 for the same week last year, and $53,220,765 two years ago.

The Hamilton Provident & Loan Society

Reserve Fund Now Equals Capital

The Forty-Seventh General Annual Meeting of the Shareholders was held at the Society's head office at noon yesterday.

Among those present were the following: George Hope, Archdeacon Forneret, John McCoy, W A. Robinson, Joseph J. Greene, A. T. Reid, James Roy, F. H. Lamb, W. A. Wood, R. Butler, J. M. Eastwood, Chas. Judd, Major Roberts, Dr. E. B. O'Reilly, T. H. Crerar, D. M. Cameron, Stanley Mills, R. B. Davidson (Ottawa), Dr. Hansel, W. A. Stewart, John Hooper, H. W. Clarkson, E G. Payne, James S. Whicher, J. R. Stone (Brandon), G. E. F. Smith, W. J. Aitchison, Robt. Mills.

The President, Mr. George Hope, having taken the chair, the Treasurer, Mr. D. M. Cameron, acting as Secretary, read the notice calling the meeting, and the Financial Report, as follows:

The Board of Directors beg to submit to the Shareholders their Forty-seventh Annual Report, showing the result of the Society's operations for the past year, with accompanying Financial Statement to December 31st, 1918, duly audited.

The net profits for the year, after providing for all interest due and accrued on borrowed capital, costs of management, contributions to Patriotic Funds and all other charges, amount to $169,064.10; to this has been added $5,153.85, withdrawn from the Contingent Fund, making a total of $174,217.95.

Which has been appropriated as follows:

Two half-yearly Dividends at the rate of eight per cent. per annum	$ 96,000.00
Government and Business Tax	3,166.91
War Taxes	5,051.04
Added to Reserve Fund	70,000.00
	$174,217.95

The Reserve Fund now amounts to $1,200,000.00, and equals the Society's paid-up Capital.

There remains at the credit of Contingent Fund, $28,840.35.

Installments maturing under mortgages during the year have been satisfactorily met.

The Directors much appreciate the valuable services rendered throughout the year by Messrs. Gillespie & Paterson, W.S., the Society's agents in Edinburgh.

The Officers and Staff continue to discharge their duties efficiently.

All of which is respectfully submitted. GEORGE HOPE, President.

Hamilton, Canada, Jan. 29, 1919.

	$4,579,472.98

D. M. CAMERON, Treasurer.

The President congratulated the Shareholders on the fact that the Society's Reserve and Surplus Profits now amount to $1,228,840.35, and exceed the paid-up Capital.

He also pointed out the satisfactory nature of the Society's investments, which consist of $3,978,849.80, invested in first mortgages on productive real estate valued at $10,192,764, Government and Municipal Debentures $278,919.50 and $7,938.85 on call loans on Stock.

The Report was adopted on motion of Mr. George Hope, seconded by Mr. J. J. Greene.

The Directors were re-elected as follows: Messrs. George Hope, Joseph J. Greene, Henry L. Roberts, W. A. Wood, Stanley Mills and William Hendrie. At a subsequent meeting of the Directors, Mr George Hope was re-elected President, and Mr. J. J. Greene, Vice-President.

BRITISH AMERICA ASSURANCE COMPANY

The statement for 1918 of the British America Assurance Co., Toronto, shows an improvement in the financial position. At the annual meeting, held in Toronto, on February 27th, the president, Mr. W. B. Meikle, after referring to the heavy fire losses during the year, stated that the small accounts in hail and automobile insurance had been profitable, but that the results in the marine department had shown a loss. He added:—

"Through the increased fire business there is necessarily an increase in unearned premium reserve. Our yield from interest and rents has increased from $80,613.63 in 1917 to $102,265.26 in 1918, and I am satisfied that our assets are well invested. Fearing that the war might send market prices lower, we marked all our assets down to even under the market value at the end of 1917. The ending of the war has, on the other hand, given us the very satisfactory increase in market values of $56,953.54, and of this we have set aside $25,000 as a reserve against any future fall in these prices. A further item of $5,068.37 has been added to the reserve for hail business, which is now at a figure higher than is required under the government standard.

"After the payment of preference dividends and providing for the foregoing items, the balance at the close of the year is increased by $239,570.16, making same $1,525,268.91. As the reserve on the business under the government standard is now $1,825,733.98, there is an amount of $300,465.07 to make up. This will certainly take one good year, or two moderate years, and after that the common stockholders should be receiving dividends."

The company's total income for 1918 was $5,454,713 in comparison with $4,717,645, showing a substantial increase. In the figures given in *The Monetary Times* of February 28th, the balance brought forward was not included in the 1918 figure, which made it appear as if the income was less this year than last. The income from premiums, interest and rents in 1917 and 1918 was $3,913,976 and $4,112,061, respectively.

SASKATCHEWAN MORTGAGE & TRUST CORPORATION

Gross profits for the year 1918 of the Saskatchewan Mortgage and Trust Corporation, Limited, of Regina, were $70,421, according to the statement submitted at the recent annual meeting. This is considerable increase over the previous year and after deducting cost of administration, taxes and rentals, amounting to $16,007, it leaves a net profit for the year of $54,413.82. After adding to this amount the balance carried forward from the previous year, it makes a total profit of $64,661.39, which was disposed of by paying $45,188.05 to the shareholders by way of dividends, adding $10,000 to the reserve account, which now amounts to $100,000, and the balance of $9,473.34 was carried forward. The following directors were elected: J. F. Bole, president; A. E. Whitmore, vice-president; F. N. Darke, F. J. James, S. C. Burton, A. W. McGregor, R. M. Johnson, Hon. A. P. McNab, John F. Reid, A. G. Rawlinson and C. V. Smith, manager and secretary.

WESTERN ASSURANCE COMPANY

At the annual meeting of the Western Assurance Co. held in Toronto on February 27th, the president, Mr. W. B. Meikle, discussed the leading features of the company's statement. This statement was reviewed in comparison with that of the previous year in our issue of February 28th. In the comparative figures there given, however, the total income was stated to be $6,693,695. This did not include the balance brought forward from 1917 and the net increase in the market value of securities, which bring the total income for 1918 to $8,736,268, or more than for the year 1917. In addressing the shareholders Mr. Meikle said:—

"With most of the other expenses in carrying on business increased through war conditions, the turning out of a satisfactory profit is not easy. But when to net profit on underwriting we add our interest earnings of $181,963.95 and the net increase in market value of securities of $121,660, we have the large amount of $562,929.15, and as the reserve for unearned premiums on the government standard was reduced by $69,183.87, the improvement for the year is no less than $632,113.02.

"From this amount two half-yearly dividends on the preference stock amounting to $70,000 were paid, $50,000 has been carried to reserve to provide for taxes accrued but not yet due, and another $50,000 has been put to a new reserve against future possible depreciation in securities. Last year we went even below the then market value in our securities, but the end of the war has relieved our minds of a further fall in prices, and this new reserve of $50,000 may check any temporary depreciation at the end of any future year.

"After making these payments and provisions for reserves the balance in hand as at December 31st, 1917, is increased by $392,000.43 to $2,312,911.67, and as the government standard for unearned premium reserve was $2,344,327.80 at 31st December last there is only the small sum of $31,416.13 to make up to enable us to have a full reserve and to relieve the preferred stock from any longer standing as the bulwark for this reserve.

"A dividend on the preference stock for the last half of the year was paid in January of this year, and including this as a liability as of the end of last year the amount required to make up the government's standard of reserve would be increased to $66,416.13. There may be some adjusting entries which the Ottawa department may require and these may or may not increase the deficit, but in any case if 1919 is a year which gives a trading profit of say at least $200,000 this, with the interest earnings, would be sufficient to pay a dividend to the common shareholders—subject, of course, to there being no serious increase in the unearned premium reserve.

"It will be of interest to the shareholders to know that the interest account is now of such a size that in itself it can give not only the preference stockholders their dividend but have enough left to provide a 7½ per cent. dividend to the common stockholders, and this without touching the underwriting profit on the business."

FINANCE DEPARTMENT

Dominion Income War Tax Act

TO WHOM APPLICABLE

Every person who in 1918 resided or ordinarily resided in Canada, or was employed in Canada or carried on business in Canada, including corporations and joint stock companies.

WHO SHOULD FILE RETURNS

1. Every unmarried person or widow or widower, without dependent children under twenty-one years of age, who during calendar year 1918 received or earned $1,000 or more.
2. All other individuals who during the calendar year 1918 received or earned $2,000 or more.
3. Every corporation and joint stock company whose profits exceeded $3,000, during the fiscal year ended in 1918.

FORMS TO BE FILLED IN AND FILED

FORM T1. By individuals, other than farmers and ranchers.

FORM T1A. By farmers and ranchers.

FORM T2. By corporations and joint stock companies.

FORM T3. By trustees, executors, administrators of estates and assignees.

BRITISH OVERSEAS BANK

The Anglo-South American Bank, Glynn, Mills, Currie and Co., the Northern Banking Co. of Belfast, the Union Bank of Scotland, and Williams Deacons Bank are combining, it is announced, to furnish capital for a new banking institution, to be called the British Overseas Bank. The special object of the new bank will be to facilitate and finance foreign trade.

The total value of sea fish at the point of landing on both the Atlantic and Pacific coasts during the month of January was $606,556, according to the monthly statement issued by the Naval Department. In comparison with January, 1918, when the total value was $830,677, there is a decrease of $224,121.

NEW BRUNSWICK POWER COMPANY

Total earnings of $774,252 are reported by the New Brunswick Power Company for the year 1918. Operating expenses required $612,002, bond interest $87,500, and other interest $5,589, leaving net earnings of $69,160 to be carried to surplus account. Most of this was paid out in dividends and a balance of $6,452 was carried to profit and loss. Owing, however, to the increase in operating expenses the company was compelled to pass its first and second preferred stock dividends payable September 1st, and its second preferred stock dividend payable December 1st. The first preferred stock is cumulative so that there is one payment of $17,500 accumulated. The second preferred stock is non-cumulative. Last year the company was able to maintain all its preferred dividend payments, but did not pay anything on the common stock.

IRRIGATION POSSIBILITIES AROUND LETHBRIDGE

Large Sums of Money Will be Wanted for Highly Profitable Development of Farming and Livestock Raising

By G. R. Marnoch,
President, Lethbridge Board of Trade

An old-timer in Lethbridge often makes the remark when we are talking of future development that "when things happen in the west they happen very fast." Since a previous article on "Better Balanced Farming" appeared in *The Monetary Times* a month or two ago, things certainly have been happening very fast in the expression of widespread interest in the possibilities of getting greatly increased acreages under irrigation in the district around Lethbridge.

During the last few weeks very largely attended meetings of farmers have been held at various towns throughout these districts: in particular at Raymond and Taber, while there have been other gatherings at Macleod, Cardston and Milk River, and a number of other places. At each meeting the expression of the desire to have the Dominion government provide further information by proceeding with more detailed surveys has been strongly manifested. Some of the farmers go farther than this, and almost appear to think that a magic wand can be waved over the country, and the waters made to flow over the land next summer. It has been necessary to point out that, in regard to the Lethbridge south-easterly projects, all the preliminary information that is now available has been just as available for four or five years past. At one of the recent meetings, to bring home this fact, the story was told of a party of entombed coalminers; their pals on the outside had worked for 33 hours in shifts of twenty minutes and ten off, till at last they got through. The final pick stroke that broke the debris disclosed to the sweating relief party a very grimy face with a rolling white eye and a parched mouth from which came the query "Why in 'ell was you so long a-comin'?"

Stabilizing Effect on Farms

Yet it is well to state that this new found desire for irrigation is no flash in the pan following a dry year. It is a well founded call for aid from the mountain waters for the stabilizing effect that they can make on our farming operations. The recent article in this journal was reprinted and circulated among our farmers; and one of them remarked to the writer, in talking of the need for more hay, more cows and more cow-dung, "Yes, we have got to put a surcingle on our land," to which the reply was "And we people in the towns and cities need to put a surcingle on our business." The grain crops of 1915, running as they did in many cases round Lethbridge, as high as seventy bushels to the acre; in 1916 around forty; and in 1917, with a very light rainfall, up to thirty bushels, prove the high quality of our lands; but every once in a while we have a very light year such as 1918, which gravely disturbs the balance. And this becomes the more serious, because our livestock holdings have increased so very heavily since the movement in this direction started in 1914.

In a very few weeks now we shall hope to have enough information from the Reclamation Service to enable the farmers in Lethbridge northern project to discuss intelligently whether they prefer the plan for getting every acre that lies under the canal levels under irrigation, or whether the plan for spreading the benefits of the water farther and giving each farmer forty acres on his quarter section of 160 acres appeals more to their requirements. The likely comparison of costs will be (taking normal pre-war prices) $24 per acre for the first plan and $40 per acre for the second plan; they remark that the first would carry a capital cost of nearly $4,000 per quarter section, whereas the second would amount to but $1,600, or in other words an even $10 per acre added to the book cost of their quarter section; while the forty acres under hay or alfalfa would give them as much irrigating work as they could comfortably tackle, and yet provide enough alfalfa and pasture and stock water to carry a goodly number of animals. The straw piles from the grain crops on the other acreage will round out a very effective farm unit. The farmers who can come in under this project, which will water about 100,000 acres spread through the district, have been patient in waiting for information, and they will soon be in a fair way to be able to have the plan carried to a practical conclusion. The water is all available in a Canadian river, the Old Man River west of Macleod. They will, however, have to devote some attention to the study of the Alberta Irrigation District Act, for it is evident that it will require some alteration to fit the organization that will be necessary.

More Information Required

The farmers who may ultimately benefit from waters brought from the St. Mary's, the Belly and the Waterton Rivers, are in a different case. In the first place the surveys that have been made are only flying surveys, sufficient only to show the rough outlines of the proposals. Second, the actual ownership of these waters as between the United States and Canada is still under discussion between the nations through the agency of the International Joint Commission. Until we have absolute knowledge—and we have not that knowledge yet—as to what volume of these waters is adjudicated to Canada as her share, it is not possible to make definite plans for the secure and full use of our share of these waters. A deal of useful survey work can, however, be done, because undoubtedly by a system of reservoirs to hold the early spring and late fall runs of the rivers, there will be considerable quantities of water available.

The third point that arises is this. How are the proposals to be financed? The natural source to be thought of first is the Dominion government. The attitude of the minister of the interior, however, is that the Alberta government should co-operate in financing and constructing the works; but the Hon. Mr. Meighen has expressed his willingness to recommend to his government that the Dominion should fall in behind the province in assisting in the provision of the money. Of course, it has been understood all along that the farmers will undertake responsibility, on the security of their lands, for the ultimate repayment of the capital cost and the carrying of the interest charges, by organizing in districts in much the same way that a city or town would finance and construct a system of domestic and industrial water supply. The alternative, and indeed it would apply in the government guarantee plan, is that the bonds should be sold on the market; and it is here that, besides the general interest of the readers of this paper in a matter of so great importance in the development of the country, it becomes of particular interest to financial houses and construction engineers.

Interesting to Bond Dealers

The Lethbridge northern plan contemplates an expenditure of the sum of $2,500,000 on one plan or $4,500,000 on the other; while the possibilities of the various south-easterly projects would contemplate expenditures which might be anywhere from $5,000,000 to $15,000,000.

There is, of course, a vast difference between these projects and anything else that has been attempted in the west. The 100,000 acres now so successfully operated under irrigation around Lethbridge at Magrath, Raymond and Coaldale has been gradually developed during the last fifteen years as a land holding and development plan. The company invested capital in the land and in the water system and then brought the people to them. In the other large projects of the Canadian Pacific Railway and the Canada Land and Irrigation Co. (lately the Southern Alberta Land Co.) farther north these are still but little beyond the stage of having the water brought to the land; the colonization has but little more than begun.

The Lethbridge district plans, on the other hand, have the land and the people; and the people are calling for the water. And, as the farmers and the business people of these districts, to the number of 100,000 population, have their minds made up to the usefulness and the necessity of their case; and as they all feel sure that the enterprises can be made thoroughly successful and profitable, it is certain that ways and means will be found for bringing the plans to a practical conclusion.

WANT DIVISION OF BRITISH COLUMBIA

Boards of Trade Demand Separation of Province East of Cascades

At a meeting of the Associated Boards of Trade of Eastern British Columbia in convention at Revelstoke recently, a demand was made for the creation of a separate province of that part of British Columbia lying east of the Cascades. The reason of this demand was because of the alleged lack of proper recognition from the coast. The resolution, which met with the support of the convention, was laid over for a year.

The election of officers took place with the following result: President, Noble Binns, Trail; first vice-president, W. A. Anstie, Revelstoke; hon. treasurer, J. R. Hunter, Nelson; commissioner, F. A. Starkey, Nelson; finance committee, I. R. Poole, L. A. Campbell, Guy Constable, the president and first vice-president.

The following resolutions were endorsed by the convention:—

From Creston: Reclamation of the Kootenay flats.

From Nelson: (1) Removing of duty from machinery; (2) British dominions and colonies to be given preference in the purchase of supplies for the reconstruction of devastated Europe; (3) Dominion government be requested to erect and operate plants for testing and concentrating mineral ores; (4) that Daylight Saving Act be continued as before.

From Rossland: (1) That various roads not now properly linked up should be completed in order that better facilities be had for travel; (2) that the provincial government be asked to amend section 106 of the Public Utilities Act in order to protect local industries.

From Mountain Lumber Manufacturers' Association, urging that the present war tax on lumber be continued by way of a tariff duty in order to protect the Canadian industry.

From Revelstoke: That the Columbia River be recommended as a feasible waterway for transportation purposes; that a separate province be created of all that part of British Columbia east of the Cascades for the reason that proper recognition cannot be obtained from the coast.

From convention: That the Canadian Pacific Railway lakes and river service freight rates, which are considered excessive, be appealed to the Railway Commission board.

That the various cabinet ministers, who, from time to time, visit the coast in their official capacity, be urged to pay more attention to interior British Columbia points.

That it is in the best interests of the province that all undesirable aliens in the province be deported.

That machinery not obtainable from Canadian manufacturers be admitted free of duty.

A resolution was passed advocating that moneys spent in the Dominion housing scheme be used in purchasing materials in Canada. One was also passed requesting that the provincial taxation measure be made fairer by more equitable measures being taken.

STEPS BY BOARD OF TRADE FAVORABLE TO CANADA

The British Board of Trade has issued an open general license to permit the importation of bacon, ham and lard arriving on or after March 10. Consignments which may be imported under this general license before March 31 may not, however, be sold before that date, according to the information cabled to the Canadian Trade Commission in Ottawa. This restriction, it is believed, has been dictated partly by the difficulties of allotment under the ration plan in Great Britain.

The board of trade also announces the removal, as from the end of April, of all restrictions on the importation of paper, including wall paper and paper-making materials. Meanwhile, the number of import licenses will be increased to 75 per cent. of the pre-war standard. The Canadian Mission at No. 1 Regent Street, London, S.W., is prepared to advise importers into the United Kingdom who may be experiencing difficulties in importing goods from Canada.

MANITOBA WILL REPORT FIRE LOSSES

Statistics Gathered by Fire Commissioner, with Classification of Losses and their Causes

Commencing with the month of February, the fire commissioner for the province of Manitoba will collect and publish statistics of the fire losses in the province. The first of these for the month of February has just been made public and is given below. Subsequent reports will be mentioned from time to time in these columns.

In explanation of the purpose of this work, Mr. Charles Heath, the superintendent of insurance and fire commissioner for the province, says:—

"On the assumption that to correctly prescribe a cure for a disease, it is necessary first to correctly diagnose the case, this department has instituted a new and improved system for the collection and tabulation of fire loss statistics. The object of this system is to insure, as far as possible, that the advices furnished this department are correctly and punctually rendered, and these returns are carefully checked with the monthly statements furnished by insurance companies and adjusters. The information is then carefully tabulated with a view to showing the locations in which the fires occurred, the occupancy of buildings burned, the construction of buildings burned, causes of fires and so forth.

"With this information secured, we will, so to speak, have isolated the germ of the disease and be in a position to study it and find out why fires were so frequent in certain districts and practically unknown in other districts, and the same with regard to certain occupancies and constructions of buildings. Then we will be able to specialize instead of generalize with regard to the application of the remedy.

"At the present time we are handicapped with regard to comparisons, as prior to July 1st last, there are practically no statistics in this office that are worth considering, and those available for the latter part of the year, although fairly correct as far as they go, are only useful for comparative purposes to a small extent.

"Losses due to chimneys and stoves and furnaces amounting to $56,515 in January could be practically eliminated with proper building by-laws and rigid inspections. You will note that losses from these causes constitute practically 70 per cent. of the total loss for January."

The following is the list for February, 1919:—

Number of fires reported	94
Estimated value	$3,726,229
Amount of insurance	3,053,730
Estimated loss	80,193
Loss ratio per capita	0.1578
Fatalities reported	4

A comparative statement of losses by cities and towns, grouped according to class, follows:—

Winnipeg	$23,352
Brandon	100
Towns with 5,000-12,000 population having waterworks and fire departments	22,053
Towns with 1,000-5,000 population having waterworks and fire departments	1,694
Towns with 1,000-5,000 population without waterworks and having fire departments	Nil
Towns with less than 1,000 population having waterworks and fire departments	Nil
Towns and villages with gasoline engine, chemical engine, hand pumps	131
Towns and villages without fire protection	353
Rural municipalities	32,510
Total	$80,193

The Bank of Toronto has just purchased what is known as the "Scottish Rite" property, 106, 106½ and 108 Sparks Street, Ottawa, owned by Mr. A. McMillan, jeweler, the sum involved being $120,000.

NEW BASIS FOR WINNIPEG WATER SYSTEM

New Arrangements Will Make Winnipeg Consumers Bear Entire Cost of Enterprise

ON February 28th, a bill was introduced into the Manitoba legislature which aimed to make consumers pay the interest on all water system bonds in the form of water rates. The bill was introduced by Mr. J. P. Dumas, M.L.A. for St. Boniface. The bill is being opposed by the Winnipeg City Council and also by the Water District Board, which is controlled by Winnipeg. The following statement has been handed out by the city council, in explanation of its position:—

"Dismissing at this juncture the agreement entered into under the original Water District Act, where the interest and sinking fund were to be levied upon the land, let us examine how the proposal would work out to Winnipeg water consumers. It has been estimated that $16,000,000 will be invested in the project, and assuming that we set the average rate of interest at 5½ per cent. (it will probably be more), the annual levy will be: for interest $880,000 and for sinking fund, $207,000. Winnipeg's proportion of the 1918 levy was 79.27 per cent., and if this was not altered, the levy for the city would be $861,991. $880,000 estimated interest charges must be raised direct upon the water rates. Of the possible total water consumed in the district, Winnipeg's proportion is not less than 94 per cent., and this percentage of $880,000 equals $827,000, so that Winnipeg's water rates must be increased to produce this amount. It is estimated that $540,000 will be received from water consumers this year. Upon the water consumers paying this $540,000 must be further assessed $827,000, or an increase of 153 per cent. The sinking fund proportion for Winnipeg would be $164,151, or approximately one mill on the land assessment, plus the present rates, plus 153 per cent. of the present rates.

"The city should strenuously oppose the scheme.

"First. Because it is making a scrap of paper of the original contract. Second. That it is not a fair and equitable one, as it is putting on the Winnipeg consumers, as a body, an additional $130,000 per year, or approximately four and one-half million dollars for the life of the bonds, and relieving the municipalities of a similar amount.

"Notwithstanding the action the legislature may take, it will be absolutely impossible to add this extra amount of $827,000 per year to the amount to be paid by the water consumers.

"It would make the price of water to manufacturers, whom we are trying to encourage to do business in Winnipeg, prohibitive, and would only benefit the owner of valuable property, where they are small users of water."

BANKERS BEFORE LAW AMENDMENTS COMMITTEE

A delegation representing the banks of Manitoba, waited on the law amendments committee at Winnipeg last week, and asked for modification of the proposed corporations tax which is to be levied on the banks of the province.

The bankers were represented by F. W. S. Crispo and E. P. Winslow, of the Canadian Bankers' Association. They pointed out that in many parts of the province at the present time, banks are making little or no profit, especially in the towns of the province.

The proposed tax on banks is that, "Every head office of a bank shall pay a tax of $2,400 annually.

"Every bank shall annually pay an additional tax of $600 for each branch office or agency, up to and not exceeding four in number, all branches or agencies over and above four in number, and up to and including ten branches or agencies in excess of the fourth shall pay a tax of $300 on each such branch or agency in excess of the fourth, and all other branches or agencies over and above the fourteenth shall pay a tax of $100 each, except that no branch office or agency tax shall be levied upon for more than one office branch or agency in any city, town or village."

The delegation was asked to provide further data for the committee's consideration.

ONTARIO HYDRO FINANCIAL RESULTS

Power Facilities Have Been Used to Capacity Even Since Munition Manufactures Ceased

THE annual statement of the Ontario Hydro-Electric Power Commission for the year 1918 shows that 134 municipalities used power from the commission during the year, the average horse-power used being 156,828. The following is a summary of the financial results:—

	Expenditure.	Receipts.
Total capital invested	$12,308,628.56	
Revenue		$2,944,796.92
Interest charges on capital	481,812.79	
Maintenance	230,984.68	
Operation	147,522.29	
Administration	8,311.21	
Cost of power	1,385,706.41	
		2,254,337.38
Surplus		$ 690,459.54
Renewals	$ 266,579.32	
Contingencies	37,500.00	
		304,079.32
Surplus after deducting renewals, contingencies, interest and operation		$ 386,380.22
Sinking fund, chargeable		191,937.12
Net surplus after all charges, including sinking fund		$ 194,443.10

The Niagara system now has $1,176,692 credited to "reserve for renewals," $59,168 for "contingencies," $310,139 for "sinking fund," and under "net surplus," $413,937, making total reserves, including surplus and sinking fund, of $1,950,939.

Toronto-London Project

The Hydro-Electric Railway Association's executive meeting went on record as strongly in favor of the immediate commencement of operations in connection with the proposed hydro radial from Toronto through Brampton, Guelph, Kitchener, Stratford, St. Mary's to London. The resolution, which was moved by A. F. Wilson, of Markham, and seconded by G. Powell Hamilton, of Guelph, set out the fact that the municipalities in the district had carried by-laws to the extent of millions of dollars for the radial; and the work was vitally necessary to the progress and development of this part of the province and for the provision of employment for returned men in order to avoid a possible period of depression; and that the money necessary was now available.

Copies of the resolution will be sent to the municipalities interested, asking them to endorse the action of the executive, and make their position known to the Hydro-Electric Commission and to the prime minister of Ontario.

Another resolution urged the amending of the Power Commission Act to provide for the appointment of the Hydro-Electric Commission for a definite term of years in order to ensure continuity of service and policy. Still another resolution endorsed by Toronto-Niagara radial project, and pledged the members of the executive to personally support the radial by-laws being voted on in Hamilton, Saltfleet and Nelson.

NEW INDUSTRY FOR MEDICINE HAT

Announcement was made a few days ago in Medicine Hat, Alta., that a contract had been signed with a leading tractor industry of Minneapolis for the manufacture of tractors on a large scale.

Only the details of the arrangement remain to be completed, and a director of the Minneapolis concern is on his way to Alberta for this purpose.

BRITISH COLONIAL
FIRE INSURANCE COMPANY
MONTREAL

Report of the Proceedings of the 7th Annual General Meeting

The Seventh Annual General Meeting of the Shareholders of the British Colonial Fire Insurance Company was held at the Company's Head Office, 2 Place d'Armes, Montreal, on Wednesday, the Twelfth day of February, 1919.

The following report was presented to the Shareholders:—

This Report is the best which has been presented to you since the Company's inception. The Premium income shows an increase of $54,476.44 for the year, and the Income from all sources has increased by $95,965.17.

The total receipts amounted to $411,565.04, and the total disbursements to $397,958.91. The total Assets amount to $1,178,102.21, and the Liabilities to policyholders to $155,293.69.

The Company subscribed $25,000 to the Victory Loan and invested $8,200 in Municipal Debentures.

You have all learned of the death of our associate, the Honorable Ernest F. de Varennes. We have lost a sincere friend, and although he had only been a member of the Board for the last year, he had previously taken an active interest in the Company's affairs.

We wish to express our gratification and thankfulness that the world war has been brought to a victorious conclusion.

The demand for raw material necessary to the reconstruction of devastated countries and to the replacing of property destroyed will be considerable for many years to come, and Canada being specially favored in this respect our foreign trade should show a tremendous increase. Furthermore, immigration will be resumed and the work to be done in connection with the development of our country should result in an unprecedented era of prosperity. There will also be a resumption of building operations and the result should be a material increase in our Premium Income in the future. In view of the Company's financial position and with well established Agencies throughout the country, it is well prepared to take advantage of the conditions which will obtain from now on.

We wish to express our thanks to the staff and to the agents of the Company for the great interest which they have taken in advancing the interests of the Company, and we feel assured that they will continue to discharge their duties in an efficient and conscientious manner.

In conclusion your Directors declare themselves as being satisfied with the result of the Company's operations, and I have pleasure in proposing the adoption of this report.

Respectfully submitted,
I. L. LAFLEUR, President.

The Report was unanimously adopted.

It was then unanimously resolved that the following shareholders be and they are hereby appointed Directors for the current year, namely: I. L. Lafleur, J. B. Morissette, Nap. Drouin, Hon. Adelard Turgeon, J. E. Emile Leonard, Hon. J. E. Roberge, D. O. E. Denault, Eusebe Huard, L. H. Desjardins, J. Leon Patenaude, Michel Propper, Jean Spycket, Vicomte de Jessaint, Luzarche d'Azay, Dupont-Descat.

At a subsequent meeting of the Directors the following officers were elected: President, I. L. Lafleur; Vice-President, J. B. Morissette; Manager, Theodore Meunier.

NEW INCORPORATIONS

February 21	1,061,581	1,505,872	+ 444,291
February 28	1,208,966	1,512,271	+ 303,305

DOMINION EXPENDITURE PLANS

In the debate on the speech from the throne which took place on Tuesday, February 25th, acting premier Sir Thomas White, gave a summary of expenditures planned by the government, in reply to the criticisms of Mr. D. D. McKenzie, the new opposition leader.

The conclusion of an armistice, he said, had meant the release of about 120,000 munitions workers. In addition, from 25,000 to 30,000 soldiers a month were returning. The question was to find employment. On behalf of the Canadian National Railways, the Canadian Pacific Railway and Grand Trunk Railway orders for 200,000 tons of steel rails, valued at $13,000,000, had been placed. Railway estimates to be brought down would include an item of $35,000,000 for rolling stock and material, a sum exceeding $20,000,000 for railway extensions and over $10,000,000 for betterments and improvements. Further, the sum of $25,000,000 had been set aside to encourage better housing conditions. Work had been resumed on the Welland and Trent Valley canals. A Canadian trade mission in London with its counterpart a mission in Ottawa, had been created, credits had been established to facilitate the sale overseas of Canadian products. Provision of such credits, Sir Thomas felt, would be necessary for some time on account of the exchange situation. The figures involved were large. But for the next two or three years those in charge of the government would require the necessary courage to raise money on a sufficiently large scale to enable Canada to market its products abroad. Such a policy was absolutely vital to the continuance of business and agricultural prosperity. A measure was to be brought down to encourage the construction of better highways, and Sir Thomas did not know of any public work more progressive than highways improvement.

MUNICIPAL BOND MARKET

The Monetary Times' Weekly Register of Municipal Activities and Financing

Nelson, B.C.—Debentures are to be issued to the amount of $500,000, to finance the erection of a wholesale warehouse.

St. Thomas, Ont.—It has been proposed to issue debentures to cover the cost of erecting two new schools in the city.

Penticton, B.C.—An issue of $35,000 6 per cent. debentures has been awarded to the British-American Trust Company at $8.45.

St. Lambert, Que.—The town is offering for sale by tender $100,000 ten-year 5½ per cent. debentures. Interest payable half-yearly. Sealed tenders will be received at the town hall up to March 17th, 1919.

Point Grey, B.C.—Messrs. Wood, Gundy and Company, of Toronto, have purchased an issue of $55,000 5 per cent. bonds, due February, 1953. The money will be used for school purposes.

Vermilion, Alta.—Tenders will be received up till March 31st, 1919, for the purchase of $5,000 6 per cent. 20-year local improvement debentures. These debentures are guaranteed by the town at large.

Brockville, Ont.—In *The Monetary Times* recently, an announcement was made of the sale of $28,000 5-year 6 per cent. debentures locally. Since then, the town treasurer informs us, $2,500 has been sold, making a total of $30,500, sold at par over the counter.

Fitzroy Township, Ont.—Sealed tenders will be received up till March 28th, 1919, for an issue of $7,000 6 per cent. debentures, payable in 20 equal annual instalments, for the purpose of buying a site and building a school house.

St. Boniface, Man.—Sealed tenders will be received by Ernest Gagnon, city clerk, for the purchase of local improvement, bridge and waterworks debentures, amounting to $464,373.02, bearing interest at the rate of five and six per cent., and maturing in 5, 7, 10, 20 and 30 years. Further particulars appear in the advertisement on another page of this issue.

Toronto, Ont.—Messrs. W. A. Dyment and Company, of Toronto, have been awarded $300,000 city of Toronto Separate School bonds, bearing 5½ per cent. interest, and maturing in 20 years. The bonds are payable both in Toronto and New York. The following is a list of tenders:—

W. A. Dyment and Company	$300,828
Canada Bond Corporation	300,480
A. E. Ames and Company	298,020
R. C. Matthews and Company	297,690
Brent, Noxon and Company	297,229
G. A. Stimson and Company	297,036
H. A. Colson	296,430
Housser, Wood and Company	295,320
McDonagh, Somers and Company	294,981
C. H. Burgess and Company	294,330
A. Jarvis and Company	293,710
Wood, Gundy and Company	293,280
Pepler and Company	292,650

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from February 15th, to February 22nd:—

School Districts.—Beaverside, $800 10-years not ex. 8 per cent. annuity.

Rural Municipalities.—Buckland, No. 491, $1,500 5-years not ex. 8 per cent. instalment.

The following is a list of debentures reported sold from February 15th to February 22nd:—

Rural Telephone Companies.—Norden, $2,500, W. L. McKinnon and Company; North Weldon, $4,600, W. L. McKinnon and Company; Willow Heights, $5,000, Wood, Gundy and Company; Eston Pioneer, $800, Wood, Gundy and Company

School Districts.—Gallivan, No. 3857, $3,000, Canada Landed and National Investment Company, Winnipeg; Beaver Valley, No. 3804, $1,000, Waterman-Waterbury Manufacturing Company, Regina.

Towns.—Kamsack, $10,700, Goldman and Company, Regina.

Burlington, Ont.—For an issue of $30,000 by the town of Burlington, 6 per cents., payable in thirty instalments, R. C. Matthews and Company were the highest bidders, at 103.25. At this price the money will cost the town about 5.70 per cent. The following is a list of tenders:—

R. C. Matthews and Company	$30,975.00
Canada Bond Corporation	30,789.00
A. E. Ames and Company	30,770.00
Wood, Gundy and Company	30,681.00

FEBRUARY BOND SALES

Issues Sold Total More than in January—Two Large Industrial Issues Placed

The following is a summary of bond financing in Canada in the month of February:—

Provincial	$ 1,400,000
Municipal	5,946,569
Corporation	10,300,000
Total	$17,696,569

The figure for January was $23,960,587. Details of the February sales are given below, although it is as yet too early to specify exactly what proportion of each issue was sold outside of Canada.

Two or three large corporation issues have been absorbed with considerable ease during the past few weeks. In addition to the two mentioned in February, there is also that of the Riordon Pulp and Paper Co. to the amount of over $4,000,000, which has been oversubscribed, according to an announcement just made by the Royal Securities Corporation, who headed the underwriting syndicate.

BRITISH COLUMBIA BOND ISSUE

The Dominion Securities Corporation and Messrs. Wood, Gundy and Co., working in co-operation, were the successful tenderers for the issue of $3,000,000 of British Columbia bonds. The bonds bear 5½ per cent. interest and mature in twenty years. The purchasers' price was 99.32, at which the yield will be 5.57.

This issue of government bonds is one of the largest and most important of the season. The bonds are payable as to principal and interest in Victoria, Toronto, Montreal and New York. It is understood that the greater portion of the issue will be offered for sale in Canada. Owing to the preoccupation of United States bond houses with the forthcoming Victory Loan across the border, interest in Canadian securities is not at present as great is it was a few weeks ago.

The following is a list of tenders:—

Dominion Securities Corporation and Wood, Gundy and Co.	99.32
A. E. Ames and Co.	99.29
C. H. Burgess and Co.	98.82
W. A. Mackenzie and Co. and Brent, Noxon and Co.	98.82
Oxford Securities Corporation	98.75
G. A. Stimson and Co. (for $1,000,000 only)	98.53
R. C. Matthews and Co., Canada Bond Corporation, A. Jarvis and Co. and Hanson Bros.	97.40

Messrs. G. A. Stimson and Co. bid 98.53 for $1,000,000, with option on balance. The Oxford Securities tender was not complete.
